TO...

**those who have perceived the true essence of things
and seen the farthest boundaries before the beginnings ;**

TO...

those who have dissolved the Self in the love of THEE ;

TO...

**those who are passing through on way to the other side ;
those who embark on this earthly journey, carrying only
the language of their hearts .**

ACKNOWLEDGEMENTS

There are a number of people who have helped me get to where I am. Without them, I could not have made it this far. It is with great pleasure that I am able to thank them here.

First and foremost, my deepest and most sincere gratitude goes to my supervisor, Asst. Prof. Baida' Faisal Noori (PhD), who spared neither efforts nor time to offer her valuable guidance, critical insights, and insightful comments and suggestions.

I would also like to thank my PhD Programme teachers, especially Prof. Nidham Sheet (PhD), Prof. Lubna Riyadh (PhD), Asst. Prof. Sundus Muhsin (PhD) and Asst. Prof. Sarab Khalil (PhD), for their limitless generous support. They set excellent examples to follow and believe in. I am very grateful to them.

My deep thanks extend to Prof. John Lachlan Mackenzie at VU University of Amsterdam, to Prof. Maite Taboada at Simon Fraser University, and to Asst. Prof. Rasha Diab at the University of Texas at Austin, for their most kind cooperation and support with references and guidance.

My PhD Programme colleagues (Ahmed Qadoury Abed, Khalid Shamki, Rasim Taiyh Jahjoh, Samir Al-Sheikh, Hadeel Kamil Ali, Inaam Tahir, Israa Talib Saad, Kholud Ibrahim) deserve my sincere gratitude. They are more than colleagues: they are brothers and sisters to me. Their valuable support, encouragement, and help are never forgotten.

My heart-felt thanks and appreciation are due to the staff members of the Department of English Language, College of Arts, University of Kufa for their constant support and open-ended cooperation. Thank you from the very deep core of my heart.

My words stand mute for giving the thanks and sincere gratitude my family deserve. They sacrificed a lot in order to offer me all possible help, care, peace, and spiritual and material support. They gave me what is impossible for me to give back. May Allah bless you one by one, up, down, and sideways.

ABSTRACT

The distinctiveness of religious discourse is the result of religiously-based social and textual practices which let different participants interact with experiences in order to respond to some of the critical questions they face, such as: How can we talk and interact with invisible interlocutors? In what manners must we talk and interact with invisible interlocutors? How can we make them respond? How should we describe them, tell about them?

To answer these questions, selecting form among the wide scope of linguistic possibilities seems inevitably characteristic of religious practices. At some other times, these religious practices may suspend or even change certain aspects of the common way of using language in speaking or writing. Addressing invisible interlocutors may require clarifying unambiguously the participants, the nature, and purpose of the act of speech.

Studying religious texts can take a great advantage of the progress in the theories and activities of linguistics. One of the possibilities of doing this is analysing the rhetorical organisation of these texts, which is the task of this study. The present study is a rhetorical discourse analysis of some selected texts from two different cultures: Biblical, represented by Psalms and Islamic, represented by AŞ-Şaḥīfatus Sajjādīyah. The study aims to present a functional plausible in-depth account of rhetoric in religious discourse through a correlation of holistic generic structure and linguistic structures brought into work under one theory of rhetorical discourse analysis which is called 'Rhetorical Structure Theory'. In particular, the study aims to analyse some selected religious longer texts, examine the generic structure, investigate the intrasentential and intersentential relations and realisation, identify the patterns and hierarchy of rhetorical relations, and unmask the linkage and signalling of rhetorical relations.

Accordingly, five hypotheses are set up to fulfil these aims: 1. the suggested composite of both the generic structure and linguistic structures is greatly successful and practical in analysing religious longer texts; 2. the default structures for the selected texts are non-identical to and distinct from their actual realisations

and their structure potentials; 2. intrasentential EDU relations and their realisations dominate over intersentential EDU relations and realisations in the selected texts; 3. much attention is paid to semantic rhetorical relations at the expense of pragmatic ones; and 4. the density of more information, less salience, and higher explicit downgrading greatly dominate the selected texts, hence they are difficult to understand. Based on qualitative and quantitative procedures, a data of twelve texts gathered from two complementary sub-genres: petitionary praise (i.e., lament) and declarative praise (i.e., thanksgiving) are analysed according to a selected framework of two components: Hasan' Generic Structure (1989) and Gylling's Linguistic Structures (2013).

The main findings of the present study are the following: 1. The composite of the generic structure and linguistic structure is successful in analysing religious longer texts; 2. the default structures of the selected texts are first non-identical and distinct from each other as which elements are included or excluded and which exist or do not exist, and second from both the actual realisations and the structure potentials; 3. too much focus is on the intrasentential EDU relations, whether subordinate or coordinate. In addition, realisation proves workable in conjunction with dependency relations; 4. semantic rhetorical relations are clearly and plausibly noticed in all texts; and 5. more information, less salience, and higher explicit downgrading greatly dominate the selected texts, yet they are not difficult to understand. The study has ended up with some concluding points that pertain to the selected texts under analysis. It has also presented some recommendations and suggestions for future researches.

CHAPTER ONE

INTRODUCTION

1.1 The Problem

Rhetoric governs generally any effective use of (non)verbal communication in order to influence audience. Those human activities which are, explicitly or implicitly, in the quest of influencing others involve, by definition, rhetoric in the broader sense, hence, a multiplicity of 'rhetorics' exists (Carron, in Horowitz, 2005, vol.5: 2122). Rhetoric is concerned with a psychologically and emotionally effective, for instance, religious discourse. It is a talent in the sense that "... *the communicator penetrates the hearts and minds of his or her addressees...*", and a linguistic skill in that it produces "*either a succinct text with clarity and informativity, or a long text without verbosity*" (Abdul-Raof, 2006:91).

Linguistics is undeniably relevant to understanding religious texts through the application of theories and activities of linguistics to them. In other words, texts like these are written, transmitted, and received in language which is the domain of linguistics. This can be done by, among others, analysing the rhetorical organisation of those texts.

The present study is a rhetorical discourse analysis of highly-rhetorical sacred texts that:

1. need to be described from a rhetorical viewpoint;
2. have a complex interpretative structure that needs to be unravelled;
3. are characterised by a great variety of rhetorical relations (henceforth Rhe Rs); and
4. contain both literal and metaphorical passages.

The selected two groups of texts belong to two different cultures, Biblical and Islamic. The first group contains six psalms (henceforth PSs) from the Old Testament, which have a significant position for Jews and

Christians. The second group is a set of six texts from AŞ-Şahīfatus Sajjādīyah, the oldest manual of spiritual ethics, addressing different issues that approach nearness to God. The texts under each group belong to two complementary religion sub-genres: petitionary praise, also called lament, and declarative praise, also called thanksgiving.

The study is in the direction of presenting a functional plausible in-depth account of rhetoric in religious discourse to add to the growing literature in this respect and to present a significant feedback to rhetorical discourse analysis, and to fill in the gaps in the linguistic theory of rhetorical discourse. It tries to answer the following questions: How are these sublime texts functionally and plausibly described? What are their generic and linguistic structures? How can these structures work and intermingle without confusion?

This is done through a correlation of holistic generic structure and linguistic structures brought together into work under one linguistic theory of rhetorical discourse which is called 'Rhetorical Structure Theory' (henceforth RST).

To the best knowledge of the researcher, no comprehensive, similar or different, attempt has been made to understand the rhetorical mechanism of organisation of such texts in the light of this correlation. Therefore, the gap in the concerned literature will be hopefully filled with the current study.

1.2 Aims

The aims of the present study are:

1. analysing functionally and plausibly the selected religious longer texts;
2. examining the actual generic structure (henceforth AGS) and the generic structure potential (henceforth GSP) of the twelve texts: the PSs and Şahīfa texts;

3. investigating the intrasentential and intersentential relations, and their realisations, in the elementary discourse units (henceforth EDUs) of these texts;
4. identifying the pattern or patterns of Rhe Rs, and their rhetorical hierarchies in these texts; and
5. uncovering the linkage of EDUs and explicit and implicit signalling of Rhe Rs.

1.3 Hypotheses

Five hypotheses are set up for the current study:

1. the suggested composite of both the generic structure and linguistic structures is greatly successful and practical in analysing religious longer texts;
2. the default structures for the selected texts are non-identical to and distinct from their AGS and GSP;
3. intrasentential EDU relations, whether subordinate or coordinate, and their realisations dominate over intersentential EDU relations in the selected texts;
4. because the selected texts are heavily loaded with situations differently shaped to meet their intentions, much attention is paid to Rhe Rs whose coherence source (henceforth CS) is semantic (henceforth SM), at the expense of pragmatic (henceforth PR) Rhe Rs; and
5. the density of more information, less salience, and higher explicit downgrading greatly dominate the selected texts, hence they are difficult to understand.

1.4 Procedures

In order to verify the hypotheses in the present study, the following procedures will be followed:

1. presenting a critical survey of the philosophy of genre, rhetoric and its relation to RST, and religious discourse language with reference to the selected texts;
2. establishing a justifiable dialogue between RST and the two classificatory structures: holistic generic structure and linguistic structures, for the sake of a detailed analytical framework of analysis;
3. identifying the steps of analysis to carry out the rhetorical analysis;
4. analysing and discussing the nominated texts in the light of the adopted framework; and
5. drawing the relevant conclusions to test the validity of the hypotheses of the present study.

1.5 Limits

The following are the limits of the present study:

1. The study is limited to the analysis of the rhetorical organisation of particular texts from two religion sub-genres: petitionary praise (lament), and declarative praise (thanksgiving);
2. The study is also limited to six PSs, three from each sub-genre, and six Ṣaḥīfa texts, three from each sub-genre;
3. The selected framework of analysis is restricted to two components, to work under RST: generic structure by Hasan (in Halliday & Hasan, 1989), and the linguistic structures developed by Gylling (2013);
4. In addition, some language-specific principles are also taken into account, such as 'segmentation principles' of EDUs in Arabic.

1.6 The Value of the Study

It is expected that the present study will be of value to those academics and scholars who want to understand how religious texts generically work, what mechanism they adopt, and how they are rhetorically

organised. The study can be valuable to rhetoricians working on getting an in-depth account of rhetoric and rhetorical organisation in highly rhetorical longer texts. The analyses that the study presents can be also valuable to the RST specialists since such analyses respond seriously to the calls of augmentation and gap-filling of RST within the domain of functionally-oriented theories of discourse. It is also likely that the study will methodologically contribute to the growing literature on rhetoric by combining analysis methods from several fields.

1.7 Definitions of Terminology

Some of the working definitions in the study are:

1. Downgrading versus Upgrading: Downgrading strategy is the process whereby the satellites (henceforth Ss) of a given sentence are structured as subordinate EDUs of various types. These Ss are integrated in their nucleus (henceforth N) EDUs and are dependent on them. That also cognitively means they play a rather less salient role in the discourse structure of the sentence. In upgrading strategy, on the contrary, these S EDUs are not always restricted to subordinate clauses, but they are textualised as independent sentences. Some sentences may introduce the main N and others may act as carriers of different Rhe Rs (Gylling, 2013:166ff).

2. EDUs and EDU relations: is a term employed by Gylling to refer to the 'minimal building blocks' of the discourse structure of a text. They are able to distinguish the various relations that exist through linguistic structures in a given text. EDU relations can be either intrasentential (i.e., inside the same sentence) or intersentential (i.e., across sentence boundaries) (ibid.:72,122).

3. Generic Structure: According to Hasan (in Halliday & Hasan, 1989:99ff, 108) genre is a structurally determining characteristic of texts. A particular text belongs to a genre because of its structural features, that is, its staging. Based on that, a genre has AGSs which later constitute its GSP.

4. Linguistic Structures: Three linguistic structures are known in this study, following Gylling (2013:15f): 1.text structure which includes dependency (syntactic coordination versus subordination of EDUs), and realisation (finite versus non-finite realisation of EDUs); 2.discourse structure which includes hierarchy (rhetorical coordination versus subordination of EDUs), and CS (SM versus PR Rhe Rs); and 3.information structure which includes linkage (intersentential versus intrasentential juxtaposition of EDUs), and signal (implicit versus explicit marking of Rhe Rs).

5. Rhe Rs: A Rhe R is the result of clearly established, non-overlapping, connection between at least two spans of text. These Rhe Rs and their hierarchical structure help recognise coherence in discourse. It is usual to have/find an intention behind expressing the relations, but intentions themselves do not define relations (Taboada & Mann, 2006b:432).

CHAPTER TWO

A GENERAL PERSPECTIVE

This chapter establishes a link with the other chapters that disclose the research questions associated with the label 'Rhetorical Organisation'. To that end, this chapter addresses the following issues: genres of language use, 'Rhetoric' through discourse¹, RST and religious discourse and its link with RST and/or other approaches.

2.1 Genre

Originally the word 'genre' comes from the French word for 'kind' or 'class'. It is developed into a term widely used in rhetoric, literary theory, media theory, and linguistics "...to refer to a distinctive type of text" ² (Chandler,1997:1). Genre study principally divides the world literature into types and names those types (ibid.).

There were general types under which literary works have been classified. The broadest division in literature is between poetry, prose, and drama with further subdivisions of drama into comedy and tragedy. Though there are countless genres in various media, rhetoric, literature and linguistics, there are also many genres and subdivisions which are not classified or even named. This suggests that the number and variety of genres in any society is complex much as the society is complex and widely varied. Chandler (ibid.:1f) believes that the classification and taxonomy is not always undisputable, neutral, or even objective. This is a widened gap particularly if other factors are taken into account: the availability of many media, the considerable theoretical disagreement about defining specific genres, the concept of 'themes' of genres, extension (the breadth or narrowness of labels), normativism (having perceived ideas of criteria for genre membership), monolithic definitions, etc. Language is neither 'a monolithic entity' nor 'a unified phenomenon' (Verschueren,1999:49). This simply refers to the idea that there are several distinctions to be drawn between the many different manifestations of language in use.

It is a widely accepted assumption that no universally recognised definition of 'genre' exists in the available literature of linguistics. Many scholars have clearly tried to come up with one such definition "...*making genre theory a theoretical minefield where different definitions of and viewpoints on genre abound*" (Tianinen,2012:6). Most definitions of genre connect with Mikhail Bakhtin's theory of 'speech genres'. Human activity, according to this theory, and hence every sphere of communication essentially links with a variety of utterance types "...*which are relatively stable in terms of thematic content, linguistic style, and compositional structure*" (Verschueren,1999:49). For Bakhtin, language is realised through individual concrete utterances by participants in the various areas of human activity (Bakhtin,1986:60, in Taboada,2011:248).

Out of the huge literature written about genre and its defining and characterising, three schools or traditions of genre analysis are selected for review because they:

- focus on communication as an activity realised through texts in social contexts;
- emphasise culture in relation to genre where text users engage in a purposeful activity as members of their culture; and
- believe in communicative or social purpose which is an influential contextual factor able to describe the way the interaction's general purpose leads to organise a text functionally.

These three schools or traditions are:

1. 'New Rhetoric' School.
2. Register and Genre Theory influenced by Hallidayan Systemic Functional Linguistics (henceforth SFL).
3. English for Specific Purposes (henceforth ESP).

2.1.1 New Rhetoric School

A leading figure in 'New Rhetoric' is Bazerman in his *Shaping Written Knowledge* (1988). He examines the relations between scientific activity and scientific communications as a lens on the nature of rhetoric itself.

Bazerman is neither engaged in critique nor is he trying to hold up physics, for instance, as a paradigm or an ideal for other disciplines. Instead, he examined works such as the early *Philosophical Transactions* and Newton's optical writings as well as *Physical Review*. He views the changing forms of scientific writing as solutions to rhetorical problems faced by scientists. He demonstrates that the rhetoric of science is an embedded part of scientific activity, including social structure and empirical experience (ibid.: 3-8,16-17).

In his recent book entitled *A Rhetoric of Literate Action: Literate Action*, Bazerman offers a new approach to understanding different situations of writing and creatively responding to these situations in deep and transformative ways (2013,vol.1:4). His efforts in this work can be grouped into three stages:

- providing a framework for identifying and understanding the situations which writing comes out of and is directed toward. It handles issues like 'rhetoric of speaking and writing', 'origins of rhetoric', 'genres', 'how to recognize and realise genres in personal and public histories and genres for reading and writing', 'texts and genres used', 'intertextuality', 'notions of context', 'intertext as a theatre of action', etc.
- showing how a text works to transform a situation and achieve the writer's (henceforth W(s)) motives as the text begins to take form. The topics studied are 'creating and influencing the situation in place and time', 'social facts and speech acts', 'face-to-face situations', 'typified motives, situations, and forms of action', 'text strategies', 'forms of genres and the process of forming meaning'.
- a. providing more specific advice of and recommendations for the work to be accomplished in shaping the text in its final form, and
 b. showing how to manage the work and one's emotions and energies in order to accomplish the work effectively. This stage studies matters like 'meaning and their representations', 'organisation of the text', 'cohesion', 'coherence in reasoning and

representation', 'style and revision', 'managing writing processes and the emergent text (ibid.).

Genres for Bazerman (2013) are recognised with the domain of communications. Communications *"...flow within systems in typical pathways, at typical moments, in typical forms, to enact typical intentions, carrying out familiar acts"* (ibid.:29). Genres then are those typical actions that carry out stabilised familiar intentions with textual forms that are recognisable. Genres are: (1) categories of textual, social-interaction, and cognitive-recognition; and (2) shaping of motive and thought.

Text users start categorising a text to be belonging to a specific genre on the basis of certain textual features. That is, text users *"...start to frame personal meaningfulness ...personal purposes and interactions"*. To help identify what the text is about and what kind of attention is to be given to it, text users activate their social knowledge and thought with what they find in the text. Therefore, they build their own meanings once they enter into a social space of interaction that is mentally directed (ibid.).

In their *Genre and the New Rhetoric* (1994), Freedman & Medway mix 'ground-breaking articles' in the field of literacy/illiteracy with new and recent pieces relating literacy/illiteracy to power. The result of such mixture, as described by the series editor in the preface to their book, is *"...an excellent primer on current American and Canadian debates over genre and pedagogy that pushes beyond formalist and individualist approaches to writing"* (Freedman & Medway, 1994:vii). Freedman & Medway seem to look at culture, being related to genre, as given and free of any conflict. They also assume that

Speech communities, contexts of situation, socio-rhetorical networks ... are consensual social bodies, where ... discourse norms, common goals, motive strategies and private intentions occur naturally and problematically (ibid.:vi).

The book presents a mutual reflexivity between text and context, between genre and culture, and between writing and subjectivity. It moves to a focus on textual description, whether rhetorical or cognitive. The texts described range from legal to workplace and institutional 'speech acts of power': sanctioning, authorising, positioning, and controlling. The 'new rhetoric' displayed by the authors is a new rhetoric that is tied to power as an analytic tool for classifying several types of knowledge, action, and their consequences.

2.1.2 SFL's Register and Genre Theory

Research with SFL has provided deep interesting insights through its establishing a link between the social and communicative purposes of text with their textual structuring. Generic analysis within this school was originally applied to written genres with the work of Martin & Rothery (1986). Yet, it extended to spoken genres, including spontaneous informal conversation represented in the works of Horvath & Eggins (1995), Eggins & Martin (1997), and Eggins & Slade (1997).

Within this tradition, the relationship between context and text is portrayed as being a relationship between human activity and language. This specific idea of the operation of language within a definite context of situation is referred to as 'register'. In discussing Halliday's approach to register, Martin (1992:492) notes that *"the socio-semantic organisation of context has to be considered from a number of angles if it is to give a comprehensive account of the ways in which meanings configure texts"*. Such different angles from which register is analysed are the three Hallidayan elements that realise context: field, tenor, and mode of discourse (Halliday, in Halliday & Hasan, 1989:12). 'Field' designates what is going on; the area of operation of the language activity. It refers to the inherent features of the situation and the social action that is taking place. 'Tenor' refers to the participants taking part in the event or social action, their nature, their status and roles and the relations among them, to the extent that they affect and determine features of language. 'Mode' of

discourse studies the function or functions of text in the event or social action. In this category, Halliday includes

...the symbolic organisation of the text, the status it has, and its function in the context, including the channel (is it spoken or written or some combination of the two?) and also the rhetorical mode, what is being achieved by the text in terms of such categories as persuasive, expository, didactic, and the like (ibid.).

These elements are to be realised through three metafunctions of language: field, tenor, and mode are realised through ideational, interpersonal, and textual metafunctions respectively (Halliday,1994:35,179,190).

Each one of these semiotic variables (field, tenor, and mode), Halliday proposes, is related to a definite component of the semantic stratum, and then to the systems of the lexico-grammatical features of a text (see sec. 3.1.1). A 'register', therefore, is a semantic phenomenon in the sense that it *"is the clustering of semantic features according to situation type"* (Halliday,1978:68). The semantic stratum, for Halliday, is the juncture of language with the eco-social environment. At this interface, register is *"the necessary mediating concept that enables us to establish the continuity between a text and its sociosemiotic environment"* (Halliday,2002, in Webster,2002:75).

In summary, register represents aspects of language that are defined by the context of situation-what is taking place, who is taking part, and what part the language is playing-along with the words and structures used to realise those meanings. It does not account for the link between language and the context of culture within which a text occurs.

Genre, instead, involves the context of culture. This is evident in the definition of Martin (1984:25) who believes that 'genre' is *"a staged, goal-oriented, purposeful activity in which speakers engage as members of our culture"*. The main focus for functional linguists is that language is related to context. Such relation between language and context is one of 'realisation' where the text realises the situation and the linguistic system realises the culture. In other words, the culture is constructed by the

systems of linguistic choice speakers engage in, while the situation is constructed by patterns of language use (Figueiredo,2010:127).A similar characterisation of genre is later proposed by Eggins & Martin (1997:36). When analysing the context of culture, i.e. genre, analysts should try to describe how the interaction's general purpose leads to organise a text in stages, since it is impossible to convey all the meanings simultaneously. A genre, thus, is structured in stages, as Martin proposes (1992:505), and consists of a social process oriented towards a goal, therefore, organised and realised by the register.

2.1.3 ESP Tradition

The third school of genre and its approach is clear in the works of Swales and/or Swales and Bhatia. In their proposal, genre is also a social phenomenon. This is evident in their analysis of academic genres; research articles in particular (Swales,1981,1990,2002,2004). It is also present in the analysis of science dissertations (Dudley-Evans,1986, Dudley-Evans 1989; Hopkins & Dudley-Evans,1988); medical texts (Nwogu,1991); job applications, sales promotion letters, and legal case studies (Bhatia,1993); grant proposal (Connor & Mauranen,1999); introductions to university lectures (Thompson,1994); and lecture and poster sessions at conferences (Shalom,1993).

Many researches and theorists in the field of ESP regard Swales' work (1990) as carrying a detailed conception of a social genre construct which he describes as "*...a class of communicative events, the members of which share the same communicative purpose*" (ibid.:40,45-58). Communicative purpose acts as the privileged criterion for identifying the different types of genre. This idea sounds logical for Bhatia (1993) who believes that "*...Of all of the contextualized factors associated with a conventionalized speech event, communicative purpose is the most privileged criterion for the identification of genres*" (ibid.:43).

Both Swales (1990) and Bhatia (1993) place emphasis on the social purpose and its central role, like those who are within SFL and Martin (1984) in particular. Yet, the perspective of Swales and Bhatia is to assign

purposes to genres or the communicative events and not to individual speakers engaging in "*a staged, goal-oriented, purposeful activity...*" as it is in Martin's conception.

The position that this study takes is to adopt the definition of genre which sees it as a structurally determining characteristic of texts. A given text is to be regarded as belonging to a genre because of its structural features, that is, its staging. This means that certain texts are developed in a definite series of stages. The appropriate staging for a given text is the result of the text functioning in a certain situation. Each of these stages in a genre tends to have its own linguistic structures or lexico-grammatical characteristics in the SFL perspective.

2.2 Rhetoric

The factor of extension which refers to the breadth and narrowness of labels comes into play here in this section. 'Rhetoric' as being a polysemic word stretches fast and deep. 'Rhetoric' systematically analyses human discourse to identify useful percepts for further discourse. Its main fields are the human thought and expression and as such it is correlated and linked with psychology, philosophy, private and public ethics, education, argumentation, etc. (Murphy,2006, in Mey,2009:864ff).

2.2.1 Rhetoric: Origin, Development and Revival of Interest

In ancient times, 'rhetoric' originated in those specific settings of the ancient Greek civilisation. All other subsequent schools and traditions in rhetoric have either derived from this source or adopted it in complete. (Lotman,2006, in Mey,2009:868). Ancient cultures at that time have not developed to the existence of the classical rhetoric and rhetorical matters which are distributed among grammar, stylistics, poetics and logic (ibid.).

Classical rhetoric(s) meant the teachings for the skills of eloquent speech and oratory for aesthetic and poetical goals. Aesthetically and poetically, the most beautiful speech was, for classical idealists, likely the most persuasive. For the sophists, a pragmatically good rhetor should be equipped with and acquainted with a solid repertoire of skills in persuasive speech so that he can win any argument, without any concern

whatsoever for questions of truth and beauty. These two connotations made rhetoric earn positive and negative attitudes (Mailloux,1995:14ff).

'Rhetoric' stood differently from 'dialectics' since it was the art of monological speech while the latter was the art of dialogue. 'Rhetoric' also opposed 'logic' as an art of expressing one's thoughts against the act of thinking and proving (Lotman,2006, in Mey,2009:869). Classical rhetoric(s) consisted of five major categories or 'canons':

1. invention (heuresis, inventio): finding something to say.
2. arrangements (taxis or dispositio): ordering speech or writing or even discourse in the broader large scale.
3. style (lexis, elocution): the fitting of the proper language to the invented matter. It is the artful expression of ideas and it addresses how something will be said or embodied in language.
4. memory (mneme, memoria): the mental grasp of matters and words with the help of mnemonics, 'memory aids', which store up common places or other material, for instance, arrived at through 'invention' and call them for in a given situation or occasion.
5. delivery (hypokrisis, pronuntiatio): the control of voice and body in a suitable manner.

These major canons formed a logical whole sequenced together to mark "*an ideal succession of rhetoric activities that corresponded to the rhetorical ideal...*" (ibid.). They are also called "... [the] [square brackets in the origin] *common body of rhetorical doctrine...*" (Murphy,2006, in Mey,2009:864f).

At the era of two Roman empires, some of these categories lost their significance. Public speech, for instance, gave up its social role in seeking and expressing truth. Accordingly, the relevance of the first and the second canons greatly diminished. The spread of the written word at the expenses of the spoken one lessened the dependence on and flourish of the fifth canon. Only the third canon 'style' had increased its significance (Lotman,2006, in Mey,2009:869).

Medieval rhetoric distinguished two fields only:

1. speculative rhetorics which focused on the classification and taxonomy of figures and tropes; and
2. practical oratory relevant in sermons; it formed the sphere of homiletics.

Three rhetorical treatises were known in medieval rhetoric each formed a separate rhetoric genre (Murphy,2006, in Mey,2009:863):

1. The art of letter writing (ars dictaminis)
2. The art of writing poetry (ars poetriae)
3. The art of preaching (ars praedicandi)

The present study, however, is not interested in any historical development of 'rhetoric' as much as it is interested in showing, in this specific part, the senses that this word acquires. The meanings connected with 'rhetorics' as a polysemic word fall into two major groups: in the first one, 'rhetorics' in the narrower and traditional sense is related to verbal texts; in the second one, 'rhetorics' in the universal and modern sense is linked with expressing any information whether verbal or a non-verbal.

Selzer (2004, in Bazerman & Prior,2004:279ff) believes that no generally accepted definition exist for 'rhetoric'. Scholars differ in determining its meaning(s) because they draw upon different ideas about their subject. To illustrate, 'rhetoric' to the general public would commonly denote speech or writing that is highly ornamental or deceptive or even manipulative. This is clear in such public's statements: *"That politician is just using a bunch of rhetoric"*, or *"the rhetoric of that advertisement is highly deceptive"* (ibid.).

The term 'rhetoric' is also common in other statements: *"Silent Spring is one of the most influential pieces of environmental rhetoric ever written"* (ibid.) to mean a synonym for speaking or writing in general or for any other kind of communication. Another aspect of the meaning of 'rhetoric' is when it is taken as an academic subject. 'Rhetoric' is associated with education: Aristotle, for instance, wrote an educational treatise 'On Rhetoric'. The term, in this aspect, is often associated with the means of producing effective discursive acts. Rhetoric textbooks are

usually advice manuals for how to produce effective or persuasive pieces of communication. In recent years 'rhetoric' has also an interpretive function; i.e., as a way of understanding communication.

In short, rhetoric can be understood as both a productive and interpretive enterprise: *"the study of language—and the study of how to use it"*. Due to that new wave, 'rhetoric' has been taken up as persuasion but without its pejorative connotations (see sec. 2.2.3). Revival of interest in rhetoric and rediscovering it has been extended to mean:

1. a means of improving efficiency in verbal presentation (Booth, 2004:12,17, 23);
2. an analytical and a descriptive tool used to uncover certain aspects of discourse (ibid.); and
3. in addition, several important issues arise when thinking seriously about rhetoric and its various uses in modern times. Among these are : power in society, facts and truth relevant to decision making, moral and ethical questions, potential influence on an audience, the development and maintenance of societies, etc. (Herrick, 2013:21).

In linguistics, in particular, the notion of 'rhetoric' has developed side by side with the shift of interest to the use of language beyond sentence level. It has been mainly associated with the patterning of text presented in the approach of contrastive rhetoric of Kaplan (1966, 1972, 1987) and in the works of Mann & Thompson (1987, 1988).

This study is concerned not with rhetoric as a set of rhetorical devices or techniques but with 'rhetoric' as an aspect of verbal behaviour. The next section will present the linguistic approaches to rhetoric in order to position the domain of the study within the appropriate approach.

2.2.2 Descriptive Linguistic Approaches to Rhetoric

Two prominent descriptive linguistic approaches are discussed below. Each believes that linguistically oriented rhetoric is associated with text organisation beyond the sentence level.

2.2.2.1 Contrastive Rhetoric

Contrastive rhetoric examines the differences and similarities in writing cross-culturally; in particular, differences and similarities in rhetorical patterns across cultures. Connor (1996:5) defines this field as: "*an area of research in second language acquisition that identifies problems in composition encountered by second language writers and, by referring to rhetorical strategies of the first language , attempts to explain them*". Contrastive rhetoric began with the publication of an influential article of Kaplan (1966) entitled *Cultural Thoughts Patterns in Inter-Cultural Education*. The basic assumption of Kaplan is that rhetorical strategies of each language are unique to each language and culture (Kaplan,1966:10). This assumes that the writing of second-language Ws is inefficient and problematic from the perspective of native readers (henceforth R(s)) of the target language. In other words, when such rhetorical strategies which are in native culture do not match audience or Rs expectations in the target culture, the newly produced writing fails to logically convey the message to the intended audience or Rs. The reason behind this failure, for Kaplan, is that the rhetorical structure and the logic upon which it is based is culturally bound (ibid.:2).

This assumption insinuates to certain underlying ideas taken from the theory of linguistic relativity which came under strong attack and was almost proven void. The theory is also called the Sapir-Whorf Hypothesis of linguistics relativity. This hypothesis has two versions: a strong and a weak one. The strong version stipulates that language controls thoughts and perceptions of reality; and thus, different languages dictate thoughts in different ways and directions. The weaker version, however, suggests that language merely influences thought rather controlling it. Many scholars have found this weak version hard to prove (Kay & Kempton, 1984:66; Wolf & Holmes, 2011:253ff).

Some new directions have taken in contrastive rhetoric making it more inclusive than early works. Connor (1996:10) summarised the mono- and bi-directional influence of various theories on contrastive rhetoric. These theories are given in the table below:

Table (2.1): Influence of Various Theories on Contrastive Rhetoric

No	Domain	Theory
1	First language pattern transfer to second language	Theory of Applied Linguistics
2	Patterns of language and writing are cultural-specific	Theory of Linguistic Relativity
3	Writing as communication and persuasion affected by audience	Theory of Rhetoric
4	Text and writing have systematic, analysable variation	Theory of Text Linguistics
5	Writing is task and situation based and results in discourse types	Theory of Discourse types and Genres
6	Activity of writing is embedded in culture	Theory of Literacy
7	Texts are translatable across cultures but may take different manifestation	Theory of Translation

2.2.2.2 Clause Relational Approach to Written Discourse

Two leading figures are known for their analysis of text patterning and organisation but with no explicit reference to rhetoric. Winter's and Hoey's earlier and later works can be grouped under 'Clause Relational Analysis' in so far as they study the overall architecture of text conventionally understood or known as 'Textual Rhetoric' (see Leech, 1983:15ff for more about 'textual rhetoric').

Established in 1970s, the clause relational approach concentrated on the description of what is directly observable in the text. This principle is reflected in Hoey's (1983) *On the Surface Discourse* which is in part a development of the analysis presented by Winter (1977). It is also seen in their later works: Hoey's (1994, in Coulthard, 1994) and Winter's (1994, in Coulthard, 1994).

The basic assumption which they work upon is not the sentence. It is the clause that is the base point of relevance in written discourse. As Winter (ibid.:47f) affirms, it is the clause that is linguistically relevant, significant, and highly structured; while the sentence is more or less a grammatical structure. If this approach is scrutinised deeply, one can

easily point to one of its most essential feature: the semantic relation between these clauses in a given written text is the minimum unit of an analysis (ibid.). A clause relation is a semantic one in the sense that it is established whenever one clause is understood in the light of the other. When such two clauses are making sense together, some type of clause relation would naturally result. Clause relations are binary ones where the presence of one member of the relation in the text necessitates that of the other member in the adjacent text. Consider what is stated above with the latest definition of Winter (ibid.:49):

A clause relation is the shared cognitive process whereby we interpret the meaning of a clause, in the light of their adjoining clauses or groups of clauses. When the clauses are independent, we speak of clause 'sentence relation.

This definition is compatible with Hoey's (1983:19), though it expands the cognitive aspect of the relation still further:

A clause is also the cognitive process whereby the choices we make from the grammar, lexis and intonation in the creation of a sentence or group of sentences made in the light of its adjoining sentence or group of sentences.

Winter (1994, in Coulthard,1994:55) refers to his (1977:5) in which he emphasises that relations between clauses are not random but are part of "...a mutually expected text structuring or linguistic consensus...". Therefore, a description of the basic text structuring in English is a description of its clauses relations. For Winter, however, there are two main kinds of clause relations (Winter,1994, in Coulthard,1994:50ff):

1. The basic text (or message) structures with types like (Situation and Evaluation), (Hypothetical and Real), and a combination of these two; and
2. The basic clause relations of 'Matching', 'Logical Sequence', and 'Multiple Mixed' relations. Matching relations occur when two parts of a text that are repetitive are compared to each other in terms of people, things, attributes, actions, states, description.

Logical sequencing *"...is concerned with representing selective changes in a time, space, continuum..."* (ibid.:52).

The clause relations presented by Winter go on to form text structures, which then form message structures which act as particular linguistic contexts for basic clause relations (ibid.:50).

Related to the issue of surface text structuring is the marking of clause relations by signalling devices. Hoey (1983:19ff) states that 'subordinators' and 'conjuncts' signal clause relations in a discourse. It is noted that the presence of 'relations' is not language-specific for Hoey. He further explains that when one clause or sentence or even a paragraph is signalled as being subordinated to another one, this indicates the presence of a relation involved between the two. Conjuncts and particles are frequently used to signal whether the relation is parallel or contrasting or expansion, etc.

The other two signalling devices are 'lexical signalling' and 'repetitions'. Lexical signalling refers to words that act as context specific signals. It may spell out a relation before, during, or after the event. (ibid.:23). Repetition is used as a signalling device since it is *"...a way of opening out a sentence so that its lexical uniqueness may be used as that basis for providing further, related information"* (ibid.:25).

2.2.3 Rhetoric as Persuasion Discourse

Persuasion is still one of the mysteries of rhetoric and/or other disciplines. Discourse, having persuasive power, is able to move minds and hearts and can transform situations and/or their actors (i.e., people) in different powerful forms and ways. A focus of rhetoric attention is to identify the underlying principles of persuasion (cf. sec. 2.2.1 above) (O'Keefe, 2006, in Sloan, 2006:595). Rhetoric in recent years is used not just as

...a means of producing effective communication, but also as a way of understanding communication. In short, rhetoric can be understood as both a productive and interpretive enterprise:

the study of language and the study of how to use it (Selzer,2004, in Bazerman & Prior,2004:280).

Therefore, it is logical to understand 'rhetoric' as involved in the study of 'persuasion'. Selzer (ibid.) states:

... 'persuasion' as used here must be persuasion very broadly defined, because recently the realm of rhetoric has come to include a great deal of territory-written and oral language used to persuade, to be sure, but also a great many other kinds of communications that have general designs on people's values and actions, attitudes and beliefs. Speeches and writing usually have such persuasive designs, and so rhetoricians attempt to understand how to produce effective acts of verbal and written persuasion.

What is interesting here is that a minimal triadic model of rhetoric as persuasive discourse needs to be fundamentally involved in three elements or concepts in persuasive communication:

1. The rhetor (persuader , speaker, W);
2. The audience (actual persuadee, hearers, and Rs, image of those persuadees, hearers, and Rs in the mind of an author or the presence of an audience within the text itself); and
3. The discourse as the medium of persuasion.

This orientation of rhetoric brings emphasis on two significant issues: (1) the task of rhetorical analysis; and (2) author's intentions (i.e., rhetor's intentions) and audience's interpretations (i.e., the three general ideas mentioned above). As far as the first issue is concerned, it is generally assumed that there is no undisputable definition of 'rhetorical analysis' probably because of the complexity of getting at a conventional lexicon definition of 'rhetoric'. Nevertheless, rhetorical analysis *"can be understood as an effort to understand how people within specific social situations attempt to influence others through language"* (ibid.:281). This analysis can be strategically constructed through verbal and non-verbal symbols. That is, symbols of various types are used in rhetorical messages responding to rhetorical analysis. Rhetoric aims, through

rhetorical analysis, to shape the way people think, act, believe, and feel. This is, however, to suggest that enterprises like (religion or education, for instance) rely on rhetoric to accomplish their ends (Stoner & Perkins,2005:5).

Selzer (2004, in Bazerman & Prior,2004:281) distinguishes two types of analyses in the sense of readings: the first is the normal (i.e., 'uncritical' or 'reactive') reading which revolves around experiencing a text and then reacting or not reacting to it. The second reading is called a 'critical' reading in terms of which rhetorical analysis is to be measured. Critical reading - rhetorical analysis - involves the careful investigation and analysis of some kind of symbolic action, regardless of whether or not it is directed towards a particular audience, in order to understand it better and appreciate its strategies. This second reading which is domain of rhetorical analysis increases the awareness of the message under rhetorical consideration and heightens the appreciation for the way people exploit or manipulate language and other symbols for persuasive purposes.

The issue of 'rhetor's intentions and audience's interpretations' is significant in rhetoric. Messages are created to address particular audience (Stoner & Perkins,2005:3). One clear possibility for this issue is to admit the existence of persuasive effect which comes as a result of the relationship of rhetor's intentions with audience's interpretations. Bruce (1980:309, in Tierney et al.,1983:2) states that *"Texts are written by authors who expect meaning-making on the part of readers and read by readers who do the meaning making"*. It is a mutual relationship where one of its ends is Ws who produce their texts and at the same time they consider their Rs and the rhetorical act they engage in. On the other end, Rs, as being audiences, comprehend text and respond to the Ws and what they are trying to get them do. Rs also respond to what they themselves need to do.

This link draws upon the notion that products of writing and reading are regarded as 'situated accomplishments' (Cook,1973, in Bernstein,2005,vol.2:283). The interactions between Ws and Rs become

environments for each other. Tierney et al. (1983:6), quoting Fillmore (1974:4), believe that what enables the message to be interpreted is an understanding of what the W is doing. Rs resort to linking actions done by Ws with their goals and intentions (i.e., the Ws' purposes). The failure to understand the goals and intentions of Ws is in itself a failure to link Ws' actions with their purposes (ibid.:7).

Therefore, it is more appropriate to call such rhetoric that fails to persuade unsuccessful rhetoric. On the contrary, rhetoric which attends to Rs' understanding of the goals and intentions of Ws and hence the desired effect they wish can be called effective successful rhetoric. The position to be adopted in this study is that persuasive intentions are likely typical and ideal elements of persuasive discourse.

2.3 Reviewing RST

This section attempts to review the major theory that the present research is based on. That is, it aims to be representative, rather than exhaustive, for some repeatedly-mentioned theoretical aspects of a significant theory of text organisation, namely 'RST'.

2.3.1 The Origins of RST

RST³ was developed originally during the mid-to-late 1980s at the Information Science Institute of the University of Southern California by a group of researchers interested in 'natural language generation'. The leading figures were William Man, Christian Matthiessen and Sandra Thompson. They were supported with inputs from Cecilia Ford, Barbara Fox and Peter Fries (Taboada & Mann, 2006b:425). The interests of RST first formulated were "...seeking a model of textual coherence sufficiently explicit to drive automatic text production..." and "...researching the text signalled of discourse relations" (Bateman & Delin, 2006, in Mey, 2009:875).

Starting with the intention of uncovering how written text functions, the theory observed that certain textual sequences may carry additional relations or assertions which arise from and above the explicit textual

material sequences served in the text itself (Mann & Thompson,1983:1f). These assertions were first catalogued by Mann & Thompson for the purpose of understanding how texts 'mean' in addition to the propositional content represented by individual 'independent clauses' in a text. These 'implicit assertions' in discourse are vital for the speaker and R communicating with each other: the speaker as the source of textual material sequenced together relies on the R who uncovers such assertions in order for him to understand the message.

The kind of relationships that result from the implicit assertions can hold at any level in the text not necessarily individual-sentence restricted. It is to be noticed that RST relates "...*the rhetorical intent of the discourse portions over which the rhetorical relations hold...*". The rhetorical intent does not only correspond to individual sentences, but to units smaller than sentences, and to larger units in more extensive segments of a text (Bateman & Delin,2006, in Mey,2009:875).

2.3.2 RST: A Brief Introduction

The structure of RST is needed to have a somewhat refined definition of its terminology and mechanism.

2.3.2.1 Relations, Schemas and Structures

Mann & Thompson (1988:245ff) define four basic elements of RST regardless of particular languages and text types. They are: (1) relations, (2) schemas, (3) schema applications, and (4) structures. These elements work in line with the plan below. The definition of the set of relations recognises particular relationships holding between two text portions or spans. The schemas define the arrangements of texts structurally. In other words, they "*define patterns in which a particular span of text can be analysed in terms of other spans*". They are simple predefined patterns able to specify how portions of texts combine to form larger areas up to whole texts. The notion of structure is simply a composition of portions of an entire text where schemas apply (ibid.).

The first element 'relations' refers to the bond between two (or more) chunks of discourse or, to be more specific, parts of a text. It is used by

the theory to achieve text coherence through postulating a hierarchical, connected structure of text where every part or segment of a text has a role, a function to play, with regard to other text parts. These relations are labelled 'rhetorical' in this theory while they are called differently in other trends keeping the same core meaning. 'Coherence relations', 'discourse relations', and 'conjunctive relations' are circular labels in text structuring literature (Taboada & Mann, 2006b:425). Rhetorical relations are used when the aim of the discourse analysts is to study the global structure and functions of a text. Coherence relations are used when the goal is to examine how the clauses in a text are combined to form a whole. Conjunctive relations are employed when the syntactic description acts upon the discoursal level. Discourse relations are used to view discourse structure from a discourse-semantic perspective (Gylling, 2013:117).

RST is seen as especially useful to the discourse analyst *"because it allows, and even forces, the analyst to consider the intended communicative effects expressed in, or plausibly inferable, from the text"* (Abelen, Redeker, & Thompson, 1993:333). The word 'rhetorical' in the name RST suggests that it is a *"theory of influence"* because it focuses upon the intended effect(s) (henceforth E(s)) (Mann & Thompson, 1988:257). To explain the sense of E, consider the following statement of support by Mann, Matthiessen, & Thompson (1989:8f):

Text structuring relations are functional; the character that they all share can be stated in terms of the categories of effects that they produce. They can be described in terms of the purposes of the writer, the writer's assumptions about the reader, and certain propositional patterns in the subject matter of the text. The text structuring relations reflect the writer's options of organisation and presentation; it is in this sense that an RST structure is 'rhetorical'.

It is a 'functional theory' in that the postulated relations are described in terms of the goals of the W, and 'hierarchical' in that simple 'local' structures combine into complex 'global' structures up to whole texts. The role of rhetoric is much stressed in the RST model because Rs, Ws, and rhetorical interaction between them are recognised as important

theoretical bases for text structure analysis. The text can be built up *"in different ways to achieve an effect and that RST is capable of showing this, thus justifying the label 'rhetorical' "* (Gylling,2013:129).

Relations hold between 'two non-overlapping' spans of text called 'N' and 'S'. Each relation is defined in terms of two fields (Mann, Matthiessen, & Thompson,1989:11): 'constraints' and 'effect'. In their papers (1987:4; 1988:245), Mann & Thompson stated that each relation definition consists of four fields.

Table (2.2): Constraints and E in Three RST Leading Articles

<u>1989 1987/</u>	<u>1988</u>
1. constraints:	1.constarints on the N,
a. on the N,	2.constraints on the S,
b. on the S,	3.constraints on the combination of both
c. on the combination of both	4.The E
2. E	
The E field includes:	
a. a statement of the E that 'plausibly' the W attempts to achieve when employing the relation; and	
b. the 'locus' of E which is to be identified as either the N alone or the combination of the N and the S together.	

For example, the constraints of a 'Background' Rhe R operate on the N and on the combination of N and S and an overall E is associated with the Rhe R (Mann & Thompson,1988:273):

'Background' Rhe R

Constraints on the N: R won't comprehend N sufficiently before reading text of S

Constraints on the S: none

Constraints on the combination of N and S: S increases the ability of R to comprehend an element in N.

The Effect: R's ability to comprehend N increases.

Locus of the effect: N.

Example: [Home addresses and telephone numbers of public employees will be protected from public disclosure under a new bill approved by Gov. George Deukmejian.]S[Assembly Bill 3100 amends the Government Code, which required that the public records of all state and local agencies, containing home addresses and telephone numbers of staff, be open to public inspection.]N

The judgments made by an analyst (also called *observer* or *judge*) of a text are judgments of plausibility rather than certainty based on context and the intention of the W (Mann & Thompson, 1987:5; 1988:246f). The definitions of relations are based on functional and semantic criteria. In addition, on the part of the R's comprehension of the text, all judgments the analyst makes are based on the text rather than on his direct access to the knowledge of the R, and thus are from the W's perspective.

As for the schemas, the second basic element, they refer to an abstract patterning of a small number of text portions or spans. They specify the relations between text spans and how particular spans of the text altogether (*ibid.*). Mann & Thompson recognise five kinds of schema shown below. The arrows in the following figure link the Ss to N EDUs. The R and R's names are given above these arrows. The vertical lines represent non-overlapping text spans, whereas the edges in 'b', 'c' and 'd' represent the notation for the relations of the multinuclearity (equal importance of nuclei rather than a more important N over an S).

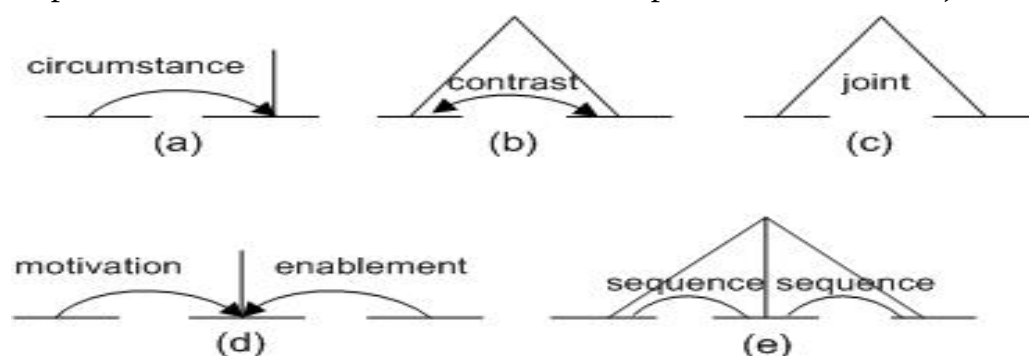

Figure (2.1): Examples of Five Types of Schema Used in RST (by Mann & Thompson, 1987:7; 1988:246f).

A large majority of the relations are brought together with the pattern given in 'a' above. Schema 'd' covers the cases in which multiple S EDUs

are connected with an N by possibly different R's. Schemas 'b', 'c' and 'e' cover the multinuclear relations.

The third basic of RST is 'schema application' which refers to some variation of schema appearing in text structures. For Mann & Thompson, there exist three conventions that limit the possible applications of a schema (1987:6; 1988:248):

1. **Unordered Spans:** The order of N or S in the text span in a schema is not being constrained by schemas.
2. **Optional Relations:** All individual relations are optional for multi-relation schemas as long as at least one of the relations is hold.
3. **Repeated Relations:** There is no limitation for the number of a relation being a part of a schema with a definite schema application.

In doing a structural analysis of a text, the set of schema applications recognises the following four constraints (1987:7f; 1988:248f):

1. *Completeness*– The set contains one schema application that contains a set of text spans that constitute the entire text.
2. *Connectedness*– Except for the entire text as a text span, each text span in the analysis is either a minimum unit or a constituent of another schema application of the analysis.
3. *Uniqueness*– Each schema application consists of a different set of text spans, and, within a multi-relation schema, each relation applies to a different set of text spans.
4. *Adjacency*– The text spans of each schema application constitute one text span.

In their paper (1989:3f), Mann, Matthiessen, & Thompson argue that the term 'structure' is of an organisational sense in the name of the theory. Yet, it has other senses that the theory itself recognises. RST, for them, is able to describe three principal kinds of structures:

1. **Holistic Structure** that can be derived from "*the properties of the genre or variety of text,...*";

2. Relational Structure that expresses "*the organisation of coherent contiguous text,...*"; and
3. Syntactic Structure which is clear in common use of syntax. In this case, they also argue that RST can interface with different theories of syntactic structure.

They believe that (ibid.:4, note 2):

The nature of such 'interface' between rhetorical structure and syntactic structure may vary quite significantly depending on the nature of the syntactic theory. In general, functional theories of syntactic structure will simplify the interface considerably.

However, it is noticed that RST is first a 'relational-structure theory', though it admits the significance of the other two kinds of 'structure' interacting strongly with the first kind. As stated quite clearly by them, no attempt is taken to incorporate accounts of both 'genre' and 'syntax' (ibid.:5, note 3). The present study undertakes such task in religious texts.

2.3.2.2 Nuclearity in Discourse within RST Tradition

In their influential papers (1987) and (1988), Mann & Thompson proposed 'nuclearity' as a general principle of text organisation particularly when observing that most of their Rhe Rs are asymmetric (1987:31; 1988:266). For instance, the Rhe R 'evidence' reads as: when A is evidence for B, then B cannot be evidence for A. They noticed three commonalities when applying this asymmetry for all relations. This in turn affirms the general division into 'N' and 'S'. The three commonalities are:

1. Often, one segment of the relation pair depends on the other for the discourse to be comprehensible, but not vice versa. For 'evidence' relation, the N claim is necessary for the S to be comprehended. Without the N, it would be a non-sequitur; i.e., it is not connected in a logical or correct way to what is said before.
2. Often, the S is apt to accept substitution without changing the overall purpose of the text. It is possible, for example, to replace

the S with a different piece of evidence in the case of 'evidence' relation.

3. Often, one segment is more essential to the W's purpose than the other.

For Mann & Thompson (ibid.), nuclei are regarded as the most important parts of a text, whereas Ss are secondary but they contribute to the nuclei. The criterion for making this distinction is Mann & Thompson's 'Deletion Test'.

However, there is a relationship between nuclearity and linguistic structures. The N-S distinction directly corresponds to the syntactic phenomenon of hypotaxis in clause combining. Mann & Thompson noticed that *"grammars in many languages draw a distinction between hypotactic and main clauses because of the nucleus-satellite distinction in discourse"* (1987:35; 1988:269). For instance, Arabic distinguishes between 'عمدة' and 'فضلة' within the same domain of grammar thinking (Kareem,2000:56f). Two propositions are clear from the preceding quotation:

1. Nuclearity might be responsible for hypotactic clause combining. This is evident in Matthiessen & Thompson (1987:12f); and
2. A correlation is held between grammar and discourse structure; i.e., a direct mapping between subordinate clauses and Ss of Rhe Rs (ibid.). Languages also exhibit parataxis, i.e., the coordination of equal structures. This is reflected in multinuclear Rhe Rs in RST; those relations in which each span is central to the W's purposes (ibid.).

2.3.3 Central Issues in RST

As an open system with a few fixed parts, RST has some basic issues concerning how it characterises its elements and their use. Some of these issues are discussed briefly below in terms of answers to critical questions.

2.3.3.1 What is the Goal of RST Analysis?

The original goal of RST was, as pointed by Knott et al. (2001, in Sanders, Schilperoord, & Spooren,2001:181ff), to be a theory of both text

organisation and of specific Rhe Rs and their definitions. That is, it was meant to be a theory of attributing structure to text, how it works, and how coherence in text can be achieved (Taboada & Mann, 2006b:429).

Subsequent discussions and analyses over years of using RST have shown that RST can be workable in various fields such as computational linguistics, cross-linguistic studies, dialogue and multimedia, discourse analysis, argumentation, writing, etc. (see sect. 2.4). Within each area of these, RST is adopted for a goal that is particularly suitable for uncovering the implicit communication effects of discourse structure (ibid.).

2.3.3.2 What is Rhetorically Related?

The text to be analysed in RST is divided into units coming together to form the ultimate text. These units become the minimal or elementary elements of the analysis. In an earlier paper, Mann & Thompson (1983:3) state that they are concerned with relations between parts of texts "...each potentially containing many clauses, not just between adjacent clauses". Some of these relations may be found to hold between larger parts of a text and even between clauses. Yet, they (1987:6; 1988:248) admit the size of units the rhetorical analysis is built on is 'arbitrary' while they are at the same time asserting that these units:

...should be based on some theory-neutral classification. That is, for interesting results, the units should have independent functional integrity. In our analyses, units are essentially clauses, except that clausal subjects and complements and restrictive relative clauses are considered parts of their host clause units rather than separate units.

To put that in formal terms, Mann & Thompson's view of rhetorical structure is interclausally-oriented giving no cause to disregard intraclausal analysis (see chapter three for these two terms as employed in the adopted framework of the present study). The classical RST, thus, is syntactically delimited since Rhe Rs can hold between nuclei and Ss.

Taboada & Mann (2006b:429f) comment that such division rule is workable and applicable for several purposes, but it undergoes problems when applied to other goals. In particular:

1. Fine details can be missed. To miss or skip details may be necessary for some long texts.
2. It is strongly related to "*the language of the text, and its clause-forming processes*" (ibid.). This is a real problem if texts are compared cross-linguistically specifically if one language or another is not clause-oriented.
3. Spoken language poses another problem where units are not necessarily independent clauses but intonation units, for example.

This issue is prone to heated discussions and criticism which range from prescribing it as inadequate or difficult to insufficient for detailed discourse interpretation. Other discourse level units are proposed (Polani, 1995:11ff). Among them are:

1. Turns at Talk: The exchange of right to the floor or the conversational turn is regarded as "*the basic unit of the social organization of interactively constructed spoken discourse*" by many researchers who are interested in conversational analysis. Yet, turns often consist of a large stretch of discourse with many shifts in semantic dimensions of interpretations. Instead, the notion of turn with "*Transition Relevance Place (TRP)*" is proposed to refer to the moment in which the speaker changes within a stretch of talk (ibid.:11).
2. The Discourse Segment: It is the unit favoured in computational treatments of discourse. This segment is defined in terms of the speaker's "*INTENTIONS, PLANS, OR ATTENTION* [capitals in the origin]". However, there is a tendency for clausal boundaries, breath points (or pauses), and propositional or 'idea' unit boundaries to co-occur. These co-occurrences tend to bring a shift in attention or intention (ibid.:12).
3. Orthographic Units or Subsections: Since RST was initially expected to work within the levels of larger unit sizes, some researchers (Granville,1993, in Rambow, 1993:19ff; Reed & Long, 1997, in Taboada

& Mann, 2006b:430) attempt to make their analysis the orthographic paragraphs or subsections.

4. Phrases: Sometimes phrases may serve as condensed forms to express elaborate content. Analysis can be based on prepositional phrases that would act as EDUs.

5. Referential Relations: In contrast to intraclausal EDUs, the interplay of co-referential expressions and discourse structure can also be taken into account. Referential relations are a good indicator of units of discourse at the level of entire sentences.

In summary, Taboada & Mann (ibid.) comments: *"We do not believe that one unit division method will be right for everyone; we encourage innovation"*. What the minimum size of text segments to rhetorically relate should be is still left open to debate.

2.3.3.3 Coherence, Hierarchy, and Intentions

Discourse is a communicative event where language plays a central role. Minimally, three elements are required: a sender (W or speaker), a receiver (R or listener), and a message that is communicated. This message is not just a series or a chain of clauses, on the contrary; it forms a unified and coherent whole (Louwerse & Graesser, 2005:216).

The term 'coherence' has been defined variously. Often, it is defined in conjunction with 'cohesion'. One prominent proposal on how to interpret coherence is the relational theory of text known as RST. RST assumes that texts consist of parts which are elements of patterns. These parts are functionally significant in that they combine to create larger parts and whole texts. Therefore, text is organised, and to be organised as such, there is a need for the text to create a sense of overall unity to which every constituent part contributes (Mann, Matthiessen & Thompson, 1989:6).

However, the assumption of unity and coherence is uncontroversial. In RST, the source of this unity and coherence is 'Imputed Function' which is described in their following statement: *"A (region of) text is perceived as having unity and coherence because all of its parts are seen as*

contributing to a single effect" (ibid.:7). The formulation of coherence in RST is the absence of non-sequiturs and gaps. That is, a coherent text is one where all the parts form a whole: *"for every part of a coherent text, there is some function, some plausible reason for its presence, evident to readers, and furthermore, there is no sense that some parts are somehow missing"* (Mann & Taboada, 2005 [2015/2016], in <http://www.sfu.ca/rst/>). Therefore, coherence in this theory requires for every part of a text to have an evident or intended role. However, in order to find or assign roles for text parts, hierarchy seems essential. The hierarchy principle is part of the N-S distinction. The Rs work recursively to account for the whole text, until the units or parts in the analysed text become constituent elements in an RST relation. In other words, analysing a text aims to uncover the E achieved with a particular relation. This E may need to be expressed in a complex unit having other relations. Decomposing into further relations, i.e., from top-level to lower-level, can contribute to that E (Mann & Thompson, 1987:8; 1988:247f). It is also noticed that the analysis is performed in terms of schema applications that obey the four constraints outlined earlier (see sec. 2.3.2.1). The result of this analysis is that relational structures are represented as tree diagrams consisting of one top-level relation that encompasses other relations at lower levels (Mann, Matthiessen, & Thompson, 1989:7).

The next question to consider is: what is that is organised in hierarchy to produce coherence? Do the text spans represent propositions, intentions, or something else? Typically, a speaker in a particular context of situation has some goal in mind when producing an utterance. The recent research on the coherence of discourse has focused on distinguishing discourse structure. Two leading approaches are presented here: 1. Grosz & Sidner (1986) and their theory of intentionality; and 2. RST. The two approaches revolve around a central issue; how speakers' intentions determine the structure of their discourse.

The first approach concentrates on the role of discourse purpose and the speaker's plan. The main claim they adopt is that 'discourse' is coherent if its discourse purpose can be shared by all the participants, speakers and

hearers, and if each utterance of the discourse contributes to achieving this purpose. This achievement may be direct or indirect (Grosz & Sidner, 1986:176). The discourse structure in their theory is a composite of three interacting components:

- a linguistic structure.
- an intentional structure (i.e., a structure of intentions); and
- an attentional state.

Each component deals with different aspects of the utterances in a discourse. The linguistic structure is the structure of the actual utterance sequences that make up a discourse segment. These utterances have roles similar to those of words in phrases. The second basic structure refers to relations between intentions, also called 'discourse segment purpose' (henceforth DSP). The DSPs specify how these segments contribute to achieving the overall discourse purposes. They distinguish between intentions that are intended to be recognised and those intentions that are associated with discourse. The DSP is always intended to be recognised. Two structural relations are introduced to represent intentional structure of discourse: 'dominance' and 'satisfaction-precedence'. When one intention contributes to the satisfaction of another, then there is 'dominance'. 'Satisfaction-precedence' would be true if one intention must be satisfied before another (ibid:178f). The third component is the attentional state. It contains information about the objects, properties, relations and discourse intentions salient at any given point in the discourse.

The second approach in the question of intentions is that of RST. Mann in his article 'Models of Intentions in Language', in (<http://www-bcf.usc.edu/>) states that the verb 'to intend' is used in its general sense in the theory *"to describe situations in which, minimally, some individual has in mind some situation , not yet actualized, along with a disposition to prefer that the situation be actualized"*. He adds that the term 'intention' sometimes includes the notion that the person who intends also has in his mind a commitment towards actualising that intention. The

intention that RST seeks is, thus, the range of possible RST text structures which is defined by a set of schemas (see sec. 2.3.2 for further information). It is noticed that the speaker's intentions determine discourse structure in this theory. As shown in the figure below, at the top level, the text is broken down into two spans: (1) and (2-3). The span (2-3) forms an S that stands in a 'justify' relation to (1). This span can be further broken down into two minimal units (2) and (3), where (2) is an S that stands in a 'concessive' relation to (3):

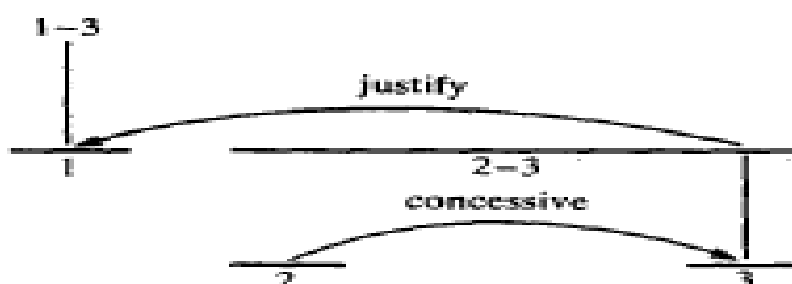

Figure (2.2): RST Diagram (by Mann & Thompson,1988:252).

This figure matches the following text:

'Music Day'

1. The next music day is scheduled for July 21 (Saturday), noon-midnight.
2. I'll post more details later,
3. but this is a good time to reserve the place on your calendar.

In the figure above, the N (1) presents the W's right to express the text. The S (2-3) is in a 'justify' relation with (1). It intends to tell Rs/hearers why the W/speaker believes he has the right to say (1) without giving more details. In the embedded span, the N (3) expresses the W's/speaker's positive regard for the situation presented in (3), and the S (2) is intended to increase the R's/hearer's positive regard for the situation presented in (3) (Mann & Thompson,1988:252ff). In summary, not only is there a functional distinction between N EDUs and Ss, there is also a classification of Ss due to how they help achieve the R's/hearer's adoption

of the N. That is, the text is structured by the ways in which parts are intended to help other parts achieve their purposes.

However, it seems, on the face of it, that these two approaches are rather similar: both are interested in hierarchical categorisation of texts and both concern themselves with the purpose of the text. But these commonalities are not too much deep. The discourse structure for Grosz & Sidner is a composite of three interacting components: a linguistic structure, an intentional structure, and an attentional state. The classical unmodified RST accounts primarily for what is called the intentional structure in Grosz & Sidner's approach.

The position adopted in this study is the same as that of Rambow (1993:iii, in Taboada & Mann, 2006b:431f) who believes that RST relations are considered "*a reflection of intentions and relations among intentions*". Yet, intentions and relations, though possibly complementary, are different, as Taboada & Mann point out (2006b:432). The Rs work on two or more text spans to join them to get a new text span. These spans are connected to create an E on the R/hearer. This E can be considered intention; hence 'intended effect'. It is quite possible that intentions are realised by uttering a single sentence or a single word.

To summarise, the Rs are the result of clearly established, non-overlapping, connections between at least two spans of text, i.e., text spans in terms of the original RST. These Rs and their hierarchical structure help recognise coherence in discourse. It is usual to have/find an intention behind expressing the relations, but intentions themselves do not define relations (ibid.).

2.3.3.4 Number and Types of Relations

Another central issue in RST is embodied in some questions in the field, such as how many Rs in discourse are allowed to relate two or more segments or spans? Is there a standard single taxonomy classifying these relations? It is noticed that researchers working on text coherence frequently play down attempts to taxonomise relations in discourse, both

within and outside the RST traditions. Consider Mann & Thompson (1987:17;1988:256) who state:

Several people have suggested that we create a taxonomy of the relations in order to present the important differences among them. However, no single taxonomy seems suitable. Depending on one's interests, any of several features could be made the basis for grouping them.

Halliday & Hasan (1976:238) confirm the same issue saying: "There is no single, uniquely correct inventory of the types of conjunctive relation; different classifications are possible each of which would highlight different aspects of the facts". RST taxonomy of relation is deliberately made open-ended to bring some description flexibility. Consider the claim of Mann & Thompson:

Despite our efforts to say the opposite, some have read our other papers as suggesting that the relations are a closed list, a kind of one-dimensional text theory . We see it as an open set susceptible to extension and modification for the purposes of particular genres and cultural style (1987:48).

This possibility of "...extension and modification..." is also supported by another statement in Mann Matthiessen, & Thompson (1989:9, note 5) and in Mann & Thompson (1987:5; 1988:247) which reads as follows:

RST is an abstract set of conventions. We can view the conventions as either independent or inclusive of particular definitions. The first view is more comprehensive, but the latter is more convenient - we use the latter....

The first view which is more comprehensive sounds essentially workable in a cross-linguistic or a cross-cultural comparative study where definitions given for relations might differ. The second view which they adopt gives rise to several RST versions as different targets are desired for. Such versions are to be built on variant sets of relation definitions. They are also to be based on minor variations in the set of defined schemas.

There are some major research efforts to taxonomise Rhe Rs. Examples are those classifications of Van Dijk' (1977), Halliday (1985), Traxler, et al. (1997), and Benwell (1999). Much of these works are outside the RST framework proper. These works analyse the same text-linguistic phenomena as RST does and the resultant analyses are congruent with RST (i.e., hierarchal text structures, the same general types of Rhe Rs ascribed, the same basic units of text analysis). The revision in this section is limited to Mann & Thompson's classification (1987, 1988) due to its RST proper.

Mann & Thompson's original proposal in (1987) and (1988) articles includes 24 Rhe Rs classified into those called 'subject matter' and those 'presentational' Rhe Rs. This two-way division is based on a distinction between two aspects of text structure. Subject matter (i.e. SM or ideational to other scholars) Rhe Rs such as 'volitional cause' express parts of the text's subject matter relating two text spans if they are understood here as causally related in the subject matter. Presentational (i.e. PR, to other scholars) relations, such as 'justify', on the other hand, facilitate the presentation of the subject matter relating two spans if one of them is understood here as increasing the R's acceptance of the other (ibid.).

The inclusion into the proper group for a given relation is based on or indicated by the E of the relation on the R as shown in the definition of each relation. In subject matter relations, the text producer intends to make the R recognise that there is an ideational meaning relation between the two text spans. In other words, these informational relations have a perlocutionary E that is so straightforward; getting the R to recognise some fact about the real world. Examples of such relations are 'elaboration', 'circumstance', 'purpose', 'condition', etc. Presentational relations, on the other hand, are intended to *"increase some inclination in the reader"* such as positive regard, belief, or acceptance of the N (ibid., 1987:18; 1988:257). These presentational relations, thus, have a perlocutionary E not limited to mere R recognition. Examples of presentational relations are 'antitheses', 'justify', 'concession', 'evidence',

etc. A point in favour of RST is that its metalanguage and representational language are widely known. This has been so clear in the several attempts to taxonomise RST relations in other ways.

However, the original list of the 24 relations is expanded to 30 or 32 on the RST website (Mann & Taboada, 2015). It could have been shorter than this, as in the approach of Grosz & Sidner's 'Dominance' and 'Satisfaction-Precedence', and it could be expected longer and larger reaching a collection of 78 by Hovy et al. (1992) to 350 relations by Hovy (1990). Additional classifications of relations in discourse are a growth industry. It is possible to find many other ones outside RST or even within RST. Taboada & Mann (2006b:438) comment: *"The various efforts to taxonomize relations, to find or introduce hierarchy among RST relations, and to classify relations into types, are collectively supportive of RST's usefulness"*.

2.3.3.5 Interpreting Unsignalled Relations

There are a growing number of studies in the use of relations and their markers in natural texts. Most of these studies try to establish a relationship between the relation found in the text and the markers used to signal them linguistically. In actual text analysis, one gets rapidly confronted with an important number of ambiguous cases. It would become difficult if impossible to classify some relations on the basis of the distinctions stated (see sec. 2.3.3.4) and their definition alone. Different elements may account for these problems:

1. Relations in discourse are not always marked linguistically;
2. There is no one to one mapping between the relation and the linguistic discourse markers (henceforth DMs⁴); and
3. There is no general consensus the type of linguistic constructions that may function as DMs (connectives, prepositions, adverbials, intonation pattern, cue phrases, etc.).

The phenomena of *"...the recognizable presence of relations that are, seemingly, not signalled in any explicit way"* has come into play and view with the use of RST (Taboada & Mann, 2006b:438). The focus of recent

researches on coherence or Rhe Rs has been directed towards cues (DMs or particles) that indicate or point to the presence of a relation, or the lack of these cues ⁵ in the case of other unsignalled relations (Taboada & Das,2013:3).

In the area of relation signalling, DMs, in addition to other type of signals, have been the focus of researches on relation signalling (ibid.:4). Discourse parsing is one of these fields in which the structure for a given text can be identified through recognising the relationships that hold between the text parts. DMs are frequently employed by discourse parsing specialists to identity the relations in a text and to recognise the structure of a discourse (ibid.).

DMs are psychologically considered to be guiding instructions whereby Rs process and recognise Rhe Rs. This assumes that DMs have necessarily a positive influence/E on Rs' understanding of a given discourse and their recall performance when retrieving the textual information. These DMs act as text-processing accelerators, i.e., they lead to *"...a faster processing of the immediately following text segment"* (ibid.). However, the effects of signalling by DMs on recall show three mixed patterns:

1. Some studies refer to the positive effect of DMs on the mental representation of a discourse. They assume that Rs perform much better if a DM is present;
2. Other studies suggest that DMs neither contribute to cognition nor have any 'significant' effect on it;
3. The third pattern claims that DMs have a negative effect on Rs' recall performance. They hinder the process of cognition representation (ibid.).

How are Rhe Rs signalled in the absence of DMs? Based on the psychological validity for Rhe Rs postulated above, analysts or observers or judges can assume that there must be signals through which Rs and speakers are able to identify these Rhe Rs.

Signals other than DMs have received less effort. That is, research on Rhe Rs signalled by other means is not abundant (Das,2012:4). The clear

position regarding this issue is that the unsignalling of Rhe Rs does not mean that they are not present. What is significant is the way of taxonomising such Rhe Rs whose signals are not overt (Taboada & Mann, 2006b:440). For Knott & Dale (1994:41) DMs are the only indicators of the different relations in discourse. However, signalling a relation is not confined to these connectives. Not much attention has been paid to other linguistic signals including features of tense, aspect, mood, modality, embedding, verb meaning, implicature, pauses, intonation, clausal status, anaphora, polarity, lexical chains, cohesive devices, punctuation and graphical features, textual layout, synonym/antonym, parallel syntactic structure and topic and focus, NP/VP cues and reiterative devices, morphosyntactic and genre-related information, syntactic similarity, word overlap, proper nouns, and definite articles (Taboada & Mann, 2006a:573f; Taboada & Mann, 2006b:440; Taboada, in Renkema, 2009:127-132; Taboada & Das, 2013:4).

In other words, beside DMs, there are six other signalling mechanisms: morphological, syntactic, semantic, phonological, pragmatic, and graphological /graphical and layout levels. Morphologically, tense, for instance, marks temporal relations and helps guide "*...the reader in the interpretation of progressions or flashbacks in time*" (Taboada, in Renkema, 2009:127f). Two syntactic means are used as linguistic signals: sentence mood (indicative, imperative, and interrogative) and embedding which is obvious in the use of relative clauses for 'elaboration' relation. Semantically, verb meaning can denote certain relations such as: 'cause', 'trigger', and 'provoke' are used to indicate 'causal' relation (ibid:128). Intonation can also be used as a DM. Adverbs such as 'now' have different prosodic patterns or contours when they are used as DMs and when they are sentence adverbials (Taboada & Mann, 2006a:573). Implicature pragmatically establishes relations between different implicit propositions in the text which are constructed in the Ws' or speakers' ⁶ minds (Taboada, in Renkema 2009:128). (For more examples of signalling via DMs see ibid.:129ff; Gómez-González & Taboada, 2005:227ff).

Therefore, are unsignalled relations actually relations? This study believes that unsignalled relations are indeed Rhe Rs. Whether signalled or not, Rhe Rs of either type 'presentational' and 'subject matter' are to be recognised and interpreted as relations by recipients. The challenge lies in finding what the particular signal is in each case. As relations are mostly defined according to the Es within RST, they do not need to be always signalled explicitly. It is quite reasonable and logical if the intention or E, i.e. the author's most plausible intention or E, is recognised by the Rs or hearers.

2.4 Religious Discourse

Culture and all items that belong to culture have a history. Words also have a history where their meanings and usages change over time. Religion, for instance, is liable to change its meaning and usage too. It is a product of historical development that the world is divided into religious and non-religious. However, the early twenty first century witnessed a misty situation about this item 'religion': it is not obvious enough to know how religion is understood or how it must be used (McCutcheon, in Horowitz, 2005, vol.5: 2048).

2.4.1 Introduction

The language of religion is identified as discourse referring to a wide range of "*...social practices and investigations, in talking and writing, that bring into being new ways of classifying and linking experiences and people, so creating new reasons of reading*" (Green & Seale-Chatterjee, 2008:5). Keane (1997:48) on his part defines religious language in light of "*the perceived distinctiveness of certain interactions, textual practices or speech situation*". Such distinctiveness of religious discourse is the result of social and textual practices in speech or writing situations, which let people or participants interact with experiences in order to respond to some common semiotic and pragmatic questions they face (ibid.):

1. How can we talk and interact with invisible interlocutors?
2. In what manners must we talk and interact with invisible interlocutors?
3. How can we make them respond?
4. How should we describe them, tell about them?
5. What should we depend on to know whether or not some words originate from a divine source?
6. Are such words real, factual, appropriate, effectual, or persuasive in particular ways?

Keane (ibid.:49), while commenting on diagnosing religious language, believes that *"no single set of formal or pragmatic features is diagnostic of religious as opposed to other marked uses of language, such as poetic or ceremonial speech"*. On the contrary, selecting form among the wide scope of linguistic possibilities seems characteristic of religious practices. At other times, these religious practices may suspend or even change certain aspects of the common way of using language in speaking or writing.

Religious speech situations challenge/stand against ordinary everyday speech in some respects (ibid.:50):

1. Religious speech is frequently achieved in situations where some everyday-conversation assumptions are suspended. Everyday-conversation is a mutual production between participants of shared assumptions like who is participating and what relevant 'here' and 'now' contexts are present.
2. It is not always presupposed or guaranteed that spiritual participants in religious speech practices are present, engaged in the situation, or even identified. This happens in face to face encounters of conversation.
3. In contrast to everyday-conversation events, addressing invisible interlocutors may require clarifying unambiguously the participants in the speech event. Such requirement of explicitness also includes the nature and purpose of the act of speech under process. In this regard, Keane points out that *"much of the content of spells and prayer [as being forms*

of religious practice] is metapragmatic; that is, it reflexively refers to the very actions it is undertaking". A reason behind this may be that the spatiotemporal context is not shared by the supposed participants or shared by them not in quite the same way. Practitioners in religious traditions resort to linguistic means to engage with the invisible world. Two important questions are raised here (ibid.:51):

- What is there in the speech activities of people that enables them to engage in interaction with this world?
- Where does the efficacy of religious language lie?

To answer them is to indulge into examining formal properties of religious speech performances and the explicit beliefs or the implicit intentions that accompany them. Respectively, Pernot (2006:237-239) claims that religious discourse consists of:

- Discourse about the gods;
- Discourse addressed to the gods; and
- Discourse of the gods.

His claim in the way discussed below is applicable to the spiritual or invisible world previously stated. As for the first type, he states that it includes narration of the god's deeds and eulogy of his power. These two forms fall within ancient rhetoric traditions. Yet, they resonate in contemporary religious practice directed towards the invisible, spiritual world or interlocutors. Preaching and naming and designation are considered acts of worship in this first type. Preaching is a kind of or a form of advice for the audience to urge them do an action of religious significance. Naming and designation includes divine qualifiers, epithets, invocation, defining the functions or roles of the gods and their powers (ibid.).

Discourse addressed to the gods includes ways of greeting gods, prayer, mediations and spiritual exercises. The discourse an individual addresses to himself, to act on himself, to comfort or change himself, may be within this type, too.

Finally, the discourse of the gods was not so clear in ancient rhetoric traditions. The ancient were not able to describe the words of the gods.

But the divine words, expressions, and language could be expressed in prophecies and oracles, through the intervention of holy personages

2.4.2 The Bible as a Religious Text

The Bible which is the sacred book or collection of books is accepted by the Christians and Jews as uniquely inspired by God. It is thus authoritative and guiding for belief and behaviour. Throughout the Bible, many verses indicate their divine origin. Yet, it is not as a whole dictated word-for-word by God. It can be stated that it is also the resulting product of many human authors written at different times and cultures. Christians and Jews at this matter believe that God used human authors to make His messages recognised for people through the presence and inspiration of His Spirit (Douglas, et al.,1962:138, 516). This is shown in the different writing skills, writing styles, personalities, world views, cultural backgrounds. Nevertheless, biblical scholars believe that there exists a kind of ground unity and harmony throughout the Bible. This suggests for them the idea of divine inspiration (Smith,1955:iii).

Since it is an undeniable fact that the Bible comes in language, therefore, it is possible to use the knowledge and application of modern linguistics to understand biblical texts. This idea is made obvious in Cotterel and Turnier's words (1989:16, in Zedníčková,2010:27):

Understanding of utterances requires some measure of understanding of the text, the actual words used, the cotext, the sentences, paragraphs, chapters surrounding the text and related to it; and the context, the sociological and historical setting of the text.

However, in a very influential document presented to Pope John Paul II on April 23, 1993, and published January 6, 1994, the Pontifical Biblical Commission investigated the various methods and approaches most appropriate for arriving at an interpretation of the Bible with regard to its human and divine characters. The commission considered in their account the aspects that reflect "...a Catholic interpretation of the Bible" (The Pontifical Biblical Commission,1994:4f).

2.4.2.1 Approaches for Interpreting the Bible

The methods and approaches for interpreting the Bible are:

1. Non-Literary Methods and Approaches
2. New Methods of Literary Analysis

Under non-literary methods and approaches, the following are enlisted:

- Historical-Critical Method.
- Approaches Based on Tradition.
- Approaches that Use the Human Sciences.
- Contextual Approaches.
- Fundamentalist Interpretation.

Historical-Critical Method is assumed to be *"the scientific study of the meaning of ancient texts"*. It is historical in that it seeks answers to questions related to those historical processes that gave rise to biblical texts. Through the different places and different times, biblical texts addressed various groups of hearers and Rs. This method is critical in the sense that it seeks the help of scientific criteria in order to be as objective as possible.

Approaches Based on Traditions aim to carry out a theologically-directed interpretation by *"bringing from within an explicit framework of faith: the Bible as a whole"* (ibid.). The biblical texts are interpreted in terms of the canon of Scripture. That is, each text is interpreted *"...within the single plan of God, the goal being to arrive at a presentation of Scripture...."* (ibid.).

Approaches that Use the Human Sciences in particular sociology, anthropology, and psychology can be adopted in interpretation. For example, the anthropological approach studies those aspects reflected in language, art, religion, dress, ornament, celebration, dance, myth, legend, etc. It distinguishes those elements of the biblical message which are fixed and pertain to human nature and which are contingent due to the particular properties of certain cultures (ibid.).

Related to Contextual Approach, and according to fast-moving and contemporary currents of thought, some exegetes include in their

interpreting some points of view which have not been sufficiently studied. Two movements claim this particular attention, namely the Liberationist approach and the Feminist Approach.

Fundamentalist Interpretation is based on the principle that the Bible should be read literally in all its details since it is the Word of God which is free from error. Literal interpretation excludes every effort at understanding biblical texts in terms of their historical origins and development.

Due to the progress in linguistic and literary studies, biblical exegesis makes use of some new methods of literary analysis:

- Rhetorical Analysis
- Narrative Analysis
- Semiotic Analysis

Rhetoric is used to interpret in a systematic way the Bible. Rhetoric here is defined as *"the art of composing discourse aimed at persuasion"* and thus knowledge of rhetoric should be part of the equipment of all exegetes. Rhetorical features in Scripture have been studied through three different sub-approaches (ibid.:7).

1. The Classical Rhetoric: It identifies three elements of every situation of discourse: the speaker (or author), the discourse (or text), and audience (or the addressees). Accordingly, three factors are recognised; they contribute to the quality of the persuasive discourse: the authority of the speaker, the force of the argument and the feeling aroused in the audience (ibid.). Therefore, some exegetes make use of classical rhetoric traditions to analyse certain aspects of biblical texts, particularly those of the New Testament.

2. The Semitic Procedures of Composition: It is rooted in Semitic culture and its preference for symmetrical compositions of the text the different elements of which stand in a relationship with each other. As an example, parallelism is characteristic of the Semitic composition and allows for the description of the literary structure of biblical texts (ibid.).

3. The New Rhetoric. Applied to the Bible, this approach, 'the new rhetoric', attempts to *"...penetrate the very core of the language of revelation precisely as persuasive religious discourse and to measure the impact of such discourse in the social context of the communication thus begun"* (ibid.).

Related to Narrative Analysis, the message of the Bible can be understood and communicated through narrative exegesis such as: the message corresponds to the form of story and personal testimony. The recital of the story of salvation, the life, death (as claimed in Christianity) and resurrection of Jesus Christ, etc. are examples of detailed narrative accounts (ibid.:8).

The Semiotic Analysis is synchronic in the sense that it focuses on studying a biblical text in its final state and shape as it is in front of Rs. Most biblical scholars using semiotics in their studies follow as their authority 'Greimas' and the 'School of Paris' founded by him (for further information, see Cobley, 2010:227ff).

2.4.2.2 An Overview of Previous Studies

Five studies are noteworthy here. All of them have focused on analysing texts taken from Christianity (i.e., either biblical texts or texts around topics extracted from the Bible) and Islam (i.e., prayer texts or Prophetic Traditions or texts discussing Islamic issues).

The first study is conducted by Wong (2010) at the City University of Hong Kong and aims to use SFL analysis to investigate (2010:2-6):

1. The linguistic differences between three Bible English translations through analysing a specific text (John 1:1-14) in (King James Version, New International, and The Message);
2. Any problem which may result from linguistic differences; and
3. The concept of equivalence through SFL.

The study proceeds to spotlight on *"textual and ideational meaning at the stratum of semantics [i.e., theme and rheme], the cohesion achieved by*

thematic progression as well as the text's process and participants" for the sake of examining translation equivalence (ibid.).

The second study is an M.A. thesis by Zedníčková (2010). It examines the composite of ideology and discourse in Christian religious texts which function as a source of ideology and can also be used for ideology reproduction. Three questions are answered in the practical side of the study:

1. What kind of ideological discourse structures do the New Testament epistles use? ;
2. Is there legitimation and de-legitimation present in these epistles? ;
and
3. Are these religious texts a source of manipulation?

The third study is an unpublished Ph.D dissertation by Al-Jazrawi (2004) at the University of Baghdad. This study investigates texts from Christianity, in particular Suter's *The Book of English Collects*(1940), and Islam, namely 'الدعاء المستجاب' by Ahmad Abdul Jawad (1978), as regards a special type of prayer called 'the collect/brief'. This type is a short one uttered by "*the minister on behalf of a worshipping congregation, and it is usually connected with a particular occasion*" (ibid.: vi). The short 'du'aa' is its nearest equivalence in Arabic but uttered at any time not necessarily by imam in the ritual prayer. The study aims to discover how such texts are composed at four levels (i.e., lexis, syntax, style, discourse). It pays attention to diachronic development of these short texts. A mixture of models is selected to achieve the aims and fulfil the hypotheses of the study: Ferguson (1976), Halliday & Hasan (1976), Thornborrow & Wareing's (1998), and Crystal & Davy's (1969).

The fourth study is another unpublished PhD dissertation by Ahmed (2012) at the University of Baghdad. It studies etiquette teachings in the Bible and Prophetic Hadiths through applying the general framework of politeness theory, in particular, Brown & Levinson's (1987) model, to cover areas like: marital relationships, interpersonal relationships, children-parents relationships, and relations with the neighbours. The

study incorporates politeness theory and the speech acts theory within the etiquette teachings. In addition, a specific focus is directed towards the practices of social marking and politeness strategies used in the texts selected in each language (ibid.:1ff).

2.4.3 AṢ-Ṣaḥīfatus-Sajjādīyah

For more than thirteen centuries 'AṢ-Ṣaḥīfatus-Sajjādīyah' has gained worthy significance among Muslims. Its authorship is attributed to ʿAlī Ibnul-Ḥusayn (d.9/712-4), the great grandson of Prophet Muḥammad (PBUH), and fourth Imām in the Twelver Shīʿī School of Islam.

The Ṣaḥīfa invites its readership to indulge into:

...the depths of goodness inherent in the human being as it serves as a treatise of instruction in the development of the human self. God, as the Object of the Ṣaḥīfa portrays the most noble rank befitting humanity, serving as both a Means and the Ultimate goal for the culmination of human beauty (Dhalla,2012:2).

Below is a description of some aspects of this treatise.

2.4.3.1 Overview and Background

Chittick (1988:3), the well-known translator of the Ṣaḥīfa, considers this manual of spiritual ethics the oldest text in the Islamic traditions, rituals, theology, history, and thought. It has become the part and the parcel of the identity and lives of its users. It is described as one of the deepest veins of Islamic spirituality (ibid.:24, 30). Such vein sustains and nourishes the minds and souls of the community using it. The spirit of Shīʿī faith shines through the Ṣaḥīfa. The Shīʿī community has transmitted the Ṣaḥīfa generation after generation as their book for worship, as one manual of major themes in faith, and as guide of the duties towards God, their society, and each other. Therefore, it covers a great variety of topics; praise of God and worship of Him, prayers for help and protection in times of stress and difficulty, pleas for God's forgiveness, petition for His grace and blessing, etc. (Dhalla ,2012:64ff).

The historians differed over the place where Imām ʿAlī Ibnul-Ḥusayn was born. They believed he was born either in Kūfa or Medina. Al-

Qarashi (2000:14) thinks he was born in Kūfa. This is because the narrators and the historians mentioned that he was born two years before the death of his grandfather (P B U H). It is certain that Imām al-Ḥusayn and his family were in Kūfa along with Imām ʿAlī. None of them lived in Medina throughout his succession (to authority). They also differed over the time he was born. Yet, the Twelver Shiʿites believe that he was born on Thursday, the 5th of Shaʿbān in the year (38 /658-9) (ibid.).

He grew up under the direct guidance and supervision of his father, Imām al-Ḥusayn, the grandson of Prophet Muḥammad (PBUH). In (61/680) witnessed the tragedy of Karbalā and its massacre. After the events of Karbalā and his captivity to Damascus, the Imām returned to his Medina where he stayed there until his death (65/713). In that place of Medina, he kept himself aloof from politics and devoted himself exclusively to worship. Worship was his only means to teach and his children, his family, and followers the principles of spiritual growth needed greatly those times (ibid.:159). He dedicated his life to educating and his children, his family, and followers the resistance to the oppressive rules of his time through these acts of worship or spiritual ethics. The Ṣaḥīfa was also intended to be a vehicle of repentance, providing the means to purify his followers of any guilt (ibid.:167-169, 531-534, 653-657; Dhalla,2012:22f).

2.4.3.2 Authenticity of the Ṣaḥīfa

The question of the authenticity of the Ṣaḥīfa and the reliability of the individual texts in the manual would need a separate study of great proportions. This certainty falls outside the scope of this study. However, to test these questions, Dhalla (ibid.:47ff) investigates in detail these two issues. Three steps are nominated in this approach: 1.Looking for the meanings and usage of the word 'ṣaḥīfa'; 2.Analysing linguistically the text; and 3.Conducting a traditional analysis followed in evaluating texts in Arabic. They are briefly discussed below.

2.4.3.2.1 Meanings and Usages of the Word 'Ṣaḥīfa'

ابن منظور (d.711/1311) states that the word 'ṣaḥīfa' is used to mean something which is written upon. It can also mean a book or something that is written upon but between two covers. Dhalla (2012:48) also refers to the opinion of Lane (1984) who adds that it may be a volume, a letter, or an epistle. Watt (1961, in Dhalla,2012:48f) also adds that it may be applied to a fragment of the Qur'ān or Ḥadith or any other document of a solemn nature. An example of this early usage is documented in Qur'ān with the meanings of 'books, scrolls, scriptures' and 'records' (ibid.). Another example is demonstrated which clearly shows that in the early period of the first century, the word 'ṣaḥīfa' is used to mean manuscripts that keep and include Ḥadith of the Prophet (P B U H) (ibid.:49).

2.4.3.2.2 Linguistic Analysis of the 'Ṣaḥīfa'

Due to such analysis, the Ṣaḥīfa exposes variation in style and language structures used for the different themes. A common point that exists is the constant and direct reference and text allusion to the Qur'ān and Ḥadith. Though such reference and allusion are seen in other sources, yet in the Ṣaḥīfa such usage demonstrates strong and intimate knowledge and familiarity with two bases (ibid.:50ff). Consider the following extracts:

1. The theme of 'God's mercy' predominates, as Chittick (1988:26f) states. When the worshipper is faced with either the scene of mercy or wrath, he is definitely seeking one and avoiding the other. This pattern is set in the Prophet's saying:

"اللَّهُمَّ اَعُوذُ بِرِضَاكَ مِنْ سَخَطِكَ ، وَبِمُعَافَاتِكَ مِنْ عُقُوبَتِكَ ، وَاعُوذُ بِكَ مِنْكَ...."

"Oh Allah, I seek refuge in Thy good pleasure from the displeasure and Thy pardon from Thy punishment. I seek refuge in Thee from Thee" (Dhalla,2012:50-53).

It is to be remembered that 'God's mercy' is His essence and His wrath is only accidental. Allusion to such sources is present in the ṣaḥīfa where the Imām is seeking asylum with God:

"اللَّهُمَّ اِنْ تَشَاءُ تَغْفِرْ عَنَّا فَبِفَضْلِكَ ، وَ اِنْ تَشَاءُ تُعَذِّبُنَا فَبِعَذْلِكَ فَسَهِّلْ لَنَا عَفْوَكَ بِمَنِّكَ ، وَ اَجِرْنَا مِنْ عَذَابِكَ بِتَجَاوُزِكَ ، فَإِنَّهُ لَا طَاقَةَ لَنَا بِعَذْلِكَ ، وَ لَا نَجَاةَ لِأَحَدٍ مِنَّا دُونَ عَفْوَكَ...."

"O Allah, if Thou wilt, Thou wilt pardon us through Thy bounty and if Thou wilt, Thou wilt chastise us through Thy justice. So make our ways smooth to Thy pardon through Thy kindness and grant us sanctuary from Thy chastisement through Thy forbearance, for none of us has the endurance for Thy justice and none of us can reach deliverance without Thy pardon!" (Ṣaḥīfa Text no.10, translated by Chittick,1988:83f).

2. The employment of 'سجع' (i.e., Arabic rhyme) is a distinguishing feature in the ṣaḥīfa for the following reasons (Dhalla,2012:50ff):

- Its use refers to an exceptional proficiency in composing and rhetoric;
- It strengthens eloquence coloured in the text;
- It may help Rs memorise some parts of the text easily; and
- Its use harmonises the flow of the text.

The extract above shows 'سجع' clearly. Consider the underlined parts of the words in the extract.

2.4.3.2.3 Traditional Analysis of the Ṣaḥīfa

In evaluating transmitted texts, Islamic scholarship follows two-fold tradition:

- First by studying critically the chain of transmitters of a certain text. This is known as 'سند'; and
- Second by studying critically the content or subject matter of a certain text. It is known as 'متن' (ibid.:58).

The authenticity of a text will be evaluated according to some lines and through using some terms. In case the chain of transmitters is interrupted or broken (i.e., منقطع), then the text authenticity is questioned. If, on the other hand, the subject matter of the evaluated text contradicts the core of the Qur'ān and Ḥadith or reason (i.e., عقل), or its language does not belong to the supposed language and its features at the time of its originating, it is not to be accepted as authentic.

Further, the authentic reporting of a text (i.e., صحيح) is divided into two categories: the متواتر (i.e., multiple successive lines of transmission) and the آحاد (i.e., single lines of transmission) ⁷. Ḥadith scholars, legal

theorists, theologians, exegetes, and linguists apply this system of authenticity of texts and documents (i.e., إسناده) in their works (ibid.:58). In light of this, scholars who have explained, exploited, and interpreted the Ṣaḥīfa claim that their chains are متواتر. This is evident in the opinions of most scholars in this field (ibid., al-Qarashi,2000:379).

The most popular and undeniably main chains of authorities of the Ṣaḥīfa are the two sons of the fourth Imām; Muḥammad al-Bāqir bin ʿAlī Ibnul-Ḥusayn (d.114/732) and Zayd bin ʿAlī Ibnul-Ḥusayn (d.122/739). The author of the present Ṣaḥīfa dictated the work to his two sons. It is strongly claimed that the Ṣaḥīfa is firmly confirmed by over fifty-six thousand authorities (al-Qarashi,2000:379f).

Moreover, the wording and narration of the Ṣaḥīfa suggest that it has been transmitted both orally and in the written form. That is, some indicators are used to refer to (in) direct transmission through unbroken chains. Some of these are (Dhalla,2012:60f):

- ' حَدَّثَنَا ' (meaning 'he related/narrated to us'), which is an indicator that he is reporting directly from his sources as opposed to the words;
- ' عَنْ ' (meaning 'from'), which allows the possibility of indirect transmission;
- ' أَخْبَرَنَا ' (meaning 'he informed us') which is a technical term used by narrators to indicate that they are transmitting from a written document;
- the words ' قَرَأَهَا عَلَيَّ وَأَنَا أَسْمَعُ ' (meaning 'he recited it to him while I was listening') also used in the chains explicitly suggests that the Ṣaḥīfa was being circulated and transmitted in written form; and
- verbs such as ' سَمِعْتُهَا ' (meaning 'I heard it') also suggest that the transmission of the Ṣaḥīfa is through unbroken chains.

To sum up, there is no doubt concerning the integrity and authorship of the Ṣaḥīfa. Howarth (1991:19, in ibid.:63) claims that *"the value of the book [i.e., the Ṣaḥīfa] cannot be divorced from the history and personality of Zayn al-ʿĀbidīn himself"*.

2.4.3.3 A Sample of Previous Studies

A noteworthy group of scholars have considerably paid attention to some aspects of Shī'ī School of Islam. Dhalla cites names of some of these scholars: Rudolph Strothmann (1877-1960), Louis Massignon (1883-1962) and Henry Corbin (1903-1978), Etan Kohlberg, M.A Amir-Moezzi, Farhad Daftary, Moojan Momen, Ḥusain M. Jafri, Heinz Halm, Wilferd Madelung and others.

The Ṣaḥīfa, within the same line of thought, has not received that share of modern academic scholarship and in-depth study it deserves. Two studies are theses at the University of Birmingham, College of Arts and Law, Department of Theology and Religion. The first is Howarth's M.A. thesis (1991) entitled 'Zayn al-ʿĀbidīn's Ladder: An Exploration of Imam ʿAlī ibn Ḥusayn's Al-Ṣaḥīfat al-Kāmilat al-Sajjādiyyah'⁸.

The second M.Phil. thesis is the one by Dhalla (2012) at the University of Birmingham, College of Arts and Law, Department of Theology and Religion. It attempts to reconstruct the context of the Ṣaḥīfa based on the fact "*that to understand a text is to follow its dynamics, its movement from what it says to that which it discloses, including a biography, investigation into authenticity, an exploration of style and themes,...*". To attain this goal, Dhalla applies the 'Reader Response Theory'⁹ to approach the work through the setting within which the Ṣaḥīfa emerged, the motives behind its production, changes in literary style, shifts in vocabulary and phrasing, breaks in continuity, etc.

There are two recent research papers. The first is an article by Poor (2013:2473ff) studying 'implicit metaphor'¹⁰ in the Ṣaḥīfa. In this kind of metaphor, "*...the literal referent crosses the boundary of the sentence and appears in the co-text or context of a given text*"; i.e., the literal referent is not included in the sentence, which is the case with explicit metaphor. Thus, implicit metaphor requires "*more inferencing between sentences, or between sentence and context,...*" (Stern, 2000:1ff). An illustration extract from the Ṣaḥīfa is given below:

"... وَ أَغْمِ أَبْصَارَ قُلُوبِنَا عَمَّا خَالَفَ مَحَبَّتَكَ ، وَ لَا تَجْعَلْ لِّشَيْءٍ مِنْ جَوَارِحِنَا نُفُوداً فِي مَعْصِيَتِكَ .
اللَّهُمَّ فَصِّلْ عَلَى مُحَمَّدٍ وَ آلِهِ، وَ اجْعَلْ هَمَسَاتِ قُلُوبِنَا ،...."

"... blind the eyes of our hearts toward everything opposed to Thy love, and set not in any of our limbs passage to disobeying Thee! O God, bless Muhammad and his Household and assign the whisperings of our hearts," (Ṣaḥīfa Text no.9, translated by Chittick,1988:82).

The other paper is by Dastjerdi, Shahrokhi, & Pirmoradian (2013: 3246-3254) who attempt to study those procedures the translators of the Ṣaḥīfa follow in their translating it. This paper tries to answer the question: Are the metaphors used in the work under investigation translated into English literally or freely? It is proved that most of the metaphors selected in the sample are translated literally, whereas some of them freely.

Some Arabic prominent academic studies of the Ṣaḥīfa are also available. An M.A. Stylistic study is conducted by فضالة (2002) of the most prominent features in Ṣaḥīfa. It focuses on those patterns that attribute their source to only this Ṣaḥīfa, which result in its aesthetic value.

Another unpublished M.A. thesis is written by كاظم (2003). It examined the structure of 'sentence' in terms of Arabic rhetorically-oriented semantics. Issues like fronting, ellipsis, (in)definiteness, (un)segmentation, tense, etc., are handled.

Poetics is studied in the speech of Imām ʿAlī Ibnul-Ḥusayn by محمد in his unpublished M.A. thesis (2006). The study has made use of the efforts of 'الرجائي' to explore the phenomenon of 'poetics' at two levels: semantics and phonology.

A fourth unpublished M.A. thesis is by حسن (2011) which investigated epistles, treatises, speeches, and sayings of Imām are investigated through the following lines: verbal sentence structure, passive structure, (in)completeness, conjugation, negative and declarative structures, restricted or non-restricted simple and compound nominal sentences, conditional sentence and its patterns, etc.

The unpublished M.A. thesis of العزاوي (2014) considers cohesion in the Ṣaḥīfa at three levels:

1. phonological in issues like سجع (Arabic rhyme), جناس (paronomasia)¹¹, تنغيم (intonation).
2. lexical represented in repetition, synonymy, parallel structures, lexical collocation, antonym, part-to-whole and whole-to-part relations, etc.
3. grammatical which studies anaphora, ellipsis, linking particles, etc.

A recent M.A. thesis is conducted by عبد الزهرة (2016). It studies the Ṣaḥīfa pragmatically through intentions of its discourse, its context, the prominent speech acts, etc.

To sum up, the rhetorical, literary, linguistic, etc. qualities of the Bible and Ṣaḥīfa have not completely put into study, exploration, and investigation in the light of the new theory of rhetoric; RST, either by themselves or compared to other religious manuals or texts. The present study is initiative in this respect. Space and time are still open to much future efforts.

Notes to Chapter Two

1. 'discourse', and 2. 'text' are used here in the more common sense employed in most of the literature reviewed. They are interchangeable regardless of the medium and channel or product and process. See Chapter Three for the strict sense that this study adopts.

3. Taboada (2006b:450) argues that *"The name Rhetorical Structure Theory has been criticized in the literature by three groups. One complains that Rhetorical is never related to classical rhetoric. A second suggests that a non-standard meaning of Structure is being used. The third group points out that RST is thoroughly descriptive and does not put forth a causal Theory. All of these are commendable, valid arguments. The name of RST was chosen as a phrasal unit, distinctively best out of a collection of suggestions"*.

4. 'Discourse marker' is used in a loose sense as adopted by Taboada (in Renkema, 2009:129) *"to refer to any conjunction, adverbs, adverbial phrases or other types of phrase that frequently links two or more units of discourse"*.

5. Cue phrases have received different names: coherence markers, discourse connectives, or discourse markers.

6. 'speakers/hearers' and 'Ws/Rs' will be used interchangeably. It is arguably the case that most of what can be said about coherence relations applies equally to spoken and written discourse.

7. A متواتر report is one that is transmitted by a large number of narrators that it would be impossible for them all to have agreed to fabricate it. Scholars are not agreed as to the minimum number of transmitters that constitutes متواتر.

8. The researcher could not find this M.A. thesis in University of Birmingham's e-theses repository. He could not also find a paper- or a pdf-version of it.

9. This is a theory of literary criticism rejecting the new critical position which concentrates on the text and thus excludes the R. 'Reader Response Theory' spotlights responses of readers to literary texts (Childs & Fowler, 2006:196ff; Tyson, 1999:153, 163ff).

10. Implicit metaphor is a type of metaphor that compares two unlike things, but it does so without mentioning one of them. Instead, it implies the comparison by using a word or phrase that describes the unmentioned term and makes the comparison in that way; it does not use a linking verb, so one term of the comparison is implied (Steen, 2007:66ff; Kövecses, 2002:29ff, 43ff), as in: 1. Hatred is an infection of the mind. (ordinary metaphor) and 2. Hatred infects the mind. (implicit metaphor).

11. Some translators prefer to use other alternative: alliteration, anaphora, homonymy, homophony.

CHAPTER THREE

FRAMEWORK OF ANALYSIS AND DATA DESCRIPTION

The idea that rhetoric finds its place in text patterns emerges strongly from RST which has developed a descriptive framework for relations between parts of text. This chapter is devoted to present the framework of analysis adopted in the study. It states the foci and objects of analysis, theories adhered to, and the components of the final framework. It also describes the data used in the study, criteria of selection, analysis, text segmentation, and RST relations and their marking.

3.1 Framework of Analysis

In order to start analysing the selected texts and to achieve the aims and hypotheses stated earlier, the present study is based on two cornerstones: the first is 'The Generic Structure' developed by Hasan (in Halliday & Hasan, 1989), and the second one is 'The Structure of Discourse' through its 'Linguistic Structures' developed by Gylling (2013). Reference has been made in the previous chapter (see sec. 2.3.2.1) to the argument of Mann, Matthiessen, & Thompson (1989) concerning the nature of the term 'structure'. This term denotes three kinds of structure: holistic, relational, and syntactic structures. They also refer to the interface between these kinds, though RST is primarily a relational-structure theory.

They believe that no attempt is made to incorporate the accounts of holistic and syntactic structures into RST. They allude to the possibility of approaching RST analysis from the perspective of other supporting theories which can act, in their opinion, as *"components of an account rather than as monolithic"* (Mann, Matthiessen & Thompson, 1989:5, note 3). Consider their argument:

*While we do not select any particular theory of holistic structure, **the systemic theory of generic structure**, Hasan*

(1978), Halliday & Hasan (1988), or macrostructure theory, van Dijk (1972), van Dijk (1977), van Dijk (1980) offer possibilities. In each case the theory provides much more than just a correlate of holistic structure. RST also has strong interactions with **independent theories of Thematic Structure**, i.e. the establishment and maintenance of topics, and with Exchange Structure, i.e. dialogue structure,...[emphasis mine](ibid.).

The call for inclusion of insights from theories of holistic structure and syntactic structure is also obvious in their announcing (ibid.:45f):

RST also has not yet been related to all of the kinds of theories with which it should interact. Theories of holistic structure and syntactic structure are the most obvious cases; elaboration in both directions would be helpful. In these cases the need can only be partly met by augmentation of RST, since one really needs to connect to theories that are functional in the same effects-oriented sense that RST employs.

They call for a complex mixed strategy of RST to also include information flow and thematic structure. In addition, the realisation of Rhe Rs, ranging from signalling to unsignalling cases, remains to be searched for in RST, which is "pre-realizational, since it makes statements about how such meanings and intentions are structured and combined, but not about how they are realized"(ibid.:8). Below is a detailed discussion of each cornerstone to show the points of common ground they share before the step of merging them together to get one particular framework for this study exclusively.

3.1.1 Hasan's Generic Structure (1989)

In the previous chapter reference has been made to genre and its recognition that this study adopts. Genre is a structurally determining characteristic of texts. A particular text belongs to a genre because of its structural features, that is, its staging. What criteria would be used to establish generic identity seems a reasonable question to search an answer for. This question refers to:

1. The features of a text that must be available and must be held constant to make its generic classification constant, too.
2. The features of the text that can vary to allow constructing variant texts, without varying the genre.

3.1.1.1 Contextual Configuration and GSP

Hasan (in Halliday & Hasan, 1989:108) argues that what counts as one genre is the logical relation it bears to 'contextual configuration' (henceforth CC). Genre is the verbal expression of CC; *"If CC is a class of situation type, then genre is language doing the job appropriate to that class of social happenings"*. This illuminates to what Eggins & Martin (1997:236) state: *"different genres are different ways of using language to achieve different culturally established tasks, and texts of different genres are texts which are achieving different purposes in the culture"*.

To get into Hasan's generic structure a discussion of CC and the values of its identity is necessary.

A CC is significantly related to the three aspects of social situations of speech community members: field, tenor, and mode. These aspects always act upon the language in use¹ (see also sec. 2.1.2 for a brief gloss of these terms). Each one of them can be looked at as having a set of specific values. Each can also act as *"a point of entry to any situation as a set of possibilities-or, to use a technical term, OPTIONS [capitals in the origin]"*. For instance, field as a variable would possibly have the value 'praising' or 'blaming'; tenor may have 'parent-to-child' or 'employer-to-employee', and mode can allow for 'speech' or 'writing'. Therefore, *"a CC is a specific set of values that realises field, tenor, and mode"*. In addition, the features of the CC are to be invested in making some predictions about the structure of text. The predictions can be:

- the elements that must occur (i.e., obligatory);
- the elements that can occur (i.e., optional);
- where must they occur (i.e., sequence);
- where can they occur (i.e., sequence); and
- how often they can occur (i.e., iteration).

In line with this, a CC can predict the obligatory and optional elements of a text's structure, their sequence in relation to each other, and their iteration. An element is a stage with some consequence in the progression of a text (Hasan in Halliday & Hasan, 1989:55f).

It is noticed that CC is significant due to its relation to the culture it belongs to. Hasan shows this indirect relation diagrammatically as in figure 3.1 below (ibid.:99f):

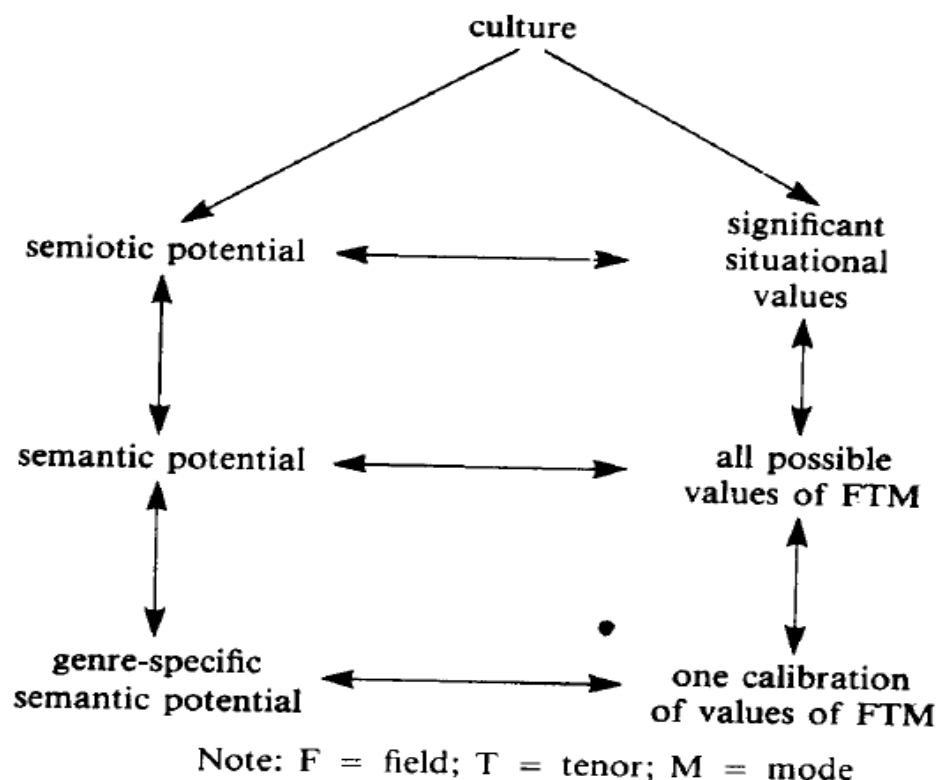

Figure (3.1): Culture, meaning, and situation (by Hasan, in Halliday & Hasan, 1989:100).

Culture stands as higher abstraction the realisations of which are the left and right columns. The slanting arrows represent this relation on three layers. Culture, therefore,

is itself more specifically describable as an integrated body of the total set of meanings available to a community: its semiotic potential. Any meaning system is part of this resource. The semiotic potential includes ways of doing, ways of being, and ways of saying.

The first layer of these three, 'semiotic potential', looks at culture as referring to the totality of what is meaningful available to the community; i.e. the set of meanings formed by the various semiotic systems which cover the ways of being, saying, and doing stated earlier as the three general modes of meaning. Hasan (ibid.:101) believes that *"These formed meanings construct significant situational values; and it is the operation of the semiotic systems that permits the perception of what is or is not a significant situational variable"*. The arrow horizontally linking the two entries of this layer refers to a bi-directional relationship between them. The left-column element serves the needs of the second one; equally the right-column element exists and acquires its status because of the left one.

The second layer is linked to the first one by vertical arrows to indicate that it is a subset relation. This layer has 'semantic potential' as a subset of 'semiotic potential'. It refers to those meanings that language can form and express (ibid.:101f). It is at this layer that saying is separated from both being and doing. The right column at this level is devoted to the possible values of field, tenor, and mode. These variables are *"...encapsulated into the text through the simultaneous encoding of the experiential, interpersonal, and textual meanings"*.

The third layer is limited to the concept of CC which is taken as one particular *"calibration" of the values of field, tenor, and mode. A particular CC can be unique through the set of meanings associated with it.*" Hasan refers to this set of meanings as *"genre-specific semantic potential"* (ibid.:102). A CC can also be thought of as *"...the expression of a type of situation"* that can be instantiated by many instances. The word 'potential' in 'genre-specific semantic potential' suggests the notion of variation; *"The semantic potential is a potential because it can be stated as a resource - as a range within which variant selections are possible"* (ibid.).

It is worth mentioning that meanings in 'genre-specific semantic potential' are of two general kinds: meanings as components of particular messages within the genre and meanings relevant to the overall message form of the text. Examples of the first kind are specific to certain

individual messages such as, for instance, 'two apples' as opposed to 'one apple'. The second kind of meanings is related to those which are expressed as GSP. Both types are related in that individual messages can be part of the overall message form of the text. Meanings of the first kind are thus included within the range of the second one. Hasan's GSP appears to rest on a type of criterial attribute categorisation:

The GSP becomes pivotal in any discussion of the identity of a CC and we may claim that only those values of field, tenor, and mode are defining for the identity of the CC that are motivationally related to the elements of its GSP. If the CC has these values, then these elements will appear in any text embedded in this CC; if these elements appear in any text, these values of the CC can be inferred from it (ibid.:103).

What is proposed by Hasan is the idea that a GSP can have a number of actualisations; i.e. the possible structures that can be actualised. One instance of actualisation is referred to AGS (ibid.:64f). The AGS of a text is the actual series of functional stages which appear in that text while the GSP is the whole potential range of structures for a particular genre, not all of which, presumably, are likely to appear in one particular example of a genre.

From the GSP, Hasan (ibid.) further identifies obligatory elements; those functional stages which are necessary for a text to be identified as an example of a certain genre. They are the genre-defining functional stages that cannot be left out. Hasan claims that the obligatory elements place restrictions on the types of semantic values which may be selected as the language which operates within that genre: *"One need not know all the details of a particular situation in order to be able to say what the overall structure of the message should be"* (ibid.:105). This restriction which operates on semantic choices within a genre is termed 'genre-specific semantic potential', stated earlier. She allows that, within one type of genre, texts can exhibit a variety of structures, although certain semantic elements are obligatory: *"the one respect in which they cannot vary without consequence to their genre allocation is the obligatory elements and dispositions of the GSP"* (ibid.:108). The obligatory

elements which constitute a genre are defined in semantic rather than lexico-grammatical terms: "... since (1) the range of meanings have variant realisations; and (2) the more delicate choices within the general area is not a matter of generic ambience" (ibid.:113).

A text example cited by Hasan (ibid.:54) is introduced now with an account of its context, the values of the three variables nominated above in the three layers, its structure, and the GSP with its actualisations.

Text 1:

C: *Can I have ten oranges and a kilo of bananas please?*

V: *Yes, anything else?*

C: *No, thanks.*

V: *That's all be dollar forty.*

C: *Two dollars.*

V: *Sixty, eighty, two dollars. Thank you.* (C= Customer; V= vendor)

A. The values of the three variables for this text and its context are (ibid.:56ff):

1. *The field of discourse*: the goal of acquiring some food in exchange for money. This is buying which implies selling.

2. *The tenor of discourse*: the roles of the C and V are clear in this text.

Agent roles are also related to the degree of control (or power) exercised by one participant over another. The agent roles construct 'dyads' which may be hierarchic or non-hierarchic. A hierarchic dyad indicates that one agent has a greater degree of control over the other. The non-hierarchic dyad refers to a peer-hood relation, such as those of acquaintanceship, friendship, indifference, and rivalry. In this text, the dyad is hierarchic where the customer exercises his power over the vendor within the range of this social activity. The vendor is in the position of 'soliciting' in order to sell his goods. Hasan states: "*It is important to recognise that control may shift from one agent to the other, and that a person carrying a subordinate hierarchic role in the agent dyad is not necessarily submissive* (ibid.:57)."

Another important factor is the social distance between the C and V which may be maximal or minimal. A maximal distance happens when the participants know each other through infrequent encounters. The distance would be less if the two participants are in a relation; *"The more minimal the social distance, the greater the degree of familiarity between the carriers of the role"* (ibid.). Therefore, the social distance between the C and V in this text is near maximal.

3. *The mode of discourse*: it is noticed that the language role in this text is ancillary since it accompanies the social activity of exchanging goods for money. The process of sharing of text creation is active between the C and V for they engage in a dialogue. The channel used is phonic. The medium employed is spoken with visual contact of the two participants.

B. The CC of this text would look like (ibid.:59):

Field: Economic transaction: purchase of retail goods: perishable food...

Tenor: Agents of transaction: hierarchic: customer superordinate and vendor subordinate; social distance: near-maximum...

Mode: Language role: ancillary; channel: phonic; medium: spoken with visual contact...

C. The structure of this text would be (ibid.):

1. Obligatory Elements (i.e. obligatory functional stages):

SR = → [Can I have ten oranges and a kilo of bananas please?
 SC = → [Yes, anything else?
 [No thanks.
 S = → [That'll be dollar forty.
 P = → [Two dollars.
 PC = → [Sixty, eighty, two dollars. Thank you.

Figure (3.2): A Sample of Obligatory Elements.

Five obligatory elements are seen in this text. They are: Sale Request 'SR', Sale Compliance 'SC', Sale 'SL' ², Purchase 'P', and Purchase

Closure 'PC'. These five can be displayed in the following order: **SR^SC^S^P^PC^**, with the sign ^ indicating the order of the elements (ibid.:60f).

2. Optional Elements: Such elements can be presented in relevant to another text assuming the same CC of text 1 above (ibid.:61).

Text 2:

1.	Who's next? (1)	
2.	I think I am. (2)	→SI
3.	I'll have ten oranges and a kilo of bananas please. (3)	→SR
4.	Yes, anything else? (4)	→SC
5.	Yes.	
6.	I wanted some strawberries (5) but these don't look very ripe. (6)	
7.	O they're ripe all right. (7) They're just that colour kind a'	
8.	greeny pink. (8)	→SE
9.	Mm I see. (9)	
10.	Will they be OK for this evening. (10)	
11.	O yeah, they'll be fine; (11) I had some yesterday (12) and	→SE
12.	they're good very sweet and fresh. (13)	
13.	O all right then, I'll take two. (14)	→SR
14.	You'll like them (15) cos they're good. (16)	→SE
15.	Will that be all? (17)	
16.	Yeah, thank you. (18)	→SC
17.	That'll be two dollars sixtynine please. (19)	→S
18.	I can give you nine cents. (20)	→P
19.	Yeah OK thanks (21) eighty, three dollars (22)	
20.	and two is five. (23) Thank you. (24)	→PC
21.	Have a nice day. (25)	
22.	See ya'. (26)	→F

Figure (3.3): A Sample of Optional and Obligatory Elements.

The following general notes on this presentation are registered here: boundaries of elements are shown by dotted horizontal lines; the labels for structural elements (i.e. stages) are referred to by the initials in the right-hand column; individual messages of the text are indicated by numbers within round brackets; and numbers in the left-hand column are of the successive turns in the dialogue between V and C (ibid.).

The same five obligatory elements in text 1 are also seen here in addition to several other elements. The starting point of the text is Sale Initiation 'SI' realised by the first and second messages. 'SI' acts as an optional element in the sense that in its absence, a text would still be interpreted as embedded in CC1, of text 1, since obligatory elements are there. The existence of obligatory elements is the defining principle for the genre to which the text belongs. Hasan (ibid.:62) believes that:

*To say that some elements may be optional is not the same as saying 'anything goes'. The finite set of optional elements that can possibly occur in texts of the genre under focus can be stated quite definitely. By definition, an optional element is one that **can** [emphasis in the origin] but is not obliged to occur. The conditions under which there is a high probability of its occurrence can be stated.*

One of the conditions of 'SI' to occur is in a crowded store or queue where customers need attention. The context of this social activity is thus viewed as another variant of CC1 since there is no sufficient ground for believing that the CC has changed its character in whole.

3. Iterative Elements: Iteration means how often elements can occur. It happens when a particular element or set of elements occurs more than once in a text. Linguistically, this phenomenon is always optional and can be relatively predicted from any attribute of the context of situation. 'SR' and 'SC', being originally obligatory, can be iterated as indicated in text 2 above. Their iteration can be predicted on two assumptions (ibid.:63):

1. it is possible that the C does not remember all what is needed at once; and/or
2. the V may show his readiness to meet the needs of the C in order to invite more SRs. This acts as an incentive to further SRs.

Sale Enquiry 'SE' is also iterated since the C want to make sure that the required goods or services are of the type desired. Repeated enquires are initiated because (ibid.):

1. the phenomena possess more than one attribute; and/or
2. any one of these attribute can be discussed and elaborated upon.

D. The GSP and its actualisations are:

A GSP can have a number of AGSs. The two texts discussed above have two points of similarity: they are embedded in the same CC and they share the same set of obligatory elements (ibid.). It can be said that in both texts language is doing the same kind of job; assisting the participants in the process of buying and selling. Yet, differences are there but not of the kind that alters the job the text language is doing. It is possible for some elements to occur, as in text 2, but they need not be available in other texts in the same context (ibid.:64). It is also quite possible to express both obligatory and optional elements together with their order in a manner that *"...exhausts the possibility of text structure for every text that can be appropriate to CC1"*. This is exactly what is

stated by GSP, or its interchangeable acronym (SP) for structure potential.

Accordingly, the GSP for CC1 looks like:

$[(G) \cdot (SI)^{\wedge}] [(SE \cdot) \{SR^{\wedge} SC^{\wedge}\}^{\wedge} SL^{\wedge}] P^{\wedge} PC^{\wedge} (^{\wedge}F)$

Sequence is indicated by the labels for structures and the caret sign $\wedge$. Optionality of the elements (G) for Greeting, (SI), (SE), and (F) for Finis is referred to by round brackets. The dot $\cdot$ between elements refers to more than one option in sequence. There is a condition that limits the optionality, which is not equal to complete freedom. This restraint is indicated by the square brackets. Consider the reading of the first bracket by Hasan:

"• G and/or SI may/may not occur;

• if they both occur, then either G may precede SI, or follow it;

• neither G nor SI can follow the elements to the right of SI." (ibid.)

Iteration is marked by the curved arrow. For instance, $(SE \cdot)$ means that (SE) is optional; can occur anywhere, so long as it does not precede (G) or (SI) and not follow P or PC or (F); and can be iterative. Using the braces with a curved arrow $\{ \}$ indicates that the degree of iteration for the elements within the braces is equal. For instance, if SR occurs twice, then SC must be iterated two times (ibid).

This powerful devise, GSP, permits, by its nature, a large number of possible actualised structures. An instance of a GSP actualisation is called as AGS. Texts 1 and 2 are two AGSs of the GSP stated above. The AGSs are represented below:

Text 1: $SR^{\wedge} SC^{\wedge} SL^{\wedge} P^{\wedge} PC^{\wedge}$

Text 2: $SI^{\wedge} SR_1^{\wedge} SC_1^{\wedge} SE_1^{\wedge} SE_2^{\wedge} SR_2^{\wedge} SE_3^{\wedge} SC_2^{\wedge} SL^{\wedge} P^{\wedge} PC^{\wedge} F$

3.1.1.2 Residual Issues

Some residual issues that complete the first cornerstone are stated below. These are:

3.1.1.2.1 The Status of Obligatory Elements in the GSP

It is through the set of obligatory elements that the status of a particular GSP is recognised. This is clear, Hasan (ibid.:66) claims, in the

implied observation that "...optional elements have wider applicability". She proceeds to distinguish between the two elements based upon certain kinds of operations that obligatory elements are open to. These operations are seen as strategies which ensure that:

- these obligatory elements occur;
- their realisation is adequate.

Three strategies are recognised: probe, repair, and re-align. The first strategy seems active in economic transactions. If a C enters a shop making no 'SR', the V may start saying: 'Can I help you?', or some such thing. This a familiar way of 'SI' which may provoke, on the behalf of the C, an 'SR', 'SE', or the C may only take the role of a looker-on saying: 'No, I'm just looking'. This is called probe. Hasan (ibid.) features it as follows:

It consists of some device that is calculated to bring about the kind of behaviour on the part of some (one) participant that could reasonably be read by the others as a manifestation of an obligatory element in question, or if appropriate, it may lead to a claim that the view of the CC held by the other participant should be revised.

The second strategy is activated when an obligatory element is realised but not in an adequate manner. Suppose, for instance, a buyer in CC1 says: 'I'd like some oranges', the V will take it as an inadequate realisation of 'SR' and thus proceed to the next stage with no further information. He can repair the situation this way: 'Would a 3 kilo bag be enough?', or 'Did you want navels? They are five for ninety nine'. This makes the obligatory element realised adequately.

The third strategy is fruitful when the social distance between the participants is minimal. Thus, talk in the CCs of some social activities can be oriented in different directions in face-to-face interaction. Participants may engage in discussing several topics which may bear no relevance to the matter in hand.

3.1.1.2.2 The Realisation of Structural Elements

When establishing definite ways of defining the boundaries of a text, structural elements are more desirable since it is necessary to decide on "*what part of a text realises which element*" (ibid.:67f). What is obvious

is that there is no one-to-one correspondence between a structural element and a clause or a sentence or one speaker turn or one individual message or act. In this regard, Hasan (ibid.) comments:

The search for a unit of some sort-either syntactic (for example, sentence), dialogic management (for example, turn), or message status (for example, offer-receipt),- as a universal formal equivalent of a structural element seems doomed to failure.

The reason behind this, as she believes, is that "*The text is a unit of meaning; it is language that is functional in some context*". Due to that, the elements of text structure, in the sense presented by Hasan, would not be defined unless in terms of the job they do in the CC. The realisational criteria, which need not be identical across genres, would be defined in terms of some semantic property. Consider the 'SR' that is realised by the following set of semantic properties:

- demand
- reference to goods
- quantity of goods.

It is possible for 'SE', as an optional element, to refer to the same general domain in which the participants are operating (ibid.).

3.1.1.2.3 The Inherent Variation of Context

Certain sources of context variation may lead to a change in the AGSs of texts. Context variants may be made by:

- either a move in delicacy as in 'channel: phonic: noisy'; or
- a change in values as in 'social distance: near maximal' and 'social distance: non-maximal'.

It is not necessary that a change is the result out of these sources. The first or second source can happen but may not lead to any structural variation, or a variation may be only a kind of shift in a particular situation type as to shift from CC1 to CC2 (ibid.:106).

Situations are not rigid in nature; they are permeable. There is no necessary implication that two distinct CCs are absolutely distinct. The examples of CC1 and CC2 discussed above have more in common. This

also indicates that their GSP would display some commonality. A metaphoric graphic representation of the relations between distinct CCs and between variants of the same CC is given below (ibid.:107):

Figure (3.4): Two Unique CCs and their Commonalities (by Hasan, in Halliday & Hasan,1989:107).

This figure shows two distinct CCs with their GSPs. The sets of AGSs for CC1 and CC2 would be the realisations of the possibilities captured in GSPs. The overlapping area between CC1 and CC2 shows the supposed commonalities. Consider, for instance, the social activity of 'buying': buying vegetables would be CC1 and buying a car would be CC2. In this way, such commonalities would be also reflected upon their GSPs. This can be applicable to almost any kind of CCs and GSPs, as the present study believes.

3.1.1.2.4 Levels of Textual Identity

Two or more texts might be identical. Four levels of this textual identity are presented below (ibid.:110ff):

First, 'material uniqueness' and 'verbal identity'. This refers to saying the same words on distinct occasions. Consider the following:

1-Wife: Did you put the cat out?

Husband: Yes.

(An interaction setting between the two while locking the front door).

2. Wife: Did you put the cat out?

Husband: Yes.

(An interaction setting between the two while in the kitchen).

3. Husband: Did you put the cat out?

Wife: Yes.

(An interaction setting between the two in a different place).

These three cat interactions are to be viewed as three distinct texts for each one of them has a material situation different from the other as regards time and place. Though verbally identical, they are materially 'unique'.

Second, 'verbal uniqueness' and 'structural identity'. Note these texts carefully (ibid.):

Text 3:

C: Can I have ten oranges and a kilo of bananas please?	]SR
V: Yes, anything else?	]SC
C: No thanks.	]S
V: That'll be dollar forty.	]P
C: Two dollars.	]PC
V: Sixty, eighty, two dollars an' thank you.	

Figure (3.5): An Example of 'verbal uniqueness'.

Text 4:

C: Can I have half a dozen Granny Smiths please?	]SR
V: Anything else?	]SC
C: No, that's all just now.	]S
V: Ninety cents.	]P
C: Ninety cents? Oh I think I've just the right change here.	]PC
V: Thank you sir.	

Figure (3.6): An Example of 'verbal uniqueness' and 'structural identity'.

The two texts are structurally identical; both have the AGS ($SR^{\wedge}SC^{\wedge}S^{\wedge}P^{\wedge}PC$). Yet, from the point of view of words and sentences used, the two are different. They have also been produced on different occasions. Thus, 'verbal uniqueness' presupposes 'material uniqueness', too.

Third, 'structural uniqueness' and 'verbal uniqueness'. The following text, when compared with texts 3 and 4, has different words and sentences and has different AGS.

Text 5:

V: Good morning Mrs Reid.	]G
C: Good morning Bob.	]SR
Can I have a couple of apples?	]SC
V: Is that all tcday?	]S
C: Yes, thank you.	]P
V: Sixty cents.	]PC
C: Here y'are.	]F
V: Thank you.	
Goo'day.	
C: Bye.	

Figure (3.7): An Example of 'structural uniqueness' and 'verbal uniqueness'.

It is a fact that there are no two texts which have different AGSs and can have the same words and sentences. Thus, 'structural uniqueness' presupposes 'verbal uniqueness', too. However, texts 3 and 4 and text 5 can all be taken as two possible realisations of the same GSP.

Fourth, 'generic uniqueness' presupposes 'uniqueness of actual structure'. When comparing text 5 with text 6 below, a kind of similarity is uncovered that is different from the one between texts 3 and 4. Texts 5 and 6 have the optional elements 'G' and 'F'. Optional elements are not pivotal to the generic status of texts. The texts are 'generically unique' and this presupposes 'structural uniqueness', too.

Text 6:

C: Good afternoon, Mr Berg.
 B: Oh hello, Mrs Clint. How are you?
 C: I'm very well. I um ah I just wan. . .
 I wondered if I could um have a cutting from one of your plants, you know.
 B: Oh you're most welcome, m'dear.
 Which one—you just have to say and you can have any you like 'cause y'know I'd be very happy.
 C: Oh thank you that's really great um this you know the the those that bush over there the fuschia I love those only I can't . . .
 B: Oh but that's very easy I'll set it in for you take 'bout a week—and now any time you wan' anything you just have to say—anything at all.
 C: Ah thank you, Mr Berg, that's really kind—and um I shall come over um 'bout a week's time then, shall I?
 B: Yes you do that.
 C: Well uh see you again, Mr Berg. •
 B: Yeah be seein' you.

Figure (3.8): An Example of 'generic uniqueness'.

On the contrary, the AGS of texts 3 and 4 have the obligatory parts of the same GSP. These two texts are distinct from text 6 with regard to genre.

3.1.2 Gylling's Linguistic Structures (2013)

In his PhD dissertation 'The Structure of Discourse: A Corpus-Based Cross-Linguistic Study', Gylling (2013) is much interested in linguistic structures through combining together four distinguished disciplines: contrastive linguistics, corpus linguistics, text linguistics, and discourse analysis. His study comes "*...to respond to this plea by designing a corpus-based study of linguistic structures across three different languages*" (Gylling,2013:13). The plea that he searches for here is stated quite clearly by Taboada & Mann (2006b:449):

[T]here [square brackets in the origin] are not many studies in languages other than English. Annotated corpora...would be useful in exploring realisation, frequency, and signalling of rhetorical relations. Comparisons across languages and text types – both synchronically and diachronically–would provide insights into language universals and language change.

The corpus he works upon contains the proceedings of the parliamentary debates of the European Union in their original, non-translated versions together with their corresponding official translations in the European languages.

3.1.2.1 Foci and Objects of Analysis

The study of Gylling is based on some theories and adopted some methods in order to examine linguistic structures (op. cit.:14):

- First, from a product and process point of view, Gylling follows the ideas of Functional Linguistics and SFL: Halliday & Hasan (1976), Halliday (1985), and Martin (1992). It is proposed here *"...that dichotomies such as syntactic coordination versus subordination and finite versus non-finite realisation of clauses belong to the basic structural components of syntax and text structure"*.
- Second, from a linguistic perspective, Gylling's study describes discourse structure following Mann & Thompson's (1988) RST. Interpretable Rhe Rs connect text parts which Gylling prefers to call as EDUs. Such units are *"...essentially considered to be propositions textualised as sentences, clauses and, in some cases, phrases without an explicit subject or verbal element"*. Attention is paid also to the rhetorical hierarchy of EDUs and the source of coherence which may be semantic or pragmatic.
- Third, from an informational angle, EDUs are investigated through both their intersentential and intrasentential linkage and the implicit or explicit marking of Rhe Rs. Insights of Chafe (1976, in Gylling, 2013), Fabricius-Hansen (1996, in Gylling, 2013), and Vallduví & Engdahl (1996, in Gylling, 2013)'s notions of information structure are adopted here.

Gylling's study considers equally the patterns of these three linguistic structures from an intercultural rhetoric perspective as they represent "*a particular contextually embedded persuasion style*" across three languages: Danish, English, and Italian. These main objects of analysing linguistic structures at the three levels above are combined and employed to reflect two approaches that distinguish the three concepts of 'text', 'discourse', and 'information'. The first approach, the static one, looks at text as a product regardless of how it is perceived by the Rs. The second one, the dynamic approach, considers discourse and information as a process. It investigates the W's attempt to communicate his message to the R. These two approaches are united together in Gylling's attempt to examine the use of EDUs within and above the sentence and the Rhe Rs. His six main objects of analysis are given below (Gylling,2013:15f):

- Dependency: (syntactic coordination versus subordination of EDUs);
- Realisation: (finite versus non-finite realisation of EDUs)
- Hierarchy: (rhetorical coordination versus subordination of EDUs);
- CS (SM versus PR description of Rhe Rs);
- Linkage: (intersentential versus intrasentential juxtaposition of EDUs); and
- Signal: (implicit versus explicit marking of Rhe Rs).

'Dependency' refers to the possibility of EDUs to occur inside the same sentence. They can be either syntactically coordinated or subordinated. Such units can be realised by finite or non-finite forms or verbless constructions. This is 'realisation'. EDUs can also be rhetorically coordinated or subordinated due to their co-textual salience. This is referred to as 'hierarchy'. The rhetorical relating of EDUs to other EDUs may be in terms of SM (information) or PR (intentions) relations. This is called 'CS'.

The third level has two objects: 'linkage' and 'signal'. Linkage studies EDUs which can be related within the same sentence (intrasentential) or across sentence boundaries (intersentential). The phenomenon of 'signal'

is used to indicate the explicit or implicit marking of Rhe Rs between EDUs.

The following figure illustrates these aspects which are divided into three distinct linguistic structures.

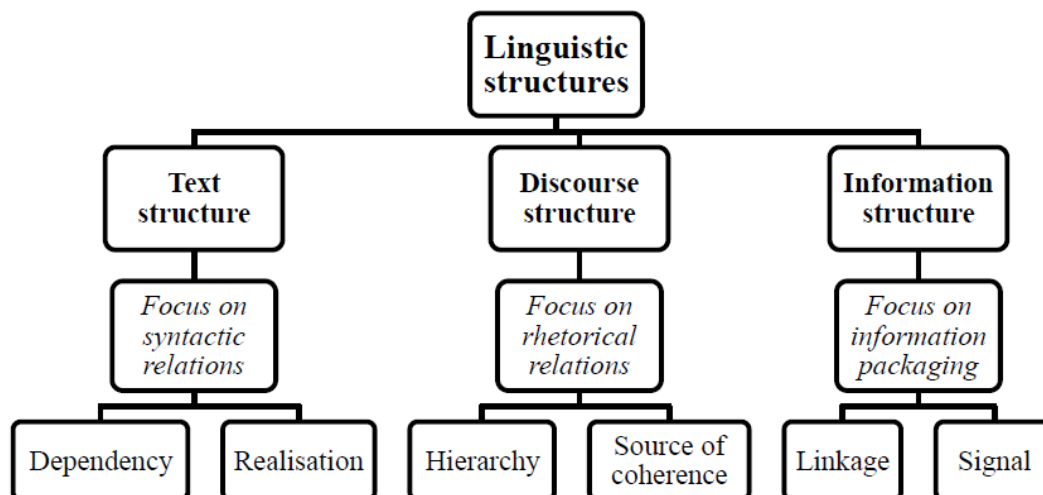

Figure (3.9): Linguistic Structures, Foci, and Objects of Analysis (by Gylling,2013:16).

As for 'text structure', it is realised through two aspects: 'dependency' and 'realisation'. 'Discourse structure' is reflected through 'hierarchy' and 'CS'. The third aspect is 'information structure'. It focuses on EDUs and Rhe Rs simultaneously through its 'linkage' and 'signal'.

This figure is operational in its division of linguistic structures. Gylling (ibid.:16f) comments:

In this way, it could be argued that information structure together with its two objects of analysis should be considered a part of text structure and discourse structure rather than a distinct structure. It could also be argued that the two objects of analysis dependency and hierarchy are so closely related to each other that it does not make sense to separate these from each other under different structural characteristics. This is true, but similar distinctions have been made by other scholars in the literature ..., and within this field of linguistics, it is very difficult to define categories that do not have overlaps. As it is, the distinction turned out to be effective in the annotation process and in the subsequent analyses.

3.1.2.2 What are Linguistic Structures?

Linguistic structures in terms of Gylling (ibid.:21) are the result of the paring of meaning and form at different levels, accounting for rules of language use, consciously or subconsciously combined by some particular-language speakers. They may be within and above the level of sentence. This work of Gylling focuses on three kinds of structures: text, discourse, and information structures. However, he claims that there is no agreement on defining them, or on setting their boundaries. The various linguistic structures interact with each other. This is clear in his revised model of the different cognitive dimensions from functional linguistics as proposed by Korzen and Lundquist (2003:11, in ibid.). Consider the figure below:

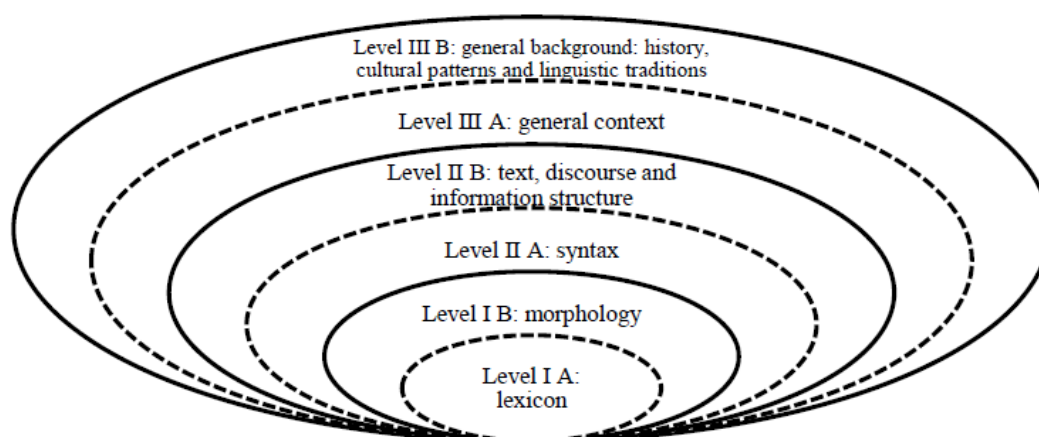

Figure (3.10): Linguistic Structures and Cognitive Dimensions (by Gylling,2013:22).

Of particular interest to Gylling is the interaction between syntax and text, discourse, and information structure. This figure uncovers the idea that communication is regarded as language shaped (moulded) as texts of different purposes in a particular context. This is the main reason behind the model having three main dimensions, with two substructures indicated by dotted lines in each. The levels in the figure are:

- the smallest level (I): the microstructure of words and phrases;
- the middle level (II): the macrostructure of sentences and whole texts; and
- the larger level (III): the context.

The result of cooperation between all these dimensions is human communication. The focus of Gylling's study is the middle level (II) B which includes structures of text, discourse, and information. Nevertheless, attention is also paid to levels (I) and (III) since the study is a cross-linguistic one aiming at correlating linguistic variation with contextual factors. In this regard, he states: *"Different languages have different syntactic patterns, which partially are result of differences in lexical and morphological features, and partially result of various contextual factors"* (Gylling,2013:22). He, in addition, supports his point of view by an argument of Longacre & Woods (1976:2, in *ibid.*) which says:

[A]ll [square brackets in the origin] work on lower levels is lacking in perspective and meets inevitable frustration when the higher levels – especially discourse and paragraph – have not been analysed ... In the view of these considerations, discourse analysis emerges not as an option or as a luxury for the serious student of language, but as a necessity.

Cognitive-functional linguistics is the framework of this study of Gylling. Though it seems odd, a combination of both approaches does not reject the idea of language as human communication in context. Such combination, Gylling states, can be seen in Langacker's belief (1991:viii, in *ibid.*) of 'a cognitive-functional conception of language' where the same axioms are the basics of the nature of language.

Added to the whole model of Gylling's are some ideas from intercultural rhetoric on how (*op. cit.*:23):

- *"texts and interpretations of texts are shaped by the world and shape the world"* (Eisenhart & Johnston,2008:11) and
- *"language and writing are cultural phenomena, different cultures have different rhetorical tendencies"* (Connor,2002:494).

The intercultural ideas adopted by Gylling help explain any variations across the languages under study with contextual factors.

3.1.2.3 Linguistic Structures and Gylling's Main Approaches

The main approaches that Gylling's model of linguistic structures is based upon are reviewed below:

3.1.2.3.1. A Cognitive-Functional Approach

The combination of the two fields of linguistics, cognitive and functional, gives some flexibility for Gylling's model as he shows. Functional linguists extend their description of language structures to include 'text' and 'context' for language basically fulfils different functions. Cognitive linguists do not qualitatively distinguish between lower-level linguistic structures (morphology and syntax) and higher-level (text, discourse, and information structures) as they are symbolic. Only in quantitative terms the distinction is valid *"...as higher levels typically are more complex structures than lower levels in that they contain more information"*(Gylling,2013.:25).

Functional linguists believe that language is used in texts that are in turn used in contexts. That is, *"language, or text, is shaped by context, and context shapes language"*. Therefore, meanings which are realised in a text occur in a situation and in a context. The relationship between text and context is clearly seen in the three situational features (field, tenor, and mode) and their direct realisations through the metafunctions of language (ideational, interpersonal, and textual) (see sec. 2.1.2 and 3.1.1.1).

Gylling (ibid.:26f) shows that cognitive linguists see a text as resulting from *"a linguistic codification of mental representation models..."* and linguistic structures as being motivated by *"general cognitive process"*. A model that is mental refers to a person's representation of a given input. For instance, if the input is a text in form, then:

- a mental model will automatically be activated (by the first words and sentences) depending on the input of the recipient, and
- the text will be interpreted interactively through both the linguistic input and the mental model.

The notion of 'Mental models' is useful for Gylling's work as it unmasks or exposes the relationship of language to knowledge and text

interpretation process to discourse processing. This notion is also useful as it is closely related to the idea of linguistic structures in functional linguistics *"where internal organisation to a large extent is created through the ideational metafunction, which in fact represents how we imagine the world around us and textualise it by means of language"*. Here lies the reconciliation between cognitive and functional approaches: it is the claim that language is not an independent faculty (ibid.:27).

3.1.2.3.2 A Rhetorical Approach

Another approach that bears some relation to the three linguistic structures is the rhetorical approach; the classic rhetoric. Three of the five canons earlier stated (see sec. 2.2.1) are closely related to this work: invention (finding something to say), style (the fitting of the proper language to the invented matter), and memory (the mental grasp of matters and words with the help of memory aids). These three canons are regarded as integrated parts of all three structures. Gylling believes that *"As a result, linguistic structures can also be approached from a rhetorical point of view, rhetoric being defined as the study of persuasive and convincing communication"* (ibid.:28).

Gylling (ibid.) discusses Renkema's view that the notion of 'register' is understood stylistically as the variation in style due to situational factors or constraints like 'setting', 'participants', and 'norms'. In line with this, he cites Korzen & colleagues (Korzen & Gylling, 2012, in Gylling, 2013; Korzen & Lundquist, 2003, in Gylling, 2013; Korzen, 2003, in Gylling, 2013) who note that there is a correlation between linguistic structures and level of formality. A more formal register suits the participant's purpose to depersonalise communication in order to reduce any spontaneity, personal dimension, and sensitivity. In addition, it can express an intellectualisation or 'logification' of the content, which requires an interpretation of the EDUs and the Rhe Rs between them. This 'logification' or interpretation can be reflected or grammaticalised in language through:

- the morphological codification of the verbal content in EDUs, or

- the explication of distinctions between various pragma-narrative levels, that is, between the foreground and the background.³

Therefore, linguistic structures seen from a rhetorical perspective are closely related to the cognitive-functional viewpoint. In terms of Gabrielsen & Juul Christiansen (2010:43, in Gylling, op. cit.), this means *"it is a matter of adapting, consciously or unconsciously, one's linguistic style to the given situation by varying factors such as ornamentation, sentence structure and word choice"*.

3.1.2.4 Basic Terminology Defined

A review of some basic terminology Gylling employs is illustrated below. Text, discourse, and information are the terms in this context.

3.1.2.4.1 Text and Discourse

'Text' and 'discourse' for Gylling (op. cit.:31) are not taken as synonyms or as referring to the distinction between medium and channel. Describing linguistic structures assumes distinguishing various mutually intertwined levels. He draws upon *"an analytical distinction between text as the product and form, and discourse as the process and the rhetorical organisation of verbal communication"*. The ultimate direction of Gylling is for combining the two terms; the text-as-product (static) and the discourse-as-process (dynamic) views. It is also employed in RST which states that *"unstated but inferred propositions [i.e. Rhe Rs] ... arise from the text structure in the process of interpreting texts"* (Mann & Thompson, 1987:3).

A combination of static and dynamic views resonates in functional linguistic thought. Gylling (op. cit.:34) refers to Martin (1992) and Matthiessen & Thompson (1987) who conjunct syntactic relations (text) with Rhe Rs (discourse) in their study. In RST context, discourse analysts investigate how a R might respond to the W when comprehending his intended message, especially through the way the different parts of the text are related to each other.

To sum up, 'text', for Gylling, is "...*the (oral or written) product and form*" while 'discourse' is "...*the process and rhetorical organisation of verbal communication*". Both of their internal relations and structures are analysable (op. cit.:31).

3.1.2.4.2 Defining Information

It is quite possible to find the term 'information' used in connection with linguistic structures. Information structure studies "*the transition from the first element in a clause towards the rest of the clause, usually referred to as thematic realisation and thematic progression*" (ibid.:37). In other words, while the discourse is set to move and progress, information structure assumes that each discourse unit has 'backward-looking links' that work to link previous material, and even contribute, to some new material within the context of the text. This is applicable at both text level and syntactic level.

The standpoint of Gylling is that some discourse parts are more informative than other parts, within and across sentences and clauses. He uses 'Information Structure' to refer to the notion of 'information packaging' of Fabricius-Hansen (1996, in Gylling, 2013) and of Vallduví & Engdahl (1996, in Gylling, 2013), and to the notion of 'informational density' of Fabricius-Hansen (1996, in Gylling, 2013) and Jansen (2003, in Gylling, 2013). In terms of Fabricius-Hansen (1996:529, in Gylling, op. cit.:38), informational density is:

[W]e [square brackets in the origin] would probably say that the informational density is higher in A than in B if at least one of the following conditions holds, other things being equal: i.e., the average amount of discourse information per sentence is higher in A than in B; ...

In other words, for some part of a sentence or clause (be A) to be of high informational density than another (be B), two states are possible:

- both A and B have the same amount of information but A is shorter than B, and/or
- A is of more discourse units than B.

3.1.2.5 Defining the Levels of Gylling's Model

Having in mind the six dimensions of the original model, Gylling demonstrates each of these six as follows:

3.1.2.5.1 The Text Structure and its Two Dimensions

'EDUs' is a term employed by Gylling to refer to the 'minimal building blocks' of the discourse structure of a text. They are able to distinguish the various relations that exist through linguistic structures in a given text. From the textual point of view, EDUs are linked to other EDUs in terms of syntactic relations using the distinction of coordination versus subordination. This is the phenomenon of dependency within this level. EDUs, in this sense, *"typically relate to the immediately adjacent EDU inside the same sentence"* (ibid.:72). These EDUs can be realised in terms of finiteness or non-finiteness. This phenomenon is called 'realisation of EDUs', which is the second parameter in this level.

The first parameter, i.e. dependency, makes use of the syntactic relations of coordination and subordination. EDUs are either coordinated with or subordinated to other EDUs. These relations concern the structure of sentences or clauses and their constituting parts (ibid.88). Illustrative examples are below:

1. *[Mr President, I am firmly of the belief that people have a right to smoke,] [but my personal taste is that they should do so only in the privacy of their own homes.]*
2. *[Mr President, this is not reform,] [as the Commission itself points out.]*

The EDUs in the two sentences are between square brackets. The first example has two EDUs coordinated by 'but', expressing a 'contrast' R_{he} R within the RST traditions. It is also noticed that both EDUs are standalone parts in that they are independent of each other. In the second example, the second EDU, through the presence of 'as', is subordinated to the first one, which is a matrix clause. That is, it cannot stand alone.

Coordinators and subordinators can determine the dependency between the EDUs inside the same sentence. If explicit connectives are

not present, then the dependency can be determined by the morphological realisation of the main verb in the subordinate EDU (ibid.:89f). This possibility is clear in the following example:

3. *[It would make the world a much more dangerous place,] [causing more resentment][and fuelling more terrorism.]*

A subordinate clause with two English –ing forms (causing and fuelling) follows the matrix clause. Another case is also available in which two coordinated main clauses, and thus two EDUs, are juxtaposed by a semicolon. Consider the one below:

4. *[Relative stability is based on track record;] [equal access is based on fleet tonnages.]*

Dependency has been studied thoroughly in syntax. In discourse studies, efforts to investigate the notion of coordination and subordination are of two directions (ibid.):

- the first believes that syntactic coordination and subordination equal rhetorical coordination, i.e. dependency across sentences, and
- the second direction claims that syntactic coordination and subordination do not correspond to rhetorical coordination.

To see things clearly, Gylling states the position of the debate for and against syntactic versus rhetorical/discoursal coordination and subordination:

Undoubtedly, the idea to link syntactic subordination to discourse nuclearity [i.e. rhetorical subordination] [square brackets in the origin] has intuitive appeal, and moreover it is not difficult to accumulate evidence in support of such a link: Quite often, a syntactically subordinate clause is in fact ‘less central to the writer’s purposes’ than the matrix clause is. But on the other hand, one can also gather evidence for the opposite position – the writer’s purposes running against syntactic subordination, which altogether suggests that matters are more complicated ... (Stede,2008:47f, in ibid.).

The standpoint of Gylling is to specify syntactic coordination to that syntactic relation between two EDUs of the same syntactic construction, whereas syntactic subordination to EDUs that are syntactically dependent

on another EDU. It is through explicit indicators and other indicators ⁴ that coordination and subordination are distinguished.

It is worth noting that coordination and subordination exhibit different degrees of syntactic dependency (ibid.:91). Consider the following examples:

5. [*The plane arrived late in London,*] [**and** *John went straight home.*](The two EDUs are syntactically independent of each other).

6. [*John arrived late in London*] [**and** *went straight home.*] (The second EDU shows a higher degree of dependency, because it depends on the first EDU and lacks the illocutionary force/E of its own).

7. [*John went straight home,*] [**because** *he arrived late in London.*] (Dependency is shown through the second EDU which is a subordinate finite construction).

8. [**Having arrived** *late in London,*] [*John went straight home.*] (A higher degree of dependency is clear in the non-finite subordinate construction for it lacks tense and an appropriate illocutionary force/E of its own).

The second parameter, that of realisation, "*...is mainly related to subordinate EDUs and to whether these contain a finite verb form, a non-finite verb form or no explicit verb form at all*" (ibid.). Such non-finite verb forms do not exhibit tense, mood or aspect, as in:

9. [*After **his late arrival** in London,*] [*John went straight home.*]

10. [**Having arrived** *late in London,*] [*John went straight home.*]

With these non-finite forms, an inherent subject and topic continuity is ensured by means of lacking the subject marking. Gylling concludes:

Therefore, the rhetorical relation between an EDU in which the main verb is non-finite is entirely dependent on the matrix EDU, and such structures express a particularly strong integration of the EDU in question into the matrix EDU,... (ibid.:92).

3.1.2.5.2 The Discourse Structure and its Two Dimensions

From a discursive perspective, EDUs can be related to each other by Rhe Rs which together constitute the discourse structure of a given text. The definition of a Rhe R that Gylling adopts is that of Stede (2011:85) who uses it to mean a "*specific relationship, holding on the semantic or*

the pragmatic level of description, between adjacent units of text". This broad definition covers the Rhe Rs in Gylling's study but the term 'adjacent' is taken to mean two units within the same text, not necessarily two neighbouring ones. These relations are viewed as 'psychological' or 'cognitive entities' used to make successful communication (Gylling. op. cit.:117ff).

The number of Rhe Rs considered in Gylling's study is a significant issue. He states:

How many relations should be included depends to a large extent on the nature of the study: if the aim is to create a corpus with high quality and reliable annotation, the number of relations must be limited, possibly grouped together in larger classes with subtypes and variants.

Due to that, the extended version of RST relations from the RST website (Mann & Taboada, 2005 [2015/2016]) has been applied ⁵.

The analyses he produces match with one of the basic assumptions of RST; i.e., 'plausible judgements' and not definite, objective observations. The aim is to employ the ideas and methods of RST and not to test and validate them.

3.1.2.5.3 The Informational Structure and its Two Dimensions

From an informational perspective, EDUs can be related to each other by packaging relations. This structure has two parameters. The first one is 'linkage' which investigates how the EDUs of a given text are linked to each other intersententially and intrasententially. It is noted here that 'dependency' and 'realisation' of text structure are related to the notion of linkage. The second parameter involves the explicit and implicit signalling or marking of the Rhe Rs in a particular text (ibid.:161). The signalling is fulfilled by items referred to as discourse cues (henceforth DCs).

Informational packaging under the first parameter searches for whether the EDUs of the long-sentencing or short-sentencing text are related to other EDUs inside the same sentence or to EDUs in other sentences. Gylling starts to analyse his argumentative texts under this

parameter by surveying their basic numbers, in order to discover which group of texts has a strikingly higher sentence lengths than the other. The reasons for such variation might be typological language characteristics or due to differences between the mean number of EDUs per sentence of the texts in the three languages under his investigation (ibid.:166ff). Therefore, those sentences containing more EDUs carry more packaged information than others.

Related to sentence length are two strategies: downgrading and upgrading. Downgrading strategy is the process whereby the Ss of a given sentence are structured as subordinate EDUs of various types. These Ss are integrated in their nuclei and are dependent on them, and thus, cognitively play a rather less salient role in the discourse structure of the sentence. Consider the following example:

11. ***[However, [when, Commissioner, [as I point out in an amendment] [supported by over 50 Members of Parliament,] it is a matter of new cosmetics] [containing new ingredients] [never tested in the past] [in order to establish their toxicological profile in laboratory animals,] then, I am convinced, as a scientist, that it is essential to carry out an initial set of experiments on animals] [before the use on human beings] [and before the emission on the market.]***

This sentence has nine EDUs with relatively long information packaged inside. The underlined Ss are subordinate EDUs linguistically. Subordinate finite adverbial clauses are reflected in the first two; (*when it is a matter new cosmetics* and *as I point out in an amendment*). The three following them are postmodifiers; (*supported by 50 Members of Parliament, containing new ingredients, and never tested in the past*).

In the upgrading strategy, these S EDUs are not always restricted to subordinate clauses, but they are textualised as independent sentences. Some sentences may introduce the main N and others may act as carriers of different Rhs (ibid.). An illustrative example is below:

12. *[I am in favour of beef being labelled with the name of the country or countries] [it comes from] [and I am strongly against introducing a*

common EU label] [from which consumers cannot see which countries are involved.] [The purpose of the regulation in question must be to achieve that consumers have confidence in meat from all EU countries.] [Until this is a reality,] [consumers need to know precisely which country their meat comes from.] [I have tabled an amendment to the effect that the slaughterhouse's authorisation number should not be shown on the label.] [In this way, I wished to ensure that small and medium-sized slaughterhouses could continue to supply meat to butchers.] [The authorisation number does not provide the consumer with any useful information] [and has no bearing upon traceability.]

Eleven EDUs are in this example. The S EDUs are not restricted to subordinate clauses. Note that the first sentence has the main N; (*beef being [must be] labelled with the name of the country or countries*) while the independent sentence; (*The purpose of the regulation in question must be to achieve that consumers have confidence in meat from all EU countries*) is used to express a 'volitional causal' relation with the previous sentence.

The second parameter is related to signalling Rhe Rs. The prototypical and most investigated signals are the DCs ⁶ which are of five types presented below with their definitions and illustrative examples (ibid.:171-173):

1. *Coordinators*: these always appear between the clauses they link; the clauses may occur in separate sentences or in the same sentence. If combined in a sequence with other DCs, coordinators always appear leftmost in the sequence. In English, typical coordinators include *and*, *but*, and *or*, as in:

13. *[It is important to sort out the structural problems in our economies] **[but this will take time.]***

2. *Subordinators*: these introduce subordinate clauses in complex sentences. The subordinate clause may occur to the left or the right of the main clause, but the subordinator is always to the left of the subordinate

clause. In English, typical subordinators include *although*, *because*, and *if*, as in:

14. [*If he can get those types of concessions from the arbitration deal on 25 September*] [*he will have done the Windward Islands a tremendous favour.*]

3. *Conjunct adverbs*: these relate whole clauses, and can appear at different points within them, although there is often a default position for particular cues. There are also syntactic constraints on exactly which positions conjunct adverbs can occupy: at the beginning of a clause, between subject and verb, between any auxiliary verbs, between auxiliary verb and main verb, after a copula if there is one, and before a sentential complement if there is one. In English, typical conjunct adverbs include *as a consequence*, *however*, and *thus*, as in:

15. [*It represents a single, simple, safe, harmonized regime*] [*that all sides of this House can support.*] [*However, I should like to focus the Commission's mind on another issue.*]

4. *Prepositional phrases*: these often contain propositional anaphora referring back to the previous clause. In English, typical prepositional phrases include *at this point*, *for these reasons*, and *in this respect*, as in:

16. [*Of course, at its core is equal access to Community waters*] [*which was derogated until 1 January 2003.*] [*Only at this point will the CFP fully come into force.*]

5. *Clauses which take sentential complements*: these often introduce a particular intentional stance with respect to the content of the clause they introduce. In English, typical phrases of this kind include *it follows that* and *it may seem that*, as in:

17. [*The delay in translating those papers into eleven different languages can be measured in terms of extra deaths.*] [*It seems to us that the Council is more interested in playing the politics of Europe*] [*than in assisting people in distress.*]

The approach that appeals to Gylling in this regard is that of Schiffrin who believes that the *"analysis of discourse markers is part of the more general analysis of discourse coherence – how speakers and hearers jointly integrate forms, meaning, and actions to make overall sense out of what is said"* (Schiffrin,1987:49, in *ibid.*:173). He, in addition, includes all DCs that are able to mark or express one of the Rhe Rs presented earlier. Equally, tense and mood are not taken as DCs, though they may ease the interpretation of which Rhe R holds between two or more EDUs, for the following reasons (*ibid.*177):

- it is difficult to define specific criteria of when to include them and when to exclude them in the analysis,
- they are not valid parameters of comparison in Gylling's study because the three languages employ different range of tenses and moods.

3.2 The Adopted Framework of Analysis

At the beginning of this chapter, it is made clear that two cornerstones are to taken as the two basics of the present study in its analysis for the texts in hand. It would be interestingly illuminating to give the reasons for having these two under this one framework. Among them are:

1. Since the different stages of a given genre can reveal different configurations of linguistic patterns and structures, then generic structure analysis is able to show non-ambiguously different distributions of Rhe Rs coinciding with different generic stages (realised or potential). They can also help *"to factor the genuinely genre-specific aspects of text from the more genre-independent ones"* (Mann, Matthiessen, & Thompson,1989:45);
2. RST account of 'rhetoric' taken as it is, with no modification, is underspecified, lacking any correlation of linguistic indicators and contextual parameters with structural analysis. RST depends on text structures, an important aspect of rhetoric, to order the parts or spans of text. Yet, many other textual and non-textual features have a bearing on the rhetorical E of a text. Equally important are the

W's intentions for each text. These intentions are treated in RST as if they are independent of their expression in the text. Therefore, to adopt a composite of the two cornerstones, documented earlier, the present research ensures that:

- a. rhetorical intentions are regulated by generic structure constraints;
 - b. rhetorical intentions are specified and related to the overall social purpose of the text and the local rhetorical purpose of all or part of it;
 - c. the goals specific to a particular text are determined by evidence from the text itself; and
 - d. the structures identified in the text are correlated with linguistic indicators, which are part of the linguistic form of the text;
3. Texts are hierarchical in their structuring and this hierarchy can manifest itself in combining smaller structures into larger ones. However, hierarchy can also be shown through some parts of the text taken as more important to the W's intentions than others; and
 4. Communication is regarded as language shaped (moulded) as texts of different purposes in a particular context. The three main dimensions (the microstructure of words and phrases, the macrostructure of sentences and whole texts, and the context) are all cooperated to result in human communication. Attention paid to all the levels is necessary since the present study is one aiming at correlating linguistic variation with contextual factors.

The following is the final shape of the framework of analysis to be adopted in the current study:

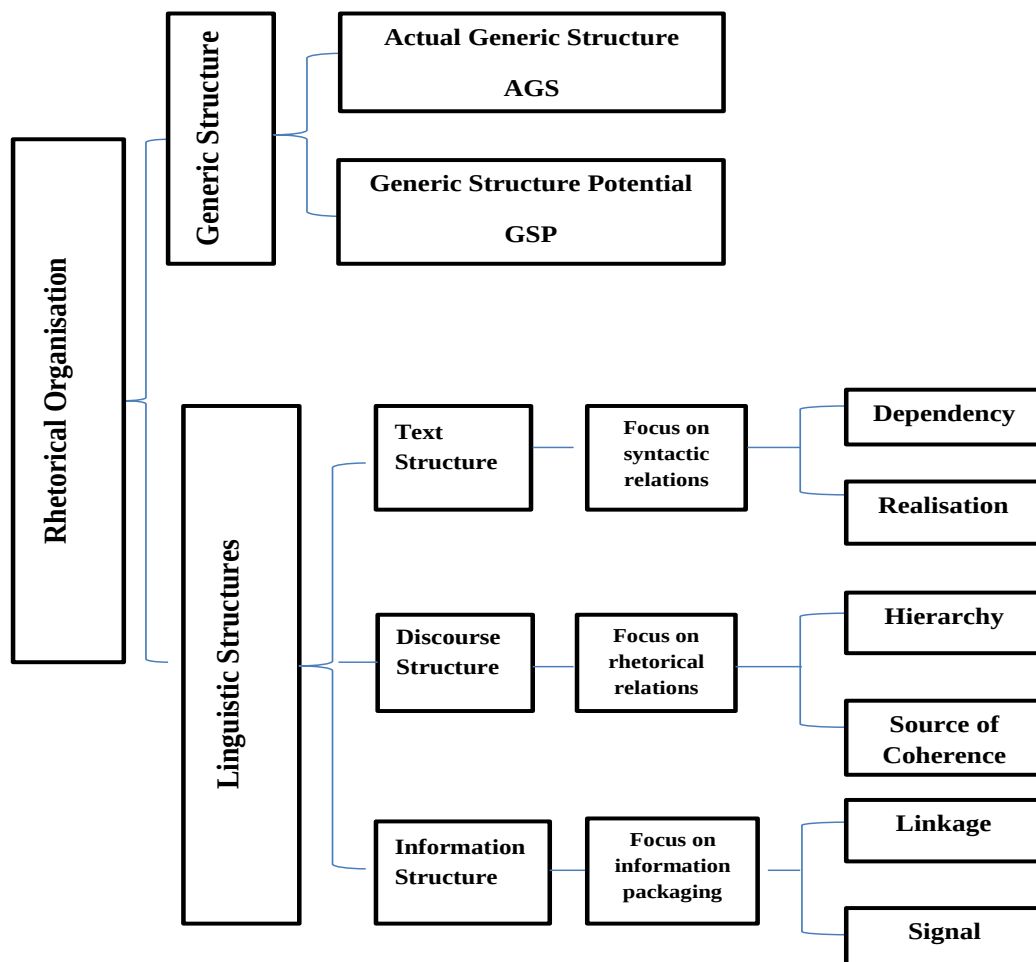

Figure (3.11): The Framework of Analysis.

3.3 Data Description

The texts of this study are taken from two sources: The Holy Bible and AŞ-Şahīfatus-Sajjādīyah. Each consists of a collection of texts that address different topics or issues: traditions, beliefs, practices, rituals, religious conception and behaviour, prostrations and prayers to Allah, their expressional necessities, discussions, practices, faith, spiritual

attitudes, social teachings, and other inner or outer dimensions of religion.

Four reasons determine the choice from these two religiously sacred texts, i.e., significant and authoritative for their particular religions, as sources of the analysis of the present study. They are:

1. The main aim is to approach them from a compound perspective; taking contextual and linguistic features into considerations;
2. This choice, in line with the studies of discourse structure, typically offers a more interesting variety of Rhe Rs which can be investigated through the two aforementioned cornerstones;
3. The classical RST has not studied religious texts, whether shorter or longer. The religious text is a natural text that allows at least one complete analysis, as classical RST claims. Uncovering that analysis would be a significant aid towards rhetorically and functionally understanding how these religious texts achieve the Es they do. This way would submit an in-depth account of rhetoric in religious texts; and
4. It is likely that the high comparability between the texts in the languages, hence cultures, is significant, but not for itself. The comparability in this current study concerns itself not with similarities or differences but with making proved and definite statements related to the texts in hand, and thus, applicable to the genre of religious texts through RST.

This section is going to deal with the following issues: the selected texts: genre and typology, data selection, analysis, segmentation principles, and steps of analysis.

3.3.1 Genre and Typology of the Selected Texts

The present study acts as a systematic analytical body of rhetorical study whose data draw upon a corpus of authentic, natural religious texts. A common linguistic property shared by the selected corpus of texts is that the language used is an elevated and supreme one suitable for the wide range of topics or issues handled in each collection (see sec. 2.5.3, 2.5.4, and 2.5.5).

A case in this field is the texts under investigation. Before setting off to decide upon whether or not they belong to a particular genre and their typology, we need to identify with more clarity the 'genre' of these selected texts. One way to state this is that 'genre' moves within external, non-linguistic, 'traditional' criteria (Biber, 1988:70, 170)

Due to this thinking, 'genre' is to be categorised on the basis of external criteria like 'intended audience', 'purpose', and 'activity type', 'the occasion', 'the social setting', 'the communicative function of the pieces of language', etc. (ibid.). In other words, categorisation is based on the fairly easily definable, external use properties rather than the internal lexicogrammatical/form features (cf. 3.1.1.2). When investigating linguistic corpora, external criteria are easily noticed as being responsible for classifying texts. A good reason for that is the one supplied by Atkins, Clear, & Ostler (1992:5):

The initial selection of texts for inclusion in a corpus will inevitably be based on external evidence primarily ... A corpus selected entirely on internal criteria would yield no information about the relation between language and its context of situation.

Another reason is given by the EAGLES (1996:7, in Lee, 2001:38):

[the] [square brackets in the origin] classification of texts based purely on internal criteria does not give prominence to the sociological environment of the text, thus obscuring the relationship between the linguistic and non-linguistic criteria.

What the present study believes in is that the external criteria are suggestive for classifying the collection of texts under analysis into a given genre. Within one specific genre, the structure of some given texts should in this case be the realisation of a given GSP (cf. 3.1.3). That is, analysis should start with external criteria that classify the selected texts into a particular genre and only then the internal linguistic criteria are subsequently upheld as belonging to the genre.

In another direction, genre is liable to change since it is a cultural construct varying with the times, with fashion, and with social ideologies.

Yet, the 'genre labels' stay the same because *"they are descriptors of socially constituted, functional categories of text"* (Lee,2001:47). Two problems are noticed with genre labels:

1. They can have different degrees or levels of generality. The label 'academic discourse' is an example where texts within this highly broad level of categorisation show a considerable internal variation, and
2. Different 'genres' can be recognised due to different criteria such as 'domain', 'topic', 'participant', 'setting', etc. (ibid.:48).

One suggestive solution to conceptualise 'genre' lies in attempting 'prototype theory'. Such conceptualisation is summarised in the following table that represent Lee's understanding of Steen (1999:112ff) and his prototype ideas. The mark '?' refer to Lee's suggestions:

Table (3.1): A Prototype Approach to Genre (by Lee,2001:48).

SUPERORDINATE	Mammal	Literature ["SUPER-GENRE"?]	Advertising ["SUPER-GENRE"]
BASIC-LEVEL	Dog/Cat	Novel, Poem, Drama [GENRE]	Advertisement [GENRE]
SUBORDINATE [PROTOTYPE]	Cocker spaniel / Siamese	Western, Romance, Adventure [SUB-GENRE]	Print ad, Radio ad, TV ad, T-shirt ad [SUB-GENRE]

In the middle of a hierarchy of terms, basic-level categories act as *"having the maximal clustering of humanly-relevant properties (attributes), and are thus distinguishable from superordinate and subordinate terms"*. This basic-level category helps human beings find prototypes or exemplars or less prototypical members. Categories of the subordinate-level function in terms of *"prototypes or fuzzy boundaries some are better members than others, but all are valid to some degree because they are cognitively salient along a sliding scale"* (Lee,2001:48).

According to Lee (ibid.:49), genres are best recognised by their 'cognitive basic-level status':

True genres, being basic-level, are maximally distinct from one another ..., whereas members at the level of sub-genre

(which operate on a prototype basis) or 'super-genre' have fewer distinctions among themselves.

Following both the external criteria of classifying a given genre, with the texts under it acting as possible realisations of a given GPS, and the basic-level approach to genre, the current study now is in a position to define the genre of the texts under investigation. The genre of the texts to be analysed is 'Religion Genre'. It is an exceptional category, in terms of the prototype approach, due to the nature of the texts which could embrace any of the stylistic features of several other categories. All 'committed religious writing' is to be put together under this category. Therefore, 'Religion Genre' can be easily attached to the category of 'super-genre', which is a 'superordinate-level category.

Moreover, one can test and characterise genres treated as basic-level categories, through the employment of at least a mixed set of six attributes in the selected texts, as follows (ibid.):

1. Domain: It is shown clearly in the selected texts through the perceived distinctiveness of certain interactions with and responses to an invisible divine presence, textual practices, or speech situations. This also refers to practitioners engaging with the invisible divine world in some respect.
2. Content: It is perceived in the selected texts through the promise of 'religions' to bring people into relation with a dimension of life that:
 - is more real, more powerful, and more meaningful than everyday experience; and
 - provides a pattern for interpreting that experience and providing orientation within it.

However, the inner dimensions of 'religion' can be pictured through 'spirituality' with its aspects: 'experience', 'belief', and 'value'. It can also be pictured *"in personal and non-institutional ways, without the ritual and social dimensions of organized religions"* (Fisher,2012:2f).

3. Function: This attribute is noticed in the selected texts in the effort to persuade and motivate God to act in behalf of the devotees, in the case of the selected texts. They seek to make a persuasive case to God.

4. Intended audience: A distinction is made by Goffman (1981:124ff, in Keane,1997:58) regarding the participant roles in speech events. He lists the following:

- i. The 'principal' who bears responsibility for what is said;
- ii. The 'author' who formulates the actual words;
- iii. The 'animator' who utters them;
- iv. The proximal 'addressee' of the utterance;
- v. The 'target' to whom the words are ultimately directed; and
- vi. The 'overhearer'.

The intended audience of this super-genre can be directly linked to the last three roles. However, the texts in hand have their audience those who are close to the 'author', i.e. the proximal 'addressee' like his followers, spectators, listeners, devotees, viewers. The 'target' to whom the words of a text are directed is 'God' or 'Allah'. Without the knowledge of the 'author', the 'overhearer' may be other present-in-the- situation people or absent from it, i.e. spirits, for instance.

5. Purpose: The purpose is present in the selected texts when some divine help, support, forgiveness, etc. is the thing to ask for. It may also be enhanced in order to speak about the divine or the sacred, to express religious feeling or awareness, to invoke God's justice, righteousness, mercy, steadfast love, to appeal to the faithfulness of God, to urge and reason with God, etc.

6. Setting or Activity Type: The setting or activity type in the selected texts can be seen in the case where the 'author' can recite his words publically or in private or in particular time or place or occasion, etc.

Other attributes may be noticed, as well. The 'medium' attribute' is clear when either written or spoken language is used by the 'author' to achieve his goals. In this case, a written-to-be-spoken text is plausibly shown in the selected texts. Other attributes – 'form', 'type', 'language' – are to be later uncovered when analysing the texts.

To support all this, the 'genre' of these texts can be given three labels of distinctions according to 'The Library of Congress' in its project of

'Religion Genre/ Form Terms', available at: <https://www.loc.gov/aba/publications/FreeSHM/freeshm.html> :

1. Devotional literature: This is related to religious works, like books, pamphlets, brochures, or other printed material intended for meditation and edification. It includes: (Devotional exercises, Devotions, Forty hours' devotion, Losungen, Marian devotions, Spiritual exercises, and Meditations).
2. Liturgical books: ⁷ The scope of this category is wider than others. It is used for all books, published by the authority of any religious body. The text and directions for its official liturgical services are presented. It includes: (Agendas 'Liturgical books', Altar books, Antiphonaries, Benedictionals, Breviaries, Collects, Divine office, Evangelaries, Litanies, Menologion, Missals, Ordinals 'Liturgical books', Prayer books, Psalters, Responses 'Liturgy', Rosaries 'Prayer books', Sacramentaries, Service books, Liturgies, Lectionaries, etc.).
3. Prayers.: This heading is saved for all types of prayers. The 'Library of Congress' prefers to bring out the occasion for the prayers or the denominational aspects by means of subject headings as appropriate; e.g. Buddhism-Prayers and devotions; Judaism-Prayers and devotions; Prayers for animals; Prayers for the dead; etc., which includes, for instance: (Altar prayers, Bedtime prayers, Pastoral prayers, Prayers for peace, Prayers for the dead).

This proves how complex is to settle exactly between the sub-genres of the super-genre of 'religion'.

As far as the subordinate category is concerned, the content and shared themes of the selected texts legitimate using petitionary praise (i.e., lament) and declarative praise (i.e., thanksgiving) (Waltner, 2006: 763ff). The unifying element of 'praise' is suggestive among these two sub-genres as each is taken as a different mode of praise (Bratcher, 2013: 7, available at <http://www.crivoice.org/psalmgenre.html> /).

3.3.2 Data Selection

The selected corpus of the present study is taken from the genre of 'religion'. It is aimed to be the working place for a rhetorical structural analysis in terms of RST. This section includes the size of the sample, and reasons and criteria of selection.

3.3.2.1 Sample Size

A prominent characteristic of the sample to be selected is its representativeness. O'Keeffe (2006:78f) believes that selecting a part to refer to the whole is a reliable strategy in a qualitative research which aims to understand how the text acts as a social product and what it represents as its author claims. He also states that to select is to *"provide new insights, especially for developing a theory...[and] setting criteria for a well-founded limitation of the sampling really matters"* (ibid.:69). Sampling for him can be achieved when theoretical saturation is reached, i.e. when *"nothing emerges any more"* (ibid.:66).

Other scholars like Johnson & Christensen (2014:34) and Maunter (2008:32) consider the systematic procedure of selection influential. Since saturation has no limit, Maunter (ibid.:35) focuses on the view which says: *"The idea here is that you begin by selecting a small but relevant and homogeneous corpus, analyze it and on the basis of your findings, select again...[but] new data no longer yield new representations"*. Selecting texts to match the research objectives seems preferable to Dörnyei (2007:33ff) who states that *"it depends on the logic of the selection procedure, no matter how small or big the sampling is"*. In addition, in a qualitative research, what matters, for him, is some evidence of saturation, not the sample size. Therefore, to follow Maunter's procedure, twelve texts are selected from both the Bible and the Şahīfa, i.e. six texts from each.

3.3.2.2 Reasons and Criteria of Data Selection

This study believes that an RST analysis of the selected texts is particularly important because the interface between language and religion is so parable throughout the world that we cannot ignore it.

The reasons behind selecting the twelve texts are clear when the perceived distinctiveness of the interactions in both collections is taken into consideration in conjunction with their textual practices. The language employed in the selected texts responds to some prominent semiotic and pragmatic questions, as Keane (1997:48) states:

By what means can we, and in what manner ought we, talk with invisible interlocutors? How can we get them to respond? How should we talk about them? By what marks do we know that some words originate from divine sources? Are these words true, fitting, efficacious, or compelling in some special way?

Such critical questions allude to the general problem related to the relations between performance, text, and context. Other relations are also in concern like the relations among experience, concrete practices, and what culturally lie beyond ordinary experience. Reference is also directed to some problems of communication between this world and the other invisible world (ibid.). However, most religious traditions require their practitioners to engage and interact in some respect with the invisible world through some linguistic means within the limits of their own cultural contexts. Such requirement implies the two cornerstones of the present study.

As for the criteria for the data selection, the following have been set up:

1. The general content shared between the two collections of the selected texts should refer to what the current study seeks to analyse: natural, primary, religious texts that serve their communicative intentions;
2. The selected texts should represent and present RST relations according to the theory definitions and constraints;
3. The selected texts for analysis should recognise the internal hierarchal structure of texts. The aim is to reach to some regularities in the collections of RST analyses for the texts;
4. The selected data should result in comprehensive, explicit, plausible, functional analyses rather than selective commentaries;

5. The selected texts *"provide paths or mappings both from situation to language, explain how or why particular uses of language were chosen, and from language to situation to effect, explaining why particular uses of language succeeded or failed"* (Mann, Matthiessen & Thompson, 1989:2); and

3.3.3 Data Analysis

All the texts in the two languages are to be analysed with regard to the two main structures: generic structure and linguistic structures, including text structure, discourse structure, and information structure. Analysis is to be done in two modes: one related to generic structure, another related to the linguistic structures: text, discourse, and information structures.

In the first mode, all texts are to be segmented into the AGSs of each one which in turn compose the whole GSP of the texts. In the second mode, all texts would first be segmented into EDUs according to some principles which shall be discussed in the next section. When EDUs are identified, they would be analysed in terms of their dependency and realisation, the two dimensions in this level. After that, the Rhs defined by RST would be interpreted as they are between the EDUs. The texts are to be segmented into EDUs in order to build up the discourse structure with Rhs of the texts and their structural elements (i.e., stages). During this mode, the hierarchy and CS are to be analysed. Next, the two dimensions under the information structure; the type of linkage (intrasentential or intersentential) and signal (explicit or implicit), would also be analysed.

Analyses in these two modes are done manually in order to ensure that they follow the same set of RST principles and constraints. The texts selected from the Bible are to be analysed first and, later, the texts chosen from the Ṣaḥīfa are to be analysed. However, the two languages may pose some analysis difficulties: the use or non-use of signals, the frequency of the signals used, length of sentences, and the density of embedded EDUs. To overcome the challenges, all analyses are to be revised at least two

times, and they are to be put into subsequent discussions with other consultants and/or specialists.

However, this is not an easy task, Gylling (2013:64) claims that analysing syntactic features, which are taken as low-level features, requires much less effort than analysing those features in the higher level; (see sec. 3.1.2.2, figure 3.10). This is due to the fact that syntactic functions like subject and object are well-defined and recognised categories in the field. On the contrary, high-level features do not yield themselves easily to analysing: *"The extra effort needed in annotating [i.e., analysing] higher level features consists not only in interpreting which relations hold between the various units of a text but also in obtaining a certain degree of tagging consistency,..."*

Another problem is also raised here by Mann & Thompson (1987:26ff, 1988:265) and Mann, Matthiessen & Thompson (1989:33ff). A text may have more than one analysis, the main source of which lies within what they call 'Varieties of Differences between Analyses' created by one analyst or several analysts. This source has several kinds of multiplicity:

- a) 'Boundary Judgments' in which the analyst is forced to make category judgments that encounter borderline cases. Such cases are forced into the categories of RST;
- b) 'Text Structure Ambiguity' which is normal in RST, given its definitions that do not constraint the theory to single analyses. In such cases, it is well recognised that *"any of several incompatible analyses are plausible, and that the text does not provide a sufficient basis to disallow any of them"*;
- c) 'Simultaneous Analyses' where there are many compatible alternate analyses for which the analyst is able to recognise that more than one relation definition holds. That is, there are two analyses, for instance, but one of them seems to be more plausible to the author's goals;
- d) 'Differences between Analysts' which may be attributed especially to differing plausibility judgments and their reactions to the text. In this case, each analyst accepts the analysis that the other posits.

This reconciliation of different analyses is a possible solution to a particular ambiguity; and

- e) 'Analytical Errors' made by inexperienced analysts. However, the analysis would be stabilised with practice.

When several acceptable analyses are created by one or more analysts, some of them are preferred and the other marginal. Consider Mann and Thompson's statement (1987:30):

However, unlike the case for grammatical analyses, RST provides a way to reject certain sorts of analyses that technically conform to definitional criteria but seem unrelated to the actual use [‘the’ is repeated in the origin. It would mean ‘of’ to the researcher] the language in context. Because each relation definition has an Effect field, the analyst must affirm that the writer plausibly intended the given effect; otherwise the analysis is rejected. This restricts RST analyses to genuinely plausible analyses.

3.4 Reliability and Validity

The quality of the data to be analysed can reflect to some extent the reliability of its measurement (Riffe, Lacy, & Fico, 2005:123ff). Two worth noting propositions are stated below:

1. *Reliability*: It is achieved through three steps: (defining the categories and subcategories relevant to the study goals, training coders or annotators to apply those definitions to the content of interest, and assessing reliability through coder reliability tests to indicate numerically how well the definitions have controlled the assignment of content to appropriate analytical categories) (ibid.).

The first two steps would be achieved if a simplified corpus is created. However, the categories and subcategories of the current study were defined in chapters two and three in order to get a better understanding of how the content of interest in the corpus is applied. The third step is more applicable in content analysis by implementing numerical reliable tests. When both qualitative and quantitative methods of analysis are to be used, numerical data will be seen later, and reliability is achieved.

2. *Coding Scheme*: This goes right with Weber's (1990:17) view of reliability, which is of three types:

- i. 'stability' which can be determined when the same content, i.e. the selected texts, is coded more than once by the same coder or annotator. Inconsistencies in coding constitute unreliability.
- ii. 'reproducibility', sometimes called intercoder reliability, which refers to the extent to which content classification produces the same results when the same text is coded by more than one coder, i.e. specialists helping the researcher in coding; and
- iii. 'accuracy' which refers to the extent to which the classification of text corresponds to a standard or norm. It is the strongest form of reliability. Except for training purposes, standard codings are established infrequently for texts. Consequently, researchers seldom use accuracy in reliability assessment.

To achieve good agreement in validity terms, the following steps are applied:

1. For *content validity*, the RST investigation of a number of linguistic issues is surveyed thoroughly in order to validate RST's assumptions. The significance of RST is described in chapter two. Added to that, consider the following (Mann, Matthiessen, & Thompson, 1989:10):

- First, RST is a useful framework in describing the grammatically or lexically signalled relations between organisational elements in a text;
- Second, being a descriptive framework, RST has been applied as an analytical tool for a variety of texts;
- Third, the descriptive RST is prominent as a foundation for contrastive rhetoric studies;
- Fourth, RST has been successful in analysing, for instance, the grammatical and rhetorical properties of narrative discourse; and
- Fifth, RST is used as a framework for analysing relational propositions: *"unstated but inferred propositions that arise from*

the text structure in the process of interpreting texts" (ibid.). The study of text coherence depends in part on these propositions.

2. For *face validity*, direct and indirect procedures are adopted:

- The proposal, the selected framework, and the plan of analysis have been directly recommended by three specialists in the RST and Rhetoric fields, outside Iraq ⁸; and
- The settled framework with its two main parts that centres on RST has been indirectly validated by the match it has to the goals and objectives of the present study which seeks answers to questions related to texts belonging to religion genre.

3.5 Text Segmentation

Segmentation is based on the principle that the smallest units of a text are individuated in order to be examined in terms of 'how' (i.e., their distribution), and 'where' (i.e., their internal relationships) (Jansen,2003:67, in Gylling,2013:69).

3.5.1 EDUs and DCs

'EDUs' is a term that is used to refer to 'minimal building blocks' working upon the discourse structure of texts to identify their linguistic structures through individuating the Rhe Rs that these EDUs show (Gylling,2013:72f) ⁹. EDUs can be looked at from three perspectives:

- i. textual where they are typically linked to other (immediately) adjacent EDUs inside the same sentence through the various syntactic relations;
- ii. discursive in which the link is through Rhe Rs within and across the sentence boundary; and
- iii. informational where they are linked in terms of packaging relations.

It is clearly noticed that EDUs are approached from the English syntactic constructions. Approaches of other language grammars may approximate, as in German, or diverge, as in Arabic or Japanese or Chinese, in this regard (ibid.:74). This is the reason behind taking

language typological differences into account by the present study. This is supported by the view below:

A total adoption of already existing text segmentation principles within the RST framework would perhaps not capture all possibly relevant aspects of the linguistic structures of a text; thus, an additional modified set of a text segmentation principles is needed (ibid.).

Taking language typological differences into account enforces the study to determine the types of DCs that head the EDUs inside the selected texts. The five types of Gylling's DCs are to be adopted in analysing the texts taken from the Bible. They are, in brief (see 3.1.2.5 for their inclusion as a parameter in the second cornerstone of the framework):

1. *Coordinators*: these always appear between the clauses they link; the clauses may occur in separate sentences or in the same sentence;
2. *Subordinators*: these introduce subordinate clauses in complex sentences;
3. *Conjunct adverbs*: these relate whole clauses;
4. *Prepositional phrases*: these often contain propositional anaphora referring back to the previous clause; and
5. *Clauses* which take sentential complements: these often introduce a particular intentional stance with respect to the content of the clause they introduce.

In Arabic, however, linking EDUs is exhibited cautiously within the limits of syntax and semantics. Arabic employs a variety of explicit DCs *"with a wide range of syntactic types such as conjunctions, prepositions, nouns, adverbial and prepositional phrases and other expressions ...[and] clitics attached at the beginning of words"* (Alsaif,2012:4). The syntactic categories of Arabic DCs are collected by Alsaif (ibid.:72ff) due to two significant principles: where they occur in the sentence and what relation they typically signal. The most common types of these syntactic categories are listed below (ibid.:75ff):

1. *Coordinating conjunctions*: a coordinating conjunction is used to link two clauses or sentences, or even more. Typical coordinators are 'لكن' (but), 'و' (and), 'أو' (or), etc. as in:

١٨ - السيارة متطورة لكنها باهظة الثمن.

2. *Subordinating conjunctions*: they introduce clauses that syntactically depend on the main clause. Two kinds are prominent here:

- a. simple such as 'لأن' (because), 'بينما' (while), 'حيثما' (where/since), etc.
- b. paired, such as 'رغم أن...إلا أن' (although/despite), 'إذا...ف' (if...then), etc., that consist of two non-adjacent lexical parts. The first introduces the subordinate clause and the other part heads the main clause. Examples are:

19 - رفض المقترح لأنه غير فعال.

٢٠ - إذا كان الجو صحواً، فلنلعب في الحديقة.

3. *Adverbial and prepositional phrase*: they are sentence modifying connectives which can mark a Rhe R. Typical connectives in this group are the adverbials 'نتيجة ل' (as a result), 'طالما...ف' (as long as), and the prepositional phrase 'بالتالي' (consequently), etc. Both these types can be simple and paired. An example is:

21 - طالما ان المؤتمر لم يحقق اهدافه فلن نجد من يثق بنتائجه.

4. *Prepositions*: prepositions in Arabic can be used to indicate Rhe Rs. They are often attached to 'Al-maṣḍar' nouns. Al-maṣḍar is a new category in Arabic used to express events or actions without indicating tense. Prepositional clitic connectives such as 'ل' (due to/for), 'بـ' (by) are attached to Al-maṣḍar nouns. An example is:

22 - ذهبنا الى مركز الشرطة للتبليغ عن فقدان وثائق الشركة الرسمية.

5. *Nouns* can also function as connectives of EDUs in Arabic. They can be:

- a. simple such as 'بغية' (desire/to), 'بيد' (but), 'نتيجة' (result), etc.; or
- b. combined nouns with prepositions such as 'فضلا عن' (as well as), or attached to 'أن' (but). Examples are:

23 - كانت حياته مستقرة، بيد أن الظروف لم تسمح له أن يكون تاجرا.

24 - قدم مراد طلب تقاعد مبكر بغية الاندماج في مشاريع اخرى.

It is noticed that not every ' واو ' or ' فاء ' is considered a DC. Some of these are only additional in their EDUs with no significant syntactic functions to be regarded. Such cases of ' واو ' or ' فاء ' are either 'استئنافية' (resumptive) or 'فصيحة' (restating) (الشيرازي, 1425A.H., vol.1:148ff). This is adopted in the analysis in chapter five.

3.5.2 Text Segmentation Principles

Setting well-defined criteria for characterising EDUs in detail seems inevitable to include what is relevant and exclude the irrelevant. The following segmentation is adopted in the present study as it is fine-grained. It draws upon the extended RST inventory of Rhe Rs in the RST website (see Appendix A). The following is the first list of seven principles of segmenting EDUs (Gylling, 2013:75ff) (see Appendix B for the deverbalisation scale that includes them):

1. *Sentences*: normally a sentence is a group of interrelated words expressing a complete event or situation. It contains a subject and predicate and must have a finite verb. Simple sentences are regarded as EDUs. Finite and non-finite clauses functioning as complements to verbs are not taken as EDUs, as in the to-infinitive and the -ing participle phrase. To-infinitives which are part of the valence of the main verb are to be regarded within the whole construction that acts as a single EDU by itself. Complements of attribution verbs (i.e., speech act and other cognitive acts) are not treated as EDUs, since *"attribution does not constitute a 'real' rhetorical relation since there is no regular semantic or pragmatic relationship between the attribution complement and the matrix clause;..."* (ibid.:76).

2. *Coordinated Clauses*: clauses can be coordinated to other clauses. Such types have the same properties of a sentence as well as a main clause: can stand alone by itself or as a part of another sentence. Elliptical coordinated clauses, two or more, are also included in the study, for they are seen as distinct predicates. Moreover, most types of subordinate

clauses can be coordinated and, thus, are considered separate EDUs (ibid.:76f).

3. *Subordinate Finite Clauses*: two types of subordinate finite clauses will be focussed on exhaustively in the analysis: adverbial and relative clauses. The focus would be on the verbal aspect of these subordinates, i.e., finite or non-finite subordinates. The finite ones, with their main types 'adverbial' and 'restrictive and appositive relative', are headed by a subordinator, cannot stand alone, and function as a clause or phrase constituent. Why restrictive relative clauses are included in this study lies first in the fact "*that these are able to express rhetorical relations other than Elaboration*". Another reason is the practical difficulty of distinguishing between restrictive and appositive relative clauses. Appositive relative clauses can also express a variety of Rhe Rs and, therefore, can be included in the segmentation of a text into EDUs (ibid.:78f).

4. *Subordinate Non-Finite Clauses*: they are clauses that contain a normally implicit subject, a predicate, and no finite verb. They may start or may not start with a subordinating adverb or a preposition. They cannot stand alone, but are to be clause or phrase constituents. The main types included here are: non-finite adverbial clauses, adjectival modifiers, (i.e., 'reduced relative clauses'), present and past participial clauses, and gerunds/English -ing clauses. Infinitival clauses are also segmented as single EDUs but they should not be complements to verbs, i.e., 'infinitival complements' (ibid.:80f).

5. *Phrases*: it is normal that the verbal element in a phrase is either omitted or deverbilised in the form of a nominalisation construction. However, prepositional phrases are segmented as single EDUs based "*on the grounds of an overtly-signalled rhetorical relation through discourse cues*" (ibid.:82). Prepositional phrases with clausal objects that are related to the entire matrix clause are also individuated as separate EDUs. The following constructions are seen as separate EDUs: non-clausal appositives, nominal appositions, non-clausal reformulations, exemplifications, comparatives, and postmodifiers (ibid.:83).

6. *Punctuation*: the following types of punctuations are adopted to segment EDUs (ibid.:83f):

- a. unless used in abbreviations, acronyms, dates, etc., full stops, question marks, and exclamation marks are references to single EDUs.
- b. colons and semicolons individuate EDUs if what follows is a clause, though not if it is a non-clausal expression.
- c. parenthesised or bracketed or quotation-marked non-clausal expressions are not taken as EDUs.
- d. independent fragments, with no verbal element, ending with a full stop are single EDUs.

7. *Embedded EDUs*: EDUs are broken up by an embedded construction such as a relative clause or a finite adverbial clause.

The second list is reserved for language-specific segmentation principles, i.e., Arabic. The list is taken from the following sources:

1. The Quranic Arabic Corpus, which is organised and presented by the University of Leeds. It *"is an annotated linguistic resource which shows the Arabic grammar, syntax and morphology for each word in the Holy Quran"* (Duke,2011, <http://corpus.quran.com/wordbyword.jsp>) . It is *"the closest to descriptions of traditional Arabic grammar"* (Habash,2010: 111f). The language and style of the Ṣaḥīfa pertains to the same period that traditional Arab grammarians depend on when testifying their grammar rules and explanations. That is the reason for adopting such source;
2. Introduction to Arabic Natural Language Processing, presented and organised by Habash (ibid.: 39-112); and
3. Modern Written Arabic: A Comprehensive Grammar by Badawi, Carter & Gully (2004) which is organised according to the strictly Classical Arabic morphology and syntax rules, regardless of the modern data of examples and the recent innovations used.

This list includes the following, explained briefly (see Appendix C for the deverbalisation scale that includes them):

1. *Sentences*: three types of sentences are adopted. They are:

a. nominal (i.e., starting with a noun or noun phrase), as in:

25- العالم قرية صغيرة.

b. verbal, (i.e., the first element is a verb), as in:

26- نجحت الطالبة.

c. interrogative, which is introduced by an interrogative element (Ryding,2005:58), as in:

27- هل تعرف المسألة؟

2. *Coordinate construction and clause*: two or more sentences or constructions are coordinated either without or with DCs, whether punctuation is involved or not, Badawi, Carter & Gully (2004:539ff), as in:

a. asyndetic, which has no DC, as in:

28- لعبنا معاً...مرحاً معاً.

b. syndetic, which has some DC, as in:

29- الضوء ناصع ,والجو حار.

3. *Subordinate construction and clause*: subordinated items which function as simple elements subordinated by each other can be a nominal or verbal sentence, or a clause, or phrase (ibid.:575ff). Four types are recognised:

a. circumstantial qualifiers and indefinite adjectival clauses, as in:

30- انطلقت في الشارع تبحث عن الاطفال.

31- رجل يقول الحق.

b. syndetic single (single DC , لَمَّا , أَنَّ), as in:

32- يسعدني أَنْ تكون رئيساً.

c. syndetic correlative (مع أَنَّ , إلاَّ أَنَّ , لم...حتى), as in:

33- لم تكذ الحكومة تعلن فرض ضريبة المبيعات حتى سارع التجار برفع الاسعار.

d. complementisers (أَنَّ , أَنْ) clauses, as in:

34- قرر أَنْ يسير.

4. *Adjectival and relative clauses*: adjectival clauses can qualify indefinite nouns, while clauses qualifying definite nouns are treated as relative clauses, as in (ibid.489ff):

35- جلس رجل يتحدث.

36- جلس الرجل الذي يتحدث.

5. *Conditional clause (the condition, i.e., the protasis, and the result, i.e., apodosis)*: it is a clause that focuses on 'hypothetical conditions' which are specified for the sake of something to take place. Usually there are two parts: 1. the condition (i.e., the protasis) and 2. the result or the consequences (i.e., apodosis) (ibid.:636ff). Consider the example:

٣٧ – إذا كنت في الطوابق العلوية, لا تهرع الى الأسفل.

6. *Nominal(ised) construction and clause*: all elements in this type do not form complete sentences. They are (ibid.:100ff):

a. adjective and adjectival qualification, as in:

38- قصة طويلة.

b. apposition,(i.e., nouns or phrases are in apposition when they are juxtaposed referring to one entity but in different words) (Ryding,2005:240), as in:

39- ظاهرتان اجتماعيتان الفقر والانتحار.

c. adverb/adverbial, as in:

40- لغوياً.

41- هنا.

d. dependent elements, like *cognate accusative* (i.e., it is a way of "emphasising or enhancing a previous statement by deriving a verbal noun from the main verb or predicate... and modifying the derived verbal noun with an adjective that intensifies the effect of the statement") (ibid.:285), *accusative of specification* (i.e., "This form of adverbial accusative is used to label, identify, or specify something previously referred to in the sentence. It specifies the nature of what has been mentioned by answering the question "in what way?") (ibid.:295), *accusative of purpose* (i.e., "...an accusative used in order to show the motive, purpose, or reason for an action. It is usually used with an indefinite verbal noun") (ibid.:175), *comitative object* (i.e., is an accusative-case noun found, and follows the comitative usage of the particle 'واو المعية'. In this usage, the particle means 'with') (<http://corpus.quran.com/documentation/comitativeobject.jsp>),

prepositional object (i.e., a noun or noun phrase that follows a preposition to complete its meaning) (Kareem,2000:68ff). Examples are given below for these cases, respectively:

42- يتأثر تأثراً واضحاً.

43- أقدم الشعوب ركوباً للبحر.

44- ابتعدت خوفاً.

45- ما يتفق وطبيعة المحتويات.

46- شرح الكتاب بالتفصيل.

e. nominal arguments, like deverbal nouns (i.e., they are "systematically related to specific verb forms and can come from trilateral or quadrilateral roots...". They name the actions of their corresponding verbs) (Ryding,2005:75), *active participle* and *passive participle* (i.e., "The active participle describes or refers to the doer of the action and the passive participle describes or refers to the object of the action") (ibid.:83). Examples are given for these cases, respectively:

47- وصول القطار.

48- مُخَيَّبٌ للأمال.

49- مُحَمَّلَةٌ بغبار التعصب.

f. possessive/genitive construction and chain (i.e., "two nouns may be linked together in a relationship where the second noun determines the first by identifying, limiting, or defining it, and thus the two nouns function as one phrase or syntactic unit") (ibid.:205), as in:

50- حفلي الافتتاح والاختتام.

g. prepositional phrase, as in:

51- على جانبي النيل فيض من الضجيج.

h. vocative construction, i.e., addressing someone or some entity directly by the speaker (ibid.:170), as in:

52- يا أماء.

i. miscellaneous (comparatives, superlatives), as in, respectively:

53- هم أضعف مما تتصور.

54- الطريقة المثلى.

7. *Exceptive construction and clause*: exceptive constructions have two elements; the antecedent which is the general element from which the

exception is formed, and the element that is excepted, as in (Badawi, Carter and Gully, 2004:672):

55- لا إله إلا الله.

8. *Exclamation construction and clause*, (i.e., a construction or clause expressing astonishment, or surprise, or wonder) (Ryding, 2005:181), as in:

56- يا للعجب والغرابة والغموض!

Directly linked to this list is the issue of realising EDUs in Arabic. Arabic is a distinctive language in the way it expresses finiteness to the elements inside their constructions. It generally uses two ways which are either both activated at the same time, or one is active, or even none is active in the case of omission or non-finiteness: morphological, and contextual.

The first way employs both 'morphological' and 'contextual finite' forms in conjunction to each other. It is clear through the use of mood contrasts, called 'صيغ صرفية', whether in nominal sentences, or present verbal sentences, or some nominal(ised) constructions like active and passive participles when followed by other elements, or complementisers clauses, etc. However, there is no one-to-one correspondence between these types and this way. That is, a variation is quite possible depending on the position and function of a particular EDU in the text (المنصوري, 2002:28ff). Consider the examples below:

57- اللهم إني أعوذ بك منك.

58- نعوذ بك من أن ننطوي على غش أحد.

59- هذا أنا واقف بباب عزك.

60- هل ينفعني اعترافي بالخطأ؟

The second way, which is only 'contextual finite', is identified through the employment of several tools, called indicative markers, i.e., 'قرائن' which may be (verbal, nominal, adverbial, particle, meaning, cohesive, etc.). This is clear in past forms of verbs, or in constructions where only the linguistic context is decisive, or adverbs and adverbials, etc. It is also a true case that there is no one-to-one correspondence between these types

and this way. That is, a variation is quite possible depending on the position and function of a particular EDU in the text (ibid.:40ff) (for further information see chapter five for how they are used in text structure analysis). Examples are below:

61- أمرتني فأبطأت عنك.

62- ها أنا ذا، يا أخي.

63- أعترف لك في مقامي هذا.

One last thing in this issue is that, by way of thorough investigations of punctuation marks in Arabic, the 'comma' is used in between 'clause-like' EDUs while the 'full stop' is used at the end of complete sentences in meaning, even if they have several EDUs in sequence. This issue is directly related to the concepts of morpho-syntactic connection and disconnection (هارون, 1993:54ff).

3.6 Steps of Analysis

The present study, as stated earlier, is behind the generic and linguistic structures that unfold the rhetorical organisation of two collections of religious texts. Towards reaching this analysis, the steps of analysis below are followed and first applied to the selected texts from the Bible, and second to the selected texts from the Ṣaḥīfa:

1. Dividing the text into stages to investigate its AGS and GSP;
2. Identifying the EDUs of the texts by segmentation;
3. Analysing EDUs in terms of text structure and its two dimensions: dependency and realisation;
4. Interpreting Rhe Rs in order to build up the discourse structure with them;
5. Analysing hierarchy and source of coherence;
6. Making RST graphical representations; and
7. Analysing the type of linkage and signals used.

Notes to Chapter Three

1. Field, tenor, and mode are defined by Hasan (in Halliday & Hasan, 1989:56-59) as follows:

"Field, being concerned with the nature of the social activity, involves both the kind of acts being carried out and their goal(s)", "This [Tenor] social activity is institutionalised. And so the nature of the activity predicates the set of roles [i.e. Agent Roles] relevant to the unfolding of the activity", and "The third variable, mode, can also be described under at least different sub-headings. First, there is the question of the LANGUAGE ROLE– whether it is CONSTITUTIVE or ANCCILARY. These categories should not be seen as sharply distinct but rather as the two end-points of a continuum.... The second factor to be considered under mode is that of PROCESS SHARING. Is the addressee able to share the process of text creation as it unfolds, or does the addressee come to the text when it is a finished product? Here again, there are degrees of process sharing from the most active-as in dialogue-to the most passive-as in a formal lecture. The degree to which process sharing can occur is closely related to CHANNEL [i.e. phonic or graphic]. The third important factor relevant to mode is MEDIUM, the primary distinction here being: is the medium SPOKEN or WRITTEN. Medium refers to the patterning the wordings themselves: for example, is there a great degree of grammatical complexity or of lexical density? Like process sharing and language role, the difference is patterning the wording is again a matter of degree [capitals in the origin] "

2. The 'S' in terms of Hasan's examples is abbreviated to 'SL', in this current study, in order not to confuse it with the recurrent abbreviation 'S', (meaning Satellite; a widely well-known RST abbreviation), throughout the whole study.

3. The foreground-background distinction is more or less equivalent to the N-S distinction in RST (Gylling, 2013:29).

4. Among them is word order, as in Danish. In most subordinate clauses, negation is placed between the subject and the verb and not between the verb and its object in sentences and other types of clauses (Gylling, 2013:90).

5. See appendix A for the definitions of all these relations.

6. Gylling (2013:173) states: *"Discourse cue is intended as a general term for those words that signal discourse coherence in texts. The term 'cue' is taken from Grosz and Sidner (1986) and corresponds essentially to other proposals found in the literature ..."*

7. An alternative would be to combine "Liturgies" (which might be thought of as "scripts") and "Liturgical books" (manuals of instruction on performance) into the single heading: "Liturgies and rituals" with the scope note *"This heading is used for prescribed forms of religious actions and worship."* In that case, all of the UF

references for both “Liturgies” and “Liturgical books” would be applied to “Liturgies and rituals” heading.

8. The researcher has emailed and contacted the following scholars:

1. Professor 'John Lachlan Mackenzie', PhD of Functional Linguistics at VU University of Amsterdam, Holland. He is working as a Consultant in Languages and Linguistics,

2. Professor 'Maite Taboada', PhD of English Linguistics at Simon Fraser University, Burnaby, Canada. She has written many articles and conducted several studies related to RST, and

3. Assistant Professor 'Rasha Diab', PhD of Composition and Rhetoric at the University of Texas at Austin, Texas, USA.

9. Gylling (2013:72) cites Stede (2011:89) who tries to define EDUs more precisely as a: *"span of text, usually a clause, but in general ranging from minimally a (nominalisation) NP to maximally a sentence. It denotes a single event or type of event, serving as a complete, distinct unit of information that the subsequent discourse may connect to. An EDU may be structurally embedded in another"*.

CHAPTER FOUR

ENGLISH DATA ANALYSIS AND DISCUSSION

4.1 Introduction

This chapter is a rhetorical analysis of the selected data according to the two modes stated previously. To maintain objective conclusions, a discussion of results will follow each level of these two modes. The analysis will be for the two structures in each text, i.e. generic structure and linguistic structures including text, discourse, and information structures. Each structure is to be analysed due to its aspects. In the qualitative analysis of each case study, i.e. text, the researcher may give a number of examples to show how the structures are utilised and carried out. The analysis will also be revealed numerically. Six texts are selected from the Bible. They are three petitionary praise (i.e., lament) and three declarative praise (i.e., thanksgiving) PSs. These have two major characteristics (Coutler,2011: 12ff):

1. A variety of types that makes it possible to distinguish some PSs with certain structural patterns which are fairly stable, and
2. Some commonalities are obviously shared among some PSs: their problem-referring ways, their expressing of individual and community help cries to God, etc.

The unifying element of 'praise' is suggestive among these two sub-genres as each is taken as a different mode of praise (Bratcher,2005: 7, available from <http://www.crivoice.org/psalmgenre.html/>). To illustrate, lament, individual or community, recognises a complaint against physical or mental suffering that threatens the individual or group worshipping. Since lament focuses on an unresolved present distress, it often expresses *"misery about one's own suffering or guilt, about enemy activities, and about God's negligence"* (Waltner,2006:763f). Usually, a five-element default structure can be nominated, but not necessarily appear in each lament:

1. Opening address;
2. Description of the trouble or distress;
3. Petition for God's response, often accompanied by reasons for God to act;
4. Profession of trust in God; and
5. Promise or vow to praise God or to offer a sacrifice.

Thanksgiving PSs are a grateful response of individuals and community towards God for some particular deliverance acts such as liberation from enemies, healing, or even rescue from a dangerous or unpleasant situation or trouble. They have the following default structuring (ibid.:764f):

1. Account of trouble and salvation;
2. Praise of the LORD's saving work;
3. Presentation of offering; and
4. Blessing and exhortation.

These PSs present a deliverance story coming after the described suffering and pain which lie in the past. They differ from laments in that the problems (i.e., suffering and pain) are resolved in thanksgiving (ibid).

4.2 Rhetorical Organisation of the Selected Biblical Texts

This part is devoted to analysing and discussing the rhetorical organisation of the selected English texts due to two structures: generic, and linguistic. The plan of analysis goes as such. First the generic structure is analysed for the six texts, followed by a discussion of this analysis. Second, the linguistic structures are analysed, starting with text, discourse, and then information structure with their dimensions. Discussing the analysis of each immediately follows.

4.2.1 Generic Structure Analysis

The generic structure analysis of all texts includes four aspects: themes, content outline, values of 'field', 'tenor', and 'mode', and AGSs.

4.2.1.1 Generic Analysis of Petitionary Praise (i.e., Lament) Texts (PSs No. 9,10, 22)

These texts are taken as lament texts for they are used to bring requests to God.

A. Themes

The major themes of these texts are:

Text One (Lament PS 9): The themes of this PS are God's thanksgiving, faith in God's total rule, petition for deliverance, and the cry for justice.

Text Two (Lament PS 10): While the focus of the previous text is on the yet-to-come judgement, this text spotlights the present judgement for those who wickedly oppose God and severely attack His people. Its powerful description makes it suitable for the afflicted/oppressed as a lament prayer for immediate help.

Text Three (Lament PS 22): The dominating themes of this significant individual lament are severe mental suffering or physical pain and seeking and finding God. It shows *"an intensity and comprehensiveness, moving from the depths of personal anguish to exuberant praise of God, which knows no bounds"* (ibid: 120).

B. Content Outline

If read carefully, the content outline of these texts looks like:

Text One: 1. Thanksgiving for God's Judgement on the Enemy; 2. Thanksgiving that God does not Forget the Oppressed/Reasons for the Delight; and 3. Petition for Deliverance and the Cry for Justice.

Text Two: 1. Lament over the Prosperity of the Wicked; 2. Petition that God Remember the Afflicted and Punish the Wicked; and 3. Praise that the LORD is Judge of the Nations and Saviour of the Poor.

Text Three: 1. Address, Affirmation, Complaint, and Petition; 2. Description of the Psalmist's Plight and Petition; 3. Praise in the Congregation; and 4. Proclamation of the Worldwide Sovereignty of the LORD.

C. Values

The values of 'field', 'tenor', and 'mode' are stated below:

1. Field

Text One: the goal of this text is to invite those people of faith to pray with full awareness that God is righteously judging people, nations, and individuals and that God hears their cry. This is pictured in thanksgiving and hopeful trust. These two acts are spreading over the text which moves towards confidence.

Text Two: its main goal is to let people know that the enemy they should face is one that invades, corrupts, and destroys from within. The feeling of perplexity of the psalmist leads him to enact a lament over the prosperity of wickedness through four 'Why?' questions about God's silence and the reviling of the wicked. Amidst of this, the psalmist raises his plea, in a passionate mode of cry, for God to remember the oppressed/afflicted and punish the wicked. Back to his confidence, the psalmist closes with praise.

Text Three: the goal of this is not to confess a sin or imprecate on particular enemies, but to send a message to worshippers that they can count on God. He is to answer their prayers. It encourages others to trust in being rescued sooner or later and to be sure that deliverance may hopefully come. To this end, the psalmist practices some acts such as crying of anguish when God seems absent for the psalmist observed in the first and second points of the PS content outline above, and

expressing the response of thanksgiving and praise shown through the third and fourth points of the above PS outline.

2. Tenor

Text One: the agents in this text are in a hierarchic relation to each other. That is, the subordinate individual psalmist in terms of 'I' and 'my' or other parties in terms of the plural 'the oppressed', 'the nations', 'the peoples', 'those who seek you', 'the wicked', 'the needy', 'the enemy', 'the afflicted', etc. have their roles as the lowly to the superordinate 'You', 'LORD', 'God', 'Most High'. The social distance is minimal since the degree of familiarity is greater between the present/visible subordinate agent and the invisible superordinate agent who definitely knows the psalmist, supposedly 'David' the Prophet, and his needs and fulfils his requests if he is a true worshipper. This also means that the psalmist knows his LORD through deliverance of his pleas, his petitions, laments, offering his thanksgiving, and praise.

Text Two: the agents in this text are in a hierarchic relation to each other. That is, the present/visible subordinate individual psalmist in terms of 'third person singular' or other parties in terms of the plural 'the oppressed', 'the nations', 'the peoples', 'the fatherless', 'the wicked', 'the helper', 'the enemy', 'the afflicted', 'the victim', etc. have their roles as the lowly to the invisible superordinate 'You', 'LORD', 'God', 'King'. In addition, other parties of a hierarchic relation also play their role, i.e. those who control over the other: the wicked/the greedy vs. the weak/the enemies/the helpless/the innocent. The social distance is minimal since the degree of familiarity is greater between the present/visible subordinate agent and the invisible superordinate agent.

Text Three: the agents in this text are in a hierarchic relation which is reflected in:

a. 'I' referring to the psalmist, vs. 'me' which denotes him in 'object' position; both references are subordinate to the superordinate 'My God', 'the LORD', 'You' or even to 'men', 'people', 'all', 'many bulls', 'strong

bulls of Bashan', 'roaring lions', 'dogs', and 'a band of evil men' who scorn or attack or hate him, and

b. 'You', 'the Holy One' vs. 'me', the psalmist.

Since the degree of familiarity is greater between the invisible and present agents, the social distance is minimal.

3. Mode

All Three Texts: the language role is evidently constitutive. The channel used is phonic. The medium employed is written to be spoken. Accordingly, The CCs of these texts would look like:

1. Field

Text One: Religion language: lament: praise and thanksgiving: trust and faith: petition.

Text Two: Religion language: lament: frustration: cry and petition: praise.

Text Three: Religion language: lament: frustration: foes and fatigue: petition: praise.

2. Tenor for the three texts

Agents: hierarchic: the individual(s) subordinate and LORD/God superordinate; social distance: minimal.

3. Mode for the three texts

Language role: constitutive; channel: phonic; medium: written to be spoken.

D. AGSs

The AGS of these texts would include the elements which are actually present. However, the possibility of the optionality and iteration of some elements would be regarded in relation to other yet-to-be-analysed texts of the same CC. As for obligatory elements, they are to be identified

through the GSP which is to be discovered when analyses of all sub-genre texts are completed (see sect 4.3.1). The messages of these texts are distributed over the following actual elements (see Appendix D):

Table (4.1): The Structural Elements (Stages) of Petitionary Praise PSs.

Text	No.	Structural Elements (Stage)	Outline	Verses	From ... To
1	1	Opening Address	Announcing God's 'mighty deeds' and 'extraordinary works'	1-2	I will praise ... O Most High.
	2	Reasons for Delight	Showing why delight is present above; 'mighty deeds' deserve thanksgiving	3-6	My enemies... has perished.
	3	Profession of Trust in God	Hope of the oppressed that God is soon to act in times of distress and trouble	7-10	The LORD reigns... who seek you.
	4	Praise to God	Call for the afflicted and the oppressed to praise God and testify about His care for them	11-12	Those who know ... has done.
	5	Petition for God	Addressing God's graciousness in order to offer praise with joy for His justice will prevail	13-18	LORD ...ever perish.
	6	Request for God	Concluding with a request for the LORD 's intervention	19-20	Arise ... but men.
2	1	Voicing the psalmist's frustration/ ignorance	Two 'Why?' questions about God's silence expressing sense of abandonment forcefully	1	Why, O LORD... of trouble?
	2	Lament to picture wickedness	Describing the evil impulse in the wicked in plotting/ implementing their acts/traps	2-11	In his arrogance... and never sees."
	3	Petition for God	Crying for vengeance, repeating the plea for God to 'rise up' to act for the righteous	12-15	Arise, LORD... would not be found out.
	4	Praise to God	Expressing the psalmist's confidence in God answering his petition	16-18	The LORD... may terrify no more.
	1	Opening Address/Cry	Though crying with two 'Why?' questions, love is there to a personal God	1-2	My God... and am not silent.

3	2	Statement of Affirmation	Because God is Holy, confidence in Him is stronger. This is encouraging to honour His rewards	3-5	Yet you are... were not disappointed.
	3	Complaint	Reference to rejecting 'the inner self', mocking, and insulting by others	6-8	But I am... he delights in him."
	4	Statement of Affirmation	The psalmist remembering that God had supported, helped, strengthened, and encouraged him	9-10	Yet you brought... have been my God.
	5	Petition for God	Pleading that God should surely respond because H is the only help	11	Do not... no one to help.
	6	Complaint	Emphasising the miserable conditions of the psalmist that led him to a worsening plight	12-18	Many bulls... for my clothing.
	7	Petition for God	Hope is only in God and God alone, renewing the request for deliverance	19-21	But you... the wild oxen.
	8	Vow to Praise	Announcing thanksgiving to the LORD in particular setting, the temple, while connecting the fate of psalmist and the afflicted to the LORD's sovereignty	22-31	I will declare... he has done it.

The elements of these three texts can be displaced below where in each formula the caret sign indicates sequence:

Text One: Opening Address ^ Reasons for Delight ^ Profession of Trust ^ Praise to God ^ Petition for God ^ Request for God.

Text Two: Voicing Frustration ^ Lament against Wickedness ^ Petition for God ^ Praise to God.

Text Three: Opening Address/Cry ^ Statement of Affirmation ^ Complaint ^ Statement of Affirmation ^ Petition for God ^ Complaint ^ Petition for God ^ Vow to Praise.

4.2.1.2 Generic Analysis of Declarative Praise (i.e., Thanksgiving) Texts (PSs No. 34, 40, 41)

These three texts present thanksgiving to God for the fulfilling the requests.

A. Themes

The major themes of these texts are:

Text Four (Thanksgiving PS 34): This text is a combination of thanksgiving and wisdom. The theme of glorifying God for the deliverance of the oppressed is dominant. The psalmist reflects on the promise of the LORD to save those who show obedience to rules. This PS *"tells of the nearness, tenderness, ready help, and mighty power of the LORD on behalf of all who trust. It contrasts good and evil and acknowledges retribution"* (ibid:179).

Text Five (Thanksgiving PS 40): This psalm combines thanksgiving and lament. Its first theme is sacrificing the psalmist's self to God for the sake of deliverance. The second theme is the call for obedience on behalf of worshippers. The third theme has to do with praising the blessedness of those who are pious and who respect God's disciplines.

Text Six (Thanksgiving PS 41): A central theme of this thanksgiving PS is that since the palmist helps the poor, the needy, and the weak, God surely helps and delivers him in return. Therefore, the LORD deserves thanks to be offered to for being so gracious.

B. Content Outline

If read carefully, the content outline of these texts looks like:

Text Four: 1. Invitation to Praise; 2. Narrative of the Psalmist's Experience; 3. The LORD's care for those who Seek Him; 4. Invitation to Learn about Life; 5. The LORD's Face toward the Righteous; and 6. Liturgical Conclusion: The LORD Redeems.

Text Five: 1. Description of Past Deliverance; 2. Expressing Relief and Astonishment; and 3. Plea for a New Deliverance.

Text Six: 1. Didactic Introduction/Instruction of Confidence in the LORD; 2. The Psalmist's Lament Prayer; 3. Concluding Statement of Confidence; and 4. Doxology Blessing.

C. Values

The values of 'field', 'tenor', and 'mode' are stated below.

1. Field

Text Four: the goal of this individual thanksgiving PS is to instruct believers on how to live under the fear of the LORD, the deliverer of those who are afflicted. Among these instructions are: look after your tongue, detest and loathe evil, love and consider good, and seek and live in peace. Added to this is the practical meaning of what happiness in life is. To fulfil this goal, the psalmist enacts calling the hearers to worship and sharing the joy of praise. Other acts are noticed: the psalmist reciting his own experience and story of hope after disappointment, instructing didactically some wisdom to people, and showing reasons behind praise to God.

Text Five: the primary goal set for this text is to act as a liturgical unit that calls for praise which prepares for prayer. That is, it assures faith and strives for it (ibid.:206). It invites hearers to understand that sacrifices alone cannot detract sins. It is only through God's obedience and His divinity that people are saved. Another central goal is that faith and life must be integrated in order that beliefs match up practices. In this case, faith is to be shaped through community. These goals are reflected in some acts of the psalmist, among them are: celebrating God's past deliverance, professing/expressing his service-devotion to the LORD, praying to relieve himself from imminent dangers.

Text Six: the main goal is that reward from God would definitely be to those who attend to the needs of the weak and the poor. Another goal that

is anticipated is that God's sympathy is also granted to those who are compassionate towards others. Some acts are employed to fulfil these goals, such as: declaring blessedness with the sense of instructing others to have confidence in God, narrating his plight and personal experience with enemies as evidence of good care for the helpless, lamenting, praying and confessing sins, expressing his joy and gratitude for the LORD's deliverance and salvation, etc.

2. Tenor

Text Four: the agents who are in a hierarchic relation to each other are the present/visible subordinate represented by the psalmist 'I', 'my soul', 'me', or by others 'those who...', 'this poor man', 'him', 'them', 'the righteous', 'the afflicted', 'his servants' against the visible superordinate 'the LORD', 'He', 'Him', 'The angel/eyes/face/ears of the LORD'. Three other hierarchic relations exist; one between the psalmist as a master and 'my children' as students, the second is related to 'evil' which exercises control over 'the wicked', and the third is between 'The angel of the Lord' and 'those who fear him'. In all these relations there is a control of some agents over others. The social distance is minimal.

Text Five: the agents in this text are mainly in a hierarchic relation to each other linking the present/visible subordinate psalmist 'I', 'me', or other beings 'many...', 'the man who makes...' to the invisible superordinate 'LORD', 'You', 'He'. However, two non-hierarchic relations exist linking, in the first, 'the man...' to 'the proud' and to 'those who turn aside to false gods' (verse.4) and, in the second, 'those who say...' to 'me'. Both show a particular relation of indifference to the agents in charge of the acts. The social distance is minimal.

Text Six: the agents in this text are in two relations equally: hierarchic and non-hierarchic. Hierarchically, the present/visible subordinate psalmist 'I', 'me', 'him' are under the control of the invisible superordinate 'the LORD', 'You', 'He', 'the God of Israel'. In addition, some particular agent 'he', '(all my) my enemies', '...one...', 'my close friend', ' is also in a

superordinate non-hierarchic relation of indifference or rivalry with the present/subordinate psalmist. The social distance, however, is minimal.

3. Mode for the three texts

All Three Texts: the language role is evidently constitutive. The channel used is phonic. The medium employed is written to be spoken. Accordingly, The CCs of these texts would look like:

1. Field

Text Four: Religion language: thanksgiving: opening praise/bless: salvation after trouble: offering wisdom: blessing after redemption.

Text Five: Religion language: thanksgiving: celebrating God's past deliverance, professing/expressing service-devotion to the LORD, praying for relief.

Text Six: Religion language: thanksgiving: declaring blessedness and instructing for confidence, narrating plight and personal experience, lamenting/praying for relief, expressing gratitude for deliverance, concluding doxology.

2. Tenor for the three texts

Agents: hierarchic: the individual(s) subordinate and LORD/God superordinate; social distance: minimal.

3. Mode for the three texts

Language role: constitutive; channel: phonic; medium: written to be spoken.

D. AGSs

The AGSs of these texts would include the elements which are actually present. The messages of this text are distributed over the following actual elements (see Appendix D):

Table (4.2): The Structural Elements (Stages) of Declarative Praise PSs.

Text	No.	Structural Elements (Stage)	Outline	Verses	From ... To
4	1	Opening Praise/Bless	The psalmist calls hearers to worship and praise God	1-3	I will... his name together.
	2	Account of Salvation after Trouble	Narrating the psalmist's own experience leading to salvation	4-6	I sought...his troubles.
	3	Statement about the LORD's Goodness	Calling people to experience personally the LORD's goodness	7-10	The angel... no good thing.
	4	Offering Wisdom to Others	Instructing didactically some wisdom to people	11-14	Come,...and pursue it.
	5	Articulating God's Blessings	Contrasting the righteous whom God cares for and bless with the wicked	15-21	The eyes... will be condemned.
	6	Liturgical Assurance Note to the Righteous	You need not fear the fate of the wicked if you fear the LORD	22	The LORD... refuge in him.
5	1	Recording the Favour of God	Offering thanks to God for delivering him out of deep distress	1-4	I waited...false gods.
	2	Expressing Service-Devotion to the LORD	Sacrifices and obedience help the psalmist and hearers get salved	5-10	Many,... the great assembly.
	3	Praying/Petition for Mercy and Grace	Praying to relieve himself and his friends from imminent dangers	11-17	Do not...do not delay.
6	1	Declaring Blessedness through Instructing	Be attentive to the weak so that you confidently gain God's blessedness and deliverance	1-3	Blessed...of illness.
	2	Lamenting /Narrating Plight and Personal Experience	Confessing sins and narrating personal experience to receive God's graciousness	4-10	I said...repay them.
	3	Expressing Joy and Gratitude	Thanksgiving and joyful gratitude for the sake of vindication and deliverance	11-12	I know...for ever.
	4	Concluding Doxology	A doxological conclusion which serves as praise	13	Praise...Amen.

The elements of these three texts can be displaced below where in each formula the caret sign indicates sequence:

Text Four: Opening Praise/Bless ^ Account of Salvation after Trouble ^ Statement about the LORD's Goodness ^ Offering Wisdom to Others ^ Articulating God's Blessings ^ Liturgical Conclusion.

Text Five: Recording God's Favour ^ Expressing Devotion to the LORD ^ Praying/Petition for Mercy and Grace.

Text Six: Declaring Blessedness through Instructing ^ Lamenting/Narrating Plight and Experience ^ Expressing Joy and Gratitude ^ Concluding Doxology.

4.2.2 Generic Structure Discussion

Six texts from two sub-genres are selected for analysis as far as their generic structure is concerned. Three texts are taken to represent 'lament' PSs, and three texts to represent 'thanksgiving'.

The default structure of 'lament' is earlier shown as consisting of:

1. opening address; 2. description of the trouble or distress; 3. petition for God's response, often accompanied by reasons for God to act; 4. profession of trust in God; and 5. promise or vow to praise God or to offer a sacrifice.

In addition, the default structure of 'thanksgiving' is stated as:

1. account of trouble and salvation; 2. praise of the LORD's saving work; 3. presentation of offering; and 4. blessing and exhortation.

4.2.2.1 CCs and GSPs

Three generic aspects have been fully explained in each of these six texts: the content outline, the values of 'field', 'tenor', and 'mode', and the AGS. The optionality and iteration of some structural elements (i.e., stages) would be regarded in relation to all the analysed texts of the same

CC. The obligatory presence of some structural elements (i.e., stages) is to be identified through the GSP.

As for 'lament' texts, PSs '9', '10', and '22', two optional structural elements (i.e., stages) are seen, though with some realisations to be explained below: request/plea (henceforth R/P), affirmation (henceforth AF). The texts under 'thanksgiving' have also two optional structural elements (i.e., stages): petition (henceforth PT) and offering wisdom (henceforth OW). Obligatory elements are observed in the texts of the two sub-genres. 'Lament' texts have four elements: opening address (henceforth OA), expressing lament (henceforth EL), PT, and praise and/or bless (henceforth PRS/BL). 'Thanksgiving' texts have three elements: PRS/BL, account of experience and salvation (henceforth AES), and offering thanksgiving (henceforth OT).

Iteration, which is optional as Hasan (in Halliday & Hasan, 1989: 63) believe, is also seen in elements which are optional and elements which are taken as obligatory. 'Lament' text '1' has the obligatory element 'PR' iterated twice and text '3' has the obligatory element EL and the original optional AF iterated twice in each. 'Thanksgiving' texts have the following elements iterated: PR in text '4' is iterated three times and in text '6' twice, AES is iterated twice in text '4', and OT is also iterated twice in text '5'.

In this regard, obligatory elements which are responsible for the GSP of the whole genre can be downgraded to becoming 'strongly obligatory' in their presence. Contextually iterating an element in, for instance, service encounters discussed by Hasan (ibid.) is not a strong reason, we believe, for taking it as always optional. By the same logic, if iteration is contextual, then obligatory presence is also necessitated through the contexts of religion situation. This would be clear in the discussion of the realisation of these structural elements.

Six CCs are noticed: three in the 'lament' texts and three in the 'thanksgiving' ones. These CCs have been stated earlier under each text

when analysed. According to this, two GSPs are discovered, one for each sub-genre:

1. the first sub-genre; 'lament' texts:

$[OA \wedge EL .] \wedge [PT \wedge PRS .] \wedge [(R/P) . (AF .)] ;$

and

2. the second sub-genre; 'thanksgiving' texts:

$[PRS/BL . \wedge AES . \wedge OT .] \wedge [(OW) . (PT)]$

where:

' $\wedge$ ' indicates sequence of the structural elements, '.' refers to more than one option in sequence, square brackets restrain the degree of optionality, round brackets refer to optionality, and the curved arrow refers to iteration. It is to be noted that, for instance, R/P and/or AF may/may not occur, if they occur both, then R/P either precedes or follows AF.

4.2.2.2 The Realisation of Structural Elements (i.e., Stages)

No one-to-one correspondence is there between a structural element in these texts and a clause or a sentence or speech turn or one individual message or act (see sec. 3.1.1.2, the first residual issue). It is only in terms of the job in CCs where these elements are defined and realised. When generically analysing the texts, the following flexible 'sets of semantic properties', which is a term used by Hasan (ibid.: 76f), are uncovered for the first sub-genre texts, depending on the contextual situations of the religion language displayed here:

1. OA:

a. announcing deeds and works of God;

b. voicing the psalmist's frustration; and

c. crying out of personal love to God.

2. EL:

- a. describing trouble and distress with profession of trust in God;
- b. describing evil impulses in the wicked; and
- c. complaining about worsening plight.

3. PRS:

- a. calling for others to praise and testify God, and the psalmist's delight with or without reasons;
- b. expressing personal confidence in God answering the petition of the psalmist; and
- c. announcing thanksgiving in some definite settings and vows to doing that.

4. PT:

- a. addressing God's graciousness for His justice;
- b. crying for vengeance; and
- c. pleading for God's response and help.

5. R/P:

- a. request for God's intervention.

6. AF:

- a. encouraging to honour God's rewards; and
- b. remembering God's support, help, strength, and encouragement.

For the second sub-genre, the following set is noticed:

1. PRS/BL:

- a. calling others to worship and praise God;
- b. assuring God's redemption;

c. declaring blessedness through instructing; and

d. doxologically articulating God's blessings.

2. AES:

a. narrating personal experience leading to salvation;

b. confessing sins and narrating personal experience to receive God's graciousness; and

c. stating the LORD's goodness over people.

3. OT:

a. offering thanks to God for deliverance;

b. expressing devotion to God leading to relief and astonishment; and

c. expressing joy and gratitude for the sake of deliverance.

4. PT:

a. praying for mercy and grace.

5. OW:

a. offering others some wisdom didactically.

4.2.2.3 The Inherent Variation of Context

The plasticity of contexts is clear in the texts of the two sub-genres. Two sources for that are generally given by Hasan (ibid: 106):

1. a move in delicacy, for instance, as in 'channel: phonic: noisy'; or

2. a change in the values of 'field', 'tenor' and 'mode'.

The six CCs, and their GSPs, are not absolutely distinct, with no common implications in-between. On the contrary, the obligatory elements, for instance, in each sub-genre are common in presence and disposition and that is why there is a well-defined 'genre' of this type of texts. Another commonality is the way the CCs of the texts in each sub-

genre are shaped. All the six texts share the values of 'tenor' (Agents: hierarchic: the individual(s) subordinate and LORD/God superordinate; social distance: minimal) and 'mode' (Language role: constitutive; channel: phonic; medium: written to be spoken). They also share part of the values of 'field' (Religion language: lament) or (Religion language: thanksgiving). Some structural elements, such as OP followed by EL, PT, and PRS, which are included in AGS and their sequencing at some positions, are also shared. These two last points are clearly noticed in the analysis earlier conducted. Still another commonality is the sets of semantic properties employed to define and realise the structural elements. They shape the disposition and job of each structural element inside its CC.

4.2.2.4 Levels of Textual Identity

Only two levels, out of the four levels presented by Hasan (ibid: 110ff), are recognised at which analysed texts are, to some degree, identical. They are:

1. material uniqueness and verbal identity (saying the same words on distinct occasions), though not widely spread, yet they can be identified. Some parts of texts can be verbally 'identical' but still 'unique' because each has a materially different situation to express within the structural element or the whole text. Examples are:

1. *EDU (#5) in text '1' and EDU (#7) in text '4': [and rejoice];*
2. *EDUs (#26+27), (#33+34), and (#36+37) in text '2': [He lies] [in wait]...;*
3. *EDU (#29) in text '4' and EDU (#17) in text '5'; [Blessed is the man]....*

These excerpts from their nominated texts are materially 'unique' specifically when the adjacent EDU(s), whether before or after, is/are taken into account. For illustration, the EDU [and rejoice] in 'a' above is preceded by EDU (#4) [I will be glad] in text '1' and by EDU (#6) [let the afflicted hear] in text '4'. The agents of the acts are different (the

subordinate individual or individuals) and the first acts represented by EDUs (#4) and (#6) are also not exactly similar (being glad vs. let the afflicted hear). With 'b', the setting, which is EDU (#28) [near the villages;], is stated after EDUs (#26+27), the means, that is in EDU (#35) [like a lion in cover], is shown for EDUs (#33+34), and the purpose, which is embodied in EDU (#38), is uncovered for EDUs (#36+37). With the last excerpt 'c', the Rhe R of 'elaboration' is recognised for the EDUs coming after [Blessed is the man] in both texts.

2. structural uniqueness and verbal uniqueness can be represented by the fact that the six texts have different AGSs and, thus, have not exactly the same words and sentences. Therefore, structural uniqueness presupposes verbal uniqueness.

The other two levels of textual identity; i.e., 'verbal uniqueness and structural identity' and 'generic uniqueness and uniqueness of actual structure' are not shown in the texts under analysis because:

1. no two texts are structurally identical so that they are to be verbally unique, as stated by level '2' in Hasan (ibid.); and
2. the pivotal factor in generic uniqueness, which is level '4' in Hasan (ibid), is the existence of obligatory elements that, in this case, the two sub-genres have similarly in both GSPs. If two texts are unique as far as their genre is concerned, then they would be structurally unique and, then, their AGSs would be different.

4.2.3 Linguistic Structures Analysis

The analysis at this stage starts at the level of the linguistic structures used in the selected texts.

4.2.3.1 Text Structure

This sub section analyses the text structure of the above PSs, in two dimensions: syntactic relations (dependency), seen in coordination vs. subordination of EDUs, and realisation of EDUs in terms of verbal

finiteness (finite or non-finite verb forms or verbless constructions). The deverbalisation scale discussed earlier (see Appendix B) shall be employed here in the analysis. The syntactic relations analysed in this sub section, and the coming similar analyses, are only the intrasentential since they are the interest of syntactic type of coordination and subordination. However, the intersentential relations that link EDUs to other EDUs outside the sentence are to be analysed in the next sub section. The first thing to do is to show the number of EDUs relations considered in these PSs to facilitate the task of discussion which is yet to come. The first group of texts to be analysed are those under Petitionary Praise (i.e., Lament) (PSs No. 9, 20, 22).

4.2.3.1.1 Petitionary Praise (i.e., Lament) Texts

4.2.3.1.1.1 Text One (PS No. 9)

The text structure of this PS is clearly seen in the following table:

Table (4.3): The Text Structure of Text One (PS No. 9).

Stage No.	EDU No.	Linguistic Material of EDU	Syntactic Relation (Dependency)	Realisation
1 EDUs (#1-8)	1	I will praise you, O LORD [EDU#2],	Independent sentence (a)	Finite verb form
	2	with all my heart;	Nominalisation/ prepositional phrase(i)	Noun Phrase
	3	I will tell of all your wonders.	Independent sentence (a)	Finite verb form
	4	I will be glad	Independent sentence (a)	Finite verb form
	5	and rejoice [EDU#6]	Coordinate clause (c) to #4	Finite verb form
	6	in you;	Nominalisation/ prepositional phrase(i)	Pronoun
	7	I will sing praise [EDU#8]	Independent sentence (a)	Finite verb form
	8	to your name, O Most High.	Nominalisation/ prepositional phrase(i)	Noun Phrase
	9	My enemies turn back;	Independent sentence (a)	Finite verb form
	10	they stumble	Independent sentence (a)	Finite verb form
	11	and perish [EDU#12]	Coordinate clause (c) to #10	Finite verb form
	12	before you.	Nominalisation/ prepositional phrase(i)	Pronoun
	13	For you have upheld my right and my cause;	Subordinate finite adverbial clause (d) to # 10-12	Finite verb form
	14	you[EDU#15] have sat on your throne,	Independent sentence (a)	Finite verb form

2	15	judging righteously.	Present participle modifier (h) to 'you' in #14	Non-finite verb form
	16	You have rebuked the nations	Independent sentence (a)	Finite verb form
	17	and destroyed the wicked;	Coordinate clause (c) to #16	Finite verb form
	18	you have blotted out their name for ever and ever	Independent sentence (a)	Finite verb form
	19	Endless ruin has overtaken the enemy,	Independent sentence (a)	Finite verb form
	20	you have uprooted their cities;	Independent sentence (a)	Finite verb form
	21	even the memory of them has perished.	Independent sentence (a)	Finite verb form
3	22	The LORD reigns forever;	Independent sentence (a)	Finite verb form
	23	he has established his throne [EDU#24]	Independent sentence (a)	Finite verb form
	24	For judgment.	Nominalisation/ prepositional phrase(i)	Noun
	25	He will judge the world [EDU#26]	Independent sentence (a)	Finite verb form
	26	in righteousness;	Nominalisation/ prepositional phrase(i)	Noun
	27	He will govern the peoples [EDU#28]	Independent sentence (a)	Finite verb form
	28	with justice.	Nominalisation/ prepositional phrase(i)	Noun
	29	The LORD is a refuge [EDU#30]	Independent sentence (a)	Finite verb form
	30	For the oppressed,	Nominalisation/ prepositional phrase(i)	Noun Phrase
	31	(The LORD is)a stronghold [EDU#32]	Coordinate clause (c) to #29-30	Finite verb form omitted
	32	in times of trouble.	Nominalisation/ prepositional phrase(i)	Noun Phrase
	33	Those [EDU#34]will trust [EDU#35]	Independent sentence (a)	Finite verb form
	34	who know your name	Relative clause (e) to 'those' in #33	Finite verb form
	35	in you,	Nominalisation/ prepositional phrase(i)	Pronoun
	36	For you, LORD, have never forsaken those [EDU#37]	Subordinate finite adverbial clause (d)	Finite verb form
	37	who seek you.	Relative clause (e) to 'those' in #36	Finite verb form
	38	Sing praises [EDU#39]	Independent sentence (a)	Finite verb form
	39	to the LORD,[EDU#40]	Nominalisation/ prepositional phrase(i)	Noun Phrase

4	EDUs (#38-45)	40	enthroned in Zion;	Past participle modifier (h) to 'the LORD' in #38	Non-finite verb form
		41	proclaim [EDU#42] what he has done	Independent sentence (a)	Finite verb form
		42	among the nations	Nominalisation/ prepositional phrase(i)	Noun Phrase
		43	For he[EDU#44]remembers;	Subordinate finite adverbial clause (d) to # 41-42	Finite verb form
		44	who avenges blood	Relative clause (e) to 'he' in #43	Finite verb form
		45	he does not ignore the cry of the afflicted.	Independent sentence (a)	Finite verb form
5	EDUs (#46-68)	46	LORD, see how my enemies persecute me!	Independent sentence (a)	Finite verb form
		47	Have mercy	Independent sentence (a)	Finite verb form
		48	and lift me up[EDU#48]	Coordinate clause (c) to #47	Finite verb form
		49	from the gates of death,	Nominalisation/ prepositional phrase(i)	Noun Phrase
		50	that I may declare your praises [EDU#51]	Subordinate finite adverbial clause (d) to #47-48	Finite verb form
		51	in the gates of the Daughter of Zion	Nominalisation/ prepositional phrase(i)	Noun Phrase
		52	and there rejoice [EDU#53]	Coordinate clause (c) to #50	Finite verb form
		53	in your salvation.	Nominalisation/ prepositional phrase(i)	Noun Phrase
		54	The nations have fallen [EDU#55]	Independent sentence (a)	Finite verb form
		55	into the pit[EDU#56]	Nominalisation/ prepositional phrase(i)	Noun Phrase
		56	they have dug;	Relative clause (e) to 'pit' in #55	Finite verb form
		57	their feet are caught [EDU#58]	Independent sentence (a)	Finite verb form
		58	in the net[EDU#59]	Nominalisation/ prepositional phrase(i)	Noun Phrase
		59	they have hidden.	Relative clause (e) to 'net' in #58	Finite verb form
		60	The LORD is known [EDU#61]	Independent sentence (a)	Finite verb form
		61	by his justice;	Nominalisation/ prepositional phrase(i)	Noun Phrase
		62	The wicked are ensnared [EDU#63]	Independent sentence (a)	Finite verb form
		63	by the work of their hands.	Nominalisation/ prepositional phrase(i)	Noun Phrase

	64	The wicked return to the grave,	Independent sentence (a)	Finite verb form
	65	all the nations [EDU#66]	Independent sentence fragment (a)	Omitted finite verb form
	66	that forget God.	Relative clause (e) to 'nations' in #65	Finite verb form
	67	But the needy will not always be forgotten,	coordinate clause (c) to #60-66 or #60-63	Finite verb form
	68	Nor the hope of the afflicted ever perish.	Coordinate clause (c) to #67	Finite verb form
6 EDUs (#69-75)	69	Arise, O LORD,	Independent sentence (a)	Finite verb form
	70	let not man triumph;	Independent sentence (a)	Finite verb form
	71	Let the nations be judged [EDU#72]	Independent sentence (a)	Finite verb form
	72	in your presence.	Nominalisation/ prepositional phrase(i)	Noun Phrase
	73	Strike them[EDU#73] O LORD;	Independent sentence (a)	Finite verb form
	74	with terror,	Nominalisation/ prepositional phrase(i)	Noun
	75	let the nations know they are but men.	Independent sentence (a)	Finite verb form

The number of EDUs in total is (75) and is distributed over the six stages as follows:

1. '33' EDUs which have been textualised as independent sentences (level a);
2. Next in distribution is level (i) which has '21' EDUs textualised as nominalisation/prepositional;
3. '8' EDUs are textualised as coordinate main or matrix clause (i.e. level c) where EDU (#31) in stage '3' may be taken as a coordinate matrix clause if the coordinator 'and' is inserted;
4. '6' EDUs are textualised as relative clauses (i.e. level e);
5. '4' EDUs are textualised as subordinate finite adverbial clauses (i.e. level d);

6. '2' EDUs are textualised as level (h), i.e. present, past participle or adjectival modifier;

7. '1' independent sentence fragment (level a); whose verbal element with its subject would be uncovered through the preceding context.

It is noticed that '12' EDUs act as whole independent sentences intersententially linked to other EDUs, making reasonable sense by themselves with no subordinate EDUs attached such as: EDU (#3)[I will tell of all your wonders.] in stage '1'; and other cases in other stages. However, both 'comma' and 'semicolon' can often be used in biblical texts instead of full stops to make sure that the ideas on either side are closely related (<http://www.thebibleteaches.com/FragRunonCSplice>).

Other EDUs have intrasentential subordinate EDUs attached. This is the dominating feature here, as in the independent EDU (#1) [I will praise you, O LORD,] with another EDU (#2) [with all my heart;]. In addition, such subordinate EDUs may in turn have other subordinate EDUs inside, as in (#49-51). This yields a deeper textual structure of different degrees of subordination. Syntactically coordinated EDUs which are intrasententially distributed in the text are '8' cases in number. Syntactically subordinated EDUs intrasententially distributed are '33'cases. Subordination between EDUs in this text is, thus, heavily employed. Whether coordinated or subordinated, EDUs are heavily used in intrasentential positions in this text.

The different levels of the deverbalisation scale used in the analysis can be grouped into four main groups according to the verbal finiteness (Gylling,2013: 93ff):

1. the upper levels (a-c) are more or less independent of the adjacent EDU in terms of their grammatical and semantic values, can clearly express speech acts independently, and have finite verb forms;
2. levels (d-e) lose independent tense, mood, and illocution and they contain finite verb forms, too;

3. levels (f-h) have non-finite verb forms and they lack any aspectual, modal, and temporal values; and

4. level (i) nominalisation (including overtly-signalled prepositional phrases where the verbal element is omitted or strongly nominalised) and level (j) verbless constructions (where there is complete absence of verbal element) are syntactically related to the whole event or situation the matrix EDU conveys.

Accordingly, '50' EDUs in this text are morphologically realised by finite verb forms, most of them are positioned intrasententially. They are distributed over the first three groups above. '2' EDUs (#15) in stage '2' (#40) in stage '4', are realised by non-finite verb forms. '2' EDUs (#31+65) has its finite verb form omitted. '22' cases belonging to level (i) are realised by nouns, pronouns, and noun phrases.

4.2.3.1.1.2 Text Two (PS No. 10)

The text structure of this PS is clearly seen in the following table:

Table (4.4): The Text Structure of Text Two (PS No. 10).

Stage No.	EDU No.	Linguistic Material of EDU	Syntactic Relation (Dependency)	Realisation
1 EDUs (#1-3)	1	Why, O LORD, do you stand far off?	Independent sentence (a)	Finite verb form
	2	Why do you hide yourself [EDU#3]	Independent sentence (a)	Finite verb form
	3	in times of trouble?	Nominalisation/ prepositional phrase (i)	Noun Phrase
2 EDUs (#4-49)	4	In his arrogance	Nominalisation/ prepositional phrase (i)	Noun Phrase
	5	the wicked man hunts down the weak,[EDU#6]	Independent sentence (a)	Finite verb form
	6	who are caught in the schemes [EDU#7]	Relative clause (e) to 'the weak' in #5	Finite verb form
	7	he devises.	(Reduced) Relative clause (e) to 'the schemes' in #6	Finite verb form
	8	He boasts of the cravings of his heart;	Independent sentence (a)	Finite verb form
	9	he blesses the greedy	Independent sentence (a)	Finite verb form

10	and reviles the LORD.	Coordinate clause (c) to #9	Finite verb form
11	In his pride	Nominalisation/ prepositional phrase (i)	Noun Phrase
12	the wicked does not seek him;	Independent sentence (a)	Finite verb form
13	in all his thoughts	Nominalisation/ prepositional phrase (i)	Noun Phrase
14	there is no room for God.	Independent sentence (a)	Finite verb form
15	His ways are always prosperous;	Independent sentence (a)	Finite verb form
16	he is haughty	Independent sentence (a)	Finite verb form
17	and your laws are far from him;	Coordinate clause (c) to #16	Finite verb form
18	he sneers [EDU#19]	Independent sentence (a)	Finite verb form
19	at all his enemies.	Nominalisation/ prepositional phrase (i)	Noun Phrase
20	He says[EDU#21]“Nothing will shake me;	Independent sentence (a)	Finite verb form
21	to himself,	Nominalisation/ prepositional phrase (i)	Pronoun
22	I’ll always be happy	Clause as part of a sentence (b) #20	Finite verb form
23	and never have trouble.”	Coordinate clause (c) to #23	Finite verb form
24	His mouth is full of curses and lies and threats;	Independent sentence (a)	Finite verb form
25	trouble and evil are under his tongue.	Independent sentence (a)	Finite verb form
26	He lies [EDU#27-28]	Independent sentence (a)	Finite verb form
27	in wait	Nominalisation/ prepositional phrase (i)	Noun
28	near the villages;	Nominalisation/ prepositional phrase (i)	Noun Phrase
29	from ambush	Nominalisation/ prepositional phrase (i)	Noun
30	he murders the innocent,	Independent sentence (a)	Finite verb form
31	watching [EDU#32] for his victims.	Present participle modifier (h) to #30	Non-finite verb form

	32	in secret	Nominalisation/ prepositional phrase (i)	Noun
	33	He lies [EDU#34-35]	Independent sentence (a)	Finite verb form
	34	in wait	Nominalisation/ prepositional phrase (i)	Noun
	35	like a lion in cover;	Nominalisation/ prepositional phrase (i)	Noun Phrase
	36	he lies [EDU#37-37]	Independent sentence (a)	Finite verb form
	37	in wait	Nominalisation/ prepositional phrase (i)	Noun
	38	to catch the helpless;	Infinitival clause (f) to #36-37	Non-finite verb form
	39	he catches the helpless	Independent sentence (a)	Finite verb form
	40	and drags them off [EDU#41]	Coordinate clause (c) to #39	Finite verb form
	41	in his net.	Nominalisation/ prepositional phrase (i)	Noun Phrase
	42	His victims are crushed,	Independent sentence (a)	Finite verb form
	43	they collapse;	Independent sentence (a)	Finite verb form
	44	they fall [EDU#45]	Independent sentence (a)	Finite verb form
	45	under his strength.	Nominalisation/ prepositional phrase (i)	Noun Phrase
	46	He says[EDU#47] “God has forgotten;	Independent sentence (a)	Finite verb form
	47	to himself,	Nominalisation/ prepositional phrase (i)	Pronoun
	48	he covers his face	Clause as part of a sentence (b) #46	Finite verb form
	49	and never sees.”	Coordinate clause (c) to #48	Finite verb form
	50	Arise, LORD!	Independent sentence (a)	Finite verb form
	51	Lift up your hand, O God.	Independent sentence (a)	Finite verb form
	52	Do not forget the helpless.	Independent sentence (a)	Finite verb form
	53	Why does the wicked man revile God?	Independent sentence (a)	Finite verb form

3 EDUs (#50-64)	54	Why does he say [EDU#55] “He won’t call me to account”?	Independent sentence (a)	Finite verb form
	55	to himself,	Nominalisation/ prepositional phrase (i)	Pronoun
	56	But you, O God, do see trouble and grief;	coordinate clause (c) #53-55	Finite verb form
	57	you consider it [EDU#58]	Independent sentence (a)	Finite verb form
	58	to take it in hand.	Infinitival clause (f) to #57	Non-finite verb form
	59	The victim commits himself to you;	Independent sentence (a)	Finite verb form
	60	you are the helper of the fatherless.	Independent sentence (a)	Finite verb form
	61	Break the arm of the wicked and evil man;	Independent sentence (a)	Finite verb form
	62	call him [EDU#63]	Independent sentence (a)	Finite verb form
	63	to account for his wickedness [EDU#64]	Infinitival clause (f) to #63	Non-finite verb form
	64	that would not be found out.	Relative clause (e) to 'wickedness' in #63	Finite verb form
4 EDUs (#65-73)	65	The LORD is King for ever and ever;	Independent sentence (a)	Finite verb form
	66	the nations will perish[EDU#67]	Independent sentence (a)	Finite verb form
	67	from his land.	Nominalisation/ prepositional phrase (i)	Noun Phrase
	68	You hear, O LORD, the desire of the afflicted;	Independent sentence (a)	Finite verb form
	69	you encourage them,	Independent sentence (a)	Finite verb form
	70	and you listen to their cry,	Coordinate clause (c) to #69	Finite verb form
	71	defending the fatherless and the oppressed,	Present participle modifier (h) to #69-70	Non-finite verb form
	72	in order that man,[EDU#73]may terrify no more.	Infinitival clause (f) to #71	Non-finite verb form
	73	who is of the earth,	Relative clause (e) to 'man' in #72	Finite verb form

The number of EDUs in total is (73) and distributed over the stages of the text as follows:

1. '36' EDUs are textualised as independent sentences (level a);

2. '18' EDUs are textualised as nominalisation/prepositional phrase, level (i);
3. '7' EDUs are textualised as coordinate clause (i.e. level c);
4. '2' EDUs are textualised as main or matrix clause as part of a sentence, (level b); they are part of the content of the verb 'say' in the main sentence;
5. '4' EDUs are textualised as relative clauses, level (e);
6. '4' EDUs belong to level (f), infinitival clause;
7. '2' EDUs are textualised as level (h), i.e. present, past participle or adjectival modifier;

'16' independent-sentence EDUs are intersententially linked to other EDUs, making reasonable sense by themselves with no subordinate EDUs attached such as: EDU (#1) [Why, O LORD, do you stand far off?] in stage '1'. Other cases are in other stages.

Other EDUs have intrasentential subordinate EDUs attached. It is the dominating feature as in the independent EDU (#2) [Why do you hide yourself] with another EDU (#3) [in times of trouble?]. In addition, such subordinate EDUs may in turn have other subordinate EDUs inside, as in (#69-73). This yields a deeper textual structure of different degrees of subordination. Syntactically coordinated EDUs which are intrasententially distributed in the text are '7' cases. Syntactically subordinated EDUs intrasententially distributed are '30' cases. Subordination between EDUs in this text is, thus, heavily employed. Coordinated or subordinated EDUs are heavily used in intrasentential positions in this text.

According to the four levels of the deverbalisation scale discussed earlier, it is clearly noticed that '52' EDUs in this text are morphologically realised by finite verb forms, most of them are positioned intrasententially. They are distributed over the first three groups above. In

addition, '6' EDUs (#31+38) in stage '2'; (#58+63) in stage '3'; (#71+72) in stage '4' are realised by non-finite verb forms. '18' cases of level (i) are realised by nouns, pronouns, and noun phrases.

4.2.3.1.1.3 Text Three (PS No. 22)

The text structure of this PS is clearly seen in the following table:

Table (4.5): The Text Structure of Text Three (PS No. 22).

Stage No.	EDU No.	Linguistic Material of EDU	Syntactic Relation (Dependency)	Realisation
1 EDUs (#1-9)	1	My God, my God, why have you forsaken me?	Independent sentence (a)	Finite verb form
	2	Why are you so far [EDU#3]	Independent sentence (a)	Finite verb form
	3	from saving me,	Nominalisation/ prepositional phrase (i)	Noun
	4	[EDU#2] from the words of my groaning?	Nominalisation/ prepositional phrase (i)	Noun Phrase
	5	my God, I cry out [EDU#6]	Independent sentence (a)	Finite verb form
	6	by day,	Nominalisation/ prepositional phrase (i)	Noun
	7	but you do not answer,	Coordinate clause (c) to #5-6	Finite verb form
	8	[EDU#5] by night,	Nominalisation/ prepositional phrase (i)	Noun
	9	and am not silent.	Coordinate clause (c) to #5-8	Finite verb form
2 EDUs (#10-21)	10	Yet you are enthroned as the Holy One;	Coordinate clause (c) to #1-9	Finite verb form
	11	you are the praise of Israel.	Independent sentence (a)	Finite verb form
	12	In you	Nominalisation/ prepositional phrase (i)	Pronoun
	13	our fathers put their trust;	Independent sentence (a)	Finite verb form
	14	they trusted	Independent sentence (a)	Finite verb form
	15	and you delivered them.	Coordinate clause (c) to #14	Finite verb form
	16	They cried [EDU#17]	Independent sentence (a)	Finite verb form
	17	to you	Nominalisation/ prepositional phrase (i)	Pronoun
	18	and were saved;	Coordinate clause (c) to #16-17	Finite verb form
	19	in you	Nominalisation/ prepositional phrase (i)	Pronoun
	20	they trusted	Independent sentence (a)	Finite verb form
	21	and were not disappointed.	Coordinate clause (c) to #20	Finite verb form
	22	But I am a worm	Coordinate clause (c) to #16-21 or #20	Finite verb form

3 EDUs (#22-33)	23	and (I am) not a man,	Coordinate clause (c) to #22	Finite verb form omitted
	24	scorned by men	Past participle modifier (h) to # 23 or #22	Non-finite verb form
	25	and despised by the people.	Coordinate clause (c) to # 22 or past participle (Coordinate) (h) to #24	Finite verb form or Non-finite verb form
	26	All [EDU#27] mock me;	Independent sentence (a)	Finite verb form
	27	who see me	Relative clause (e) to 'all' in #26	Finite verb form
	28	they hurl insults, [EDU#29]	Independent sentence (a)	Finite verb form
	29	shaking their heads:	Present participle modifier (h) to #28	Non-finite verb form
	30	“He trusts in the LORD;	Clause as part of a sentence (b)	Finite verb form
	31	let the LORD rescue him.	Clause as part of a sentence (b)	Finite verb form
	32	Let him deliver him,	Clause as part of a sentence (b)	Finite verb form
	33	since he delights in him.”	Subordinate finite adverbial clause (d) to #32	Finite verb form
4 EDUs (#34-42)	34	Yet you brought me [EDU#35]	Coordinate main clause (c) to #22-33	Finite verb form
	35	out of the womb;	Nominalisation/ prepositional phrase (i)	Noun Phrase
	36	you made me trust in you	Independent sentence (a)	Finite verb form
	37	even at my mother’s breast.	Subordinate finite adverbial clause (d) to #36	Finite verb form omitted
	38	From birth	Nominalisation/ prepositional phrase (i)	Noun
	39	I was cast[EDU#40]	Independent sentence (a)	Finite verb form
	40	upon you;	Nominalisation/ prepositional phrase (i)	Pronoun
	41	from my mother’s womb	Nominalisation/ prepositional phrase (i)	Noun Phrase
	42	you have been my God.	Independent sentence (a)	Finite verb form
5 EDUs (#43-46)	43	Do not be far [EDU#44]	Independent sentence (a)	Finite verb form
	44	from me,	Nominalisation/ prepositional phrase (i)	Pronoun
	45	for trouble is near	Subordinate finite adverbial clause (d) to #43-44	Finite verb form
	46	and there is no one to help.	Coordinate clause (c) to #45	Finite verb form
	47	Many bulls surround me;	Independent sentence (a)	Finite verb form
	48	strong bulls of Bashan encircle me.	Independent sentence (a)	Finite verb form

6 EDUs (#47- 75)	49	Roaring lions [EDU#50] open their mouths wide	Independent sentence (a)	Finite verb form
	50	tearing their prey [EDU#51]	Present participle modifier (h) to #49	Non-finite verb form
	51	against me.	Nominalisation/ prepositional phrase (i)	Pronoun
	52	I am poured out [EDU#53]	Independent sentence (a)	Finite verb form
	53	like water,	Nominalisation/ prepositional phrase (i)	Noun
	54	and all my bones are out of joint.	Coordinate clause (c) to #52-53	Finite verb form
	55	My heart has turned [EDU#56]	Independent sentence (a)	Finite verb form
	56	to wax;	Nominalisation/ prepositional phrase (i)	Noun
	57	it has melted away [EDU#58]	Independent sentence (a)	Finite verb form
	58	within me.	Nominalisation/ prepositional phrase (i)	Pronoun
	59	My strength is dried up [EDU#60]	Independent sentence (a)	Finite verb form
	60	like a potsherd,	Nominalisation/ prepositional phrase (i)	Noun Phrase
	61	and my tongue sticks[EDU#62]	Coordinate clause (c) to #59-60	Finite verb form
	62	to the roof of my mouth;	Nominalisation/ prepositional phrase (i)	Noun Phrase
	63	you lay me [EDU#64]	Independent sentence (a)	Finite verb form
	64	in the dust of death.	Nominalisation/ prepositional phrase (i)	Noun Phrase
	65	Dogs have surrounded me;	Independent sentence (a)	Finite verb form
	66	a band of evil men has encircled me,	Independent sentence (a)	Finite verb form
	67	they have pierced my hands and my feet.	Independent sentence (a)	Finite verb form
	68	I can count all my bones;	Independent sentence (a)	Finite verb form
	69	people stare	Independent sentence (a)	Finite verb form
	70	and gloat [EDU#71]	Coordinate clause (c) to #69	Finite verb form
	71	over me.	Nominalisation/ prepositional phrase (i)	Pronoun
	72	They divide my garments [EDU#73]	Independent sentence (a)	Finite verb form
	73	among them	Nominalisation/ prepositional phrase (i)	Pronoun
	74	and cast lots [EDU#75]	Coordinate clause (c) to #72-73	Finite verb form

	75	for my clothing.	Nominalisation/ prepositional phrase (i)	Noun Phrase
7 EDUs (#76- 86)	76	But you, O LORD, be not far off;	Coordinate clause (c) to #47- 75	Finite verb form
	77	O my Strength, come quickly [EDU#78]	Independent sentence (a)	Finite verb form
	78	to help me.	Infinitival clause (f) to # 77	Non-finite verb form
	79	Deliver my life [EDU#80]	Independent sentence (a)	Finite verb form
	80	from the sword,	Nominalisation/ prepositional phrase (i)	Noun Phrase
	81	[Deliver] my precious life [EDU#82]	Coordinated main clause (c) to #79-80 or undefined ambiguous case	Finite verb form omitted
	82	from the power of the dogs.	Nominalisation/ prepositional phrase (i)	Noun Phrase
	83	Rescue me [EDU#84]	Independent sentence (a)	Finite verb form
	84	from the mouth of the lions;	Nominalisation/ prepositional phrase (i)	Noun Phrase
	85	save me [EDU#86]	Independent sentence (a)	Finite verb form
	86	from the horns of the wild oxen.	Nominalisation/ prepositional phrase (i)	Noun Phrase
8	87	I will declare your name [EDU#88]	Independent sentence (a)	Finite verb form
	88	to my brothers;	Nominalisation/ prepositional phrase (i)	Noun Phrase
	89	in the congregation	Nominalisation/ prepositional phrase (i)	Noun Phrase
	90	I will praise you.	Independent sentence (a)	Finite verb form
	91	You[EDU#91] praise him!	Independent sentence (a)	Finite verb form
	92	who fear the LORD,	Relative clause (e) to 'you' in # 91	Finite verb form
	93	All you descendants of Jacob, honour him!	Independent sentence (a)	Finite verb form
	94	Revere him, all you descendants of Israel!	Independent sentence (a)	Finite verb form
	95	For he has not despised	Subordinate finite adverbial clause (d) to #91-94	Finite verb form
	96	or disdained the suffering of the afflicted one;	Coordinate clause (c) to #95	Finite verb form
	97	he has not hidden his face [EDU#98]	Independent sentence (a)	Finite verb form
	98	from him	Nominalisation/ prepositional phrase (i)	Pronoun

EDUs (#87-129)	99	but has listened to his cry [EDU#100]	Coordinate clause (c) to #97-98	Finite verb form
	100	for help.	Nominalisation/ prepositional phrase (i)	Noun
	101	From you comes the theme of my praise [EDU#102]	Independent sentence (a)	Finite verb form
	102	in the great assembly;	Nominalisation/ prepositional phrase (i)	Noun Phrase
	103	before those[EDU#104]	Nominalisation/ prepositional phrase (i)	Pronoun
	104	who fear you	Relative clause (e) to 'those' in #103	Finite verb form
	105	will I fulfil my vows.	Independent sentence (a)	Finite verb form
	106	The poor will eat	Independent sentence (a)	Finite verb form
	107	and be satisfied;	Coordinate clause (c) to #106	Finite verb form
	108	They[EDU#109]will praise him —	Independent sentence (a)	Finite verb form
	109	who seek the LORD	Relative clause (e) to 'they' in #108	Finite verb form
	110	may your hearts live forever!	Independent sentence (a)	Finite verb form
	111	All the ends of the earth will remember	Independent sentence (a)	Finite verb form
	112	and turn to the LORD,	Coordinate clause (c) to #111	Finite verb form
	113	and all the families of the nations will bow down [EDU#114]	Coordinate clause (c) to #111-112	Finite verb form
	114	before him,	Nominalisation/ prepositional phrase (i)	Pronoun
	115	for dominion belongs to the LORD	Subordinate finite adverbial clause (d) to #111-114	Finite verb form
	116	and he rules [EDU#117]	Coordinate clause (c) to #115	Finite verb form
	117	over the nations.	Nominalisation/ prepositional phrase (i)	Noun Phrase
	118	All the rich of the earth will feast	Independent sentence (a)	Finite verb form
	119	and worship;	Coordinate clause (c) to #118	Finite verb form
	120	All [EDU#121] will kneel[EDU#122]	Independent sentence (a)	Finite verb form
	121	who go down to the dust	Relative clause (e) to 'all' in #120	Finite verb form

122	before him —	Nominalisation/ prepositional phrase (i)	Pronoun
123	those who cannot keep themselves alive.	Relative clause (e) to 'all' in #120	Finite verb form
124	Posterity will serve him;	Independent sentence (a)	Finite verb form
125	future generations will be told [EDU#126]	Independent sentence (a)	Finite verb form
126	about the Lord.	Nominalisation/ prepositional phrase (i)	Noun Phrase
127	They will proclaim his righteousness [EDU#128]	Independent sentence (a)	Finite verb form
128	to a people yet unborn —	Nominalisation/ prepositional phrase (i)	Noun Phrase
129	for he has done it.	Subordinate finite adverbial clause (d) to #127-128	Finite verb form

The total number of EDUs is (129) and distributed as follows:

1. '49' EDUs have been textualised as independent sentences (level a);
2. Next in distribution is level (i) which has '38' EDUs textualised as nominalisation/prepositional phrase;
3. '22' EDUs are textualised as coordinate main or matrix clause (i.e. level c);
4. '6' EDUs are textualised as subordinate finite adverbial clause (level d);
5. '6' EDUs are textualised as relative clauses (level e);
6. '3' EDUs are textualised as level (h), i.e. present, past participle or adjectival modifier;
7. '3' EDUs textualised as main or matrix clause that is part of a sentence; i.e. level (b) are in stage '3': (#30+31+32).
8. '2' ambiguous EDUs: (#25) in stage '3' which can be either a coordinate main clause or a coordinated past participle, and (#81) in stage '7' which is either a coordinated main clause to (#79) or undefined through the deverbalisation scale discussed earlier.

9. '1' EDU (#78) is textualised as infinitival clause, (level f).

It is noticed that there are '15' EDUs acting as whole independent sentences linked intersententially to other EDUs, making reasonable sense by themselves with no subordinate EDUs attached such as: (#1) [My God, my God, why have you forsaken me?] in stage '1' and other cases in other stages.

Other EDUs have intrasentential subordinate EDUs attached. This is the dominating feature here; as in the independent EDU (#2) [Why are you so far] with another EDU (#3) [from saving me,] and (#4) [from the words of my groaning?]. Other subordinate EDUs may in turn have other subordinate EDUs inside, as in (#22-25) or (#28-30). This yields a deeper textual structure of different degrees of subordination. Syntactically coordinated EDUs which are intrasententially distributed in the text are '21' clear cases in number. However, syntactically subordinated EDUs intrasententially distributed are '54' cases. Subordination between EDUs in this text is, thus, heavily employed. Whether coordinated or subordinated, EDUs are heavily used in intrasentential positions in this text.

In terms of the four levels of the deverbalisation scale, '84' EDUs in this text are morphologically realised by finite verb forms, most of them are positioned intrasententially. They are distributed over the first three groups above. There are '3' cases where the finite verb form is deleted. One case is ambiguous as to whether it is realised by finite or non-finite verb form. '4' clear EDUs are realised by non-finite verb forms. '37' cases belonging to level (i) are realised by nouns, pronouns, and noun phrases.

4.2.3.1.2 Declarative Praise (i.e., Thanksgiving) Texts

4.2.3.1.2.1 Text Four (Ps No. 34)

The text structure of this PS is clearly seen in the following table:

Table (4.6): The Text Structure of Text Four (PS No. 34).

Stage No.	EDU No.	Linguistic Material of EDU	Syntactic Relation (Dependency)	Realisation
1 EDU (#1-10)	1	I will extol the LORD [EDU#2]	Independent sentence (a)	Finite verb form
	2	at all times;	Nominalisation/ prepositional phrase (i)	Noun Phrase
	3	his praise will always be on my lips.	Independent sentence (a)	Finite verb form
	4	My soul will boast [EDU#5]	Independent sentence (a)	Finite verb form
	5	in the LORD;	Nominalisation/ prepositional phrase (i)	Noun Phrase
	6	let the afflicted hear	Independent sentence (a)	Finite verb form
	7	and rejoice.	Coordinate main clause (c) to #6	Finite verb form
	8	Glorify the LORD [EDU#9]	Independent sentence (a)	Finite verb form
	9	with me:	Nominalisation/ prepositional phrase (i)	Pronoun
	10	let us exalt his name together.	Independent sentence (a)	Finite verb form
2 EDUs (#11-22)	11	I sought the LORD,	Independent sentence (a)	Finite verb form
	12	and he answered me;	Coordinate main clause (c) to #11	Finite verb form
	13	he delivered me [EDU#14]	Independent sentence (a)	Finite verb form
	14	from all my fears.	Nominalisation/ prepositional phrase (i)	Noun Phrase
	15	Those [EDU#16] are radiant;	Independent sentence (a)	Finite verb form
	16	who look to him	Relative clause (e) to 'those' in #15	Finite verb form
	17	their faces are never covered [EDU#18]	Independent sentence (a)	Finite verb form
	18	with shame.	Nominalisation/ prepositional phrase (i)	Noun
	19	This poor man called,	Independent sentence (a)	Finite verb form
	20	and the LORD heard him;	Coordinate main clause (c) to #19	Finite verb form
	21	he saved him [EDU#22]	Independent sentence (a)	Finite verb form
	22	out of all his troubles.	Nominalisation/ prepositional phrase (i)	Noun Phrase
	23	The angel of the LORD encamps[EDU#24]	Independent sentence (a)	Finite verb form
	24	around those [EDU#25]	Nominalisation/ prepositional phrase (i)	Pronoun
	25	who fear him,	Relative clause (e) to 'those' in #24	Finite verb form
	26	and he delivers them.	Coordinate main clause (c) to #24-25	Finite verb form

3 EDU (#23- 37)	27	Taste	Independent sentence (a)	Finite verb form
	28	and see that the LORD is good;	Coordinate main clause (c) to #27	Finite verb form
	29	blessed is the man [EDU#30-31]	Independent sentence (a)	Finite verb form
	30	who takes refuge [EDU#31]	Relative clause (e) to 'man' in #29	Finite verb form
	31	in him.	Nominalisation/ prepositional phrase (i)	Pronoun
	32	Fear the LORD, you his saints,	Independent sentence (a)	Finite verb form
	33	for those [EDU#34] lack nothing.	Subordinate finite adverbial clause (d) to #32	Finite verb form
	34	who fear him	Relative clause (e) to 'those' in #33	Finite verb form
	35	The lions may grow weak and hungry,	Independent sentence (a)	Finite verb form
	36	but those [EDU#36] lack no good thing.	Coordinate main clause (c) to #35	Finite verb form
	37	who seek the LORD	Relative clause (e) to 'those' in #36	Finite verb form
4 EDUs (38- 51)	38	Come, my children,	Independent sentence (a)	Finite verb form
	39	listen to me;	Independent sentence (a)	Finite verb form
	40	I will teach you the fear of the LORD.	Independent sentence (a)	Finite verb form
	41	Whoever of you loves life	Relative clause (e) to #43	Finite verb form
	42	and desires to see many good days,	Coordinate matrix clause (c) to #41	Finite verb form
	43	[EDU#41-42] keep your tongue [EDU#44]	Independent sentence (a)	Finite verb form
	44	from evil	Nominalisation/ prepositional phrase (i)	Noun
	45	and your lips [EDU#46]	Coordinate matrix clause (c) to #43	Finite verb form omitted
	46	from speaking lies.	Nominalisation/ prepositional phrase (i)	Noun Phrase
	47	Turn [EDU#48]	Independent sentence (a)	Finite verb form
	48	from evil	Nominalisation/ prepositional phrase (i)	Noun
	49	and do good;	Coordinate main clause (c) to #47-48	Finite verb form
	50	seek peace	Independent sentence (a)	Finite verb form
	51	and pursue it.	Coordinate main clause (c) to #50	Finite verb form
	52	The eyes of the LORD are on the righteous	Independent sentence (a)	Finite verb form
	53	and his ears are attentive	Coordinate main clause (c)	Finite verb form

5	EDUs (#52-73)		[EDU#54]	to #52	
		54	to their cry;	Nominalisation/ prepositional phrase (i)	Noun Phrase
		55	the face of the LORD is against those[EDU#55]	Independent sentence (a)	Finite verb form
		56	who do evil,	Relative clause (e) to 'those' in #55	Finite verb form
		57	to cut off the memory of them [EDU#58]	Infinitival Clause (f) to #55-56	Non-finite verb form
		58	from the earth.	Nominalisation/ prepositional phrase (i)	Noun Phrase
		59	The righteous cry out,	Independent sentence (a)	Finite verb form
		60	and the LORD hears them;	Coordinate main clause (c) to #59	Finite verb form
		61	he delivers them [EDU#62]	Independent sentence (a)	Finite verb form
		62	from all their troubles.	Nominalisation/ prepositional phrase (i)	Noun Phrase
		63	The LORD is close [EDU#64]	Independent sentence (a)	Finite verb form
		64	to the brokenhearted	Nominalisation/ prepositional phrase (i)	Noun Phrase
		65	and saves those[EDU#65]	Coordinate main clause (c) to #63-64	Finite verb form
		66	who are crushed in spirit.	Relative clause (e) to 'those' in #65	Finite verb form
		67	A righteous man may have many troubles,	Independent sentence (a)	Finite verb form
		68	but the LORD delivers him [EDU#69]	Coordinate main clause (c) to #67	Finite verb form
		69	from them all;	Nominalisation/ prepositional phrase (i)	Pronoun
		70	he protects all his bones,	Independent sentence (a)	Finite verb form
		71	not one of them will be broken.	Independent sentence (a)	Finite verb form
		72	Evil will slay the wicked;	Independent sentence (a)	Finite verb form
6	EDUs (#74-77)	73	the foes of the righteous will be condemned.	Independent sentence (a)	Finite verb form
		74	The LORD redeems his servants;	Independent sentence (a)	Finite verb form
		75	no one [EDU#76]will be condemned	Independent sentence (a)	Finite verb form
		76	who takes refuge [EDU#77]	Relative clause (e) to 'no one' in #75	Finite verb form
		77	in him.	Nominalisation/ prepositional phrase (i)	Pronoun

The total number of EDUs is (77) and distributed over the six stages as follows:

1. '35' EDUs have been textualised as independent sentences (level a);
2. Next in distribution is level (i) which has '17' EDUs textualised as nominalisation/prepositional phrase;
3. '14' EDUs are textualised as coordinate main or matrix clause (i.e. level c);
4. '9' EDUs are textualised as relative clauses (e);
5. '1' EDU (#33) in stage '1' is textualised as subordinate finite adverbial clause (level d);
6. '1' EDU (#57) in stage '5' is textualised as infinitival clause (level f).

It is noticed that '8' EDUs are whole independent sentences linked intersententially to other EDUs, making reasonable sense by themselves with no subordinate EDUs attached such as: (#3) [his praise will always be on my lips.] in stage '1' and other cases in other stages.

Other EDUs have intrasentential subordinate EDUs attached. This is the dominating feature here; as in the independent EDU (#3) [My soul will boast] with EDU (#2) [in the LORD]. Other subordinate EDUs may in turn have other subordinate EDUs inside, as in (#56-58). This yields a deeper textual structure of different degrees of subordination. Syntactically coordinated EDUs which are intrasententially distributed in the text are '14' in number. However, syntactically subordinated EDUs intrasententially distributed are '28' cases. Subordination between EDUs in this text is, thus, heavily employed. Whether coordinated or subordinated, EDUs are heavily used in intrasentential positions in this text.

According to the four levels of the deverbalisation scale, '58' EDUs in this text are morphologically realised by finite verb forms, most of them are positioned intrasententially. They are distributed over all groups

above. There is only '1' case where the finite verb form is deleted. '1' EDU is realised by non-finite verb form. '17' cases belonging to level (i) are realised by nouns, pronouns, and noun phrases.

4.2.3.1.2.2 Text Five (Ps No. 40)

The text structure of this PS is clearly seen in the following table:

Table (4.7): The Text Structure of Text Five (PS No. 40).

Stage No.	EDU No.	Linguistic Material of EDU	Syntactic Relation (Dependency)	Realisation
1 EDUs (#1-21)	1	I waited patiently for the LORD;	Independent sentence (a)	Finite verb form
	2	he turned [EDU#3]	Independent sentence (a)	Finite verb form
	3	to me	Nominalisation/ prepositional phrase (i)	Pronoun
	4	and heard my cry.	Coordinate clause (c) to #2-3	Finite verb form
	5	He lifted me [EDU#6-7]	Independent sentence (a)	Finite verb form
	6	out of the slimy pit,	Nominalisation/ prepositional phrase (i)	Noun Phrase
	7	out of the mud and mire;	Nominalisation/ prepositional phrase (i)	Noun Phrase
	8	He set my feet [EDU#9]	Independent sentence (a)	Finite verb form
	9	on a rock	Nominalisation/ prepositional phrase (i)	Noun Phrase
	10	and gave me a firm place [EDU#11]	Coordinate clause (c) to #8-9	Finite verb form
	11	to stand.	Infinitival clause (f) to #10	Non-finite verb form
	12	He put a new song [EDU#13]a hymn of praise to our God.	Independent sentence (a)	Finite verb form
	13	in my mouth,	Nominalisation/ prepositional phrase (i)	Noun Phrase
	14	Many will see	Independent sentence (a)	Finite verb form
	15	and fear	Coordinate clause (c) to #14	Finite verb form
	16	and put their trust in the LORD.	Coordinate clause (c) to #14-15	Finite verb form
	17	Blessed is the man[EDU# 18-19]	Independent sentence (a)	Finite verb form
	18	who makes the LORD his trust,	Relative clause (e) to 'man' in #17	Finite verb form
	19	who does not look to the proud [EDU#20],	Relative clause (e) to 'man' in #17	Finite verb form

	20	to those [EDU#21]	Nominalisation/ prepositional phrase (i)	Pronoun
	21	who turn aside to false gods.	Relative clause (e) to 'those' in #20	Finite verb form
2 EDUs (#22- 49)	22	Many, O LORD my God, are the wonders[EDU#23]	Independent sentence (a)	Finite verb form
	23	you have done.	(Reduced)Relative clause (e) to 'wonders' in #22	Finite verb form
	24	The things[EDU#25-26] no one can recount [EDU#27];	Independent sentence (a)	Finite verb form
	25	you planned [EDU#26]	(Reduced)Relative clause (e) to 'things' in #24	Finite verb form
	26	for us	Nominalisation/ prepositional phrase (i)	Pronoun
	27	to you	Nominalisation/ prepositional phrase (i)	Pronoun
	28	were I to speak	Infinitival(non-finite subordinate) clause (f) to #30-31	Non-finite verb form
	29	and tell of them,	Infinitival clause (Coordinate) (f) to #28	Non-finite verb form
	30	they would be too many	Independent sentence (a)	Finite verb form
	31	to declare.	Infinitival clause (f) to #30	Non-finite verb form
	32	Sacrifice and offering you did not desire,	Independent sentence (a)	Finite verb form
	33	but my ears you have pierced;	Coordinate main clause (c) to #32	Finite verb form
	34	burnt offerings and sin offerings you did not require.	Independent sentence (a)	Finite verb form
	35	Then I said, "Here I am,	Independent sentence (a)	Finite verb form
	36	I have come —	Clause as part of a sentence (b) to #35	Finite verb form
	37	it is written about me [EDU#38]	Clause as part of a sentence (b) to #35-36	Finite verb form
	38	in the scroll.	Nominalisation/ prepositional phrase (i)	Noun Phrase
	39	I desire to do your will, O my God;	Clause as part of a sentence (b) to #35-38	Finite verb form
	40	your law is within my heart."	Clause as part of a sentence (b) to #35-39	Finite verb form
	41	I proclaim righteousness [EDU#42]	Independent sentence (a)	Finite verb form
	42	in the great assembly:	Nominalisation/ prepositional phrase (i)	Noun Phrase

	43	I do not seal my lips, [EDU#44], O LORD.	Independent sentence (a)	Finite verb form
	44	as you know,	Subordinate adverbial finite clause (d) to #43	Finite verb form
	45	I do not hide your righteousness [EDU#46]	Independent sentence (a)	Finite verb form
	46	in my heart;	Nominalisation/ prepositional phrase (i)	Noun Phrase
	47	I speak of your faithfulness and salvation.	Independent sentence (a)	Finite verb form
	48	do not conceal your love and your truth [EDU#49]	Independent sentence (a)	Finite verb form
	49	from the great assembly.	Nominalisation/ prepositional phrase (i)	Noun Phrase
3 EDUs (#50- 81)	50	Do not withhold your mercy [EDU#51], O LORD;	Independent sentence (a)	Finite verb form
	51	from me	Nominalisation/ prepositional phrase (i)	Pronoun
	52	may your love and your truth always protect me.	Independent sentence (a)	Finite verb form
	53	For troubles [EDU#54] surround me;	Subordinate adverbial finite clause (d) to #50-52	Finite verb form
	54	without number	Nominalisation/ prepositional phrase (i)	Pronoun
	55	my sins have overtaken me,	Independent sentence (a)	Finite verb form
	56	and I cannot see.	Coordinate clause (c) to #55	Finite verb form
	57	They are more than the hairs of my head,	Independent sentence (a)	Finite verb form
	58	and my heart fails [EDU#59]	Coordinate clause (c) to #57	Finite verb form
	59	within me.	Nominalisation/ prepositional phrase (i)	Pronoun
	60	Be pleased, O LORD,	Independent sentence (a)	Finite verb form
	61	to save me;	Infinitival clause (f) to #60	Non-finite verb form
	62	O, LORD, come quickly	Independent sentence (a)	Finite verb form
	63	to help me.	Infinitival clause (f) to #62	Non-finite verb form
	64	May all [EDU#65] be put to shame and confusion;	Independent sentence (a)	Finite verb form
	65	who seek to take my life	Relative clause (e) to 'all' in #64	Finite verb form
	66	may all[EDU#67] be turned back	Independent sentence (a)	Finite verb form

		[EDU#68]		
67	who desire my ruin	Relative clause (e) to 'all' in #66	Finite verb form	
68	in disgrace.	Nominalisation/ prepositional phrase (i)	Noun	
69	May those[EDU#70] be appalled [EDU#71]	Independent sentence (a)	Finite verb form	
70	who say to me, "Aha! Aha!"	Relative clause (e) to 'those' in #69	Finite verb form	
71	at their own shame.	Nominalisation/ prepositional phrase (i)	Noun Phrase	
72	But may all [EDU#73] rejoice	Coordinate clause (c) to #60-71	Finite verb form	
73	who seek you	Relative clause (e) to 'all' in #73	Finite verb form	
74	and be glad [EDU#75]	Coordinate clause (c) to #72-73	Finite verb form	
75	in you;	Nominalisation/ prepositional phrase (i)	Pronoun	
76	May those[EDU#77] always say, "The LORD be exalted!"	Independent sentence (a)	Finite verb form	
77	who love your salvation	Relative clause (e) to 'those' in #76	Finite verb form	
78	Yet I am poor and needy;	coordinate clause to #50-77	Finite verb form	
79	may the Lord think of me.	Independent sentence (a)	Finite verb form	
80	You are my help and my deliverer;	Independent sentence (a)	Finite verb form	
81	O my God, do not delay.	Independent sentence (a)	Finite verb form	

The total number of EDUs is (81) and distributed over the three stages as follows:

1. '31' EDUs are textualised as independent sentences (level a);
2. Next in distribution is level (i) which has '18' EDUs textualised as nominalisation/prepositional phrase;
3. '10' EDUs are textualised as coordinate main or matrix clause (i.e. level c); where EDU (#29) [and tell of them,] is a coordinate subjunctive construction similar to infinitival clause;

4. '10' EDUs textualised as relative clauses (e);
5. '6' EDUs are textualised as infinitival clause (level f); where EDU (#28) [were I to speak] is not exactly defined in the deverbalisation scale (i.e., it would be regarded as subordinate non-finite infinitival clause that is called 'subjunctive' construction), and EDU (#29) [and tell of them,] is a coordinate subjunctive construction similar to infinitival clause; two EDUs (#61+63) in stage '3';
6. '4' EDUs are textualised as level (b); main or matrix clause as part of a sentence. They are part of the content of the verb 'say' in the main sentence;
7. '2' EDUs are textualised as subordinate finite adverbial clause (level d);

It is noticed that '7' EDUs are whole independent sentences linked intersententially to other EDUs, making reasonable sense by themselves with no subordinate EDUs attached such as: (#1) [I waited patiently for the LORD;] in stage '1' and other cases in other stages.

Other EDUs have intrasentential subordinate EDUs attached. This is the dominating feature here; as in the independent EDU (#5) [He lifted me] with EDU (#6) [out of the slimy pit] and EDU (#7) [out of the mud and mire]. Other subordinate EDUs may in turn have other subordinate EDUs inside, as in (#17-21). This yields a deeper textual structure of different degrees of subordination. Syntactically coordinated EDUs which are intrasententially distributed in the text are '11' in number. However, syntactically subordinated EDUs intrasententially distributed are '38' cases. Subordination between EDUs in this text is, thus, heavily employed. Whether coordinated or subordinated, EDUs are heavily used in intrasentential positions in this text.

According to the four levels of the deverbalisation scale, '57' EDUs in this text are morphologically realised by finite verb forms, most of them are positioned intrasententially. They are distributed over all groups above. There are '6' EDUs that are realised by non-finite verb form. '18'

cases belonging to level (i) are realised by nouns, pronouns, and noun phrases.

4.2.3.1.2.3 Text Six (Ps No. 41)

The text structure of this PS is clearly seen in the following table:

Table (4.8): The Text Structure of Text Six (PS No. 41).

Stage No.	EDU No.	Linguistic Material of EDU	Syntactic Relation (Dependency)	Morphological Realisation
1 EDUs (#1-14)	1	Blessed is he[EDU#2]	Independent sentence (a)	Finite verb form
	2	who has regard for the weak;	Relative clause (e) to 'he' in #1	Finite verb form
	3	the LORD delivers him [EDU#4]	Independent sentence (a)	Finite verb form
	4	in times of trouble.	Nominalisation/ prepositional phrase (i)	Noun Phrase
	5	The LORD will protect him	Independent sentence (a)	Finite verb form
	6	and preserve his life;	Coordinate clause (c) to #5	Finite verb form
	7	he will bless him [EDU#8]	Independent sentence (a)	Finite verb form
	8	in the land	Nominalisation/ prepositional phrase (i)	Noun Phrase
	9	and not surrender him [EDU#10]	Coordinate clause (c) to #7-8	Finite verb form
	10	to the desire of his foes.	Nominalisation/ prepositional phrase (i)	Noun Phrase
	11	The LORD will sustain him [EDU#12]	Independent sentence (a)	Finite verb form
	12	on his sickbed	Nominalisation/ prepositional phrase (i)	Noun Phrase
	13	and restore him[EDU#14]	Coordinate clause (c) to #11-12	Finite verb form
	14	from his bed of illness.	Nominalisation/ prepositional phrase (i)	Noun Phrase
	15	I said, "O LORD, have mercy on me;	Independent sentence (a)	Finite verb form
	16	heal me,	Clause as part of a sentence (b) to #15	Finite verb form
	17	for I have sinned [EDU#18]	Subordinate finite adverbial clause (d) to #16	Finite verb form
	18	against you."	Nominalisation/ prepositional phrase (i)	Pronoun
	19	My enemies say of me[EDU#20]"When will he die	Independent sentence (a)	Finite verb form

2	20	in malice,	Nominalisation/ prepositional phrase (i)	Noun
	21	and his name perish?”	Coordinate clause (c) to #19- 20	Finite verb form
	22	Whenever one comes to see me,	Subordinate finite adverbial clause (d) to #23	Finite verb form
	23	he speaks falsely,	Independent sentence (a)	Finite verb form
	24	while his heart gathers slander;	Subordinate finite adverbial clause (d) to #23	Finite verb form
	25	then he goes out	Independent sentence (a)	Finite verb form
	26	and spreads it abroad.	Coordinate clause (c) to #25	Finite verb form
	27	All my enemies whisper together	Independent sentence (a)	Finite verb form
	28	against me;	Nominalisation/ prepositional phrase (i)	Pronoun
	29	they imagine the worst	Independent sentence (a)	Finite verb form
	30	for me,	Nominalisation/ prepositional phrase (i)	Pronoun
	31	saying, “A vile disease has beset him;	Present participle modifier (h) to #29-30	Non-finite verb form
	32	he will never get up [EDU#33]	Independent sentence (a)	Finite verb form
	33	from the place[EDU#34]	Nominalisation/ prepositional phrase (i)	Noun Phrase
	34	where he lies.”	Relative clause (e) to 'the place' in #33	Finite verb form
	35	Even my close friend, [EDU# 36- 37] has lifted up his heel [EDU#38]	Independent sentence (a)	Finite verb form
	36	whom I trusted	Relative clause (e) to 'close friend' in #35	Finite verb form
	37	he who shared my bread,	Relative clause (e) to 'close friend' in #35	Finite verb form
	38	against me.	Nominalisation/ prepositional phrase (i)	Pronoun
	39	But you, O LORD, have mercy [EDU#40]	Coordinate clause (c) to #15- 38	Finite verb form
	40	on me;	Nominalisation/ prepositional phrase (i)	Pronoun
	41	raise me up,	Independent sentence (a)	Finite verb form
	42	that I may repay them.	Subordinate finite adverbial clause (d) to #41	Finite verb form
3	43	I know that you are pleased [EDU#44]	Independent sentence (a)	Finite verb form
	44	with me,	Nominalisation/ prepositional phrase (i)	Pronoun

EDUs (#43-50)	45	for my enemy does not triumph[EDU#46]	Subordinate finite adverbial clause (d) to #43-44	Finite verb form
	46	over me.	Nominalisation/ prepositional phrase (i)	Pronoun
	47	In my integrity	Nominalisation/ prepositional phrase (i)	Noun Phrase
	48	you uphold me	Independent sentence (a)	Finite verb form
	49	and set me[EDU#50] forever.	Coordinate main clause (c) to #47-48	Finite verb form
	50	in your presence	Nominalisation/ prepositional phrase (i)	Noun Phrase
4 EDUs (#51-54)	51	Praise be to the LORD, the God of Israel, [EDU#52-53]	Independent sentence (a)	Finite verb form
	52	from everlasting	Nominalisation/ prepositional phrase (i)	Noun
	53	to everlasting	Nominalisation/ prepositional phrase (i)	Noun
	54	Amen and Amen. Coordinated Interjections Undefined via the nominated deverbalisation scale		

The total number of EDUs is (54) and distributed over the four stages as follows:

1. '17' EDUs which have been textualised as independent sentences (level a);
2. Next in distribution is level (i) which has '18' EDUs textualised as nominalisation/prepositional phrase;
3. '7' EDUs are textualised as coordinate main or matrix clause (i.e. level c);
4. '5' EDUs are textualised as subordinate finite adverbial clause (level d);
5. '4' EDUs textualised as relative clauses (e);
6. '1' EDU (#16) is textualised as level (b); main or matrix clause as part of a sentence. It is part of the content of the verb 'say' in the main sentence;
7. '1' EDU (#31) is textualised as level (h): present participle modifier;

8. '1' undefined case in terms of the deverbalisation scale, which is the coordinated interjection 'Amen and Amen'.

It is noticed that there are no EDUs which are whole independent sentences linked intersententially to other EDUs, making reasonable sense by themselves with no subordinate EDUs attached.

Other EDUs have intrasentential subordinate EDUs attached. This is the dominating feature here; as in the independent EDU (#1) [Blessed is he] with EDU (#2) [who has regard for the weak]. Other subordinate EDUs may in turn have other subordinate EDUs inside, as in (#29-31). This yields a deeper textual structure of different degrees of subordination. Syntactically coordinated EDUs which are intrasententially distributed in the text are '7' in number. However, syntactically subordinated EDUs intrasententially distributed are '29' cases. Subordination between EDUs in this text is, thus, heavily employed. Whether coordinated or subordinated, EDUs are heavily used in intrasentential positions in this text.

According to the four levels of the deverbalisation scale, '34' EDUs in this text are morphologically realised by finite verb forms, most of them are positioned intrasententially. They are distributed over all groups above. There is only '1' EDU that is realised by non-finite verb form. '18' cases belonging to level (i) are realised by nouns, pronouns, and noun phrases.

4.2.3.2 Text Structure Discussion

It is the turn now to discuss the two parameters earlier analysed in this level: dependencies and realisations of EDUs.

4.2.3.2.1 Dependencies of EDUs

'EDUs', as units of analysis, relate either to EDUs inside the same sentence (i.e., intrasentential) or across sentence boundaries (i.e., intersentential). Intrasentential EDU relations that are attributed to the

syntactic coordination and subordination are analysed in this level only (i.e., text structure). However, intersentential EDU relations, in addition to intrasentential, are analysed, and are to be discussed, in both 'discourse' and 'information' structures.

The following table shows the number of both intersentential and intrasentential EDU relations with their percentages in relation to the total number of EDUs in the data.

Table (4.9): The Distribution of EDU Relations.

EDU Relations	Number of Cases	Percentage
Intrasentential	430	87.934%
Intersentential	59	12.065%
Total:	489	-----

The vast majority of cases are intrasentential (430), whether they are subordinated or coordinated, which represent (87.934%). This number includes EDUs that work upon the textualisation levels in the deverbalisation scale (see 3.1.2.5). Only (59) cases representing (12.065%) are intersentential. Within these numbers, two ambiguous cases are noticed: EDU (#25) in text '3', which belongs to intrasentential relations, and EDU (#54) in text '6', which belongs to intersentential relations.

However, the intrasentential EDU relations are distributed over syntactic coordination and subordination as shown the following table:

Table (4.10): The Distribution of Subordinate and Coordinate EDUs.

EDU	Number of Cases	Percentage	Percentage
Subordinated	361	84.149%	73.824%
Coordinated	68	15.850%	13.905%
Total	429	-----	-----

This distribution of the overall dependency due to their total number in the data (429) shows that (361) cases with (84.149%) are subordinated EDUs, followed by (68) with (15.850%) coordinated EDUs that work intrasententially. It is noticed that the total number of both types of EDUs in this table is (429) which is different from (430) in the preceding table. This is because EDU (#25) in text '3' is neither subordinate nor coordinate, though it is intrasententially functioning. However, the common dependency relation in the present data is subordination between EDUs. This is clear in the first column of percentage. The second column of percentage represents the occurrences when compared to the total number of EDUs in the data (489). This variation may belong to the different constructions that are employed as subordinate in the deverbalisation scale (i.e., levels 'd', 'e', 'f', 'h', 'i', in addition to 'a', 'b' levels in some cases that refer to EDUs subordinated to other EDUs inside the same sentence). This also denotes a deeper textual structure of different degrees of subordination. When compared to subordination, coordination does not sound a widely common feature as it is not favourite in the data to combine multiple units together at the same, or even different, level of linguistic structures. In addition, not too much focus is paid to equally foregrounding those multiple units through coordination on the expense of subordination that provides additional background information which frames the situation in the main clause.

An obvious phenomenon in the data is the hierarchical nature of text structure that can be entailed from subordination. The data presents hierarchy particularly in sentences that consist of two EDUs and more. The subordination employed in the data reaches to five degrees, making

use of the related levels of subordination in the deverbalisation scale such as 'd', 'e', 'f', etc. Illustrative examples in the data are below:

4. Two-EDU Sentence: *[Why do you hide yourself] [in times of trouble?]* EDUs (#2+3), text '2';

5. Three-EDU Sentence: *[Why are you so far] [from saving me,] [from the words of my groaning?]* EDUs (2+3+4), text '3';

6. Four-EDU Sentence: *[The angel of the LORD encamps] [around those] [who fear him] [and he delivers them],* EDUs (#23+34+25+26), text '4'

7. Five-EDU Sentence: *[Blessed is the man] [who makes the LORD his trust,] [who does not look to the proud] [to those] [who turn aside to false gods.],* EDUs (#17+18+19+20+21), text '5';

8. Six-EDU Sentence: *[they imagine the worst] [for me,] [saying, "A vile disease has beset him;]] [he will never get up] [from the place] [where he lives."],* EDUs (#29+30+31+32+33+34), text '6'.

4.2.3.2.2 Realisation of Subordinate and Coordinate EDUs

EDUs in the data are analysed according to whether they are realised by 'finite verb form', or 'non-finite verb form', or 'pronoun, noun, or noun phrase', or even by the omission of the verbal element. The table below shows the overall distribution of the realisation of all EDUs:

Table (4.11): The Overall Distribution of Morphological Realisation of EDUs.

Morphological Realisation	Number of Cases	Percentage
Finite	332	67.893%
Noun, Pronoun, Noun Phrase	129	26.380%
Non-Finite	20	4.089%
Omission of verbal element	06	1.226%
Ambiguous	02	0.408%
Total:	489	-----

The most frequent realisation is by 'finite verb form' with (332) cases followed by 'noun, pronoun, or noun phrase' with (129) and 'non-finite verb form' of (20) cases. Cases of omission of verbal element are only (6). Two ambiguous cases are recorded: EDU (#25) in text '3' which is either realised by 'finite' or 'non-finite'-depending on the reading of the Rhe R in the text- and EDU (#54) in text '6' which is undefined through the deverbalisation scale. The following table redistributes these basic numbers in a detailed way, from the most frequent to the less frequent:

Table (4.12): The Redistribution of Morphological Realisation in Subordinate EDUs.

Morphological Realisation in Subordinate EDUs	Number of Cases	Percentage	Percentage
Finite	209	57.894%	42.747%
Noun, Pronoun, Noun Phrase	129	35.734%	26.380%
Non-Finite	20	5.540%	0.408%
Omission of Verbal Element	03	0.831%	0.613%
Total:	361	-----	-----

Two percentages are given for the occurrences of these realisations; first in terms of their total number (361), and second in terms of the total number of EDUs in the data (489). The most frequent occurrences and percentages of intrasentential subordinate EDUs, however, are 'finite verb form' followed by, in order, 'noun, pronoun, noun phrase', 'non-finite', and 'omission of verbal element'.

As for coordinate EDUs, only (126) are seen. Three cases of these have their verbal element omitted, as shown in the following table. Two percentages are also given for the occurrences of these realisations; first in terms of their total number (126), and second in terms of the total number of EDUs in the data (489):

Table (4.13): The Distribution of Morphological Realisation in Coordinate EDUs.

Morphological Realisation in Coordinate EDUs	Number of Cases	Percentage	Percentage
Finite	123	97.619%	25.153%
Omission of Verbal Element	03	2.380%	0.613%
Total:	126	-----	-----

4.2.3.3 Discourse Structure

This part would follow the following operational steps in all the analyses of the selected data:

1. analysing the discourse structure manually by the 'observer, or R, or judge, or analyst' according to the parameter of 'CS' showing the Rhe Rs that hold between EDUs in each stage;
2. attaching the relation to the appropriate 'textualisation level';
3. showing the effects behind each relation, in terms of Mann & Taboada (2005 [2015/2016]), fixed in (Appendix A);
4. representing the analysis through an RST graphical tree in (Appendixes E and G);
5. piecing together, in another RST graphical representation in (Appendixes E and G), the stages and their Es, with their Rhe Rs; and
6. discussing the rhetorical hierarchy when analyses of all data are done.

Accordingly, the discourse structure of these PSs are stated in the tables below where N(s) =Nucleus (nuclei), S(s) =Satellite(s), W(s) =Writer(s), R(s) =Reader(s), TL(s) =Textualisation Level(s), E(s) =Effect(s) (intention/s of W).

The discourse structure of the two groups of texts is stated in terms of the following tables. The first group of texts to be analysed are those under Petitionary Praise (i.e., Lament): (PSs No. 9, 10, 22). The second

group includes Declarative Praise (i.e., Thanksgiving) Texts: (PSs No. 34, 40, 41). For the RST graphical representations for all these texts, see (Appendix E).

4.2.3.3.1 Petitionary Praise (i.e., Lament) Texts

4.2.3.3.1.1 Text One (PS No. 9)

The discourse structure of this PS is stated in the table below:

Table (4.14): The Discourse Structure of Text One (PS No. 9).

Stage No	N EDU(s)	S EDU(s)	Rhe R	CS	TL	E
1 EDUs (#1-8)	1-2	3	elaboration	SM	a	R recognises & identifies Ss as additional details for the subject matter in N.
		4-6	elaboration	SM	a+c+i	
		7-8	elaboration	SM	a+i	
	1	2	means	SM	i	R recognises that the instrument/method in S realises the subject matter in N.
	4 5-6		conjunction	SM	a+ c+i	Conjoined items are united together where each plays its role.
	5	6	circumstance	SM	i	R recognises that Ss interpret the subject matters in Ns.
	7	8	circumstance	SM	i	
2 EDUs (#9-21)	9-12	13-15	volitional cause	SM	d+a+h	R recognises S as causes for the deliberate actions of 'turn back, stumble, perish' in N.
		16-18	evidence	PR	a+c+a	R's beliefs in N are increased.
		19-21	evidence	PR	a+a+a	
	9	10-12	non-volitional result	SM	a+c+i	R recognises that N might have caused the situations in S.
	10 11-12		conjunction	SM	a+ c+i	Conjoined items are united together where each plays its role.
	11	12	circumstance	SM	i	R recognises that S interprets the context of situation in N.
	13	14-15	justify	PR	a+h	R accepting W's right to express N is increased.

	14	15	elaboration	SM	h	R recognises & identifies S as additional detail for the subject matter in N.
	16-17 18		sequence	SM	a+a+ a	R recognises that nuclei are in a succession relationship.
	16 17		conjunction	SM	a+ c	Conjoined items are united together where each plays its role.
	19	20-21	interpretation	SM	a+a	R recognises that S interprets the situation or knowledge presented in N.
	20 Or 20 21	21	volitional result sequence	SM SM	a a+ a	R recognises that N might be the cause behind the deliberate action or situation in S. R recognises a relationship of succession among the nuclei.
3 EDUs (#22-37)	22-24	25-28	evidence or interpretation	PR SM	a+i+a+i	Either R's beliefs of N's claims are increased 'evidence' or R recognises that S interprets the situations or knowledge presented in N.
	25-28	29-32	justify	PR	a+i+c+i	R accepting W's right to express N is increased.
	29-32	33-37	justify or evaluation	PR SM	a+e+i+d+e	Either R accepting W's right to express N is increased or R recognises that S can assess & identify the value of N.
	22	23-24	justify or elaboration	PR SM	a+i	Either R accepting W's right to express N is increased or R recognises & identifies S as additional detail for the subject matter in N.
	23	24	purpose	SM	i	R recognises that the situation in N is intended to realise S.
	25-26	27-28	background or volitional result	PR SM	a+i	Either R's understanding of N is increased & facilitated or R

						recognises that N might be the cause behind the deliberate action or situation in S.
	25	26	means	SM	i	R recognises that the instrument/method in Ss realise the subject matters in Ns.
	27	28	means	SM	i	
	29-30 31-32		multinuclear restatement	SM	a+i+ c+i	R recognises that the linked items are re-expressed.
	29	30	circumstance	SM	i	R recognises that Ss interpret the subject matters in Ns.
	31	32	circumstance	SM	i	
	33-35	36-37	volitional cause	SM	d+e	R recognises S as causes for the deliberate actions in Ns.
	33-34	35	circumstance	SM	i	R recognises that S interprets the context of situation in N.
	33	34	elaboration	SM	e	R recognises & identifies Ss as additional details for the subject matters in Ns.
	36	37	elaboration	SM	e	
4 EDUs (#38-45)	38-40 41-42		conjunction	SM	a+i+h+ a+i	Conjoined items are united together where each plays its role.
	41-42	43-44	volitional cause	SM	d+e	R recognises Ss as causes for the deliberate actions in N.
	43-44	45	interpretation	SM	a	R recognises that S interprets the situations or knowledge presented in N.
	38	39-40	motivation	PR	i+h	R's intended desire to perform the action in N is increased.
	39	40	elaboration	SM	h	R recognises & identifies S as additional detail for the element of subject matter in N.
	41	42	circumstance	SM	i	R recognises that S interprets the context of situation in N.
	43	44	elaboration	SM	e	R recognises & identifies S as additional detail for

						the element of subject matter in N.
5 EDUs (#46-68)	46-49	50-53	purpose	SM	e+i+c+i	R recognises that the activities in Ns are intended to realise Ss.
		54-59	evidence or volitional result	PR SM	i+a+i+e+a+i+e	R's beliefs of in Ns are increased or R recognises that N might be the cause behind the deliberate actions or situations in Ss.
		60-63	volitional result	SM	a+i+a+i	R recognises that Ns might be the cause behind the deliberate actions or situations in Ss.
		64-68	volitional result	SM	a+a+e+c+c	
	47-49	46	justify	PR	a	R accepting W's right to express N is increased.
	47 48-49		conjunction	SM	c+ c+i	Conjoined items are united together where each plays its role.
	48	49	circumstance	SM	i	R recognises that S interprets the context of situation in N.
	50-51 52-53		conjunction	SM	e+i+ c+i	Conjoined items are united together where each plays its role.
	50	51	circumstance	SM	i	R recognises that Ss interprets the context of situation in Ns.
	52	53	circumstance	SM	i	
	54-56	57-59	elaboration	SM	a+i+e+a	R recognises & identifies S as additional detail for the element of subject matter in N.
	54	55-56	circumstance	SM	i+e	R recognises that S interprets the context of situation in N.
	55	56	elaboration	SM	e	R recognises & identifies S as additional detail for the element of subject matter in N.
	57	58-59	circumstance	SM	i+e	R recognises that S interprets the context of situation in N.
	58	59	elaboration	SM	e	R recognises & identifies S as additional detail for the element of subject

						matter in N.
	60-61	62-63	evidence	PR	a+i	R's belief of N's claim is increased.
	60	61	means	SM	i	R recognises that the instrument/method in Ss realise the subject matters in Ns.
	62	63	means	SM	i	
	60-63	64-68	volitional result	SM	a+a+e+c+c	R recognises that Ns might be the cause behind the deliberate actions or situations in Ss.
	64-66 67-68		contrast	SM	a+a+e+ c+c	R recognises the comparability and difference(s) shown by comparison of situations.
	64	65-66	restatement	PR	a+e	R recognises that S acts as a restatement of N.
	65	66	elaboration	SM	e	R recognises & identifies S as additional detail for the element of subject matter in N.
	67 68		conjunction	SM	c	Conjoined items are united together where each plays its role.
6 EDUs (#69-75)	69-72	73-75	elaboration	SM	c+i+a	R recognises & identifies S as additional details for the element of subject matter in N.
	69	70-72	purpose	SM	a+a+i	R recognises that the situation in N is intended to realise S.
	70 71-72		conjunction	SM	a+ a+i	Conjoined items are united together where each plays its role.
	71	72	circumstance	SM	i	R recognises that S interprets the context of situation in N.
	73-74	75	purpose	SM	a	R recognises that the situation in N is intended to realise S.
	73	74	means	SM	i	R recognises that the instrument/method 'with terror' in S realises the subject matters in N.

Accordingly, the generic stages, Rhe Rs, and their Es are shown below:

Table (4.15): Generic Stages, Rhe Rs, and their Es of Text One (PS No. 9).

Stage	E(s)
1. (#1-8)	-----
2. (#9-21)	It is in 'justify' Rhe R with stage '1': R accepting W's right to express N is increased.
3. (#22-37)	It is in 'contrast' Rhe R with stage '2': R recognises the comparability and difference(s) shown by comparison of situations. It is also in 'enablement' (i.e., R's ability to perform the action presented in N is increased) or 'motivation' relation with stage '4'; R's intended desire to perform the action in N 'sing praise' is increased.
4. (#38-45)	It is in 'background' relation with stage '5': R's understanding of N is Rhe R increased & facilitated.
5. (#46-68)	It is in 'motivation' Rhe R to stage '6': R's intended desire to perform the action in N is increased or 'background' (i.e., R's understanding of N is increased & facilitated) relation with stage '6':
6. (#69-75)	-----

Some observations are noticed in this analysis:

1. Rhe Rs whose CS is semantic, i.e., SM, are either mononuclear or multinuclear. They link the situations embodied in EDUs. SM relations are '56' in number; '11' of them are multinuclear Rhe Rs and '45' are mononuclear ones. According to occurrence in the six stages, they are distributed as follows:

- '13' cases of circumstance Rhe R;
- '13' instances of elaboration Rhe R;
- '8' cases of conjunction (multinuclear) Rhe R;
- '6' cases of means Rhe R;
- '4' instances of purpose Rhe R;

- '3' instances of volitional cause Rhe R;
- '3' cases of volitional result Rhe R;
- '2' cases of interpretation Rhe R;
- '1' instance contrast (multinuclear) Rhe R;
- '1' case of multinuclear restatement (multinuclear) Rhe R;
- '1' case of non-volitional result Rhe R;
- '1' instance of sequence Rhe R.

2. Those Rhe Rs of pragmatic CS, i.e., PR, are used to facilitate the process of presentation through W-R relationship. They are '8' in number, and are distributed as follows:

- '3' instances of evidence Rhe R;
- '3' cases of justify Rhe R;
- '1' case of motivation Rhe R;
- '1' instance of restatement Rhe R.

3. Ambiguous cases are uncovered in situations that refer to multiple analyses. Instances of these ambiguous cases are below:

- stage '2' has '1' case where either 'volitional result' (SM) or 'sequence' (SM) is understood;
- stage '3' has '4' ambiguities: '1' case which is either 'evidence' (PR) or 'interpretation' (SM), '1' case that is either 'justify' (PR) or 'evaluation' (SM), '1' case which can be either 'justify' (PR) or 'elaboration' (SM), and '1' case of either 'background' (PR) or 'volitional result' (SM);
- stage '5' has '1' ambiguity which is either 'evidence' (PR) or 'volitional result' (SM).

4. Single EDUs are used to express a relation, as clear in many instances such as: S EDU (#3) which is 'elaboration' to N EDUs (#1-2) in stage '1'. The number of such cases is '32' cases. This refers also to the fact that a single TL is used to syntactically realise a relation.

5. Several EDUs are united together to express a relation, as in S EDUs (#13-15) which express 'volitional cause' to N EDUs (#9-12) in stage '2'. The number of such instances is '40' cases. This can also refer to the fact that some TLs are employed to syntactically realise a relation.

6. Stages '1-5' are employed to 'motivate' or set the 'background' for the ultimate E (intention of W) presented in stage '6' which is request of the psalmist for God's intervention.

4.2.3.3.1.2 Text Two (PS No. 10)

The discourse structure of this PS is stated in the table below:

Table (4.16): The Discourse Structure of Text Two (PS No.10).

Stage No.	N EDU(s)	S EDU(s)	Rhe R	CS	TL	E
1	1		conjunction	SM	a	Conjoined items are united together where each plays its role.
	2-3				a+i	
EDUs (#1-3)	2	3	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
2	4-25	26-49	evidence	PR	a+i+i+i+a+h+i+ a+i+i+a+i+f+a+ c+i+a+a+a+i+a +i+b+c	R's beliefs of Ns are increased.
	4-10 11-14 15-19 20-23 24-25		joint	SM	i+a+e+e+a+a+c i+a+i+a a+a+c+a+i a+i+b+c a+a	This multinuclear schema has no corresponding Rhe R. No clear Rhe R holds between the nuclei.
	4-7	8-10	elaboration	SM	a+a+c	R recognises & identifies S as additional details for the subject matters in Ns.
	EDUs (#4-49)					

	5-7	4	circumstance	SM	i	R recognises that S interprets the context of situations or the subject matters in N.
	5	6-7	elaboration	SM	e+e	R recognises & identifies Ss as additional details for the subject matters in Ns.
	6	7	elaboration	SM	e	
	8 9-10		joint	SM	a+ a+c	This multinuclear schema has no corresponding Rhe R. No clear Rhe R holds between the nuclei.
	9 10		conjunction	SM	a+ c	Conjoined items are united together where each plays its role.
	11-12	13-14	interpretation	SM	i+a	R recognises that S interprets the situation or knowledge presented in N.
	12	11	circumstance	SM	i	R recognises that Ss interprets the context of situations or the subject matters in Ns.
	14	13	circumstance	SM	i	
	15-17	18-19	volitional result	SM	a+i	R recognises that Ns might be the cause behind the deliberate actions or situations in S.
	15	16-17	evidence	PR	a+c	R's belief of N is increased.
	16 17		conjunction	SM	a+ c	Conjoined items are united together where each plays its role.
	18	19	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
	20-21	22-23	interpretation	SM	b+c	R recognises that S interprets the situation or knowledge in N.
	20	21	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.

	22 23		conjunction	SM	b+ c	Conjoined items are united together where each plays its role.
	24	25	restatement	PR	a	R recognises that S acts as a restatement of N.
	26-41	42-49	non-volitional result	SM	a+a+a+i+a+i+b+c	R recognises that N might have caused the situations described in S.
	26-32	33-41	background	PR	a+i+i+a+i+f+a+c+i	R's understanding of N is increased & facilitated.
	26-28	29-32	purpose	SM	i+a+h+i	R recognises that the situation in N is intended to realise S.
	26-27	28	circumstance	SM	i	R recognises that S interprets the context of situations or the subject matters in N.
	26	27	means	SM	i	R recognises that the instrument/method in S realises the subject matters in N.
	29-30	31-32	elaboration	SM	h+i	R recognises & identifies S as additional details for the subject matter in N.
	30	29	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
	31	32	means	SM	i	R recognises that the instrument/method in S realises the subject matters in N.
	33-35	36-41	elaboration	SM	a+i+f+a+c+i	R recognises & identifies S as additional details for the subject matter in N.
	33	34	means	SM	i	R recognises that the instrument/method in Ss realise the subject matters in Ns.
		35	means	SM	i	

	36-38	39-41	elaboration	SM	a+c+i	R recognises & identifies S as additional details for the subject matter in N.
	36-37	38	purpose	SM	f	R recognises that the situation in N is intended to realise S.
	36	37	means	SM	i	R recognises that the instrument/method in S realises the subject matters in N.
	39 40-41		conjunction	SM	a+ c+i	Conjoined items are united together where each plays its role.
	40	41	means	SM	i	R recognises that the instrument/method in S realises the subject matters in N.
	42-45 Or 46-49	46-49 42-45	justify non-volitional cause	PR SM	a+i+b+c a+a+a+i	R accepting W's right to express N is increased. R recognises S as a cause of N.
	42-43	44-45	elaboration	SM	a+i	R recognises & identifies Ss as additional details for the subject matters in Ns.
	42	43	elaboration	SM	a	
	44	45	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
	46-47	48-49	interpretation	SM	b+c	R recognises that S interprets the situation or knowledge presented in N.
	46	47	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
	48 49		conjunction	SM	b+ c	Conjoined items are united together where each plays its role.
	50-52	53-64	background	PR	a+a+i+c+a+f+a	R's understanding of

3 EDU (#50-64)					+a+a+a+f+e	N is increased & facilitated.
	50-51	52	justify or purpose	PR SM	a	Either R accepting W's right to express N is increased or R recognises that the situations in N are intended to realise S.
	50 51		sequence	SM	a+ a	R recognises a relationship of succession among the nuclei.
	59-64	53-58	solutionhood	SM	a+a+c+a+f	R recognises N as a solution to the problem presented in S.
	53-55 56-58		contrast	SM	a+a+i+ c+a+f	R recognises the comparability and difference(s) shown by comparison of situations.
	53 54-55		joint	SM	a+ a+i	This multinuclear schema has no corresponding Rhe R. No clear Rhe R holds between the nuclei.
	54	55	elaboration	SM	i	R recognises & identifies Ss as additional details for the subject matters in Ns.
	56	57-58	elaboration	SM	a+f	
	57	58	purpose	SM	f	R recognises that the situation in N is intended to realise S.
	61-64	59-60	volitional cause	SM	a+a	R recognises Ss as causes for the deliberate actions of in Ns.
	59	60	non-volitional cause	SM	a	R recognises S as a cause of N.
	61 62-64		sequence	SM	a+ a+f+e	R recognises a succession relationship among the nuclei.
	62	63-64	purpose	SM	f+e	R recognises that the situation in N is

						intended to realise S.
	63	64	elaboration	SM	e	R recognises & identifies S as additional details for the subject matter in N.
4 EDUs (#65-73)	65	66-67	non-volitional result	SM	a+i	R recognises that N might have caused the situations described in S.
		68-73	evaluation	SM	a+a+c+h+f+e	R recognises S as assessing N and & the value it assigns.
	66	67	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
	68	69-73	background or elaboration	PR SM	a+c+h+f+e	Either R's understanding of N is increased & facilitated or R recognises & identifies S as additional details for the subject matter in N.
	69-70	71-73	elaboration	SM	h+f+e	R recognises & identifies S as additional details for the subject matters in N.
	69 70		conjunction	SM	a+ c	Conjoined items are united together where each plays its role.
	71	72-73	purpose	SM	f+e	R recognises that the situation in N is intended to realise S.
	72	73	elaboration	SM	e	R recognises & identifies S as additional details for the subject matter in N.

Accordingly, the generic stages, Rhe Rs, and their Es are shown below:

Table (4.17): Generic Stages, Rhe Rs, and their Es of Text Two (PS No. 10).

Stage	E(s)
1. (#1-8)	This stage is in 'preparation' Rhe R to stage '2': it prepares R to expect & interpret the text to be presented after.
2. (#9-21)	It is in 'justify' Rhe R with stage '3': Rhe R accepting W's right to express N is increased.
3. (#22-37)	-----
4. (#38-45)	It is in 'evaluation' Rhe R with the preceding stage '3': R's understanding of N is increased & facilitated.

Some observations are noticed in this analysis:

1. SM Rhe Rs are '58' in number; '13' of them are multinuclear Rhe Rs and '46' are mononuclear ones. According to occurrence in the six stages, they are distributed as follows:

- '13' cases of elaboration Rhe R;
- '11' cases of circumstance Rhe R;
- '7' instances of conjunction (multinuclear) Rhe R;
- '6' cases of means Rhe R;
- '5' instances of purpose Rhe R;
- '3' instances of interpretation Rhe R;
- '3' cases of joint (multinuclear) Rhe R;
- '2' cases of non-volitional result Rhe R;
- '2' instances of sequence (multinuclear) Rhe R;
- '1' case of contrast (multinuclear) Rhe R;
- '1' case of evaluation Rhe R;
- '1' instance of non-volitional cause Rhe R;
- '1' case of solution Rhe R;

- '1' case of volitional cause Rhe R;
- '1' instance of volitional result Rhe R.

2. PR Rhe Rs are '5' in number, and are distributed as follows:

- '2' instances of background Rhe R;
- '2' cases of evidence Rhe R;
- '1' case of restatement Rhe R.

3. Instances of ambiguous cases are below:

- in stage '2', there might be another analysis for some EDUs: either N EDUs can be (#42-45) and the S EDUs (#46-49) linked in 'justify' Rhe R to its N, or S EDUs are (#42-45) which show 'non-volitional cause' Rhe R with its N EDUs (#46-49);
- stage '3' has '1' ambiguity which is either 'justify' (PR) or 'purpose' (SM);
- stage '4' has also '1' ambiguity which is either 'background' (PR) or 'elaboration' (SM).

4. Single EDUs are used to express a relation, as clear in many instances such as: S EDU (#3) which is 'circumstance' to N EDU (#2) in stage '1'. The number of such cases is '33' cases. This refers also to the fact that a single TL is used to syntactically realise a relation.

5. Several EDUs are united together to express a relation, as in S EDUs (#8-10) which express 'elaboration' to N EDUs (#4-7) in stage '2'. The number of such instances is '33' cases. This can also refer to the fact that a certain TLs are employed to syntactically realise a relation.

6. Stage '1' acts as 'preparation' to stage '2' which is itself in 'justify' Rhe R to stage '3'. Stage '4' is 'evaluation' to stage '3' which presents petition for God to act for the righteous.

4.2.3.3.1.3 Text Three (PS No. 22)

The discourse structure of this PS is stated in the table below:

Table (4.18): The Discourse Structure of Text Three (PS No. 22).

Stage No.	N EDU(s)	S EDU(s)	Rhe R	CS	TL	E
1 EDUs (#1-9)	1-4	5-9	evidence or justify	PR PR	a+i+c+c	R's beliefs of N are increased or R accepting W's right to express N is increased.
	1 2-4		conjunction	SM	a+ a+i+i	Conjoined items are united together where each plays its role.
	2	3	elaboration	SM	i	R recognises & identifies S as additional details for the subject matter in N.
		4	elaboration	SM	i	
	5-8 9		conjunction	SM	a+i+c+i+ c	Conjoined items are united together where each plays its role.
	5-7 8		sequence	SM	a+i+c+ i	R recognises a succession relationship among the nuclei.
	5-6 7		contrast	SM	a+i+ c	R recognises the comparability and difference(s) shown by comparison of situations.
	5	6	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
2	10-11	12-21	background	PR	i+a+a+c+a+i+c +i+a+c	R's understanding of N is increased & facilitated.
	10	11	restatement	PR	a	R recognises that S acts as a restatement of N.
	12-15 16-21		multinuclear restatement	SM	i+a+a+c+ a+i+c+i+a+c	R recognises that the linked items are re- expressed.

EDUs (#10-21)	12-13	14-15	restatement	PR	a+c	R recognises that S acts as a restatement of N.
	13	12	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
	14 15 Or 14	15	conjunction volitional result	SM SM	a+ c c	Conjoined items are united together where each plays its role. R recognises that Ns might be the cause behind the deliberate action or situation in S.
	16-18 19-21		multinuclear restatement	SM	a+i+c+ i+a+c	R recognises that the linked items are re-expressed.
	16-17 18 Or 16-17 18		volitional result conjunction	SM SM	c a+i c	R recognises that Ns might be the cause behind the deliberate action or situation in S. Conjoined items are united together where each plays its role.
	16	17	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
	19-20 21 Or 19-20 21		volitional result conjunction	SM SM	C i+a+ c	R recognises that Ns might be the cause behind the deliberate action or situation in S. Conjoined items are united together where each plays its role.
	20	19	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
	22-25	26-33	background	PR	a+e+a+h+b+b+	R's understanding of

3					b+d	N is increased & facilitated.
	22-23	24-25	elaboration	SM	h+c	R recognises & identifies S as additional details for the subject matters in N.
	22 23		conjunction	SM	c+ c	Conjoined items are united together where each plays its role.
	24 25		conjunction	SM	h+ c	Conjoined items are united together where each plays its role.
	26-27	28-33	elaboration	SM	a+h+b+b+b+d	R recognises & identifies Ss as additional details for the subject matters in N.
	26	27	elaboration	SM	e	
	28	29-33	evidence	PR	h+b+b+b+d	R's beliefs of N are increased.
	29	30-33	elaboration	SM	b+b+b+d	R recognises & identifies S as additional details for the subject matter in N.
	30-31 32-33		multinuclear statement or disjunction	SM SM	b+b+ b+d	R recognises that the linked items are re-expressed or an item presents a-not-necessarily-exclusive alternative for the other(s).
	31	30	volitional cause	SM	b	R recognises S as a cause for the deliberate action of in N.
4	32	33	elaboration	SM	d	R recognises & identifies S as additional details for the subject matter in N.
	34-37	38-42	evidence	PR	i+a+i+i+a	R's beliefs of N are increased.
EDUs	34-35 36-37		joint	SM	c+i+ a+i	This multinuclear schema has no corresponding Rhe R.

#34-42						No clear Rhe R holds between the nuclei.
	34	35	circumstance	SM	i	R recognises that Ss interprets the context of situation or the subject matter in Ns.
	36	37	circumstance	SM	d	
	38-40 41-42		multinuclear restatement	SM	i+a+i+ i+a	R recognises that the linked items are re-expressed.
	39-40	38	circumstance	SM	i	R recognises that Ss interprets the context of situation or the subject matter in Ns.
	39	40	circumstance	SM	i	
	42	41	circumstance	SM	i	
5 EDUs (#43-46)	43-44	45-46	elaboration	SM	d+c	R recognises & identifies S as additional details for the subject matter in N.
	43	44	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
	45 46		conjunction	SM	d+ c	Conjoined items are united together where each plays its role.
6 EDUs (#47-75)	47-64 65-75		multinuclear restatement	SM	a+a+a+h+i+a+i +c+a+i+a+i+a+ i+c+i+a+i+ a+a+a+a+a+c+i +a+i+c+i	R recognises that the linked items are re-expressed.
	47-51 52-64		joint	SM	a+a+a+h+i+ i+c+a+i+a+i+a +i+c+i+a+i	This multinuclear schema has no corresponding Rhe R. No clear Rhe R holds between the nuclei.
	47-48 49-51		joint	SM	a+a+ a+h	This multinuclear schema has no corresponding Rhe R. No clear Rhe R holds between the nuclei.
	47	48	elaboration	SM	a	R recognises & identifies S as additional details for the subject matter in N.
	49-50	51	circumstance	SM	i	R recognises that S

						interprets the context of situation or the subject matter in N.
49	50	elaboration	SM	h		R recognises & identifies S as additional details for the subject matter in N.
52-58 59-64		joint	SM	a+i+c+a+i+a+i + a+i+c+i+a+i		This multinuclear schema has no corresponding Rhe R. No clear Rhe R holds between the nuclei.
52-54 55-58		joint	SM	a+i+c+ a+i+a+i		This multinuclear schema has no corresponding Rhe R. No clear Rhe R holds between the nuclei.
52-53 54		conjunction	SM	a+i+ c		Conjoined items are united together where each plays its role.
52	53	means	SM	i		R recognises that the instrument/method in in S realises the subject matters in N.
55-56	57-58	elaboration	SM	a+i		R recognises & identifies S as additional details for the subject matter in N.
55	56	circumstance	SM	i		R recognises that Ss interprets the context of situation or the subject matter in Ns.
57	58	circumstance	SM	i		
59-62	63-64	non-volitional result	SM	a+i		R recognises that N might have caused the situations described in S.
59-60 61-62		conjunction	SM	a+i+ c+i		Conjoined items are united together where each plays its role.
59	60	means	SM	i		R recognises that the instrument/method in in S realises the subject matters in N.
61	62	circumstance	SM	i		R recognises that Ss

	63	64	circumstance	SM	i	interprets the context of situation or the subject matter in Ns.
	65-67	68-75	volitional result or evidence	SM PR	a+a+a+a+a+c+i +a+i+c+i	R recognises that Ns might be the cause behind the deliberate actions or situations in S or R's beliefs of N are increased.
	65	66-67	elaboration	SM	a+a	R recognises & identifies S as additional details for the subject matters in N.
	66 67		sequence	SM	a+ a	R recognises a succession relationship among the nuclei.
	68-71	72-75	evidence	PR	a+i+c+i	R's beliefs of N are increased.
	68	69-71	interpretation or non-volitional result	SM SM	a+c+i	R recognises that S interprets the situation or knowledge presented in N or R recognises that N might have caused the situations described in S.
	69 70-71		conjunction	SM	a+ c+i	Conjoined items are united together where each plays its role.
	70	71	circumstance	SM	I	R recognises that S interprets the context of situation or the subject matter in N.
	72-73 74-75		conjunction	SM	a+i+ c+i	Conjoined items are united together where each plays its role.
	72	73	circumstance	SM	i	R recognises that Ss interprets the context of situation or the subject matter in Ns.
	74	75	circumstance	SM	i	
7	76-78	79-86	elaboration	SM	a+i+c(or ambiguous)+i+ a+i+a+i	R recognises & identifies S as additional details for the subject matters in

	95-96 97-100		conjunction	SM	d+c+ a+i+c+i	Conjoined items are united together where each plays its role.
	95 96		conjunction	SM	d+ c	
	97-98 99-100		conjunction	SM	a+i+ c+i	
	97	98	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
	99	100	purpose	SM	i	R recognises that the situation in N is intended to realise S.
	101- 105	106- 110	volitional result	SM	a+c+a+e+a	R recognises that Ns might be the cause behind the deliberate actions or situations in S.
	103- 105	101- 102	volitional cause	SM	a+i	R recognises S as a cause for the deliberate action of in N.
	101	102	circumstance	SM	i	R recognises that Ss interprets the context of situation or the subject matter in Ns.
	105	103	circumstance	SM	i	
		104	elaboration	SM	e	R recognises & identifies S as additional details for the subject matter in N.
	106-107 108-110		joint	SM	a+c+ a+e+a	This multinuclear schema has no corresponding Rhe R. No clear Rhe R holds between the nuclei.
	106 107		conjunction	SM	a+ c	Conjoined items are united together where each plays its role.
	108- 109	110	evaluation	SM	a	R recognises S as assessing N and & the value it assigns.
	108	109	elaboration	SM	e	R recognises & identifies S as additional details for

						the subject matter in N.
111-117 118-123 124-129		joint	SM	a+c+c+i+d+c+i +a+c+a+e+i+e+ a+a+i+a+i+d		This multinuclear schema has no corresponding Rhe R. No clear Rhe R holds between the nuclei.
111-114	115-117	non-volitional cause	SM	d+c+i		R recognises that N might have caused the situations described in S.
111-112 113-114		conjunction	SM	a+c+ c+i		Conjoined items are united together where each plays its role.
111 112		conjunction	SM	a+ c		
113	114	circumstance	SM	i		R recognises that S interprets the context of situation or the subject matter in N.
115 116-117		conjunction	SM	d+ c+i		Conjoined items are united together where each plays its role.
116	117	circumstance	SM	i		R recognises that S interprets the context of situation or the subject matter in N.
118-119 120-123		joint	SM	a+c+ a+e+i+e		This multinuclear schema has no corresponding Rhe R. No clear Rhe R holds between the nuclei.
118 119		conjunction	SM	a+ c		Conjoined items are united together where each plays its role.
120-122	123	elaboration	SM	e		R recognises & identifies S as additional details for the subject matter in N.
120	121	elaboration	SM	e		
	122	circumstance	SM	i		R recognises that S interprets the context of situation or the subject matter in N.
124	125-129	elaboration	SM	a+i+a+i+d		R recognises & identifies S as additional details for

						the subject matters in N.
	125-126	127-129	volitional result	SM	a+i+d	R recognises that Ns might be the cause behind the deliberate action or situation in S.
	125	126	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
	127	128	elaboration	SM	i	R recognises & identifies S as additional details for the subject matter in N.
		129	elaboration	SM	d	

Accordingly, the generic stages, Rhe Rs, and their Es are shown below:

Table (4.19): Generic Stages, Rhe Rs, and their Es of Text Three (PS No. 22).

Stage	E(s)
1. (#1-9)	This stage is in 'antithesis' Rhe R to stage '2': it increases R's positive regard for the N, which is stage'2'.
2. (#10-21)	It is in 'contrast' Rhe R with stage '3': R recognises the comparability and difference(s) shown by comparison of situations.
3. (#22-33)	It is in 'antithesis' Rhe R to stage '4': it increases R's positive regard for the N, which is stage'4'.
4. (#34-42)	It is in 'non-volitional cause' Rhe R with stage '5': R recognises that N might have caused the situations described in S.
5. (#43-46)	It acts as an N to stage '6', the S which shows either 'background' Rhe R where R's ability to comprehend N is increased or 'elaboration' Rhe R that makes R recognise & S as providing additional detail for the subject matters in N.
6. (#47-75)	This stage acts as 'justify' Rhe R to stage '7'; R's readiness to accept W' right to present N is increased.
7. (#76-86)	-----
8. (#87-129)	It functions as 'volitional result' Rhe R from the preceding stage; '7'. R can recognise that N could be a cause for the action or situation in S.

Some observations are noticed in this analysis:

1. SM Rhe Rs are '98' in number; '33' of them are multinuclear Rhe Rs and '65' are mononuclear ones. According to occurrence in the eight stages, they are distributed as follows:

- '31' cases of circumstance Rhe R;
- '23' instances of elaboration Rhe R;
- '17' cases of conjunction (multinuclear) Rhe R;
- '9' instances of joint (multinuclear) Rhe R;
- '4' cases of multinuclear restatement (multinuclear) Rhe R;
- '2' instances of volitional result Rhe R;
- '2' cases of means Rhe R;
- '2' instances of purpose Rhe R;
- '2' cases of sequence (multinuclear) Rhe R;
- '2' instances of volitional cause Rhe R;
- '1' instance of contrast (multinuclear) Rhe R;
- '1' case of evaluation Rhe R;
- '1' instance of non-volitional cause Rhe R;
- '1' case of non-volitional result Rhe R.

2. PR Rhe Rs are '11' in number, and are distributed as follows:

- '4' instances of restatement Rhe R;
- '3' cases of background Rhe R;
- '3' instances of evidence Rhe R;

- '1' case of motivation Rhe R.

3. Instances of ambiguous cases are below:

- stage '1' has '1' ambiguity which is either 'evidence' or 'justify' PR Rhe R;
- in stage '2', there might be another analysis for some EDUs: the first case is either EDUs (#14+15) are in 'conjunction' Rhe R to each other or the S EDU(#15) is in 'volitional result' to the N EDU (#14), the second one is either N EDUs can be (#16-17) and the S EDUs (#18) linked in 'volitional result' Rhe R to its N, or both (#16-17) and (#18) are conjoined in 'conjunction' Rhe R which is a multinuclear one, and the third one is that EDUs (#19-20) are either in 'volitional result' Rhe R to EDU (#21) or in 'conjunction' Rhe R;
- stage '3' has '1' ambiguity which is either 'multinuclear restatement' (SM) or 'disjunction' (SM);
- stage '6' has also '2' ambiguity cases: the first one is either 'volitional result' (SM) or 'evidence' (PR) and the second is either 'interpretation' (SM) or 'non-volitional result' (SM);
- stage '8' has also '2' ambiguity cases: the first one is either 'background' (PR) or 'evaluation' (SM) and the second case is either 'evidence' (PR) or 'justify' (PR).

4. Single EDUs are used to express a relation, as clear in many instances such as: S EDU (#3) which is 'elaboration' to N EDU (#2) in stage '1'. The number of such cases is '61' cases. This refers also to the fact that a single TL is used to syntactically realise a relation.

5. Several EDUs are united together to express a relation, as in S EDUs (#5-9) which are in 'evidence' or 'justify' Rhe R to N EDUs (#1-4) in stage '2'. The number of such instances is '56' cases. This can also refer to the fact that certain TLs are employed to syntactically realise a relation.

6. Stage '1' can be 'antithesis' Rhe R to stage '2' which is in 'contrast' Rhe R to stage '3' that is itself in 'antithesis' Rhe R to stage '4'. Stage '4' is a 'non-volitional cause' to stage '5'. Stage '5' is the N to the S stage '6' that acts as either 'elaboration' or 'background' to it. Stage '6' is in the S position to the N stage '7'; it is in 'justify' Rhe R to it. Stage '7' act as the N to stage '8' which is in 'volitional result' to it.

4.2.3.3.2 Declarative Praise (i.e., Thanksgiving) Texts

4.2.3.3.2.1 Text Four (PS No. 34)

The discourse structure of this PS is stated in the table below:

Table (4.20): The Discourse Structure of Text Four (PS No. 34).

Stage No.	N EDU(s)	S EDU(s)	Rhe R	CS	TL	E
1 EDUs (#1-10)	1-3	4-10	elaboration or motivation	SM PR	a+i+a+c+a+i+a	R recognises & identifies Ss as additional details for the subject matters in Ns or R's desire to perform the actions in Ns is increased.
	1-2 3		multinuclear restatement	SM	a+i+a	R recognises that the linked items are re-expressed.
	1	2	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
	8-10	4-7	motivation	PR	a+i+a+c	R's desire to perform the actions in Ns is increased.
	4-5	6-7	volitional result	SM	a+c	R recognises that N might be the cause behind the deliberate action or situation in S.
	4	5	circumstance or elaboration	SM SM	i	R recognises that S interprets the context of situation or the subject matter in N or R recognises & identifies S as additional details

						for the subject matter in N.
	6 7		conjunction	SM	a+ c	Conjoined items are united together where each plays its role.
	8-9	10	restatement	PR	a	R recognises that S acts as a restatement of N.
	8	9	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
2 EDUs (#11-22)	11-14	15-18	volitional result	SM	a+e+a+i	R recognises that Ns might be the cause behind the deliberate action or situation in Ss. R recognises that Ss act as a restatement of N.
		19-22	restatement	PR	a+c+a+i	
	Or 11-14		disjunction	SM	a+c+a+i+ a+c+a+i	R recognises that the linked items are alternatives.
	19-22					
	11-12	13-14	volitional result or elaboration	SM SM	a+i	R recognises that Ns might be the cause behind the deliberate action or situation in S or R recognises & identifies S as additional details for the subject matter in N.
	11 12		conjunction	SM	a+c	Conjoined items are united together where each plays its role.
	13	14	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
	15-16	17-18	elaboration	SM	a+i	R recognises & identifies S as additional details for the subject matter in N.
	Or 15-16 17-18		multinuclear restatement	SM	a+e+ a+i	R recognises that the linked items are re-expressed.
	15	16	elaboration	SM	e	R recognises & identifies S as

						situations described in S or R accepting W's right to express N is increased.
	27 28		conjunction	SM	a+ c	Conjoined items are united together where each plays its role.
	29	30-31	elaboration	SM	e+i	R recognises & identifies S as additional details for the subject matter in N.
	30	31	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
	32-34	35-37	interpretation or evidence	SM SM	a+c+e	R recognises that S relates N to a framework of ideas not exactly involved in the knowledge shown in N or R's beliefs of N are increased.
	32	33-34	volitional cause	SM	d+e	R recognises S as a cause for the deliberate actions in N.
	33	34	elaboration	SM	e	R recognises & identifies S as additional details for the subject matter in N.
	35 36-37		contrast	SM	a+ c+e	R recognises the comparability and the difference(s) yielded by the comparison is being made.
	36	37	elaboration	SM	e	R recognises & identifies S as additional details for the subject matter in N.
4	38-40	41-51	elaboration	SM	e+c+a+i+c+i +a+i+c+a+c	R recognises & identifies Ss as additional details for the subject matters in N.
EDUs (#38-51)	38-39 40		sequence or conjunction	SM SM	a+a+ a	R recognises a succession relationship among the nuclei or

						conjoined items are united together where each plays its role.
	38	39	purpose or volitional cause	SM SM	a	R recognises that the situation in N is intended to realise S or R recognises S as a cause for the deliberate action in N .
	41-46 47-51		joint	SM	e+c+a+i+c+i+ a+i+c+a+c	This multinuclear schema has no corresponding Rhe R. No clear Rhe R holds between the nuclei.
	43-46	41-42	elaboration	SM	e+c	R recognises & identifies Ss as additional details for the subject matters in Ns.
	41 42		conjunction	SM	e+ c	Conjoined items are united together where each plays its role.
	43-44 45-46		conjunction	SM	a+i+ c+i	
	43	44	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
	45	46	circumstance	SM	i	
	47-49 50-51		joint	SM	a+i+c+ a+c	This multinuclear schema has no corresponding Rhe R. No clear Rhe R holds between the nuclei.
	47-48 49		conjunction	SM	a+i+ i	Conjoined items are united together where each plays its role.
	47	48	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
	50 51		conjunction	SM	a+ c	Conjoined items are united together where each plays its role.
5	52-58	59-71	evidence	PR	a+c+a+i+a+i+ c+e+a+c+i+a+ a	R's beliefs of N are increased.
		72-73	evaluation	SM	a+a	R recognises that Ss assess Ns & the value

EDUs (#52-73)						they assign.
	52-54 55-58		contrast	SM	a+c+i+ a+e+f+i	R recognises the comparability and the difference(s) yielded by the comparison is being made.
	52 53-54		conjunction	SM	a+ c+i	Conjoined items are united together where each plays its role.
	53	54	elaboration or circumstance	SM SM	i	R recognises & identifies S as additional details for the subject matter in N or R recognises that S interprets the context of situation or the subject matter in N.
	55-56	57-58	purpose	SM	f+i	R recognises that the situation in N is intended to realise S.
	55	56	elaboration	SM	e	R recognises & identifies S as additional details for the subject matter in N.
	57	58	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
	59-62 63-66 67-71		joint	SM	a+c+a+i+ a+i+c+e+ a+c+i+a+a	This multinuclear schema has no corresponding Rhe R. No clear Rhe R holds between the nuclei.
	59-60	61-62	volitional result	SM	a+i	R recognises that Ns might be the cause behind the deliberate action or situation in S.
	59 60		conjunction	SM	a+ c	Conjoined items are united together where each plays its role.
	61	62	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
	63-64 65-66		conjunction	SM	a+i+ c+e	Conjoined items are united together where

						each plays its role.
	63	64	elaboration or circumstance	SM SM	i	R recognises & identifies S as additional details for the subject matter in N or R recognises that S interprets the context of situation or the subject matter in N.
	65	66	elaboration	SM	e	R recognises & identifies S as additional details for the subject matter in N.
	67-69	70-71	evidence or justify	SM SM	a+a	R's beliefs of Ns are increased or R accepting W's right to express Ns is increased.
	67 68-69		contrast	SM	a+ c+i	R recognises the comparability and the difference(s) yielded by the comparison is being made.
	68	69	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
	70	71	restatement	PR	a	R recognises that S acts as a restatement of N.
6 EDUs (#74-77)	72 73		contrast	SM	a+ a	R recognises the comparability and the difference(s) yielded by the comparison is being made.
	74	75-77	non-volitional result	SM	a+e+i	R recognises that N might have caused the situations described in S.
	75	76-77	elaboration	SM	e+i	R recognises & identifies S as additional details for the subject matter in N.
	76	77	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.

Accordingly, the generic stages, Rhe Rs, and their Es are shown below:

Table (4.21): Generic Stages, Rhe Rs, and their Es of Text Four (PS No. 34).

Stage	E(s)
1. (#1-10)	It can be 'preparation' Rhe R to stage '2' where R is more ready to, interested in or oriented for reading N.
2. (#11-22)	It is related to stage '3' through either 'background' where R's ability to comprehend N increases or 'motivation' where R's desire to perform the actions in N is increased.
3. (#32-37)	It can be related to stage '4' as it may present 'evidence' (i.e. R's belief of N is increased).
4. (#38-51)	-----
5. (#52-73)	It can show 'interpretation' (R recognises that S relates N to a framework of ideas not exactly involved in the knowledge shown in N), or can act as 'elaboration' (R recognises & identifies S as additional details for the subject matter in N) to stage '4'.
6. (#74-77)	This stage can function as either 'evaluation' (R recognises that S assess N & the value it assigns) or 'summary' (R recognises S as a shorter restatement of N) to stage '5' or to all the preceding stages.

Some observations are noticed in this analysis:

1. SM Rhe Rs are '52' in number; '21' of them are multinuclear Rhe Rs and '31' are mononuclear ones. According to occurrence in the four stages, they are distributed as follows:

- '13' cases of circumstance Rhe R;
- '12' instances of conjunction (multinuclear) Rhe R;
- '10' cases of elaboration Rhe R;
- '4' instances of joint (multinuclear) Rhe R;
- '4' instances of contrast (multinuclear) Rhe R;
- '3' cases of volitional result Rhe R;

- '1' instance of evaluation Rhe R;
- '1' case of means Rhe R;
- '1' instance of multinuclear restatement (multinuclear) Rhe R;
- '1' case of non-volitional result Rhe R;
- '1' instance of purpose Rhe R;
- '1' case of volitional cause Rhe R.

2. PR Rhe Rs are '4' in number, and are distributed as follows:

- '2' cases of restatement Rhe R;
- '1' case of evidence Rhe R;
- '1' instance of motivation Rhe R.

3. Instances of ambiguous cases are below:

- stage '1' shows '2' cases: the first is that S EDUs (#4-10) work as either 'elaboration' or 'motivation' Rhe R to the N EDU (#1-3); the second is where S EDU (#5) links to N EDU (#4) through either 'circumstance' or 'elaboration' Rhe R;
- stage '2' has '4' ambiguity cases: the first is the possibility that the S EDUs (#19-22) can act as 'restatement' Rhe R to or 'disjunction' Rhe R with N EDU (#11-14); the second is where S EDU (#13-14) might be in either 'volitional result' or 'elaboration' Rhe R to N EDU (#11-12); the third case shows that S EDU (#17-18) can be either in 'elaboration' or 'multinuclear restatement' Rhe R to N EDU (#15-16); and the fourth one is where S EDU (#21-22) and N EDUs (#19-20) are in either 'volitional result' or 'elaboration' Rhe R;
- stage '3' has also '3' ambiguity cases: the first one is where the S EDUs (#27-37) could be in 'evaluation' or 'multinuclear restatement' Rhe R to N EDUs (#23-26); the second case is where S EDU (#29-31) and N EDU (#27-28) might be in 'non-volitional result' or 'justify' Rhe R; and the third

possibility is that the S EDUs (#35-37) are either in 'interpretation' or 'evidence' Rhe R to its N EDU (#32-34);

- stage '4' shows '2' ambiguity cases: the first is between EDU (#38-39) and EDU (#40) linked in either 'sequence' or 'conjunction' Rhe R; the second is between S EDU (#39) and its N EDU (#38) linked in either 'purpose' or 'volitional cause';

- stage '5' has '3' cases: the first one is where S EDU (#54) can act as 'elaboration' or 'circumstance' with N EDU (#53); the second one is that the S EDU (#64) can show 'elaboration' or 'circumstance' with N EDU (#63); the third one is where S EDUs (#70-71) and N EDUs (#67-69) show either 'evidence' or 'justify' Rhe R.

4. Single EDUs are used to express a relation, as clear in many instances such as: S EDU (#2) which acts as 'circumstance' to N EDU (#1) in stage '1'. The number of such cases is '24' cases. This refers also to the fact that a single TL is used to syntactically realise a relation.

5. Several EDUs are united together to express a relation, as in S EDUs (#4-10) which are in 'elaboration' Rhe R to N EDUs (#1-3) in stage '1'. The number of such instances is '47' cases. This can also refer to the fact that some TLs are employed to syntactically realise a relation.

6. Stage '1' is possibly in 'preparation' Rhe R to stage '2' which itself can act as 'background' or 'motivation' Rhe R to stage '3'. Stage '3' possibly evidence to stage '4'. Stage '5' could be linked to stage '4' through either 'interpretation' or 'elaboration' Rhe R. Stage '6' may act as 'evaluation' or 'summary' to stage '5' or to all the preceding stages.

4.2.3.3.2.2 Text Five (PS No. 40)

The discourse structure of this PS is stated in the table below:

Table (4.22): The Discourse Structure of Text Five (PS No. 40).

Stage No.	N EDU(s)	S EDU(s)	Rhe R	CS	TL	E
1 EDUs (#1-21)	1-4	5-21	volitional result	SM	a+i+i+a+i+c+f+ a+i+a+c+c+a+e +e+i+e	R recognises that Ns might be the cause behind the deliberate action or situation in S.
	Or 5-21	1-4	solutionhood	SM	a+a+i+c	R recognises that N is a solution to the problem presented in S.
	1	2-4	volitional result	SM	a+i+c	R recognises that Ns might be the cause behind the deliberate action or situation in S.
	2-3 4		conjunction	SM	a+i+ c	Conjoined items are united together where each plays its role.
	2	3	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
	5-11 12-21		joint	SM	a+i+i+a+i+c+f+ a+i+a+c+c+a+e +e+i+e	This multinuclear schema has no corresponding Rhe R. No clear Rhe R holds between the nuclei.
	5-7 Or 5-7 8-11	8-11	volitional result sequence	SM SM	a+i+c+f a+i+i+ a+i+c+f	R recognises that Ns might be the cause behind the deliberate action or situation in S. R recognises a succession relationship among the nuclei.
	5	6	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
		7	circumstance	SM	i	

	8-9 10-11		conjunction	SM	a+i+ c+f	Conjoined items are united together where each plays its role.
	8	9	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
	10	11	purpose	SM	f	R recognises that the situation in N is intended to realise S.
	12-16	17-21	evaluation	SM	a+e+e+i+e	R recognises that Ss assess Ns & the value they assign.
	12-13	14-16	elaboration	SM	a+c+c	R recognises & identifies Ss as additional details for the subject matter in N.
	12	13	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
	14-15 16		conjunction	SM	a+c+ c	Conjoined items are united together where each plays its role.
	14 15		conjunction	SM	a+ c	
	17-18	19-21	evaluation	SM	e+i+e	R recognises that Ss assess Ns & the value they assign.
	17	18	elaboration	SM	e	R recognises & identifies Ss as additional details for the subject matters in Ns.
	19	20-21	elaboration	SM	i+e	
	20	21	elaboration	SM	e	
2 EDUs (#22-49)	22-34 Or 35-49	35-49 22-34	volitional result or motivation solutionhood	SM PR SM	a+b+b+i+b+b+a +i+a+d+a+i+a+ a+i a+e+a+e+i+i+f+ f+a+f+a+c+a	R recognises that Ns might be the cause behind the deliberate action or situation in Ss or R's desire to perform the actions in Ns is increased. R recognises that N is a solution to the problem presented in S.

	22-31	32-34	antithesis	PR	a+c+a	R's positive regard for Ns is increased.
	22-23	24-31	restatement or elaboration	PR SM	a+e+i+i+f+f+a+f	R recognises that Ss act as a restatement of Ns or R recognises & identifies Ss as additional details for the subject matters in Ns.
	22	23	elaboration	SM	e	R recognises & identifies Ss as additional details for the subject matters in Ns.
	24-27	28-31	elaboration	SM	f+f+a+f	
	24-26	27	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
	24	25-26	elaboration	SM	e+i	R recognises & identifies Ss as additional details for the subject matter in N.
	25	26	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
	30-31	28-29	condition	SM	f+f	R recognises how the realisation of Ns depends on the realisation of Ss.
	28 29		conjunction	SM	f+ f	Conjoined items are united together where each plays its role.
	30	31	elaboration or purpose	SM SM	f	R recognises & identifies S as additional details for the subject matter in N or R recognises that the situation in N is intended to realise S.
	32-33 34		multinuclear restatement	SM	a+c+ a	R recognises that the linked items are re-expressed.
	32 33		contrast	SM	a+ c	R recognises the comparability and the

					difference(s) yielded by the comparison is being made.
35-40	41-49	justify or elaboration	PR SM	a+i+a+d+a+ia+a+i	R accepting W's right to express Ns is increased or R recognises & identifies Ss as additional details for the subject matters in Ns.
35-38	39-40	volitional result	SM	b+b	R recognises that Ns might be the cause behind the deliberate action or situation in S
Or 39-40	35-38	motivation	PR	a+b+b+i	R's desire to perform the actions in Ns is increased.
35-36	37-38	justify	PR	b+i	R accepting W's right to express Ns is increased.
35	36	restatement	PR	b	R recognises that S acts as a restatement of N.
37	38	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
39	40	volitional cause	SM	b	R recognises S as a cause for the deliberate action in N.
41-44 45-49		multinuclear restatement or disjunction	SM SM	a+i+a+d+ a+i+a+a+i	R recognises that the linked items are re-expressed or R recognises that the linked items are alternatives.
41-42	43-44	restatement or evidence or elaboration	PR PR SM	a+d	R recognises that Ss act as a restatement of N or R's beliefs of N is increased or R recognises & identifies Ss as additional details for the subject matter in

						N.
	41	42	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
	43	44	circumstance	SM	d	
	45-47	48-49	volitional result or evaluation	SM SM	a+a	R recognises that Ns might be the cause behind the deliberate action or situation in Ss or R recognises that Ss assess Ns & the value they assign.
	45-46	47	restatement or evidence or elaboration	PR PR SM	a	R recognises that S acts as a restatement of N or R's beliefs of N is increased or R recognises & identifies S as additional details for the subject matter in N.
	45	46	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
	48	49	circumstance	SM	i	
3 (#50-81)	50-77 78-81		contrast	SM	a+i+a+d+i+a+c +a+c+i+a+f+a+f +a+e+a+e+i+a+ e+i+c+e+c+i+a +e+ c+a+a+a	R recognises the comparability and the difference(s) yielded by the comparison is being made.
	50-59	60-77	elaboration	SM	a+f+a+f+a+e+a +e+i+a+e+i+c+ e+c+i+a+e	R recognises & identifies Ss as additional details for the subject matters in Ns.
	50-52	53-59	non-volitional cause	SM	d+i+a+c+a+c+i	R recognises that N might have caused the situations described in S.
	50-51	52	purpose	SM	a	R recognises that the situation in N is intended to realise S.
	50	51	circumstance	SM	i	R recognises that S interprets the context of situation or the

						subject matter in N.
53-56	57-59	evidence or restatement	PR PR	a+c+i		R's beliefs of Ns are increased or R recognises that Ss act as a restatement of Ns.
53-54	55-56	volitional cause	SM	a+c		R recognises Ss as causes for the deliberate action in N.
53	54	elaboration	SM	i		R recognises & identifies S as additional details for the subject matter in N.
55 56		conjunction	SM	a+ c		Conjoined items are united together where each plays its role.
57 58-59		conjunction	SM	a+ c+i		
58	59	circumstance	SM	i		R recognises that S interprets the context of situation or the subject matter in N.
60-71 72-77		contrast	SM	a+f+a+f+a+e+a +e+i+a+e+i+ c+e+c+i+a+e		R recognises the comparability and the difference(s) yielded by the comparison is being made.
60-63	64-71	elaboration	SM	a+e+a+e+i+a+e +i		R recognises & identifies S as additional details for the subject matter in N.
60-61 62-63		multinuclear restatement	SM	a+f+ a+f		R recognises that the linked items are re-expressed.
60	61	purpose	SM	f		R recognises that the situations in Ns are intended to realise S.
62	63	purpose	SM	f		
64-68 69-71		joint	SM	a+e+a+e+i+ a+e+i		This multinuclear schema has no corresponding Rhe R. No clear Rhe R holds between the nuclei.
64-65 66-68		joint or multinuclear restatement	SM SM	a+e+ a+e+i		This multinuclear schema 'joint' has no corresponding Rhe R. No clear Rhe R holds

					between the nuclei or R recognises that the linked items are re-expressed.
64	65	elaboration	SM	e	R recognises & identifies S as additional details for the subject matter 'May all be put...' in N.
66-67	68	means	SM	i	R recognises that the instrument/method in S realises the subject matters in N.
66	67	elaboration	SM	e	R recognises & identifies S as additional details for the subject matter in N.
69-70	71	means or circumstance	SM SM	i	R recognises that the instrument/method in S realises the subject matters in N or R recognises that S interprets the context of situation or the subject matter in N.
69	70	elaboration	SM	e	R recognises & identifies S as additional details for the subject matter in N.
72-75 76-77		joint or multinuclear restatement	SM SM	c+e+c+i+ a+e	This multinuclear schema 'joint' has no corresponding Rhe R. No clear Rhe R holds between the nuclei or R recognises that the linked items are re-expressed.
72-73 74-75		conjunction	SM	c+e+ c+i	Conjoined items are united together where each plays its role.
72	73	elaboration	SM	e	R recognises & identifies S as additional details for

						the subject matter in N.
	74	75	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
	76	77	elaboration	SM	e	R recognises & identifies S as additional details for the subject matter in N.
	78-79 80-81		multinuclear restatement	SM	c+a+ a+a	R recognises that the linked items are re-expressed.
	78	79	volitional cause	SM	a	R recognises S as a cause for the deliberate action in N.
	81	80	non-volitional cause	SM	a	R recognises that N might have caused the situations described in S.

Accordingly, the generic stages, Rhe Rs, and their Es are shown below:

Table (4.23): Generic Stages, Rhe Rs, and their Es of Text Five (PS No. 40).

Stage	E(s)
1. (#1-21) and 2. (#22-49)	They can be in 'preparation' Rhe R, where R is more ready to, interested in or oriented for reading N, to stage '3'
1. (#1-21) and 2. (#22-49)	Both stages can be either in 'multinuclear restatement' where R recognises that the linked items are re-expressed or 'conjunction' Rhe R where conjoined items are united together where each plays its role. Another possible analysis can also be seen where stage '2' can be in 'evaluation' Rhe R to stage '1'.

Some observations are stated below:

1. SM Rhe Rs are '60' in number; '16' of them are multinuclear Rhe Rs and '44' are mononuclear ones. According to occurrence in the three stages, they are distributed as follows:

- '15' instances of circumstance Rhe R;
- '15' cases of elaboration Rhe R;
- '8' instances of conjunction (multinuclear) Rhe R;

- '4' cases of purpose Rhe R;
- '3' instances of contrast (multinuclear) Rhe R;
- '3' cases of multinuclear restatement (multinuclear) Rhe R;
- '3' instances of volitional cause Rhe R;
- '2' cases of evaluation Rhe R;
- '2' instances of joint (multinuclear) Rhe R;
- '2' instances of non-volitional cause Rhe R;
- '1' case of condition Rhe R;
- '1' case of means Rhe R;
- '1' case of volitional result Rhe R.

2. PR Rhe Rs are '3' in number:

- '1' case of antithesis Rhe R;
- '1' instance of justify Rhe R;
- '1' case of restatement Rhe R.

3. '15' instances of ambiguous cases are noticed:

- stage '1' shows '2' cases: the first is that either EDUs (#5-21) act as S to the N represented by EDUs (#1-4) through 'volitional result' Rhe R or EDUs (#1-4) work as S to the N EDUs (#5-21) through 'solutionhood'; and the second case is either S EDUs (#8-11) are linked to N EDUs (#5-7) through 'volitional result' or both EDUs are related in 'sequence' Rhe R;

- stage '2' has '9' ambiguity cases:

1. the first is the possibility that the S EDUs (#35-49) can act as 'volitional result' Rhe R or 'motivation' Rhe R to N EDUs (#22-34); yet at the same time EDUs can change position and function: now S can be

EDUs (#22-34) and N can be EDUs (#35-49) which are in 'solutionhood' Rhe R to S;

2. the second is where S EDUs (#24-31) might be in either 'restatement' or 'elaboration' Rhe R to N EDUs (#22-23);

3. the third case shows that S EDU (#31) can be either in 'elaboration' or 'purpose' Rhe R to N EDU (#30);

4. the fourth one is where S EDUs (#41-49) may be in either 'justify' or 'elaboration' Rhe R to N EDUs (#35-40);

5. the fifth possibility is that either S can be represented by EDUs (#39-40) and linked to N EDUs (#35-38) in 'volitional result' Rhe R or EDUs (#35-38) can function as S and linked to N EDUs (#39-40) in 'motivation' Rhe R;

6. the sixth possibility is shown in EDUs (#41-44) and EDUs (#45-49) which can both be in either 'multinuclear restatement' or 'disjunction' Rhe R;

7. the seventh case is shown in S EDUs (#43-44) which may act as 'restatement' or 'evidence' or 'elaboration' Rhe R with N EDUs (#41-42);

8. the eighth case is seen in S EDUs (#48-49) linked to N EDUs (#45-47) in 'volitional result' or 'evaluation' Rhe R; and

9. the ninth case is shown in S EDU (#47) which may act as 'restatement' or 'evidence' or 'elaboration' Rhe R with N EDUs (#45-46);

• stage '3' has '4' ambiguity cases:

1. the first one is where the S EDUs (#57-59) could be in 'evidence' or 'restatement' Rhe R to N EDUs (#53-56);

2. the second case is where EDUs (#64-65) and EDUs (#66-68) might be in 'joint' or 'multinuclear restatement' Rhe R;

3. the third possibility is that the S EDU (#71) is either in 'means' or 'circumstance' Rhe R to its N EDUs (#69-70); and

4. the fourth case is where EDUs (#72-75) and EDUs (#76-77) might be in 'joint' or 'multinuclear restatement' Rhe R to each other.

4. Single EDUs are used to express a relation, as clear in many instances such as: S EDU (#3) which acts as 'circumstance' to N EDU (#2) in stage '1'. The number of such cases is '36' cases. This refers also to the fact that a single TL is used to syntactically realise a relation.

5. Several EDUs are united together to express a relation, as in S EDUs (#14-16) which are in 'elaboration' Rhe R to N EDUs (#12-13) in stage '1'. The number of such instances is '44' cases. This can also refer to the fact that some TLs are employed to syntactically realise a relation.

6. Stage '1' and stage '2' are possibly in 'preparation' Rhe R to stage '3'. However, stages '1' and '2' can be either in 'multinuclear restatement' or 'conjunction' Rhe R. It is also possible that stage '2' acts as 'evaluation' to stage '1'.

4.2.3.3.2.3 Text Six (PS No. 41)

The discourse structure of this PS is stated in the table below:

Table (4.24): The Discourse Structure of Text Six (PS No. 41).

Stage No.	N EDU(s)	S EDU(s)	Rhe R	CS	TL	E
1	1-4	5-14	elaboration	SM	a+c+a+i+c+i+a +i+c+i	R recognises & identifies Ss as additional details for the subject matters in Ns.
	1-2	3-4	Evidence	PR	a+i	R's belief of N is increased.
	1	2	elaboration	SM	e	R recognises & identifies S as additional details for the subject matter in N.
	3	4	circumstance	SM	i	R recognises that S interprets the context of situation or the subject

EDU (#1-14)						matter in N.
	5-10 11-14		list	SM	a+c+a+i+c+i+ a+i+c+i	R recognises the comparability of the linked items via listing.
	5-6 7-10		restatement	PR	a+i+c+i	R recognises that Ss act as a restatement of N.
	Or 5-6 7-10		disjunction	SM	a+i+ c+i	R recognises that the linked items are, not necessarily exclusive, alternatives.
	5 6		conjunction	SM	a+ c	Conjoined items are united together where each plays its role.
	7-8 9-10		conjunction	SM	a+i+ c+i	
	7	8	circumstance	SM	i	R recognises that Ss interprets the context of situation or the subject matter in Ns.
	9	10	circumstance	SM	i	
	11-12 13-14		conjunction	SM	a+i+ c+i	Conjoined items are united together where each plays its role.
	11	12	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in Ns.
	13	14	circumstance	SM	i	
2 EDUs (#15-42)	15-38 39-42		contrast	SM	a+b+d+i+a+i+c +d+a+d+a+c+a +i+a+i+h+a+i+e +a+e+e+i+ c+i+a+d	R recognises the comparability and the difference(s) yielded by the comparison is being made.
	15-18	19-38	antithesis	PR	a+i+c+d+a+d+a +c+a+i+a+i+h+ a+i+e+a+e+e+i	R's positive regard for Ns is increased.
	15-16	17-18	elaboration	SM	d+i	R recognises & identifies Ss as additional details for the subject matters in Ns.
	15 16		joint	SM	a+ b	This multinuclear schema has no corresponding Rhe R. No clear Rhe R holds between the nuclei
	17	18	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.

	19-34		list or conjunction	SM SM	a+i+c+d+a+d+a +c+a+i+a+i+h+ a+i+e+ a+e+e+i	R recognises the comparability of the linked items via listing or the conjoined items are united together where each plays its role.
	35-38					
	19-21 22-34		joint	SM	a+i+c+ d+a+d+a+c+a+i +a+i+h+a+i+e	This multinuclear schema has no corresponding Rhe R. No clear Rhe R holds between the nuclei
	19-20 21		conjunction	SM	a+i+ c	Conjoined items are united together where each plays its role.
	19	20	means	SM	i	R recognises that the instrument/method in S realises the subject matters in N.
	22-26	27-34	elaboration	SM	a+i+a+i+h+a+i+ e	R recognises & identifies Ss as additional details for the subject matters in Ns.
	22-24 25-26		sequence	SM	d+a+d+ a+c	R recognises a succession relationship among the nuclei.
	23	22	circumstance	SM	d	R recognises that Ss interprets the context of situation or the subject matter in N.
		24	circumstance	SM	d	
	25 26		conjunction	SM	a+ c	Conjoined items are united together where each plays its role.
	27-28	29-34	interpretation	SM	a+i+h+a+i+e	R recognises that Ss relate N to a framework of ideas not involved in the knowledge presented in N itself.
	Or 27-28 29-34		multinuclear restatement	SM	a+i+ h+a+i+e	R recognises that Ss act as a restatement of Ns.
	27	28	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
	29-30	31-34	elaboration	SM	h+a+i+e	R recognises & identifies Ss as additional details for the subject matter in

						N.
	29	30	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
	31	32-34	non-volitional result	SM	a+i+e	R recognises that N might have caused the situations described in Ss.
	32	33-34	circumstance	SM	i+e	R recognises that Ss interprets the context of situation or the subject matter in N.
	33	34	elaboration or circumstance	SM SM	e	R recognises & identifies S as additional details for the subject matter in N or R recognises that S interprets the context of situation or the subject matter in N.
	35-37	38	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in Ns.
	35	36	elaboration	SM	e	R recognises & identifies Ss as additional details for the subject matter in N.
		37	elaboration	SM	e	
	39-40 41-42		multinuclear restatement	SM	c+i+ a+d	R recognises that Ss act as a restatement of Ns.
	39	40	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
	41	42	purpose	SM	d	R recognises that the situation in N is intended to realise S.
3	43-46	47-50	volitional result	SM	i+a+c+i	R recognises that Ns might be the cause behind the deliberate action or situation in Ss.
EDUs (#43-50)	43-44	45-46	evidence	PR	d+i	R's belief of N is increased.
	43	44	circumstance	SM	i	R recognises that Ss interprets the context of situation or the subject
	45	46	circumstance	SM	i	

						matter in Ns.
	47-48 49-50		conjunction		i+a+ c+i	Conjoined items are united together where each plays its role.
	48	47	means or circumstance	SM SM	i	R recognises that the instrument/method in S realises the subject matters in N or R recognises that S interprets the context of situation or the subject matter in N.
	49	50	circumstance	SM	i	R recognises that S interprets the context of situation or the subject matter in N.
4 EDUs (#51-54)	51-53	54	summary or evaluation	PR SM	coordinated interjections undefined via TL	R recognises S as a shorter restatement of N or R recognises that S assesses N and the value it assigns.
	51	52	circumstance	SM	i	R recognises that Ss interprets the context of situation or the subject matter in N.
		53	circumstance	SM	i	

Accordingly, the generic stages, Rhe Rs, and their Es are shown below:

Table (4.25): Generic Stages, Rhe Rs, and their Es of Text Six (PS No. 41).

Stage	E(s)
1. (#1-21)	It can be in 'preparation' Rhe R, where R is more ready to, interested in or oriented for reading N, to stages (2-3).
2. (#15-42) and 3. (#43-50)	Stage '2' could increase the ability of R to comprehend N which is represented by stage '3'; hence, 'background' Rhe R. It is also possible that stages, '2' and '3' are linked together in 'conjunction' Rhe R where each plays a comparable role.
4. (#51-54)	It possibly acts as 'summary', R recognises S as a shorter restatement of N, or ' evaluation', R recognises that S assesses N and the value it assigns, to all the preceding stages.

Some observations are stated below:

1. SM Rhe Rs are '41' in number; '12' of them are multinuclear Rhe Rs and '29' are mononuclear ones. According to occurrence in the three stages, they are distributed as follows:

- '18' instances of circumstance Rhe R;
- '7' cases of elaboration Rhe R;
- '6' instance of conjunction (multinuclear) Rhe R;
- '2' cases of joint (multinuclear) Rhe R;
- '1' instance of contrast (multinuclear) Rhe R;
- '1' case of list Rhe R;
- '1' instance of means Rhe R;
- '1' case of multinuclear restatement (multinuclear) Rhe R;
- '1' instance of non-volitional result Rhe R;
- '1' case of purpose Rhe R;
- '1' instance of sequence (multinuclear) Rhe R;
- '1' case of volitional result Rhe.

2. PR Rhe Rs are '3' in number, and are distributed as follows:

- '2' instances of evidence Rhe R;
- '1' case of antithesis Rhe R.

3. '6' ambiguous cases are noticed:

- stage '1' has '1' case: either S EDUs (#7-10) can relate to their N EDUs (#5-6) through 'restatement' Rhe R or both EDUs (#5-6) and EDUs (7-10) are linked through 'disjunction' Rhe R;

- stage '2' shows '3' cases: the first is that EDUs (#19-34) and (#35-38) are linked through either 'list' Rhe R or 'conjunction' Rhe R; the second case is that S EDU (#34) is linked to its N EDU (#33) through either 'elaboration' or 'circumstance' Rhe R; and the third one is either S EDUs (#29-34) can relate to their N EDUs (#27-28) through 'interpretation' Rhe R or both groups of EDUs are linked through 'multinuclear restatement' Rhe R;

- stage '3' has '1' ambiguity where the S EDU (#47) could be in 'means' or 'circumstance' Rhe R to N EDUs (#48);

- stage '4' has also '1' ambiguity: the second case is where the S EDU (#54) is related to its N EDUs (#51-53) through either 'summary' or 'evaluation' Rhe R.

4. Single EDUs are used to express a relation, as clear in many instances such as: S EDU (#2) which acts as 'elaboration' to N EDU (#) in stage '1'. The number of such cases is '24' cases. This refers also to the fact that a single TL is used to syntactically realise a relation.

5. Several EDUs are united together to express a relation, as in S EDUs (#5-14) which are in 'elaboration' Rhe R to N EDUs (#1-4) in stage '1'. The number of such instances is '25' cases. This can also refer to the fact that certain TLs are employed to syntactically realise a relation.

6. Stage '1' can be in 'preparation' Rhe R to stages (2-4).

However, stage '2' could increase the ability of R to comprehend N which is represented by stage '3'; hence, 'background' Rhe R. It is also possible that both stages, '2' and '3', are linked together in 'conjunction' Rhe R. Stage '4' might work as 'summary' or 'evaluation' to stages (1-3).

4.2.3.4 Discourse Structure Discussion

Two parameters are handled in this level of analysis. CSs of the Rhe Rs used in the data are revealed and discussed here. In addition, the

rhetorical hierarchy (i.e., rhetorical coordination versus subordination of EDUs) is also to be subsequently analysed.

4.2.3.4.1 CSs and Rhe Rs

Two CSs have been discussed in the six texts of the English data: SM and PR. That is, EDUs are related to other EDUs in terms of SM (information) or PR (intentions) relations. The following table shows Rhe Rs in these two terms stating the basic numbers and percentages:

Table (4.26): The Basic Numbers and Percentages of Rhe Rs.

CS	Number of Rhe Rs	Percentage
SM	365	80.752%
PR	34	7.522%
Ambiguous	53	11.725%
Total	452	-----

The focus in the data is upon SM CS represented by 'SM' Rhe Rs with (365) cases and (80.752%) as percentage. Only (34), with (7.522%), Rhe Rs are PR in their CS. Ambiguous cases are also recognised in the analysis. '53' cases of (11.725%) are shown. Another distribution of these Rhe Rs can be in terms of whether 'SM' Rs are 'mononuclear' or 'multinuclear'. Numbers and percentages are below:

Table (4.27): The Distribution of Mononuclear and Multinuclear Rhe Rs.

SM Rhe Rs	Number	Percentage	Percentage
Mononuclear	259	70.958%	57.300%
Multinuclear	106	29.041%	23.451%

Two percentages are given for the occurrences of these realisations; first in terms of their total number (365), and second in terms of the total number of EDUs in the data (452). The table reads that mononuclear Rhe Rs are used highly in the data. Multinuclear ones have also registered their presence but not greatly. A very detailed redistribution of these

occurrences would tell of the more and less frequent mononuclear and multinuclear SM Rhe Rs. Consider this table:

Table (4.28): The Redistribution of SM Mononuclear of Rhe Rs.

CS	Rhe R	Number	Percentage	Percentage
SM Mononuclear	circumstance	101	38.996%	22.345%
	elaboration	81	31.274%	17.920%
	Means	17	6.563%	3.761%
	Purpose	17	6.563%	3.761%
	Volitional result	11	4.247%	2.433%
	Volitional cause	10	3.861%	2.212%
	non-volitional result	06	2.316%	1.327%
	Evaluation	05	1.930%	1.106%
	interpretation	05	1.930%	1.106%
	non-volitional cause	04	1.544%	0.884%
	Condition	01	0.386%	0.221%
	solutionhood	01	0.386%	0.221%
Total:	12	259	-----	-----

and :

Table (4.29): The Redistribution of SM Multinuclear of Rhe Rs.

CS	Rhe R	Number	Percentage	Percentage
SM Multinuclear	conjunction	58	54.716%	12.831%
	Joint	20	18.867%	4.424%
	Contrast	11	10.5733%	2.433%
	multinuclear restatement	10	9.433%	2.212%
	Sequence	06	5.660%	1.327%
	List	01	0.943%	0.221%
Total:	06	106	-----	-----

Two percentages are identified in each table; the first is due to the total number of 'mononuclear' (i.e., 259 cases) or 'multinuclear' (i.e., 106 cases) SM Rhe Rs, and the second is due to all the Rhe Rs present in the data (i.e., 452). Only '18' out of '22' SM Rhe Rs, adopted in this study, are employed.

The five most frequent mononuclear Rhe Rs are:

1. circumstance, realised through prepositional phrases alone or a group of TLs;
2. elaboration, realised through relative clauses, independent sentences, present, past participle or adjective modifier or even through a group of TLs;
3. means, realised through prepositional phrases or through a group of TLs;
4. purpose, realised through infinitival clauses or prepositional phrases or via other TLs together; and
5. volitional result; independent sentences or prepositional phrases or other TLs are used to realise this Rhe R.

Possible motives that can be found behind the frequency attached to these five SM mononuclear Rhe Rs in the table above are, respectively:

1. the psalmist tries to devise the setting for his requests, petitions, asking, in order to interpret the contexts presented in Ns;
2. he takes any additional elaborations as participating to making the subjects matters in Ns recognisably clear;
3. to realise the subject matters in Ns, he needs to identify the instrument/method, whether literally or metaphorically;
4. some activities that are shown in Ns are intended to realise the Ss; and
5. he prefers to recognise that Ns might be the causes behind any deliberate actions, on his part, in Ss.

Other less frequent SM mononuclear Rhe Rs are shown in the table. They can be realised through the different TLs shown in the tables for each discourse structure under the column 'TL'. They also have their motivations or intentions, such as:

6. volitional cause: Ss are taken as causes for the deliberate actions in Ns;

7. non-volitional result: Rs recognise that Ns might have caused the actions or situations described in Ss;
8. evaluation: Rs are able to assess Ns and their values;
9. interpretation: Ss can interpret the situations or knowledge presented in Ns;
10. non-volitional cause: Rs recognise Ss as causes of Ns;
11. condition: Rs recognise how the realisation of Ns depend on the realisation of Ss; and
12. solutionhood: Ns are recognised by Rs as solutions to the problems presented in Ss.

The five most frequent multinuclear Rhe Rs are:

1. conjunction, realised mostly through coordinate clauses or independent sentences or other TLs together;
2. joint, usually several TLs are employed to realise this Rhe R;
3. contrast, independent sentences or coordinate clause or other TLs as a group are used to realise this Rhe R;
4. multinuclear restatement, usually several TLs are employed to realise this Rhe R; and
5. sequence, realised through independent sentences or a group of TLs are also used.

Rs can find some of the reasons for the frequency of the SM multinuclear Rhe Rs in the table above, respectively:

1. the psalmist takes the conjoined items as united together where each plays a role in the context and progression of text;
2. sometimes EDUs are correlated to each other but there would not be a clear Rhe R that holds between them;

3. sometimes different degrees exist of the comparability through the comparison made in EDUs;
4. the re-expression by the linked items is another way to recognise the several snatches of a request, demand, petition, etc.; and
5. a relationship of succession may hold between the identified EDUs.

One less frequent SM multinuclear Rhe Rs is shown in the table; it is 'list', the motivation or intention of which is: the comparability of the linked EDUs is recognised via listing the items.

The other CS is PR and Rhe Rs in the data show some presence: (34) cases in total. A very detailed redistribution of these occurrences would tell of the more and less frequent PR Rhe Rs, as in the table below:

Table (4.30): The Redistribution of PR Rhe Rs.

CS	Rhe R	Number	Percentage	Percentage
PR	Evidence	11	32.352%	2.433%
	Restatement	09	26.470%	1.991%
	Background	05	14.705%	1.106%
	Justify	04	11.764%	1.884%
	Motivation	03	8.823%	0.663%
	Antithesis	02	5.882%	0.442%
Total:	06	34	-----	-----

Two percentages are uncovered in this table; the first is due to the total number of PR Rhe Rs (i.e., 34 cases), and the second is due to all the Rhe Rs present in the data (i.e., 452). '06' out of '10' PR Rhe Rs, adopted in this study, are employed in the data.

The frequency of these Rhe Rs is stated as:

1. evidence, realised also by independent sentences or other TLs grouped together;
2. restatement, realised by independent sentences or other TLs grouped together;

3. background, realised by a group of TLs united together;
4. justify, realised by independent sentences or a group of TLs brought together; and
5. motivation, realised through prepositional phrases + independent sentences or other TLs as a group;
6. antithesis, realised by a group of TLs including independent sentences, together with coordinate clauses, and other TLs.

However, Rs can identify some intentions behind using each of these relations, respectively:

1. Ss function as restatements of Ns;
2. beliefs of Rs of N's claims are increased;
3. for background relation, R's understandings of Ns are recognised and facilitated;
4. for justify relation, Rs accepting W's rights to express N are increased;
5. the intended desires of Rs to perform the actions in Ns are increased;
6. Rs increase their positive regards for Ns.

Ambiguity has been identified; '52' cases are discovered. In this regard, ambiguity could rise in the multiple analyses out of several reasons: textual structure ambiguity, 'simultaneous analyses' of compatible degrees, or differences in 'plausibility judgements'. The table below shows the cases and their percentages in the six texts under analysis:

Table (4.31): Ambiguity Cases and their Percentages in the Analysed English Data

Text	Rhe Rs in Text	Ambiguity Cases	Percentage	Percentage	Percentage
1	70	06	8.571 %	11.320%	1.327%
2	66	03	4.545 %	5.660%	0.663%

3	118	09	6.727 %	16.981%	1.991%
4	70	14	20 %	26.415%	3.097%
5	78	15	19.230 %	28.301%	3.318%
6	50	06	12 %	11.320%	1.327%
Total:	452	53	-----	-----	-----

The first column in the table lists the six texts. The second column contains the number of Rhe Rs in each text. The third is related to cases of ambiguity in each text. Three types of percentages are recognised in the last three columns. The first percentage is related to ambiguity in each analysed text. The second one shows ambiguity in relation to the total number of such cases; (53). The third one represents ambiguity with regard to all Rhe Rs in the data; (452) cases with (11.723%).

Another way of saying things is that the whole percentage of liability of analysis with complete clarity and ease of achievement in the terms this study presents is (88.277 %). The rest of percentage is for ambiguity, only (11.723 %). This (11.723 %) can be distributed from the more frequent to the less frequent: '5', '4' (thanksgiving texts), '3', '1' (lament texts), '6' (thanksgiving text), and '2' (lament text).

One last thing in this sub section deserves attention. It has been stated elsewhere (see 3.1.3) that generic structure is useful because it can show different distributions of Rhe Rs, intentions of the text, intentions of the W, specific goals of the text and W, hierarchy of the parts to the whole and the parts to each other, and correlating linguistic structures with contextual factors presented through generic stages. Accordingly, the stages of each text in the data are first analysed and the content of each stage is outlined. In addition, the analysis re-proceeds with this course of action in terms of the Rhe Rs that link all the text stages together and the Es on Rs. The following table outlines some basic numbers and percentages related to the generic structures of the English data:

Table (4.32): The Basic Distribution of GSPs and their Rhe Rs.

GSP	Texts	Number of Stages	Number of Rhe Rs
1	3	18	13
2	3	13	10
Total:		31	23

The six texts are distributed over two GSPs; '3' texts, with '18' stages and '13' Rhe Rs, in the first GSP, and '3' texts, with '13' stages and '10' Rhe Rs, are under the second one. Some Rhe Rs are clearly diagnosed while others have multiple readings; i.e., ambiguous. To redistribute in detail, consider the following table:

Table (4.33): The Detailed Distribution of GSPs and their Rhe Rs.

GSP	Number of Rhe Rs	Clear Cases	Percentage	Ambiguous Cases	Percentage
1	13	10	43.478%	03	13.043%
2	10	04	17.391%	06	26.086%
Total:	23	14	60.869%	09	39.130%

The two percentages are presented due to the total number of ambiguity and clarity cases in the generic structures of all texts in the data. Ambiguity in this table is either between two parts of a Rhe R, such as 'evidence' and 'interpretation' or three parts, as in 'volitional result', 'motivation', and 'solutionhood'. Clarity and ease of analysis are still dominant.

4.2.3.4.2 Rhetorical Hierarchy

Syntactic dependency relations of coordination and subordination have been analysed in each text under 'text structure'. However, this part is set to uncover whether EDUs can also be rhetorically coordinated or subordinated due to their co-textual salience. This is referred to as

'hierarchy'. Gylling (2013: 146) presents two notions in RST to testify them:

1. syntactic subordination arises out of rhetorical subordination; and
2. syntactic coordination arises out of rhetorical coordination, too.

In other words, there is an assumption of a one-to-one correspondence between syntactic dependency and rhetorical hierarchy.

If the data is scrutinised deeply, opposite evidence to the above two notions can be noticed. That is, syntactic subordination may accompany rhetorical coordination where some Rhe Rs are brought together as one unit in order to achieve some degree of balance of the composite elements of the Rhe R. The two elements, N and S, work to facilitate the intended E on Rs. Examples are taken from text '1' below:

9. *N EDUs (#9-12) [My enemies turn back;] [they stumble] [and perish] [before you.] and S EDUs (#13-15) [For you have upheld my right and my cause;] [you [EDU#15] have sat on your throne,] [judging righteously].*

The Rhe R is 'volitional cause' which means that R recognises S as a cause for the volitional action in N (i.e., the result). The TL of this Rhe R is (d+a+h), all are within the domain of subordination in the deverbalsation scale. These EDUs unite together to assume rhetorical coordination that is also supported by other adjacent EDUs with their Rhe Rs of 'evidence', S EDUS (#16-18) and S EDUs (#19-21).

10. *N EDUs (#25-26) [He will judge the world] [in righteousness;] and S EDUs (#27-28) [he will govern the peoples] [with justice.]*

The Rhe R is either 'background' (i.e., R's understanding of N is increased & facilitated) or 'volitional result' (i.e., R recognises that N might be the cause behind the deliberate action or situation in S). This ambiguous Rhe R is realised by (a+i). Though they are two distinct sentences, yet their EDUs presuppose a rhetorical coordination because with the reading of

'background' the R would not comprehend the subject matter in N completely unless he reads S, while with 'volitional result' the S refers to a situation that out of a volitional action.

Syntactic coordination, in contrast, may assume rhetorical subordination which changes independent clauses into dependent clauses having less semantic and rhetorical E if compared to their independent clauses. Consider the examples below from text '3':

11. *N EDUs (#22-23) [But I am a worm] [and (I am) not a man,] and S EDUs (#24-25) [scorned by men] [and despised by the people.]*

The Rhe R is 'elaboration' (i.e., R recognises and identifies S as additional details for the subject matters in Ns). Two syntactically coordinated EDUs are seen but they are not rhetorically coordinated. This Rhe R is realised by (h+c) which are within the domain of subordination.

12. *EDUs (#95-96) [For he has not despised][or disdained the suffering of the afflicted one;] and (#97-100) [he has not hidden his face] [from him] [but has listened to his cry] [for help.].*

These EDUs are conjoined together but, nevertheless, are not rhetorically coordinated; they are subordinated rhetorically realised by the TLs (d+c+a+i+c+i).

In this regard, it can be stated that cases can be found that do not go in line with the two notions above. Rhetorical coordination does not always assume syntactic coordination. At the same time, syntactic subordination may not correspondence to rhetorical subordination, though not often.

4.2.3.5 Information Structure Analysis and Discussion

Two parameters are analysed and discussed in this level: linkage of EDUs and signalling of Rhe Rs. These two are presented together for all texts.

4.2.3.5.1 Linkage of EDUs

A widely assumed linguistic, stylistic, and rhetorical fact is that long-sentencing texts, in words and EDUs, are *"more difficult to understand, less reader-oriented and denser..."* than short-sentencing texts (Gylling, 2013: 162). On the other hand, texts with short sentences or with lengths that are unvaried might be considered *"fragmented or incoherent,..."* (ibid.). The texts in hand are analysed to discover whether or not their EDUs are related to other EDUs inside or across the sentence boundary, and, thus, whether long- or short-sentencing is dominant. The first step is to point out the tendency towards a positive or negative correlation between the number of words in sentences and number of EDUs in the texts in order to uncover the mean sentence length.

As can be noticed in the table below, the numbers of words, of sentences, and of EDUs for the selected data are stated. In addition, the mean numbers of words per sentence, text, and per EDU are also recorded. The mean sentences per text and the mean EDUs per sentence are revealed, too. Consider the table below:

Table (4.34): The Mean Number of Selected Means.

Basic Numbers and Selected Means	Number and Percentage
Number of words	2136
Number of sentences	207
Number of EDUs	489
Mean words per sentence	10.318%
Mean words per text	356
Mean words per EDU	4.368%
Mean sentences per text	34.5%
Mean EDUs per sentence	2.362%

In terms of percentages, the data shows that the mean number of words per sentence, which also refers to the mean sentence length, is (10.318%). In addition, the mean number of words per text is (356), and per EDU is

(4.368%). Accordingly, the percentage of mean sentences per text is (34.5%) and the percentage of mean EDUs per sentence is (2.362%).

To further investigate this issue, EDUs in the data are distributed per the sentences of the six texts in the following way:

Table (4.35): The Distribution of EDU-Sentence.

EDU-Sentence	Number of Cases	Percentage	Percentage
One-EDU Sentence	60	12.269%	28.985%
Two-EDU Sentence	74	15.132%	35.748%
Three-EDU Sentence	34	6.952%	16.425%
Four-EDU Sentence	27	5.521%	13.043%
Five-EDU Sentence	05	1.022%	2.415%
Six-EDU Sentence	04	0.817%	1.932%
Seven-EDU Sentence	03	0.613%	1.449%
Total:	207	-----	

Two percentages can be stated: first in terms of the total number of EDUs (489), and second in terms of sentences (207). The distribution clearly shows that 'Two-EDU Sentence' represents (15.132%) and (35.748%) with (74) cases and the second position has (60) cases of 'One-EDU Sentence' with (12.269%) and (28.985%). Sentences of three EDUs are (34) cases with (6.952%) and (16.425%), followed by 'Four-EDU Sentence' which is (27) cases with (5.521%) and (13.043%). 'Five-EDU Sentence' comes next with (5) instances with (1.022%) and (2.415%). The other rank is reserved to 'Six-EDU Sentence' of (4) cases with (0.817%) and (1.932%). The last rank is occupied by 'Seven-EDU Sentence' of (3) cases with (0.613%) and (1.449%). These numbers verify that reasonably moderate sentence length dominates in the data.

It is noticed from the numbers above that (147) cases, with (30.061%) and (71.014%), out of (489) EDUs and (207) sentences respectively, are sentences of more than one EDU. Generally, more information is packaged behind such concentration of EDUs. These EDUs depend on

their nuclei and, thus cognitively, "... *play a less salient role in the discourse structure of the sentence than if the satellites had been textualised as independent sentences*" (Renkema,2004: 147, in Gylling,2013: 167). This is illustrated in the table below that relates to the linguistically structuring of EDUs of the data:

Table (4.36): The Distribution of the Linguistic Structuring of EDUs.

TL	Number of Cases	Percentage
a. Independent sentence	202	41.308%
b. Main or matrix clause as part of a sentence	10	2.044%
c. Coordinate main or matrix clause	68	13.904%
d. Subordinate finite adverbial clause	18	3.680%
e. Relative clause	39	7.975%
f. Infinitival clause	12	2.453%
g. Gerund, present or past participle construction	-----	-----
h. Present, past participle or adjectival modifier	8	1.635%
i. Nominalisation (prepositional phrase)	129	26.380%
j. Verbless construction	-----	-----
Ambiguous	3	0.613%
Total	489	-----

If observed carefully, some EDUs can be inside one sentence or extend over more than one sentence, as in EDU (#13), text '1': [For you have uphold my right and my cause;] which is a subordinate finite adverbial clause most possibly, if not definitely, linked to EDUs (#10-12): [they stumble] [and perish] [before you.] in terms of (for). Though it heads a new sentence, 'for' acts as a DC to its clause with other preceding EDUs. Two other DCs act the same; 'but' and 'yet'. Such cases are not many in the data. Three ambiguous cases are seen in the table; they are: 1. EDU (#25), text '3' [and despised by the people.] which could be a coordinated clause to EDU (#22) or past participle that is coordinated; 2. EDU (#80), text '3' [my precious life] which might be a coordinated clause to EDU

(#78) or ambiguously undefined; and 3. EDU (#54), text '6' [Amen and Amen) which is undefined through the deverbalisation scale.

Two strategies can be elicited from the table; downgrading and upgrading information. Downgrading information packaged in EDUs can be shown when Ss are linguistically textualised as subordinate clauses, for instance. Regardless of the three ambiguous cases stated above, there are (284) such cases, represented by TLs (b-j) with (58.077 %). Upgrading, on the contrary, can be seen when packaged information of tis upgraded to an independent sentence, as in the (202) cases above with (41.308%).

4.2.3.5.2 Signalling Rhe Rs

Ws can choose to signal their texts by the use of some signals or prefer implicitness. In the case of explicit signalling, the purpose of Ws is either to highlight the structure of texts and organise their ideas or help Rs comprehend, process, and recall the content of their texts.

Below is a survey of all the explicit linguistic DCs in the data, number of cases, and percentage, from the most frequent to the less frequent:

Table (4.37): The Distribution of Explicit DCs.

#	DC	Number of Cases	Percentage	#	DC	Number of Cases	Percentage
1	And	53	19.924%	11	Within	02	0.751%
2	In	36	13.533%		Upon	01	0.375%
3	Who	29	10.902%		without	01	0.375%
4	From	26	9.774%		About	01	0.375%
	To	26	9.774%		around	01	0.375%
5	For	17	6.390%		As	01	0.375%
6	But	11	4.135%		in order that	01	0.375%
7	With	06	2.255%		Into	01	0.375%
8	Before	04	1.503%		Near	01	0.375%
	By	04	1.503%		Nor	01	0.375%
	Against	04	1.503%		Or	01	0.375%

9	out of	04	1.503%		Since	01	0.375%
	That	04	1.503%		Under	01	0.375%
	At	03	1.127%		Were	01	0.375%
	Even	03	1.127%		whenever	01	0.375%
	Like	03	1.127%		Where	01	0.375%
	On	03	1.127%		While	01	0.375%
	Over	03	1.127%		whoever	01	0.375%
	Yet	03	1.127%		Whom	01	0.375%
10	Among	02	0.751%		-----	-----	-----
	Then	02	0.751%		Total:	266	-----

All the DCs used in the data are represented in the table, followed by number of occurrences, and frequencies.

However, both explicit and implicit signalling between EDUs of the data are distributed the following way:

Table (4.38): The Distribution of Explicit and Implicit Signalling between EDUs.

Signalling	Number of Cases	Percentage
Explicit	266	58.980%
Implicit	186	41.150%
Total:	452	-----

Most of Rhe Rs are explicitly signalled; (266) with (58.980%). This signalling refers to the idea of 'specification'; the presence of DCs between EDUs (Gylling,2013: 180). On the contrary, implicit signalling, or 'underspecification', is (186) cases with (41.150%).

Those explicit DCs are either used to link EDUs inside one sentence (intrasentential) or across different sentences (intersentential). Some of these in the data are less frequent and others are more frequent. The table below illustrates this:

Table (4.39): The Distribution of Explicit DCs in Intra- and Intersentential EDUs.

Explicit Signalling	Number of Cases	Percentage
DCs linking EDUs inside the same sentence	251	94.360%
DCs linking EDUs across different sentences	09	3.383%
Ambiguous	06	2.255%
Total:	266	-----

The majority of DCs are employed in the data to link EDUs intrasententially. Very few cases are intersententially used. Ambiguous cases are only (6) in number and they are related to the use of 'but', 'for', and 'yet', as discussed above. To further investigate this issue, the syntactic classes or linguistic items used as DCs are distributed over the following four classes or items:

Table (4.40): The Distribution of the Syntactic Classes/ Items Used as DCs.

Class or Item	Number of Cases	Percentage
Prepositions	141	53.007%
Coordinators	69	25.939%
Subordinators	51	19.172%
Conjunct adverbs	05	1.879%
Total:	266	-----

The tendency is to prefer prepositions heading their phrases, followed by coordinators and then subordinators. The lower frequency is reserved for conjunct adverbs such as 'then' and 'even'. Except of coordinators, the total number of prepositions, subordinators, and conjunct adverbs used in the data is (197) with (74.060%). These three classes or items can be seen as belonging to levels (d-j) in the deverbalisation scale discussed earlier. They integrate EDUs to their nuclei to show indicate subordination.

The distribution of explicit DCs can be reproduced to include their occurrence in relation to the deverbalisation scale, as in the following table:

Table (4.41): The Distribution of Explicit DCs in Relation to the Deverbalisation Scale.

TL	Number of Cases	Percentage
a. Independent sentence	05	1.879%
b. Main or matrix clause as part of a sentence	-----	-----
c. Coordinate main or matrix clause	67	25.187%
d. Subordinate finite adverbial clause	17	6.390%
e. Relative clause	35	13.157%
f. Infinitival clause	12	4.511%
g. Gerund, present or past participle construction	-----	-----
h. Present, past participle or adjectival modifier	-----	-----
i. Nominalisation (prepositional phrase)	129	48.496%
j. Verbless construction	-----	-----
Ambiguous	01	0.375%
Total:	266	

The first thing that is noticed is that level (c) registers (67) cases here while in the immediately preceding table, coordinators are (69) cases. The reason for this is that the coordinator 'and' in text '3' [and despised by all the people] can belong either to level (c) or level (h), and in text '5' may possibly come with level (f); EDUs (#28+29) [were I to speak] and [and tell of them]. Differences in number of cases and percentages are clear in the table. '6' cases with (1/960 %) in level (a) represent DCs that present Rhe Rs between intersentential EDUs. No DCs are seen in levels (b), (g), (h), and (j). Arrangement from the most frequent level to the less frequent would look like: (i) followed by (c), (e), (d), and (f).

CHAPTER FIVE

ARABIC DATA ANALYSIS AND DISCUSSION

5.1 Introduction

This chapter is a rhetorical analysis of the selected Arabic data. To maintain objective conclusions, a discussion of results will follow. The analysis will be for the two structures in each text, i.e. generic structure and linguistic structures including text, discourse, and information structures. Each structure is to be analysed due to its aspects. Six texts are selected from the Ṣaḥīfa. They are texts which are also called 'The Psalms of Islam', 'Sister of the Quran', 'Gospel of the Folk of the House', and 'Psalms of the Household of Muhammad' (Chittick, 2003: 9).

Some may misleadingly call this collection only as 'prayer' manual in the sense of verbal request; i.e., 'supplication'. This would be a step towards underspecifying the different varieties of prayer and devotional practices (Padwick,1996: 3ff, in *ibid*:13). Several connotations and practices are employed to let individuals or groups "*into communion with God*". That is, it is "*an act of communication by humans with the sacred or holy-God, the gods, the transcendent realm, or supernatural powers*" (Yücel,2010: 7). Five lines of defining 'prayer' are cited by Yücel (*ibid*:8):

1. Prayer is "*every kind of inward communion or conversation with the power recognized as divine*" (James,1963: 5);
2. Prayer is an address directed to God or to a superior power in which we reveal our needs and implore that they be fulfilled (Daujat,1964: 8);
3. Prayer is viewed as adoration, thanksgiving, oblation, penitence, intercession, praise and petition, and a response to God's call and a free act by a man or woman. It is any personal, impersonal or transpersonal way to express communion with the sacred (DeLong,1998: 65f);

4. From the viewpoint of emotions and mental knowledge sealed in the petition for God, "*Prayer is the raising of one's mind and heart to God or the requesting of good things from God*" (Ruland,1994: 13); and

5. A more general definition is one which views prayer, whether verbal or non-verbal, as "*communication with the Absolut*" (Dossey,1998: 10).

From the perspective of Islamic traditions, prayer in the Quran is (زوين, 2002: 23-35):

1. A form of worship (10:106);
2. A means of asking for aid (2:23);
3. God's call to humans (17:52); and
4. Praise to God (17:101).

The common feature to all these definitions is that prayer is a wide umbrella form of devotional communication between a person or a group and God; it is a kind of servitude to God. It can be noticed, therefore, that the *Ṣaḥīfa*, through the unity of its themes and style, shows these features spotted in the definitions above.

According to content and shared themes, the six texts selected as Arabic data represent the same two sub-genres pointed in the English data: 1. Lament, 2. Thanksgiving (see sec. 4.1). However, two default generic structures can be nominated for most of the lengthy prayers in Islamic traditions. The first has three options (الحسن, 1432 A.H.: 61f):

A:

1. praise to God;
2. glorifying God; and
3. request for God's response.

B:

1. praise to God;
2. glorifying God;
3. sending peace to the Prophet Muhammad and His Household; and
4. request for God's response.

C:

1. praise to God;
2. glorifying God;
3. sending peace to the Prophet Muhammad and his Household;
4. confessing one's guilt and sins; and
5. request for God's response.

The second direction of generic structuring is the one stated below (الأصفي, 1429 A.H.: 136-149):

1. Opening Address, including:
 - a. request for forgiveness and asking for God's aspiration to thank Him, remember Him, etc.;
 - b. displaying the situation of the devoted individual and his pushing needs for God's help;
 - c. showing human affliction, anguish, and pain;
 - d. stating that no help is to be received except from God;
 - e. confessing misdeeds and sins; and
 - f. announcing the readiness of the devoted individual to stand in front of God, The Master.
2. Displaying the Means Used to Fulfil the Demands, including:

- a. God's graciousness, and mercy;
 - b. divine affection towards and devotion to God and His Oneness;
 - c. weakness and feebleness of the devoted actor to endure punishment and torture;
 - d. no refuge is only to God.
3. Requests from God: where not all requests are made at once, starting from the very lowest to the highest in significance.

Thus, the tendency is to bring into play two general strategies: 'Other-Raising' (i.e., employing epithets, adjectives, titles, etc. that praise God) and 'Self-Lowering', through using expressions for lowering the needy (Beeman, 1986: 142ff).

The first three texts to be analysed belong to the sub-genre of 'lament' as they address the fact that God is to act for the achievement of the different requests raised from the supplicant. They are, in other words, texts that pertain to petitionary praise. The three texts selected from the *Ṣaḥīfa* are: '8', '12', and '13'. The next three texts for analysis belong to declarative praise as they clearly show thanksgiving to God. These texts are: '1', '2', and '37'.

5.2 Rhetorical Organisation of the Selected *Ṣaḥīfa* Texts

This part is devoted to analysing and discussing the rhetorical organisation of the selected Arabic texts due to two structures: generic, and linguistic which includes text, discourse, and information structures with their dimensions. The same plan followed in the previous chapter is also adopted here to achieve an operational similarity between the two.

5.2.1 Generic Structure Analysis

The generic structure analysis of all selected texts includes four aspects: themes, content outline, values of 'field', 'tenor', and 'mode', and AGSs.

5.2.1.1 Generic Analysis of Petitionary Praise (i.e., Lament) Texts (Ṣaḥīfa Texts No. 8, 12, 13)

These first three texts represent the different requests raised to God as they are in the 'Muḥammadi Trust of Great Britain and Ireland' edition of the Ṣaḥīfa (1988: 93-96, 105-117), supported by that of الشيرازي (1425 A.H. vol.2:427-497, vol.3:1-89):

A. Themes

The major themes of these texts are:

Text One (Ṣaḥīfa Text 8): to seek refuge from God with regard to: 1. hateful doings and matters; 2. bad and crippled morals; and 3. acts of disgrace and blame;

Text Two (Ṣaḥīfa Text 12): 1. confessing sins and wrong deeds; and 2. seeking repentance towards God; and

Text Three 13(Ṣaḥīfa Text 13): asking for needs from God and only God.

B. Content Outline

If read carefully, the content outline of these texts looks like:

Text One: 1. seeking refuge in God on the part of individual(s) from bad (non)material acts and doings; and 2. refuge in God even in the other life after death;

Text Two: 1. confessing sins, wrong deeds, disobedience, guilt, etc.; 2. repentance is sought only from God for all those shameful acts; and 3. full trust in God saving the obedient and then those who are real believers in His Mercy; and

Text Three: 1. needs are to be sought from God only; 2. reasons to seek needs from God and not from other humans; and 3. calling for God through His Names make needs fulfilled.

C. Values

The values of 'field', 'tenor', and 'mode' are stated below:

1. Field

Text One: a prominent goal of this text is to ask and seek refuge and protection in God only. This requires a recognition of five aspects: a. the act of seeking refuge and protection, b. the one who seeks and asks, c. the One to ask from, d. the content of seeking refuge and protection, e. the purpose of refuge seeking;

Text Two: its major goal is to confess those sins that bring shame and are thus causes for disobedience. Another goal is seeking repentance toward God. The acts that fulfil these goals are: opening address showing why to ask God, seeking repentance against sins, callings for God to show mercy with reasons for this act, asking for certain requests from God; and

Text Three: the major goal is to ask whatever needs from only God, and not from other humans. The acts used to achieve these goals are: opening callings for God, showing the uselessness of directing towards others, preparation for asking the needs, reasons for seeking needs from God, stating the needs.

2. Tenor

Text One: the agents in this text are in a hierarchic lowly relation to the superordinate God, through His Names. That is, the subordinate individual in terms of the one speaker or other parties in terms of the plural is/are hierarchically related to his/their superordinate agent, God. Within that, another hierarchic lowly relation is noticed between the individual 'أنا' and other controlling parties such as 'الشيطان' the Satan', 'الظالم' the oppressor(s)', 'السلطان الجائر' the supreme or sovereign authority of the tyrant', etc. The social distance is minimal since the degree of familiarity is greater between the present/visible subordinate agent and the invisible superordinate agent who definitely knows the actor of the and his needs and fulfils his request;

Text Two: the agents in this text are in a self-lowering hierarchic relation to the superordinate God, through confessing and repenting on the part of the subordinate individual in terms of 'أنا I' or other parties in terms of the plural 'نحن/نا we', 'عباده His creatures', 'المسترحمون/المستغفرون' those who seek refuge in You', etc. The social distance is minimal since the degree of familiarity is greater between the present/visible subordinate agent and the invisible superordinate agent; and

Text Three: the agent, the actor of the prayer in this text, is in a self-lowering hierarchic relation to the superordinate God, where the subordinate individual 'أنا I' and its different cases (i.e., accusative, genitive, etc.) is seeking the needs from God only. Another hierarchic relation exists between the actor and other supposed agents whom he may direct towards in his needs. The social distance is minimal since the degree of familiarity is greater between the present/visible subordinate agent and the invisible superordinate agent who definitely knows the needs and fulfils requests.

3. Mode

All Three Texts: the language role is evidently constitutive. The channel used is phonic. The medium employed is written to be spoken. Accordingly, The CCs of these texts would look like:

1. Field

Text One: Religion language: lament: refuge seeking: petition: blessings over His Prophet and his Household;

Text Two: Religion language: lament: confessing sins: repentance seeking: petition: praise: blessings over His Prophet and his Household; and

Text Three: Religion language: lament: praise: seeking needs: reasons for seeking needs: petition: blessings over His Prophet and his Household.

2. Tenor for the three texts

Agents: hierarchic: the individual(s) subordinate and God superordinate;
social distance: minimal.

3. Mode for the three texts

Language role: constitutive; channel: phonic; medium: written to be spoken.

D. AGSs

The AGSs of these texts would include the elements which are actually present. The messages of these texts are distributed over the following actual elements (ibid.) (see Appendix F):

Table (5.1): The Structural Elements (Stages) of Petitionary Praise Şahīfa Texts.

Text	No.	Structural Elements (Stage)	Outline	Parts	From ... To
1	1	Opening Address / Cry	The individual praying for refuge from (non)material bad things and morals.	1-4	بَغِيرِ عِلْمٍ... اللَّهُمَّ إِنِّي أَعُوذُ بِكَ
	2	Complaint against (Non) Material Blameworthy Acts	Complaint against acts like deceiving others, ill-mindedness, acting with prodigality, etc.	5-7	فَقَدَانِ الْكَفَافِ... وَ نَعُوذُ بِكَ أَنْ
	3	Refuge Seeking in this and the Other Life	Refuge in God from dreadful remorse, the evil end, punishment, etc.	8-9	وَ حُلُولِ الْعِقَابِ... وَ نَعُوذُ بِكَ
	4	Closing Petition	Hope in refuge from all of that.	10	يَا أَرْحَمَ الرَّاحِمِينَ... اللَّهُمَّ صَلِّ
2	1	Opening Address	Reasons are shown for both 'why to ask God; and 'why not to ask'.	1-3	كُلُّ نَعِيمِكَ ابْتِدَاءً... اللَّهُمَّ إِنَّهُ يَحْجُبُنِي
	2	Self-Asking of the Fruit of Repentance while he is Guilty.	While he is guilty, the individual talks of his shame when asking God for repentance and forgiveness.	4-6	فِي وَقْتُ دُعَايَ مَقْتِكَ؟... فَهِيَ أَنَا ذَا
	3	Despair has no Space before God.	No space for despair is ever sensed or felt.	7-8	حَائِلٍ خَفِيَ... سُبْحَانَكَ
	4	Preparing for Requests from God.	Through callings to God, the actor of the prayer paves his way for requesting Him.	9-10	بِنَقْصَلِهِ حُسْنَ الْجَزَاءِ... فَذْ تَطَاطَأُ

	5	Confessing his Sins and Remorse.	The Actor is confessing the sins, bad doings, and remorse.	11-14	عَجَزْتُ عَنْهُ... مَا أَنَا بِأَعْصَى
	6	Content of his Petition.	He asks God for forgiveness and repentance.	15-16	أَمِينَ رَبِّ الْعَالَمِينَ... اللَّهُمَّ صَلِّ
3	1	Opening Praise Callings and Stating Source of Need-Fulfilment.	Ten praise forms, through vocative style, for calling God, the source of any need-achievement. Only God is the source of achieving needs stated in the prayer.	1-14	قُوَّتِ الْإِحْسَانِ... اللَّهُمَّ يَا مُنْتَهَى
	2	Presenting Request, mixed with lament.	A preparation is presented through refuge to God in asking all needs.	15-17	إِلَى مُغْدِمٍ؟! ... اللَّهُمَّ وَ لِي
	3	Reasons for Fleeting to God.	Reasons are stated as for why prayer and fleeting are to God only.	18-19	مِنْ كُلِّ يَدٍ... فَقَصْدُكَ
	4	Content of Needs from God.	Needs are now presented before God who is the only One to make them fulfilled.	20-25	لَا تُرْذِنِي خَائِبًا... اللَّهُمَّ فَصَلِّ

The elements of these three texts can be displaced below where in each formula the caret sign indicates sequence:

Text One: Opening Address / Cry ^ Complaint against (Non) Material Blameworthy Acts ^ Refuge Seeking in this and the Other Life ^ Closing Petition;

Text Two: Opening Address ^ Self-Asking ^ Despair has no Space before God ^ Preparing for Requests from God ^ Confessing his Sins and Remorse ^ Content of his Petition; and

Text Three: Opening Praise Callings and Stating Source of Need-Fulfilment ^ Preparation for Request-Presenting ^ Reasons for Fleeting to God ^ Content of Needs from God.

5.2.1.2 Generic Analysis of Declarative Praise (i.e., Thanksgiving) Texts (Ṣaḥīfa Texts No. 1, 37, 51)

The other three texts express thanksgiving and praise to God as they are seen in the 'Muḥammadi Trust of Great Britain and Ireland' edition of the Ṣaḥīfa (ibid: 51-59, 259-265, 397-403), and الشيرازي (1425 A.H. vol.1:145-584, vol.4:347-386, vol.5:467-484):

A. Themes

The major themes of these texts are:

Text Four (Ṣaḥīfa Text 1): the "*praise and laudation of God*" (ibid.);

Text Five (Ṣaḥīfa Text 37): confessing any shortcoming that may appear in presenting thanks to God and showing certain commitment to God and His guidance; and

Text Six (Ṣaḥīfa Text 51): thanksgiving mixed with petition through both pleading and abasement to God.

B. Content Outline

The content outline of these texts looks like:

Text Four: 1. 'Praise and Laudation' are necessary when asking God 2. both the spoken and practical 'Praise and Laudation' are significant; 3. 'Praise and Laudation' are over the very different favours and blessings; and 4. 'Praise and Laudation' in this text would be competitive to other types practiced by, for instance, angels;

Text Five: 1. no limits and degrees are there to thank God by all humans; 2. it is only through God's beneficence that thanksgiving happens; and 3. there are infinite blessings and favours from God which appear in every part of humans' life, whether those who obey or disobey God; and

Text Six: 1. praise is to God for all His lavishness of blessings and favours; 2. in times of distress and troubles, only God can release those

who believe in Him; and 3. God is to be trusted in for He is the One to respond to callings of forgiveness.

C. Values

The values of 'field', 'tenor', and 'mode' are stated below.

1. Field

Text Four: the major goal of this text is to present and show praise to God for the divine infinite blessings and favours. The acts used to achieve these goals are: assigning praise and laudation for those major and minor blessings and favours, to exalt God is to praise Him for making believers do that, proving that through God only the believers are to receive His mercy, contrasting the present 'praise and laudation' to those of the angels and other humans;

Text Five: its major goal is to present and show the shortcomings in giving thanks to God that may result from humans, including the actor himself. Some acts are employed, including: stating complete inability to thank God as He deserves, showing God's generosity toward both the obedient and disobedient, and petitioning to God for guidance and success; and

Text Six: the major goals of this prayer text are to thank God in times of distress and welfare and to ask Him for any good thing. The acts employed are: praising God for His favours, showing God's generosity through all favours and blessings, petitioning and request/plea to God.

2. Tenor

Text Four: all the agents used by the actor in this text are in a self-lowering hierarchic relation to the superordinate God 'أنت Thou/ Thee', where the subordinate individuals 'نحن we' and its different cases (i.e., accusative, genitive, etc.) and reflections (i.e., الناظرين beholders' eyes and الواصفين describers' imaginations, etc.) are in under-control relation with their superordinate. The social distance is minimal since the degree of

familiarity is greater between the present/visible subordinate agent and the invisible superordinate agent;

Text Five: all the agents used, including the actor in this text, are in a self-lowering hierarchic relation to the superordinate God 'أنت Thou/Thee' or its different forms of addressee 'شكرك thanking Thee', are in under-control relation with their superordinate. The social distance is (more) minimal since the degree of familiarity is greater between the present/visible subordinate agent and the invisible superordinate agent; and

Text Six: the agent, the actor in this text, is in a self-lowering hierarchic relation to the superordinate God 'أنت Thou/Thee' or its different forms of addressee 'أحمدك I praise Thee', are in under-control relation with their superordinate. The social distance is minimal since the degree of familiarity is greater between the present/visible subordinate agent and the invisible superordinate agent.

3. Mode

All Three Texts: the language role is evidently constitutive. The channel used is phonic. The medium employed is written to be spoken. Accordingly, The CCs of these texts would look like:

1. Field

Text Four: Religion language: thanksgivings: praise and laudation: implied petition: showing grand self-lowering to God;

Text Five: Religion language: thanksgivings: praise and laudation: confessing lack of thanks: showing grand self-lowering to God: implied petition; blessing over His Prophet and his Household; and

Text Six: Religion language: thanksgivings: praise and laudation: pleading and abasement: showing grand self-lowering to God: implied petition.

2. Tenor for the three texts

Agents: hierarchic: the individual(s) subordinate and God superordinate;
social distance: minimal.

3. Mode for the three texts

Language role: constitutive; channel: phonic; medium: written to be spoken.

D. AGSs

The AGSs of these texts would include the elements which are actually present. The messages of this text are distributed over the following actual elements (ibid.) (see Appendix F):

Table (5.2): The Structural Elements (Stages) of Declarative Praise Şahıfa Texts.

Text	No.	Structural Elements (Stage)	Outline	Parts	From ... To
4	1	Praise and Laudation for Originating Creatures.	God is to be praised for He has originated all creatures and for assigning them their nourishments.	1-7	وَهُمْ يُسْأَلُونَ... الْحَمْدُ لِلَّهِ الْأَوَّلِ
	2	Praise and Laudation for Guidance to these Two Acts.	Since God has guided His servants, He deserves praise and laudation.	8-9	أَضَلُّ سَبِيلًا {...} وَالْحَمْدُ لِلَّهِ الَّذِي
	3	Praise and Laudation with Implied Petition.	Praise and laudation are also presented to God but with implied petition from the lowly agents.	10-16	الَّتِي لَا تَحُولُ... وَالْحَمْدُ لِلَّهِ عَلَى
	4	Praise and Laudation for the Blessings and Favours.	Infinite blessings and favours are always sent to creatures to the extent that they cannot pay God back.	17-21	بِرَأْفَتِهِ جَلْمًا... وَالْحَمْدُ لِلَّهِ الَّذِي
	5	Praise and Laudation for Repentance.	God waits all so that they know the way to real repentance.	22-24	مَنْ رَغِبَ إِلَيْهِ... وَالْحَمْدُ لِلَّهِ الَّذِي
	6	Competing Praise and Laudation coloured with Implied Petition.	Praise and Laudation belong to God, competing with those of His angels and other human beings.	25-30	إِنَّهُ وَلِيُّ حَمِيدٌ... وَالْحَمْدُ لِلَّهِ
	1	Confessing Lack of Thanks.	No one is definitely able to pay for God the least	1-6	فَجَازَيْنَهُمْ..., اللَّهُمَّ إِنَّ

5			degree of thanking.		
	2	Statement about God's Beneficence and Pardon.	God's Beneficence and Pardon spread over all humans, whether they are real servants or not.	7-9	عَنْ طَرِيقِكَ ضَالٌّ...بَلْ مَلَكْتُ
	3	Glorifying God's Generosity toward all Humans.	God is all-kind and most-generous to humans in accepting their gratitude.	10-11	يَقْصُرُ عَمَلُهُ عَنْهُ... فَسُبْحَانَكَ
	4	Showing God's Rewards for the Obedient.	The rewards of God are sent for those who obey Him.	12-13	لَا ! مَتَى ؟!...وَلَوْ كَافَات
	5	God's Acts against the Disobedient.	His mercy and pardon are also sent for those who disobey Him	14-15	يُدُونُ وَاجِبِكَ...هَذَا يَا إِلَهِي
	6	Closing Statement with Implied Petition.	God is asked for guidance, success, and mercy.	16	إِنَّكَ مَنَّانٌ كَرِيمٌ...فَمَنْ أَكْرَمُ
6	1	Praise to God for Benefaction.	Praise is to be directed to God for His benefaction and favours.	1-2	مَحْدُورِ الْقَضَاءِ...إِلَهِي أَحْمَدُكَ
	2	Thanksgiving.	Thanksgiving is presented to God for responding to pleading at all times.	3-5	لَدَيْ مَبْرُورٍ...إِلَهِي فَكَمْ
	3	Stating God's Favours Mixed with Implied Petition.	With implied petition, the payer focuses on stating and listing God's favours.	6-8	فَلَا تَرُدَّنِي خَائِبًا.... تَحْمَدُكَ نَفْسِي
	4	Trust in and Petition to God.	With full trust in God, the prayer presents petition.	9-12	عَمَّنْ لَأَذْ بِكَ...دَعْوَتُكَ
	5	Re-Request/Plea and Petition.	God's mercy and pardon are urgently needed.	13-14	أَرْحَمَ الرَّاجِمِينَ...إِلَهِي فَلَا

The elements of these three texts can be displaced below where in each formula the caret sign indicates sequence:

Text Four: Praise and Laudation for Originating Creatures ^ Praise and Laudation for Guidance to these Two Acts ^ Praise and Laudation with Implied Petition ^ Praise and Laudation for the Blessings and Favours ^ Praise and Laudation for Repentance ^ Competing Praise and Laudation coloured with Implied Petition;

Text Five: Confessing Lack of Thanks ^ Statement about God's Beneficence and Pardon ^ Glorifying God's Generosity toward all Humans ^ Showing God's Rewards for the Obedient ^ God's Acts against the Disobedient ^ Closing Statement with Implied Petition; and

Text Six: Praise to God for Benefaction ^ Thanksgiving ^ Stating God's Favours Mixed with Implied Petition ^ Trust in and Petition to God ^ Emphasis on Complaints.

5.2.2 Generic Structure Discussion

Six texts from two sub-genres are selected for analysis as far as their generic structure is concerned. Three texts from each sub-genre are taken to represent the data of analysis in this part. Two general default structures are stated earlier (see sec. 5.1), neither of them states exactly what default structure each sub-genre really has. The first one reads with three options, as stated below:

A: 1. praise to God; 2. glorifying God; and 3. request for God's response;

B: 1. praise to God; 2. glorifying God; 3. sending peace to the Prophet Muhammad and His Household; and 4. request for God's response.

C: 1. praise to God; 2. glorifying God; 3. sending peace to the Prophet Muhammad and his Household; 4. confessing one's guilt and sins; and 5. request for God's response.

The second option of generic structuring is of three steps:

1. Opening Address, including: a. request for forgiveness and asking for God's aspiration to thank Him, remember Him, etc.; b. displaying the situation of the devoted individual and his pushing need for God's help; c. showing human affliction, anguish, and pain; d. stating that no help is to be received except from God; e. confessing misdeeds and sins; and f. announcing the individual's readiness to stand in front of God, The Master.

2. Displaying the Means Used to Fulfil the Demands, including: a. God's graciousness, and mercy; b. divine affection towards and devotion to God and His Oneness; c. weakness and feebleness of the actor to endure punishment and torture; d. no refuge is only to God.

3. Requests from God: where not all requests are made at once, starting from the very lowest to the highest in significance.

However, in the direction towards showing the two strategies of 'other-raising' directed to God and 'self-lowering' the devoted individual is clear in each structure. The CCs and the GSPs are supposedly to uncover more of this issue in order to show the specific framework of the each sub-genre, hence the whole the genre.

5.2.2.1 CCs and GSPs

In line with the same steps of this part of the adopted framework, three generic aspects have been fully explained in each of these six texts: the content outline, the values of 'field', 'tenor', and 'mode', and the AGS. The optionality and iteration of some structural elements (i.e., stages) would be regarded in relation to all the analysed texts of the same CC. The obligatory presence of some structural elements (i.e., stages) is to be identified through the GSP.

As for 'lament' texts, Ṣaḥīfa texts '8', '12', and '13', have no optional structural elements (i.e., stages). Yet, they have some realisations to be explained below. The texts under 'thanksgiving', Ṣaḥīfa texts '1', '37', and '51' have four optional structural elements (i.e., stages): OA, PRS/BL+AES, PRS/BL+PT, and OT. The use of '+' refers to the fact that two otherwise-separate elements in the English data can merge together to form one structural element in the Arabic data.

Obligatory elements are noticed in the texts of the two sub-genres. 'Lament' texts have two obligatory elements: OA, PT, and the other two as strongly obligatory since they are present in two out of three texts: EL, and R/P. 'Thanksgiving' texts have two elements: PRS/BL, and R/P+PT.

Iteration is also observed in elements which are optional and elements which are taken as (strongly) obligatory, as well. 'Lament' text '8' has the strongly obligatory element EL iterated once, text '12' has the strongly obligatory elements EL and R/P iterated once for each, and text '13' has R/P iterated also one time. 'Thanksgiving' texts have the following elements iterated: PRS/BL in text '1' is iterated only one time, and in text '37' twice; R/P+PT is iterated twice in text '51'; PRS/BL+AES is iterated only one time in text '1'; and OA is iterated once in text '37'.

Six CCs are uncovered: three in the 'lament' texts and three in the 'thanksgiving' ones. These CCs have been stated earlier under each text when analysed. According to this, two GSPs are discovered, one for each sub-genre:

1. the first sub-genre; 'lament' texts:

$[OA \wedge PT \wedge EL . R/P .] ;$

and

2. the second sub-genre; 'thanksgiving' texts:

$[PRS/BL . \wedge R/P+PT .] \wedge [(OA .) . (OT) . (PRS/BL+AES .) .$

$(PRS/BL+PT)$

where:

' $\wedge$ ' indicates sequence of the structural elements, ' $.$ ' refers to more than one option in sequence, square brackets restrain the degree of optionality, round brackets refer to optionality, and the curved arrow refers to iteration.

5.2.2.2 The Realisation of Structural Elements (i.e., Stages)

Since there is no one-to-one correspondence between a structural element in these texts and a clause or a sentence or speech turn or one individual message or act, structural elements can be defined and realised only in terms of the job they have in their CCs.

When generically analysing the texts, the following 'sets of semantic properties' are noticed for the first sub-genre texts, depending on the contextual situations of the religion language displayed here:

1. OA:

- a. praying for refuge in God;
- b. reasons for why and why not to ask God;
- c. praise out of personal trust in God.

2. PT:

- a. affirmation of hope in refuge;
- b. asking for forgiveness and repentance;
- c. presenting needs to God.

3. EL:

- a. complaint against blameworthy acts;
- b. seeking refuge from remorse, evil ends, etc.;
- c. self-questioning of the fruit of repentance in the case of being guilty;
- d. confessing sins and remorse.

4. R/P:

- a. despair has no space in front of God;
- b. requesting God's intervention and help.

For the second sub-genre, the following set is noticed:

1. PRS/BL:

- a. showing praise to God for His originating creatures;
- b. showing praise to God for His guidance towards praise ;

- c. glorifying God 's generosity;
- d. showing God's rewards for the obedient;
- e. God's acts against those who disobey Him;
- f. praise is to God for His benefaction and favours.

2. R/P+PT:

- a. praise and laudation to God, in competition with those of the angels;
- b. God is the only source of asking for guidance, success, and mercy;
- c. stating God's favours mixed with implied petition;
- d. trusting God and presenting the prayer's petition to Him;
- e. re-requesting for God's mercy and urgent petition to Him.

3. OA:

- a. confessing great lack of thanks towards God;
- b. stating God's benefaction and pardon.

4. OT:

- a. presenting thanksgiving to God for His response at all times.

5. PRS/BL+AES:

- a. praise and laudation are sent to God out of personal experience of salvation;
- b. praise and laudation are raised to God, narrating personal experience to receive God's graciousness through repentance.

6. PRS/BL+PT:

- a. praise and laudation are raised to God, with further accounts of implied petition.

5.2.2.3 The Inherent Variation of Context

The flexibility of contexts is clear in the texts of the two sub-genres. The six CCs, and their GSPs, are not completely distinct, with no common implications that spread over them. On the contrary, the obligatory elements of 'R/P' and 'PT', for instance, in each sub-genre are common in presence and disposition and that is why there is a well-defined 'genre' of this type of texts. In addition, 'OA' is also present in the two sub-genres but with a change in its state: obligatory in the lament texts and optional in thanksgiving texts.

Another commonality is the way the CCs of the texts in each sub-genre are shaped. All the six texts share the values of 'tenor' (Agents: hierarchic: the individual(s) subordinate and LORD/God superordinate; social distance: minimal) and 'mode' (Language role: constitutive; channel: phonic; medium: written to be spoken). They also share part of the values of 'field' (Religion language: lament) or (Religion language: thanksgiving). In addition, another shared feature is that the structural element 'PR' is either clearly present as a stage by itself or implied within another.

Still another commonality is the sets of semantic properties employed to define and realise the structural elements. They shape the disposition and job of each structural element inside its CC.

5.2.2.4 Levels of Textual Identity

Only two levels, out of the four levels presented by Hasan (ibid: 110ff), are recognised at which analysed texts are, to some degree, identical. They are:

1. material uniqueness and verbal identity can be identified. Some parts of texts can be verbally 'identical' but still 'unique' because each has a materially different situation to express within the structural element or the whole text. Examples of EDUs are:

1. EDUs (#35+41+44+49) in text '1' [وَنَعُوذُ بِكَ];

2. EDU (#56) in text '1', EDU(#123) in text '2', EDU (#72) in text '3':
[اللَّهُمَّ صَلِّ عَلَى مُحَمَّدٍ وَآلِهِ];
3. EDUs (#43+59+113+124+130+160+186+) in text '4': [وَالْحَمْدُ لِلَّهِ];
4. EDUs (#71+76+92+102+106+194+208+213+223) in text '4' and
EDUs (#55+57) in text '6': [حَمْدًا]

These excerpts from their nominated texts are materially 'unique' specifically when the adjacent EDU(s), whether before or after, is/are taken into account. For illustration, the EDUs (#55) [حَمْدًا] in 'd' above, for instance, is followed by EDU (#56) [يَبْلُغُ الْوَفَاءَ وَ حَقِيقَةَ الشُّكْرِ] in text '16' and the second one (#57) is followed by (#58) [يَكُونُ مَبْلَغَ رِضَاكَ عَنِّي] in the same text. The agents of the acts are different, if compared to other occurrences in text '4'. That is, the subordinate individual represented by EDU (#54) [تَحْمَدُكَ نَفْسِي وَ لِسَانِي وَ عَقْلِي] in text '6' that immediately precedes EDUs (#55+57) is different from the superficially-hidden agent of [حَمْدًا] in text '4' represented by [وَالْحَمْدُ لِلَّهِ] which might be paraphrased as the individual himself or even a group of individuals raising their praise to God in terms of the plural 'we'. The same logic of material uniqueness in this example is also found in examples 'a', 'b', and 'c'.

2. structural uniqueness and verbal uniqueness can be represented by the fact that the six texts have different AGSs and, thus, have not exactly the same words and sentences. Therefore, structural uniqueness presupposes verbal uniqueness.

The other two levels of textual identity; i.e., 'verbal uniqueness and structural identity' and 'generic uniqueness and uniqueness of actual structure' are not shown in the texts under analysis because:

1. no two texts are structurally identical so that they are to be verbally unique, as stated by level '2' in Hasan (ibid); and
2. the pivotal factor in generic uniqueness, which is level '4' in Hasan (ibid), is the existence of obligatory elements that, in this case, the two sub-genres have similarly in both GSPs. If two texts are unique as far as

their genre is concerned, then they would be structurally unique and, then, their AGSs would be different.

5.2.3 Linguistic Structures Analysis

Analysis in this part is in terms of the three types of linguistic structures: text, discourse, and information.

5.2.3.1 Text Structure

Analysis in this part works upon the structure of the text. The first group of texts to be analysed are those under Petitionary Praise (i.e., Lament) (Şahīfa Texts No. 8, 12, 13).

5.2.3.1.1 Petitionary Praise (i.e., Lament) Texts

5.2.3.1.1.1 Text One (Şahīfa Text No. 8)

To analyse the structure of this text, consider the following table:

Table (5.3): The Text Structure of Text One (Şahīfa Text No. 8).

Stage No.	EDU No.	Linguistic Material of EDU	Syntactic (Dependency)	Relation	Realisation
1 EDUs (#1-30)	1	اللَّهُمَّ إِنِّي أَعُوذُ بِكَ ،[EDU#2]	Independent (a):2.nominal	sentence	Morphological and contextual finite
	2	مِنْ هَيْجَانِ الْجُرْصِ	Nominal(ised) (f): 7.prepositional phrase	construction	Noun phrase
	3	وَسُورَةِ الْغَضَبِ ،	Coordinate clause (b): 2 to #1-2		Omitted (morphological and contextual)finite
	4	وَعَلْبَةِ الْحَسَنِ ،	Coordinate clause (b): 2 to #3		Omitted (morphological and contextual) finite
	5	وَضَعْفِ الصَّبْرِ ،	Coordinate clause (b): 2 to #3-4		Omitted (morphological and contextual) finite
	6	وَقَلَّةِ الْقَنَاعَةِ ،	Coordinate clause (b): 2 to #5		Omitted (morphological and contextual) finite
	7	وَشَكَاةِ الْخُلُقِ ،	Coordinate clause (b): 2 to #5-6		Omitted (morphological and contextual) finite
	8	وَالْحَاحِ الشَّهْوَةِ ،	Coordinate clause (b): 2 to #7		Omitted (morphological and contextual) finite
	9	وَمَلَكَةِ الْحَمِيَّةِ	Coordinate clause (b): 2 to #8		Omitted (morphological and contextual) finite
	10	وَمُتَابَعَةِ الْهَوَى ،	Coordinate clause (b): 2 to #7-9		Omitted (morphological and contextual) finite

	11	وَمُخَالَفَةِ الْهُدَى ،	Coordinate clause (b): 2 to #10	Omitted (morphological and contextual) finite
	12	وَسِنَّةِ الْغَفْلَةِ ،	Coordinate clause (b): 2 to #10-11	Omitted (morphological and contextual) finite
	13	وَتَعَاظِي الْكُلْفَةِ ،	Coordinate clause (b): 2 to #12	Omitted (morphological and contextual) finite
	14	وَاِثَارَ الْبَاطِلِ عَلَى الْحَقِّ ،	Coordinate clause (b): 2 to #12-13	Omitted (morphological and contextual) finite
	15	وَالْإِصْرَارَ عَلَى الْمَائِمِ ،	Coordinate clause (b): 2 to #14	Omitted (morphological and contextual) finite
	16	وَاسْتِصْغَارَ الْمَعْصِيَةِ ،	Coordinate clause (b): 2 to #14-15	Omitted (morphological and contextual) finite
	17	وَاسْتِكْبَارَ الطَّاعَةِ .	Coordinate clause (b): 2 to #16	Omitted (morphological and contextual) finite
	18	وَمُبَاهَاةَ الْمُكْثَرِينَ ،	Coordinate clause (b): 2 to #16-17	Omitted (morphological and contextual) finite
	19	وَالْإِزْرَاءَ بِالْمَقْلِينَ ،	Coordinate clause (b): 2 to #18	Omitted (morphological and contextual) finite
	20	وَسُوءَ الْوَلَايَةِ [EDU#21]	Coordinate clause (b): 2 to #18-19	Omitted (morphological and contextual) finite
	21	لِمَنْ تَحْتَ أَثْنَيْنَا ،	Nominal(ised) construction(f): 7.prepositional phrase	Noun phrase
	22	وَتَرْكِ الشُّكْرِ [EDU#23]	Coordinate clause (b): 2 to #20-21	Omitted (morphological and contextual) finite
	23	لِمَنْ اصْطَنَعَ الْعَارِفَةَ [EDU#24]	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	24	عِنْدَنَا	Nominal(ised) construction (f): 3.adverb/adverbial	Non-finite
	25	أَوْ أَنْ تَغْضَضَ ظَالِمًا ،	Coordinate clause (b): 2 to #1-24	Omitted (morphological and contextual) finite
	26	أَوْ نَخْذُلَ مَلْهُوفًا ،	Coordinate clause (b): 2 to #25	Omitted (morphological and contextual) finite
	27	أَوْ تَرْوِمَ مَا لَيْسَ لَنَا [EDU#28]	Coordinate clause (b): 2 to #26	Morphological and contextual finite
	28	بِحَقِّ ،	Nominal(ised) construction (f): 7.prepositional phrase	Noun
	29	أَوْ نَقُولَ فِي الْعِلْمِ [EDU#30]	Coordinate clause (b): 2 to #27-28	Omitted (morphological and contextual) finite
	30	بِغَيْرِ عِلْمٍ .	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
2 EDUs (#31-43)	31	وَنَعُودُ بِكَ [EDU#32] ،	Coordinate clause (b): 2 to #1-30	Morphological and contextual finite
	32	أَنْ نَنْطَوِيَ عَلَى غِشٍّ أَحَدٍ	Subordinate clause (c): 4.complementiser (أَنْ) clause	Omitted (morphological and contextual) finite
	33	وَأَنْ نَعْجِبَ بِأَعْمَالِنَا ،	Coordinate clause (b): 2 to	Omitted (morphological

			#31-32	and contextual) finite
	34	و نَمُدَّ فِي أَمَانِنَا .	Coordinate clause (b): 2 to #33	Omitted (morphological and contextual) finite
	35	و نَعُوذُ بِكَ [EDU#36] ،	Coordinate clause (b): 2 to #31-34	Morphological and contextual finite
	36	مِنْ سُوءِ السَّرِيرَةِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	37	و اخْتِفَارِ الصَّغِيرَةِ ،	Coordinate clause (b): 2 to #35-36	Omitted (morphological and contextual) finite
	38	وَأَنْ يَسْتَحُوذَ عَلَيْنَا الشَّيْطَانُ ،	Coordinate clause (b): 2 to #37	Omitted (morphological and contextual) finite
	39	أَوْ يَكُفَّنَا الزَّمَانُ ،	Coordinate clause (b): 2 to #38	Omitted (morphological and contextual) finite
	40	أَوْ يَهْضَمَنَا السُّلْطَانُ	Coordinate clause (b): 2 to #40	Morphological and contextual finite
	41	و نَعُوذُ بِكَ [EDU#42] ،	Coordinate clause (b): 2 to #35-40	Morphological and contextual finite
	42	مِنْ تَنَاوُلِ الْإِسْرَافِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	43	و مِنْ فَقْدَانِ الْكَفَافِ .	Coordinate clause (b): 2 to #41-42	Omitted (morphological and contextual) finite
3 EDUs (#44-55)	44	و نَعُوذُ بِكَ [EDU#45] ،	Coordinate clause (b): 2 to #31-43	Morphological and contextual finite
	45	مِنْ شَمَاتَةِ الْأَعْدَاءِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	46	و مِنْ الْفَقْرِ إِلَى الْأَكْفَاءِ ،	Coordinate clause (b): 2 to #44-45	Omitted (morphological and contextual) finite
	47	و مِنْ مَعِيشَةٍ فِي شِدَّةٍ ،	Coordinate clause (b): 2 to #46	Omitted (morphological and contextual) finite
	48	و مَيَّةٍ عَلَى غَيْرِ عُدَّةٍ .	Coordinate clause (b): 2 to #47	Omitted (morphological and contextual) finite
	49	و نَعُوذُ بِكَ [EDU#50] ،	Coordinate clause (b): 2 to #44-48	Morphological and contextual finite
	50	مِنْ الْحَسْرَةِ الْعَظْمَى .	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	51	و الْمُصِيبَةِ الْكُبْرَى ،	Coordinate clause (b): 2 to #49-50	Omitted (morphological and contextual) finite
	52	و أَشَقَى الشَّقَاءِ ،	Coordinate clause (b): 2 to #51	Omitted (morphological and contextual) finite
	53	و سُوءِ الْمَأْبِ ،	Coordinate clause (b): 2 to #52	Omitted (morphological and contextual) finite
	54	و جِرْمَانِ الثُّوَابِ ،	Coordinate clause (b): 2 to #53	Omitted (morphological and contextual) finite
	55	و خُلُولِ الْعِقَابِ .	Coordinate clause (b): 2 to #54	Omitted (morphological and contextual) finite

4 EDUs (#56-60)	56	اللَّهُمَّ صَلِّ عَلَى مُحَمَّدٍ وَآلِهِ ،	Independent sentence (a): 2.nominal	Morphological and contextual finite
	57	وَ اَعْدَنِي [EDU#58-59] وَ جَمِيعَ الْمُؤْمِنِينَ وَ الْمُؤْمِنَاتِ ،	Coordinate clause (b): 2 to #56	Morphological and contextual finite
	58	مِنْ كُلِّ ذَلِكَ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	59	بِرَحْمَتِكَ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	60	يَا اَرْحَمَ الرَّاحِمِينَ .	Nominal(ised) construction (f): 8.vocative	Contextual finite

The total number of EDUs is (60) and is distributed over the four stages as follows:

1. '44' EDUs have been textualised as coordinate construction and clause (level b2. syndetic);
2. Next in distribution is level (f 7) which has '11' EDUs textualised as prepositional phrase;
3. '2' EDUs are textualised as independent nominal sentence (i.e. level a 2);
4. '1' EDU is textualised as level (c 4. complementisers (اَنَّ , اَنْ) clauses);
5. '1' EDU is textualised as nominal(ised) construction (f 3.adverb/adverbial);
6. '1' EDU is textualised as level (f 8), i.e. vocative construction.

It is noticed that no EDUs act as whole independent sentences intersententially linked to other EDUs, making reasonable sense by themselves with no subordinate EDUs attached.

Syntactically coordinated EDUs which are intrasententially distributed in the text are '39' cases in number. Syntactically subordinated EDUs intrasententially distributed are '14' cases. Whether coordinated or subordinated, EDUs are heavily used in intrasentential positions in this

text. Syntactically coordinated EDUs which are intersententially distributed in the text are '5' cases, EDUs (#32+36+42+45+50).

The different levels of the deverbalisation scale used in the analysis can be grouped due to the realisation through morphological and/or contextual finiteness. Accordingly, '39' EDUs in this text has an omitted morphological and contextual finite forms, most of them are positioned intrasententially. '8' EDUs are realised by morphological and contextual forms. '11' cases are realised by nouns, pronouns, and noun phrases. Contextual finite forms and non-finite are also noticed; '1' case for each.

5.2.3.1.1.2 Text Two (Ṣaḥīfa Text No.12)

The structure of this text is stated in the following table:

Table (5.4): The Text Structure of Text Two (Ṣaḥīfa Text No. 12).

Stage No.	EDU No.	Linguistic Material of EDU	Syntactic Relation (Dependency)	Realisation
1 EDUs (#1-15)	1	اللَّهُمَّ إِنَّهُ يَحْجُبُنِي عَنْ مَسَائِلِكَ خِلَالَ ثَلَاثٍ،	Independent sentence (a): 2.nominal	Morphological and contextual finite
	2	وَتَحْدُونِي عَلَيْهَا خَلَّةٌ وَاحِدَةٌ.	Coordinate clause (b): 2 to #1	Morphological and contextual finite
	3	يَحْجُبُنِي أَمْرٌ أَمَرْتُ بِهِ	Independent sentence (a): 1.verbal	Morphological and contextual finite
	4	فَأَبْطَأْتُ عَنْهُ،	Coordinate clause (b): 2 to #3	Contextual finite
	5	وَنَهَيْتُ نَهَيْتَنِي عَنْهُ	Coordinate clause (b): 2 to #3-4	Contextual finite
	6	فَأَسْرَعْتُ إِلَيْهِ،	Coordinate clause (b): 2 to #5	Contextual finite
	7	وَنِعْمَةٌ أَنْعَمْتَ بِهَا [EDU#8]	Coordinate clause (b): 2 to #5-6	Contextual finite
	8	عَلَيَّ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	9	فَقَصَّرْتُ فِي شُكْرِهَا.	Coordinate clause (b): 2 to #7	Contextual finite
	10	وَيَحْدُونِي عَلَى مَسَائِلِكَ تَقْضُكَ عَلَى مَنْ أَقْبَلَ [EDU#11] إِلَيْكَ،	Independent sentence (a): 1.verbal	Morphological and contextual finite
	11	بِوَجْهِهِ	Nominal(ised)construction (f): 7.prepositional phrase	Noun phrase
	12	وَوَقَدَ [EDU#13] إِلَيْكَ،	Coordinate clause (b): 2 to #10-11	Contextual finite

	13	يُحْسِنُ ظَنَّهُ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	14	إِذْ جَمِيعُ إِحْسَانِكَ تَقْصُلُ ،	Nominal(ised) construction (f): 3.adverb/adverbial	Non-finite
	15	وَ إِذْ كُلُّ نِعْمِكَ ابْتِدَاءٌ .	Nominal(ised) construction (f):3.adverb/adverbial, coordinate to #14	Non-finite
2 EDUs (#16-39)	16	فَهِيَ أَنَا ذَا ، يَا إِلَهِي ،	Independent sentence (a): 2.nominal	Contextual finite
	17	وَاقِفٌ بَبَابِ عِرْكَ	Nominal(ised) construction (f): 5.nominal argument	Morphological and contextual finite
	18	وَقُوفُ الْمُتَسَلِّمِ الذَّلِيلِ ،	Subordinate clause (c): 1.circumstantial qualifier to #17	Contextual finite
	19	وَ سَأَلْتُكَ [EDU#20]	Nominal(ised) construction (f): 5.nominal argument, coordinate to #17-18	Morphological and contextual finite
	20	عَلَى الْخِيَاءِ مِنِّي	Subordinate clause (c): 1.circumstantial qualifier to #19	Contextual finite
	21	سُؤَالَ الْبَائِسِ الْمُعِيلِ ،	Nominal(ised) construction (f): 4.dependent elements	Contextual finite
	22	مُقَرَّرٌ [EDU#23]بَائِي لَمْ أَسْتَسْلِمَ [EDU#24-25] ،	Nominal(ised) construction (f): 5.nominal argument	Morphological and contextual finite
	23	لَكَ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	24	وَقَفْتُ إِحْسَانِكَ	Nominal(ised) construction (f): 3.adverb/adverbial	Non-finite
	25	إِلَّا بِالْإِفْلَاحِ عَنْ عَصِيَانِكَ	Exceptive construction (g)	Contextual finite
	26	وَ لَمْ أَخْلُ [EDU#27] مِنْ أَمْتِنَاتِكَ .	Coordinate clause (b): 2 to #22-25	Contextual finite
	27	فِي الْحَالَاتِ كُلِّهَا	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	28	فَهَلْ يَنْفَعُنِي، يَا إِلَهِي، إِفْرَارِي [EDU#29-30]؟	Independent sentence (a): 3. interrogative	Morphological and contextual finite
	29	عِنْدَكَ	Nominal(ised) construction (f): 3.adverb/adverbial	Non-finite
	30	بِسُوءِ مَا اكْتَسَبْتُ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	31	وَ هَلْ يُنْجِينِي [EDU#32] اعْتِرَافِي [EDU#33-34] ؟	Independent sentence (a): 3.interrogative, coordinate to #28-30	Morphological and contextual finite
	32	مِنْكَ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	33	لَكَ	Nominal(ised) construction	Pronoun

			(f): 7.prepositional phrase	
	34	بَقِيح مَا ارْتَكَبْتُ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	35	أَمْ أُوجِبْتُ [EDU#36-37] سُخْطُكَ؟	Independent sentence (a): 3.interrogative, coordinate to #31-34	Morphological and contextual finite
	36	لِي	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	37	فِي مَقَامِي هَذَا	Nominal(ised) construction (f):3: adverb/adverbial	Contextual finite
	38	أَمْ لَزِمَنِي [EDU#39] مَقْتُكَ؟	Independent Sentence (a): 3.interrogative, coordinate to #35-37	Morphological and contextual finite
	39	فِي وَقْتِ دُعَايَ	(f): 3. adverb/adverbial	Contextual finite
3 EDUs (#40-63)	40	سُبْحَانَكَ ، لَا إِلَهَ إِلَّا أَنْتَ	Independent sentence (a): 2.nominal	Contextual finite
	41	وَقَدْ فَتَحْتَ [EDU#42] بَابَ التَّوْبَةِ [EDU#43]،	Coordinate clause (b): 2 to #40	Contextual finite
	42	لِي	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	43	إِلَيْكَ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	44	بَلْ أَقُولُ مَقَالَ الْعَبْدِ الدَّلِيلِ [EDU#45-46] .	Coordinate clause (b): 2 to #40-43	Morphological and contextual finite
	45	الظَّالِمِ لِنَفْسِهِ	Nominal(ised) construction (f): 5.nominal argument	Morphological and contextual finite
	46	الْمُسْتَخَفِّ بِخُرْمَةِ رَبِّهِ	Nominal(ised) construction (f): 5.nominal argument	Morphological and contextual finite
	47	الَّذِي عَظُمَتْ ذُنُوبُهُ	Relative clause (d) to ' الْعَبْدِ ' in #44	Contextual finite
	48	فَجَلْتُ ،	Coordinate clause (b): 2 to #47	Contextual finite
	49	وَأَذْبَرْتُ أَيْامَهُ	Coordinate clause (b): 2 to #47-48	Contextual finite
	50	فَوَلْتُ	Coordinate clause (b): 2 to #49	Contextual finite
	51	حَتَّى إِذَا رَأَى مُدَّةَ الْعَمَلِ قَدْ انْقَضَتْ ،	Conditional clause (e): the condition	Contextual finite
	52	وَعَايَةَ الْعُمْرِ قَدْ انْتَهَتْ ،	Coordinate clause (b): 2 to #51	Omitted (contextual) finite
	53	وَأَيُّقِنَ أَنَّهُ لَا مُحِيمَ [EDU#54] مِنْكَ ،	Coordinate clause (b): 2 to #51-52	Contextual finite
	54	لَهُ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	55	وَلَا مَهْرَبَ [EDU#56] عَنْكَ ،	Coordinate clause (b): 2 to	Omitted (contextual)

			#53-54	finite
	56	لَهُ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	57	تَلَقَّكَ بِالْإِنَابَةِ ،	Conditional clause (e): the result	Contextual finite
	58	وَأَخْلَصَ [EDU#59] التَّوْبَةَ ،	Coordinate clause (b): 2 to #57	Contextual finite
	59	لَكَ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	60	فَقَامَ إِلَيْكَ [EDU#61] ،	Independent sentence (a): 1.verbal to	Contextual finite
	61	بِقَلْبٍ طَاهِرٍ نَقِيٍّ.	Subordinate clause (c): 1.circumstantial qualifier to #60	Contextual finite
	62	ثُمَّ دَعَاكَ [EDU#62] .	Coordinate clause (b): 2 to #61-62	Contextual finite
	63	بِصَوْتٍ خَائِلٍ خَفِيٍّ	Subordinate clause (c): 1.circumstantial qualifier to #62	Contextual finite
4 EDUs (#64-89)	64	قَدْ تَطَّأَ [EDU#65]	Independent sentence (a): 1.verbal	Morphological and contextual finite
	65	لَكَ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	66	فَأَنْتَحَى ،	Coordinate clause (b): 2 to #64-65	Morphological and contextual finite
	67	وَنَكَسَ رَأْسَهُ	Coordinate clause (b): 2 to #64-66	Morphological and contextual finite
	68	فَأَنْتَنَى ،	Coordinate clause (b): 2 to #67	Morphological and contextual finite
	69	قَدْ أَرَعَشْتُ خَشْيَتَهُ رَجُلِيهِ ،	Coordinate clause (b): 1 to #64-68	Morphological and contextual finite
	70	وَ عَرَفْتُ دُمُوعَهُ خَدَّيْهِ ،	Coordinate clause (b): 2 to #69	Morphological and contextual finite
	71	يَدْعُوكَ يَا أَرْحَمَ الرَّاحِمِينَ ،	Independent sentence (a): 1.verbal	Morphological and contextual finite
	72	وَيَا أَرْحَمَ مَنْ انْتَابَهُ الْمُسْتَزْجَمُونَ ،	Coordinate clause (b): 2 to #71	Omitted (morphological and contextual) finite
	73	وَيَا أَعْطَفَ مَنْ أَطَافَ بِهِ الْمُسْتَغْفِرُونَ ،	Coordinate clause (b): 2 to #72	Omitted (morphological and contextual) finite
	74	وَيَا مَنْ عَفُوهُ أَكْثَرُ مِنْ نِقْمَتِهِ ،	Coordinate clause (b): 2 to #71-73	Omitted (morphological and contextual) finite
	75	وَيَا مَنْ رِضَاةٌ أَوْفَرُ مِنْ سَخَطِهِ .	Coordinate clause (b): 2 to #74	Omitted (morphological and contextual) finite
	76	وَيَا مَنْ تَحَمَّدَ إِلَى خَلْقِهِ [EDU#77] ،	Coordinate clause (b): 2 to #71-75	Omitted (morphological and contextual) finite

	77	بِحُسْنِ التَّجَاوُزِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	78	وَ يَا مَنْ عَوَّدَ عِبَادَهُ قُبُولَ الْإِنَابَةِ ،	Coordinate clause (b): 2 to #76-77	Omitted (morphological and contextual) finite
	79	وَ يَا مَنْ اسْتَصْلَحَ فَاسِيدَهُمْ [EDU#80]	Coordinate clause (b): 2 to #78	Omitted (morphological and contextual) finite
	80	بِالنُّوبَةِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun
	81	وَ يَا مَنْ رَضِيَ [EDU#82] بِالنَّيْسِيرِ ،	Coordinate clause (b): 2 to #76-80	Omitted (morphological and contextual) finite
	82	مِنْ فَعْلِهِمْ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	83	وَ مَنْ كَافَى قَلِيلُهُمْ [EDU#84] ،	Coordinate clause (b): 2 to #81-82	Omitted (morphological and contextual) finite
	84	بِالْكَثِيرِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	85	وَ يَا مَنْ ضَمِنَ [EDU#86] إِجَابَةَ الدُّعَاءِ ،	Coordinate clause (b): 2 to #81-84	Omitted (morphological and contextual) finite
	86	لَهُمْ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	87	وَيَا مَنْ وَعَدَهُمْ [EDU#88-89] حُسْنَ الْجَزَاءِ .	Coordinate clause (b): 2 to #85-86	Omitted (morphological and contextual) finite
	88	عَلَى نَفْسِهِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	89	بِتَقْضِيهِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
5 EDUs (#90- 122)	90	مَا أَنَا بِأَغْصَى مِنْ عَصَاكَ	Independent sentence (a): 2.nominal	Contextual finite
	91	فَقَقَّرْتُ لَهُ ،	Coordinate clause (b): 2 to #90	Contextual finite
	92	وَ مَا أَنَا بِالْوَمِ مِنْ اعْتَدَر [EDU#93]	Coordinate clause (b): 2 to #90-91	Contextual finite
	93	إِلَيْكَ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	94	فَقِيلَتْ مِنْهُ ،	Coordinate clause (b): 2 to #92-93	Contextual finite
	95	وَ مَا أَنَا بِأَظْلَمَ مِنْ تَابِ [EDU#96]	Coordinate clause (b): 2 to #92-94	Contextual finite
	96	إِلَيْكَ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	97	فَعُدَّتْ عَلَيْهِ .	Coordinate clause (b): 2 to #95-96	Contextual finite
	98	أَتُوبُ إِلَيْكَ	Independent sentence (a): 1.verbal	Morphological and contextual finite
	99	فِي مَقَامِي هَذَا	(f): 3.adverb/adverbial	Contextual finite

100	تَوْبَةٌ نَادِمٍ [EDU#101]،	Subordinate clause (c): 1.circumstantial qualifier to #98-99	Contextual finite
101	عَلَى مَا فَرَطَ مِنْهُ	Nominal(ised) constructions (f): 7.prepositional phrase	Noun phrase
102	مُشْفِقٍ [EDU#103]،	Subordinate clause (c): 1.circumstantial qualifier to #100-101 or Coordinate clause (b): 1 to #100-101	Contextual finite Omitted (contextual) finite
103	مِمَّا اجْتَمَعَ عَلَيْهِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
104	خَالِصَ الْحَيَاءِ [EDU#105] ،	Subordinate clause (c): 1.circumstantial qualifier to #100-101or Coordinate clause (b): 1 to #102-103	Contextual finite Omitted (contextual) finite
105	مِمَّا وَقَعَ فِيهِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
106	عَالِمٍ بِأَنَّ الْعَفْوَ [EDU#107] لَا يَتَعَاطَمُكَ ،	Subordinate clause (c): 1.circumstantial qualifier to #100-105 or Coordinate clause (b):1 to #100-105	Contextual finite Omitted (contextual) finite
107	عَنِ الذَّنْبِ الْعَظِيمِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
108	وَ أَنَّ النَّجَازَ [EDU#109] لَا يَسْتَصْبِعُكَ ،	Coordinate clause (b): 2 to #106-107	Omitted (contextual) finite
109	عَنِ الْإِثْمِ الْجَلِيلِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
110	وَأَنَّ اخْتِمَالَ الْجَنَائِتِ الْفَاحِشَةِ لَا يَتَكَادُكَ ،	Coordinate clause (b): 2 to #108-109	Omitted (contextual) finite
111	وَ أَنَّ أَحَبَّ عِبَادِكَ [EDU#112] مَنْ تَرَكَ الْإِسْتِكْبَارَ [EDU#113] ،	Coordinate clause (b): 2 to #106-110	Omitted (contextual) finite
112	إِلَيْكَ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
113	عَلَيْكَ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
114	وَجَانِبَ الْإِصْرَارِ ،	Coordinate clause (b): 2 to #111-113	Omitted (contextual) finite
115	وَلَزِمَ الْإِسْتِعْفَارَ .	Coordinate clause (b): 2 to #114	Omitted (contextual) finite
116	وَ أَنَا أَبْرَأُ [EDU#117] مِنْ أَنْ أَسْتَكْبَرَ ،	Coordinate clause (b): 2 to #98-115	Morphological and contextual finite

	117	إِلَيْكَ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	118	وَ أَعُوذُ بِكَ مِنْ أَنْ أَصِيرَ .	Coordinate clause (b): 2 to #116-117	Morphological and contextual finite
	119	وَ اسْتَغْفِرُكَ [EDU#1120] ،	Coordinate clause (b): 2 to #116-118	Morphological and contextual finite
	120	لِمَا قَصَّرْتُ فِيهِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	121	وَ اسْتَغْفِرُ بِكَ [EDU#]	Coordinate clause (b): 2 to #119-120	Morphological and contextual finite
	122	عَلَى مَا عَجَزْتُ عَنْهُ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
6 EDUs (#123- 152)	123	اللَّهُمَّ صَلِّ عَلَى مُحَمَّدٍ وَ آلِهِ ،	Independent sentence (a): 2.nominal	Morphological and contextual finite
	124	وَ هَبْ [EDU#125] مَا يَجِبُ [EDU#126] لَكَ ،	Coordinate clause (b): 2 to #123	Morphological and contextual finite
	125	لِي	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	126	عَلَيَّ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	127	وَ عَافِنِي [EDU#128] ،	Coordinate clause (b): 2 to #124-126	Morphological and contextual finite
	128	مِمَّا اسْتَغْنِي عَنْكَ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	129	وَ أَجْزِنِي [EDU#130] ،	Coordinate clause (b): 2 to #127-128	Morphological and contextual finite
	130	مِمَّا يَخَافُهُ أَهْلُ الْإِسَاءَةِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	131	فَإِنَّكَ مَلِيٌّ بِالْعَفْوِ ،	Independent sentence (a): 2.nominal	Contextual finite
	132	مَرْجُو [EDU#133] ،	Coordinate clause (b):1 to #131	Omitted (contextual) finite
	133	لِلْمَغْفِرَةِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	134	مَعْرُوفٌ بِالتَّجَاوُزِ ،	Coordinate clause (b):1 to #132-133	Omitted (contextual) finite
	135	لَيْسَ لِحَاجَتِي مَطْلَبٌ [EDU#136] ،	Independent sentence (a): 2.nominal	Contextual finite
	136	سِوَاكَ	Exceptive construction (g)	Non-finite
	137	وَ لَا لِذَنْبِي غَافِرٌ [EDU#138] ، حَاشَاكَ ،	Coordinate clause (b): 2 to #135-136	Contextual finite
	138	غَيْرُكَ	Exceptive construction (g)	Non-finite
	139	وَ لَا أَخَافُ [EDU#140-141] ،	Coordinate clause (b): 2 to #137-138	Morphological and contextual finite
	140	عَلَى نَفْسِي	Nominal(ised) construction	Noun phrase

		(f): 7.prepositional phrase	
141	إِلَّا إِيَّاكَ	Exceptive construction (g)	Non-finite
142	إِنَّكَ أَهْلُ النَّقْوَى وَ أَهْلُ الْمَغْفِرَةِ .	Independent sentence (a): 2.nominal	Contextual finite
143	صَلِّ عَلَى مُحَمَّدٍ وَ آلِ مُحَمَّدٍ ،	Independent sentence (a): 1.verbal	Morphological and contextual finite
144	وَ أَقْضِ حَاجَتِي ،	Coordinate clause (b): 2 to #143	Morphological and contextual finite
145	وَ أَنْجِ طَلِبَتِي ،	Coordinate clause (b): 2 to #144	Morphological and contextual finite
146	وَ اغْفِرْ ذَنْبِي ،	Coordinate clause (b): 2 to #145	Morphological and contextual finite
147	وَ أَمِنْ خَوْفِ نَفْسِي ،	Coordinate clause (b): 2 to #146	Morphological and contextual finite
148	إِنَّكَ [EDU#149]قَدِيرٌ ،	Independent sentence (a): 2.nominal	Contextual finite
149	عَلَى كُلِّ شَيْءٍ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
150	وَ ذَلِكَ [EDU#151] يَسِيرٌ ،	Coordinate clause (b): 2 to #148-149	Contextual finite
151	عَلَيْكَ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
152	أَمِينَ رَبِّ الْعَالَمِينَ .	Independent sentence (a): 2.nominal	Contextual finite

The total number of EDUs is (152) and is distributed over the six stages as follows:

1. '62' EDUs have been textualised as coordinate construction and clause (level b2. syndetic);
2. Next in distribution is level (f 7) which has '43' EDUs textualised as prepositional phrase;
3. '10' EDUs are textualised as independent nominal sentence (i.e. level a 2);
- 4.'6' EDUs are textualised as nominal(ised) construction (f 3.adveb/adverbial);
5. '7' EDUs are textualised as independent verbal sentence (a 1);

- 6.'5' EDUs are textualised as level (c 1), circumstantial qualifiers;
- 7.'4' EDUs are textualised as level (g), exceptive construction;
- 8.'4' EDUs are under nominal(ised) construction (f 5), nominal argument;
- 9. '3' EDUs have been textualised as coordinate construction and clause (level b 1. asyndetic);
- 10.'1' EDU is textualised as independent interrogative sentence (a 3);
- 11.'1' EDU is textualised as level (d), relative clause;
- 12.'1' EDU is under nominal(ised) construction (f 4); dependent element;
- 13.'1' EDU is under conditional clause (e), the condition;
- 14.'1' EDU is under conditional clause (e), the result.
- 15.'3' ambiguous cases.

It is noticed that '2'EDUs act as whole independent sentences intersententially linked to other EDUs, making reasonable sense by themselves with no subordinate EDUs attached. They are EDUs (#142+152).

Syntactically coordinated EDUs which are intrasententially distributed in the text are '62' cases in number. Syntactically subordinated EDUs intrasententially distributed are '68' cases. Whether coordinated or subordinated, EDUs are heavily used in intrasentential positions in this text. Syntactically coordinated EDUs which are intersententially distributed in the text are '4' cases, EDUs (#10+31+35+38). Only '3' cases are taken as ambiguous: EDUs (#102+104+106).

The different levels of the deverbalisation scale used in the analysis can be shown in the realisation through morphological and/or contextual finiteness. Accordingly, '43' cases are realised by nouns, pronouns, and noun phrases. Contextual finite forms has '43' EDUs. '36' EDUs are realised by morphological and contextual forms. '11' EDUs in this text

have omitted morphological and contextual finite forms; most of them are positioned intrasententially. '9' cases are for omitted contextual finite forms. Non-finite has '7' cases. '3' ambiguous cases between either contextual finite forms or omitted contextual finite forms.

5.2.3.1.1.3 Text Three (Şahîfa Text No. 13)

To analyse the structure of this text, consider the following table:

Table (5.5): The Text Structure of Text Three (Şahîfa Text No.13).

Stage No.	EDU No.	Linguistic Material of EDU	Syntactic Relation (Dependency)	Realisation
1 EDUs (#1-31)	1	اللَّهُمَّ يَا مُنْتَهَى مَطْلَبِ الْحَاجَاتِ ,	Nominal(ised) construction (f):8.vocative	Contextual finite
	2	و يَا مَنْ عِنْدَهُ نَيْلُ الطَّلِبَاتِ ,	Nominal(ised) construction (f):8.vocative,coordinate to #1	Contextual finite
	3	و يَا مَنْ لَا يَبِيعُ نِعْمَهُ ,[EDU#4]	Nominal(ised) construction (f):8.vocative, coordinate to #1-2	Contextual finite
	4	بِالْإِيمَانِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	5	و يَا مَنْ لَا يُكَدِّرُ عَطَايَاهُ ,[EDU#6]	Nominal(ised) construction (f): 8.vocative, coordinate to #3-4	Contextual finite
	6	بِالْإِيمَانِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	7	و يَا مَنْ يُسْتَعْنَى بِهِ وَ لَا يُسْتَعْنَى عَنْهُ ,	Nominal(ised) construction (f):8.vocative, coordinate to #3-6	Contextual finite
	8	و يَا مَنْ يُرْغَبُ إِلَيْهِ وَ لَا يُرْغَبُ عَنْهُ ,	Nominal(ised) construction (f):8.vocative, coordinate to #7	Contextual finite
	9	و يَا مَنْ لَا تُفْنِي خَزَائِنُهُ الْمَسَائِلَ ,	Nominal(ised) construction (f):8.vocative, coordinate to #7-8	Contextual finite
	10	و يَا مَنْ لَا تُبَدِّلُ حُكْمَتَهُ الْوَسَائِلَ ,	Nominal(ised) construction (f):8.vocative, coordinate to #9	Contextual finite
	11	و يَا مَنْ لَا تَنْقُطِعُ عَنْهُ حَوَائِجُ الْمُحْتَاجِينَ ,	Nominal(ised) construction (f):8.vocative, coordinate to #9-10	Contextual finite
	12	و يَا مَنْ لَا يُعْنِيهِ دُعَاءُ الدَّاعِينَ ,	Nominal(ised) construction (f):8.vocative, coordinate to	Contextual finite

		#11	
13	تَمَدَّحْتَ بِالْغَنَاءِ عَنْ خَلْقِكَ	Independent sentence (a): 1.verbal	Morphological and contextual finite
14	وَ أَنْتَ أَهْلُ الْغِنَى [EDU#15]	Coordinate clause (b): 2 to #13	Contextual finite
15	عَنْهُمْ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
16	وَ تَسَبَّيْتَهُمْ إِلَى الْفَقْرِ	Coordinate clause (b): 2 to #1-15	Morphological and contextual finite
17	وَ هُمْ أَهْلُ الْفَقْرِ [EDU#18]	Coordinate clause (b): 2 to #16	Contextual finite
18	إِلَيْكَ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
19	فَمَنْ حَاوَلَ سَدَّ خَلْتِهِ [EDU#20]	Conditional clause (e): the condition	Morphological and contextual finite
20	مِنْ عِنْدِكَ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
21	وَ رَامَ صَرَفَ الْفَقْرِ عَنْ نَفْسِهِ [EDU#22]	conditional clause (e): the condition, coordinate to #19- 20	Morphological and contextual finite
22	بِكَ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
23	فَقَدْ طَلَبَ حَاجَتَهُ فِي مَطْلَبِهَا ،	Conditional clause (e): the result	Morphological and contextual finite
24	وَ أَتَى طَلِبَتَهُ مِنْ وَجْهِهَا ,	conditional clause (e): the result, coordinate to #23	Morphological and contextual finite
25	وَ مَنْ تَوَجَّهَ بِحَاجَتِهِ إِلَى أَحَدٍ [EDU#26]	Conditional clause (e): the condition, coordinate to #19- 24	Morphological and contextual finite
26	مِنْ خَلْقِكَ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
27	أَوْ جَعَلَهُ سَبَبَ نُجْحِهَا [EDU#28]	Conditional clause (e): the condition, coordinate to #25- 26	Morphological and contextual finite
28	دُونِكَ	Nominal(ised) construction (f): 3.adverb/adverbial	Non-finite
29	فَقَدْ تَعَرَّضَ لِلْجُرْمَانِ ،	Conditional clause (e): the result	Morphological and contextual finite
30	وَ اسْتَحَقَّ [EDU#31] قَوْتَ الْإِحْسَانِ .	Conditional clause (e): the result, coordinate to #29	Morphological and contextual finite
31	مِنْ عِنْدِكَ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
32	اللَّهُمَّ وَ لِي [EDU#33] حَاجَةٌ	Independent sentence (a): 2.nominal	Contextual finite
33	إِلَيْكَ	Nominal(ised) construction	Pronoun

2	EDUs (#31-52)			(f): 7.prepositional phrase	
		34	فَدَقَصَرَ عَنْهَا جُهْدِي ،	Subordinate clause (c): 1.indefinite adjectival to 'حَاجَةٌ ' in #32-33	Morphological and contextual finite
		35	وَ تَقَطَّعَتْ دُونَهَا جِيلِي ،	Coordinate clause (b): 2 to #34	Morphological and contextual finite
		36	وَ سَوَّلْتُ [EDU#37]نَفْسِي رَفَعَهَا [EDU#38]،	Coordinate clause (b): 2 to #34-35	Morphological and contextual finite
		37	لِي	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
		38	إِلَى مَنْ يَرْفَعُ حَوَاجَتَهُ إِلَيْكَ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
		39	وَ لَا يَسْتَعْنِي [EDU#40]عَنكَ ،	Coordinate clause (b): 2 to #36-38	Morphological and contextual finite
		40	فِي طَلِبَاتِهِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
		41	وَ هِيَ زَلَّةٌ [EDU#42] ،	Independent sentence (a): 2.nominal	Contextual finite
		42	مِنْ زَلَلِ الْخَاطِئِينَ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
		43	وَ عَثْرَةٌ [EDU#44]،	Coordinate clauses (b): 2 to #41-42	Omitted (contextual) finite
		44	مِنْ عَثَرَاتِ الْمُذْنِبِينَ.	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
		45	ثُمَّ انْتَبَهْتُ [EDU#46] مِنْ غَفْلَتِي ،	Coordinate clause (b): 2 to #41-44	Contextual finite
		46	بِتَذْكِيرِكَ لِي	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
		47	وَ نَهَضْتُ [EDU#48] مِنْ زَلَّتِي ،	Coordinate clause (b): 2 to #45-46	Contextual finite
		48	بِتَوْفِيقِكَ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
49	وَ رَجَعْتُ وَ نَكَمْتُ [EDU#50] عَنْ عَثْرَتِي ،	Coordinate clause (b): 2 to #45-48	Contextual finite		
50	بِتَسْدِيدِكَ	Nominal(ised) constructions (f): 7.prepositional phrase	Noun phrase		
51	وَ قُلْتُ: سُبْحَانَ رَبِّي كَيْفَ يَسْأَلُ مُحْتَاجٌ مُحْتَاجًا ؟!	Coordinate clause (b): 2 to #49-50	Contextual finite		
52	وَ أَنَّى يَرْغَبُ مُغْدِمٌ إِلَى مُغْدِمٍ ؟!	Coordinate clause (b): 2 to #51	Contextual finite		
3		53	فَقَصَدْتُكَ ، يَا إِلَهِي ،	Independent sentence (a): 2.nominal	Contextual finite
		54	بِالرَّغْبَةِ ،	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
		55	وَ أَوْفَدْتُ [EDU#56]	Coordinate clause (b): 2 to	Contextual finite

EDUs (#53-62)		رَجَائِي[EDU#57].	#53-54	
	56	عَلَيْكَ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	57	بِالْتَّعَةِ بِكَ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	58	وَ عَلِمْتُ أَنَّ كَثِيرَ مَا أَسْأَلُكَ يَسِيرُ فِي وَجْدِكَ ،	Coordinate clause (b): 2 to #53-57	Contextual finite
	59	وَأَنَّ خَطِيرَ مَا أَسْتَوْهِبُكَ حَقِيرٌ فِي وُسْعِكَ ،	Coordinate clause (b): 2 to #58	Omitted (contextual) finite
	60	وَ أَنَّ كَرَمَكَ لَا يَضِيقُ عَنْ سُؤَالِ أَحَدٍ ،	Coordinate clauses (b): 2 to #58-59	Omitted (contextual) finite
	61	وَ أَنَّ يَدَكَ[EDU#62] أَعْلَى مِنْ كُلِّ يَدٍ .	Coordinate clause (b): 2 to #60	Omitted (contextual) finite
4 EDUs (#63- 106)	62	بِالْعَطَايَا	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	63	اللَّهُمَّ فَصِّلْ عَلَى مُحَمَّدٍ وَ آلِهِ ،	Independent sentence (a): 2.nominal	Morphological and contextual finite
	64	وَ احْمِلْنِي [EDU#65] عَلَى التَّقْضَلِ ،	Coordinate clause (b): 2 to #63	Morphological and contextual finite
	65	بِكَرَمِكَ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	66	وَ لَا تَحْمِلْنِي[EDU#67] عَلَى الِاسْتِحْقَاقِ ،	Coordinate clause (b): 2 to #64-65	Morphological and contextual finite
	67	بِعَذْلِكَ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	68	فَمَا أَنَا بِأَوَّلِ رَاغِبٍ رَغِبَ إِلَيْكَ	Independent sentence (a): 2.nominal	Contextual finite
	69	فَأَعْطِيْتَهُ وَ هُوَ يَسْتَحِقُّ الْمُنْعَ ،	Coordinate clause (b): 2 to #68	Contextual finite
	70	وَ لَا بِأَوَّلِ سَائِلٍ سَأَلَكَ	Coordinate clause (b): 2 to #68-69	Contextual finite
	71	فَأَفْضَلْتَ عَلَيْهِ وَ هُوَ يَسْتَوْجِبُ الْجَزْمَانَ .	Coordinate clause (b): 2 to #70	Contextual finite
	72	اللَّهُمَّ صَلِّ عَلَى مُحَمَّدٍ وَ آلِهِ ،	Independent sentence (a): 2.nominal	Morphological and contextual finite
	73	وَ كُنْ لِدُعَائِي مُجِيباً ،	Coordinate clause (b): 2 to #72	Omitted (morphological and contextual) finite
	74	وَ مِنْ نِدَائِي قَرِيباً ،	Coordinate clause (b): 2 to #73	Omitted (morphological and contextual) finite
	75	وَ لِتَضَرُّعِي رَاجِئاً ،	Coordinate clause (b): 2 to #73-74	Omitted (morphological and contextual) finite
	76	وَ لِصَوْتِي سَامِعاً ،	Coordinate clause (b): 2 to #75	Omitted (morphological and contextual) finite
	77	وَ لَا تَقْطَعْ رَجَائِي عَنْكَ ،	Coordinate clause (b): 2 to #73-76	Morphological and contextual finite

78	وَلَا تَبْتَ سَبِي مَنك ،	Coordinate clause (b): 2 to #77	Morphological and contextual finite
79	وَلَا تُوجِّهْنِي فِي حَاجَتِي هَذِهِ وَ غَيْرَهَا [EDU#80]	Coordinate clause (b): 2 to #77-78	Morphological and contextual finite
80	إِلَى سَوَاكَ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
81	وَتَوَلَّنِي بِنُجْحِ طَلِبَتِي	Coordinate clause (b): 2 to #77-80	Morphological and contextual finite
82	وَقَضَاءَ حَاجَتِي	Coordinate clause (b): 2 to #81	Omitted (morphological and contextual) finite
83	وَنَيْلِ سُوْلِي [EDU#84]	Coordinate clause (b): 2 to #81-82	Omitted (morphological and contextual) finite
84	قَبْلَ رَوَالِي [EDU#85]	Nominal(ised) construction (f): 3.adverb/adverbial	Non-finite
85	عَنْ مَوْقِفِي هَذَا	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
86	بِتَبْسِيرِكَ [EDU#87] الْعَسِيرِ	Subordinate clause (c): 1.cicumstantial qualifier to #72-85	Contextual finite
87	لِي	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
88	وَحُسْنِ تَقْدِيرِكَ [EDU#89]	Subordinate clause (c): 1.cicumstantial qualifier, coordinate to #86-87	Contextual finite
89	لِي	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
90	فِي جَمِيعِ الْأُمُورِ.	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
91	وَصَلَّ عَلَى مُحَمَّدٍ وَ آلِهِ ،	Coordinate clause (b): 2 to #72-90	Morphological and contextual finite
92	صَلَاةً دَائِمَةً نَامِيَةً	Subordinate clause (c): 1. circumstantial qualifier to #91	Contextual finite
93	لَا انْقِطَاعَ لِأَيِّدِهَا	Independent sentence (a): 2.nominal	Contextual finite
94	وَلَا مُنْتَهَى لِأَمْدِهَا ،	Independent sentence (a): 2.nominal, coordinate to #93	Contextual finite
95	وَأَجْعَلْ ذَلِكَ عَوْنًا [EDU#96]	Coordinate clause (b): 2 to #91-94	Morphological and contextual finite
96	لِي	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
97	وَسَبَبًا لِنَجَاحِ طَلِبَتِي ،	Coordinate clause (b): 2 to #95-96	Omitted (morphological and contextual) finite
98	إِنَّكَ وَاسِعٌ كَرِيمٌ .	Independent sentence (a): 2. nominal	Contextual finite

99	وَ مِنْ حَاجَتِي يَا رَبِّ : كَذًا وَ كَذًا [و تَذَكُّرُ حَاجَتِكَ]	Independent sentence (a): 2. nominal	Contextual finite
100	ثُمَّ تَسْجُدُ	Coordinate clause (b): 2 to #99	Morphological and contextual finite
101	وَ تَقُولُ فِي سُجُودِكَ : بِفَضْلِكَ أَنْسِنِي	Coordinate clause (b): 2 to #99-100	Morphological and contextual finite
102	وَ إِحْسَانِكَ دَلَّنِي ،	Coordinate clause (b): 2 to #101	Morphological and contextual finite
103	فَأَسْأَلُكَ [EDUS#104-106] أَنْ لَا تُرَدِّدَنِي خَائِبًا .	Coordinate clause (b): 2 to #101-102	Morphological and contextual finite
104	بِكَ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
105	وَ بِمُحَمَّدٍ وَ آلِهِ ،	Nominal(ised) construction (f): 7.prepositional phrase, coordinate to #104	Noun phrase
106	صَلِّوْا لَكَ عَلَيْهِمْ ،	Independent sentence (a): 2. nominal	Contextual finite

The total number of EDUs is (106) and is distributed over the four stages as follows:

1. '56' EDUs have been textualised as coordinate construction and clause (level b 2. syndetic);
2. Next in distribution is level (f 7) which has '30' EDUs textualised as prepositional phrase;
3. '10' EDUs are textualised as independent nominal sentence (i.e. level a 2);
4. '2' EDUs are textualised as nominal(ised) construction (f 3.adverb/adverbial);
5. '2' EDUs are textualised as level (c 1), circumstantial qualifiers;
6. '2' EDUs are under level (e), conditional result clause;
7. '1' EDUs are textualised as independent verbal sentence (a 1);
8. '1' EDU is textualised as level (c 1), indefinite adjectival clause;
9. '1' EDU is textualised as conditional clause (e, the condition);

10. '1' EDU is textualised as nominal(ised) construction (f 8), vocative.

It is noticed that only '1' EDU can act as a whole independent sentence intersententially linked to other EDUs, making reasonable sense by itself with no subordinate EDUs attached. It is EDU (#98).

Syntactically coordinated EDUs which are intrasententially distributed in the text are '56' cases in number. Syntactically subordinated EDUs intrasententially distributed are '41' cases. Whether coordinated or subordinated, EDUs are heavily used in intrasentential positions in this text. Syntactically coordinated EDUs which are intersententially distributed in the text are '3' cases, EDUs (#72+91+98).

The different levels of the deverbalisation scale used in the analysis are reflected in the realisation through morphological and/or contextual finiteness. Accordingly, contextual finite forms has '34' EDUs. '31' cases are realised by nouns, pronouns, and noun phrases. '28' EDUs are realised by morphological and contextual forms. '7' EDUs in this text have omitted morphological and contextual finite forms, positioned intrasententially. '4' cases are for omitted contextual finite forms. Non-finite has '2' cases.

5.2.3.1.2 Declarative Praise (i.e., Thanksgiving) Texts

5.2.3.1.2.1 Text Four (Ṣaḥīfa Text No. 1)

The text structure is represented in the following table:

Table (5.6): The Text Structure of Text Four (Ṣaḥīfa Text No. 1).

Stage No.	EDU No.	Linguistic Material of EDU	Syntactic Relation (Dependency)	Realisation
1 EDUs	1	الْحَمْدُ لِلَّهِ [EDU#2-5]	Independent sentence (a): 2.nominal	Contextual finite
	2	الْأَوَّلِ بِلاَ أَوَّلٍ كَانَ قَبْلَهُ،	Nominal(ised) construction (f): 6.possessive/genitive construction and chain to #1	Morphological and contextual finite
	3	وَالْآخِرِ بِلاَ آخِرٍ يَكُونُ بَعْدَهُ،	Nominal(ised) construction (f): 6.possessive/ genitive construction and chain,	Morphological and contextual finite

#1-42)			coordinate to #2	
	4	الَّذِي قَصُرَتْ عَنْ رُؤْيَيْهِ أَبْصَارُ النَّاطِرِينَ ،	Relative clause (d) to 'لِلَّهِ' in #1	Contextual finite
	5	وَعَجَزَتْ عَنْ نَعْتِهِ أَوْهَامُ الْوَاصِفِينَ .	Coordinate clause (b): 2 to #4	Contextual finite
	6	ابْتَدَعَ [EDU#7] الْخَلْقَ ابْتِدَاعاً ،	Independent sentence (a): 1.verbal	Contextual finite
	7	بِقُدْرَتِهِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	8	وَ اخْتَرَهُمْ [EDU#9] اخْتِرَاعاً ،	Coordinate clause (b): 2 to #6- 7	Contextual finite
	9	عَلَى مَشِيَّتِهِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	10	ثُمَّ سَلَكَ بِهِمْ طَرِيقَ إِرَادَتِهِ ،	Coordinate clause (b): 2 to #6- 9	Contextual finite
	11	وَبَعَثَهُمْ فِي سَبِيلِ مُحَبَّتِهِ ،	Coordinate clause (b): 2 to #10	Contextual finite
	12	لَا يَمْلِكُونَ تَأْخِيرَ [EDU#13] ،	Subordinate clause (c): 1. circumstantial qualifier to #10-11	Morphological and contextual finite
	13	عَمَّا قَدَّمَهُمْ إِلَيْهِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase

	180	وَلَمْ يَدَعْ [EDU#181] حُجَّةً وَلَا غُدْرًا	Coordinate clause (b): 2 to #178-179	Morphological and contextual finite
	181	لَاخِذٍ مِنَّا	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	182	فَالْهَالِكُ [EDU#183] مَنْ هَلَكَ عَلَيْهِ ،	Independent sentence (a): 2.nominal	Contextual finite
	183	مِنَّا	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	184	وَالسَّعِيدُ [EDU#185] مَنْ رَغِبَ إِلَيْهِ .	Coordinate clause (b): 2 to #182-183	Contextual finite
	185	مِنَّا	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
6	186	وَالْحَمْدُ لِلَّهِ [EDU#187-228]	Coordinate clause (b): 2 to #113-159 and #160-185	Contextual finite
	187	بِكُلِّ مَا حَمَدَهُ [EDU#188] ادْنَى مَلَائِكَتِهِ [EDU#189]	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	188	بِهِ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	189	إِلَيْهِ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	190	وَأَكْرَمَ خَلِيقَتِهِ [EDU#191]	Nominal(ised) construction (f): 9.comparative, coordinate to #187-189	Non-finite

EDUs (#186-228)	191	عَلَيْهِ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	192	وَ اَرْضَىٰ حَامِدِيهِ [EDU#193]	Nominal(ised) construction (f): 9.comparative, coordinate to #190-191	Non-finite
	193	لَدَيْهِ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	194	حَمْدًا [EDU#195-197] .	Nominal(ised) construction (f): 4.cognate accusative to #186-193 Or Coordinate clause (b): 1 to #186-193	Contextual finite Omitted (contextual) finite
	195	يَفْضُلُ سَائِرَ الْحَمْدِ	Subordinate clause (c): 1.indefinite adjectival clause to ' حَمْدًا ' in #194	Morphological and contextual finite
	196	كَفَضَّلَ رَبَّنَا [EDU#197]	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	197	عَلَىٰ جَمِيعِ خَلْقِهِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	198	ثُمَّ لَهُ الْحَمْدُ	Coordinate clause (b): 2 to #195-197	Contextual finite
	199	مَكَانَ كُلِّ نِعْمَةٍ لَهُ [EDU#200-201]	Adjectival clause (d) to #198	Non-finite
	200	عَلَيْنَا	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	201	وَ عَلَىٰ جَمِيعِ عِبَادِهِ الْمَاضِينَ وَ الْبَاقِينَ	Nominal(ised) construction (f): 7.prepositional phrase coordinate to #200	Noun phrase
	202	عَدَدَ مَا أَخَاطَ بِهِ عِلْمُهُ ،[EDU#203]	Adjectival clause (d) to #198- 201	Non-finite
	203	مِنْ جَمِيعِ الْأَشْيَاءِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	204	وَمَكَانَ كُلِّ وَاحِدَةٍ عَدَدُهَا [EDU#205-207]	Coordinate clause (b): 2 to #202-203	Non-finite
	205	مِنْهَا	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	206	أَضْعَافًا مُّضَاعَفَةً أَبَدًا سَرْمَدًا	Adjectival clause (d) to #204	Non-finite
	207	إِلَىٰ يَوْمِ الْقِيَامَةِ ،	Nominal(ised) construction (f): 3.adverb/adverbial	Contextual finite
	208	حَمْدًا [EDU#209-212] ،	Nominal(ised) construction (f): 4.cognate accusative to #186-193 Or Coordinate clause (b): 1 to #194-207	Contextual finite Omitted (contextual) finite
	209	لَا مُنْتَهَىٰ لِحَدِّهِ ،	Subordinate clause (c): 1.indefinite adjectival clause	Contextual finite

		to 'حَمْدًا' in #208	
210	وَلَا جِسَابَ لِعَدِيدِهِ ،	Coordinate clause (b): 2 to #209	Contextual finite
211	وَلَا مَبْلَغَ لِبَغَائِنِهِ ،	Coordinate clause (b): 2 to #209-210	Contextual finite
212	وَلَا انْقِطَاعَ لِأَمَدِهِ	Coordinate clause (b): 2 to #211	Contextual finite
213	حَمْدًا [EDU#214-222] ،	Nominal(ised) construction (f): 4.cognate accusative to #186-193 Or Coordinate clause (b): 1 to #208-212	Contextual finite Omitted (contextual) finite
214	يَكُونُ وَصْلَةً إِلَى طَاعَتِهِ وَ عَفْوِهِ ،	Subordinate clause (c): 1.indefinite adjectival clause to 'حَمْدًا' in #213	Morphological and contextual finite
215	وَسَبَبًا إِلَى رِضْوَانِهِ ،	Coordinate clause (b): 2 to #214	Omitted (contextual) finite
216	وَذَرِيعَةً إِلَى مَغْفِرَتِهِ ،	Coordinate clause (b): 2 to #215	Omitted (contextual) finite
217	وَطَرِيقًا إِلَى جَنَّتِهِ ،	Coordinate clause (b): 2 to #214-216	Omitted (contextual) finite
218	وَحَفِيرًا مِنْ نَقَمَتِهِ ،	Coordinate clause (b): 2 to #217	Omitted (contextual) finite
219	وَأَمْنًا مِنْ غَضَبِهِ ،	Coordinate clause (b): 2 to #218	Omitted (contextual) finite
220	وَظَهْرًا عَلَى طَاعَتِهِ ،	Coordinate clause (b): 2 to #217-219	Omitted (contextual) finite
221	وَ حَاجِزًا عَنْ مَعْصِيَتِهِ ،	Coordinate clause (b): 2 to #220	Omitted (contextual) finite
222	وَعَوْنًا عَلَى تَأْدِيبِهِ حَقِّهِ وَ وَظَائِفِهِ	Coordinate clause (b): 2 to #221	Omitted (contextual) finite
223	حَمْدًا [EDU#224-227]	Nominal(ised) construction (f): 4.cognate accusative to #186-193 Or Coordinate clause (b): 1 to #213-222	Contextual finite Omitted (contextual) finite
224	نُسْعُدُ بِهِ [EDU#225]،	Subordinate clause (c): 1.indefinite adjectival clause to 'حَمْدًا' in #223	Morphological and contextual finite
225	فِي السُّعْدَاءِ مِنْ أَوْلِيَائِهِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
226	وَنَصِيرُ بِهِ فِي نَظْمِ الشُّهَدَاءِ [EDU#227]	Coordinate clause (b): 2 to #224-225	Morphological and contextual finite
227	بِسُيُوفِ أَعْدَائِهِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase

	228	إِنَّهُ وَلِيُّ حَمِيدٍ .	Independent sentence (a): 2.nominal	Contextual finite
--	-----	---------------------------	--	-------------------

The total number of EDUs is (228) and is distributed over the six stages as follows:

1. '84' EDUs have been textualised as coordinate construction and clause (level b2. syndetic);
2. Next in distribution is level (f 7) which has '75' EDUs textualised as prepositional phrase;
3. '10' EDUs are textualised as level (c 1), indefinite adjectival clause;
4. '8' EDUs are textualised as level (d), relative clause;
5. '4' EDUs are textualised as nominal(ised) construction (f 3.adverb/adverbial);
6. '6' EDUs belong to level (f 4), dependent element;
7. '5' EDUs are textualised as independent verbal sentence (a 1);
8. '5' EDUs are textualised as independent nominal sentence (i.e. level a 2);
9. '4' EDUs are textualised as level (d), adjectival clause;
10. '4' EDUs are under level (e), conditional result clause;
11. '4' EDUs are textualised as exceptive construction, level (g);
12. '3' EDU is textualised as conditional clause (e, the condition);
13. '2' EDUs are textualised as level (c 1), circumstantial qualifiers;
14. '2' EDUs are under level (f 2), opposition;
15. '1' EDU has been textualised as independent interrogative sentence level (a 3);

16.'1' EDU only is textualised as level (f 6), possessive/genitive construction and chain;

17.'10' ambiguous cases.

It is noticed that '1' EDU can act as whole independent sentences intersententially linked to other EDUs, making reasonable sense by itself with no subordinate EDUs attached. It is EDU (#207).

Syntactically subordinated EDUs intrasententially distributed are '131' cases. Syntactically coordinated EDUs which are intrasententially distributed in the text are '74' cases in number. Whether coordinated or subordinated, EDUs are heavily used in intrasentential positions in this text. Syntactically coordinated EDUs which are intersententially distributed in the text are '10' cases. '10' ambiguous cases are noticed. They are EDUs (#71+76+92+97+102+106+194+208+213+223).

The different levels of the deverbalisation scale used in the analysis can be classified into several groups according to the realisation through morphological and/or contextual finiteness. Accordingly, '78' cases are realised by nouns, pronouns, and noun phrases. Contextual finite forms has '73' EDUs. '48' EDUs are realised by morphological and contextual forms. Non-finite has '10' cases. '8' cases are for omitted contextual finite forms. '1' EDU in this text has an omitted morphological and contextual finite form, positioned intrasententially.

5.2.3.1.2.2 Text Five (Ṣaḥīfa Text No. 37)

To analyse the structure of this text, consider the following table:

Table (5.7): The Text Structure of Text Five (Ṣaḥīfa Text No. 37).

Stage No.	EDU No.	Linguistic Material of EDU	Syntactic Relation (Dependency)	Realisation
1	1	اللَّهُمَّ إِنَّ أَحَدًا لَا يَتْلُغُ مِنْ شُكْرِكَ غَايَةً [EDU#2]	Independent sentence(a): 2.nominal	Contextual finite
	2	إِلَّا حَصَلَ [EDU#3-4] مَا يُلْزِمُهُ شُكْرًا	Exceptive construction (g)	Contextual finite
	3	عَلَيْهِ	Nominal(ised) construction	Pronoun

EDUs (#1-29)			(f): 7.prepositional phrase	
	4	مِنْ إِحْسَانِكَ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	5	وَلَا يَبْلُغُ مَبْلَغًا مِنْ طَاعَتِكَ وَ إِنْ اجْتَهَدَ [EDU#6]	Coordinate clause (b): 2 to #1-4	Contextual finite
	6	إِلَّا كَانَ مُقْصِرًا [EDU#7-8]	Exceptive construction (g)	Contextual finite
	7	دُونَ اسْتِحْقَاقِكَ	Nominal(ised) construction (f)3.adverb/adverbial	Non-finite
	8	بِفَضْلِكَ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	9	فَأَشْكُرُ عِبَادَكَ عَاجِزٌ عَنْ شُكْرِكَ ،	Independent sentence(a): 2.nominal	Morphological and contextual finite
	10	وَأَعْبُدُهُمْ مُقْصِرٌ عَنْ طَاعَتِكَ ،	Coordinate clause (b): 2 to #9	Morphological and contextual finite
	11	لَا يَجِبُ لِأَحَدٍ أَنْ تَغْفِرَ لَهُ [EDU#12] ،	Independent sentence(a): 1.verbal	Morphological and contextual finite
	12	بِاسْتِحْقَاقِهِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	13	وَلَا أَنْ تَرْضَى عَنْهُ [EDU#13] ،	Coordinate clause (b): 2 to #11-12	Morphological and contextual finite
	14	بِاسْتِجَابِهِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	15	فَمَنْ غَفَرْتَ لَهُ [EDU#16] ،	Conditional clause (e): the condition	Contextual finite
	16	فَيُطَوَّلِكَ	Conditional clause (e): the result	Contextual finite
	17	وَمَنْ رَضَيْتَ عَنْهُ [EDU#] ،	Conditional clause (e): the condition, coordinate to #15- 16	Contextual finite
	18	فَيُفَضِّلِكَ	Conditional clause (e): the result	Contextual finite
	19	تَشْكُرُ يَسِيرَ مَا شَكَرْتَهُ ،	Independent sentence(a): 1.verbal	Morphological and contextual finite
	20	وَتُثِيبُ عَلَى قَلِيلٍ مَا تُطَاعُ فِيهِ ،	Coordinate clause (b): 2 to #19	Morphological and contextual finite
	21	حَتَّى كَانَ شُكْرُ عِبَادِكَ [EDU#22-25] أَمْرٌ مَلَكُوا اسْتِطَاعَةَ الْإِمْتِنَاعِ مِنْهُ [EDU#26]	Independent sentence(a): 2.nominal	Contextual finite
	22	الَّذِي أُوجِبَتْ [EDU#23] تَوَابُهُمْ	Relative clause (d) to ' شُكْرُ ' in #21	Contextual finite
	23	عَلَيْهِ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	24	وَأَعْظَمَتْ [EDU#25]	Coordinate clause (b): 2 to	Contextual finite

		جَزَاءَهُمْ	#22-23	
	25	عَنْهُ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	26	ذُوْنِكَ	Nominal(ised) construction (f): 3.adverb/adverbial	Non-finite
	27	فَكَافَيْتَهُمْ ،	Coordinate clause (b): 2 to #21-26	Contextual finite
	28	أَوْ لَمْ يَكُنْ سَبَبُهُ بِيَدِكَ	Coordinate clause (b): 2 to #21-27	Contextual finite
	29	فَجَارَيْتَهُمْ ،	Coordinate clause (b): 2 to #28	Contextual finite
2 EDUs (#30-50)	30	بَلْ مَلَكْتُ يَا إِلَهِي أَمْرَهُمْ [EDU#31]	Coordinate clause (b): 2 to #1-29	Contextual finite
	31	قِيلَ أَنْ يَمْلِكُوا عِبَادَتَكَ	Nominal(ised) construction (f): 3.adverb/adverbial	Contextual finite
	32	وَ أَغْدَدْتُ ثَوَابَهُمْ [EDU#33] ،	Coordinate clause (b): 2 to #30-31	Contextual finite
	33	قِيلَ أَنْ يُفِيضُوا فِي طَاعَتِكَ	Nominal(ised) construction (f): 3.adverb/adverbial	Contextual finite
	34	وَ ذَلِكَ أَنَّ سُنَّتَكَ الْإِفْضَالَ ،	Independent sentence(a): 2.nominal	Contextual finite
	35	وَ عَادَتَكَ الْإِحْسَانَ ،	Coordinate clause (b): 2 to #34	Omitted (contextual) finite
	36	وَ سَيِّئَكَ الْعَفْوَ ،	Coordinate clause (b): 2 to #35	Omitted (contextual) finite
	37	فَكُلُّ الْبَرِيَّةِ مُعْتَرِفَةٌ بِأَنَّكَ غَيْرُ ظَالِمٍ [EDU#38]	Independent sentence(a): 2.nominal	Contextual finite
	38	لِمَنْ عَاقَبْتَ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	39	وَ شَاهِدَةٌ بِأَنَّكَ مُتَّقِنٌ [EDU#40]	Coordinate clause (b): 2 to #37-38	Contextual finite
	40	عَلَى مَنْ عَاقَبْتَ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	41	وَكُلُّ مُؤَرٍّ [EDU#42] بِالتَّقْصِيرِ [EDU#43]	Coordinate clause (b): 2 to #39-40	Contextual finite
	42	عَلَى نَفْسِهِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	43	عَمَّا اسْتَوْجِبْتَ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	44	فَلَوْ لَا أَنَّ الشَّيْطَانَ يَخْتَرِعُهُمْ [EDU#45]	Conditional clause (e): the condition	Morphological and contextual finite
	45	عَنْ طَاعَتِكَ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	46	مَا عَصَاكَ غَاصٍ ،	Conditional clause (e): the result	Contextual finite

	47	[EDU#48] وَ لَوْ لَا أَنَّهُ صَوَّرَ الْبَاطِلَ فِي مِثَالِ الْحَقِّ	Conditional clause (e): the condition, coordinate to #44-46	Contextual finite
	48	لَهُمْ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	49	مَا صَنَعَ [EDU#50] صَنَاعٌ .	Conditional clause (e): the result	Contextual finite
	50	عَنْ طَرِيقِكَ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
3 EDUs (#51-59)	51	فَسُبْحَانَكَ مَا أَبَيَّنَ كَرَمَكَ [EDU#52] ،	Independent sentence(a): 2.nominal	Contextual finite
	52	فِي مُعَامَلَةٍ مِّنْ أَطَاعِكَ أَوْ عَصَاكَ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	53	تَشْكُرُ لِلْمُطِيعِ [EDU#54] ،	Independent sentence(a): 1.verbal	Morphological and contextual finite
	54	مَا أَنْتَ تَوَلَّيْتَهُ لَهُ	Relative clause (d) to 'الْمُطِيع' in 53	Contextual finite
	55	و تُمْلِي لِلْعَاصِي [EDU#56] ،	Coordinate clause (b): 2 to #53-54	Morphological and contextual finite
	56	فِيمَا تَمْلِكُ مُعَاجَلَتَهُ فِيهِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	57	أَعْطَيْتَ كُلَّ مِثْمَهِمَا مَا لَمْ يَجِبْ لَهُ ،	Independent sentence(a): 1.verbal	Morphological and contextual finite
	58	و تَقْضَيْتَ عَلَى كُلِّ مِثْمَهِمَا [EDU#59]	Coordinate clause (b): 2 to #57	Morphological and contextual finite
	59	بِمَا يَقْصُرُ عَمَلُهُ عَنْهُ .	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
4 EDUs (#60-82)	60	و لَوْ كَافَأَتِ الْمُطِيعَ عَلَى مَا أَنْتَ تَوَلَّيْتَهُ	Conditional clause (e): the condition	Contextual finite
	61	لَأَوْشَكَ أَنْ يَقْفِدَ ثَوَابَكَ ،	Conditional clause (e): the result	Contextual finite
	62	وَأَنْ تَرْوَلَ عَنْهُ نِعْمَتُكَ ،	Conditional clause (e): the result, coordinate to #61	Omitted (contextual) finite
	63	و لَكِنَّكَ [EDU#64] جَارَيْتَهُ بِالْمُدَّةِ الطَّوِيلَةِ [EDU#65] ، الْخَالِدَةِ ،	Coordinate clause (b): 2 to #60-62	Contextual finite
	64	بِكَرَمِكَ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	65	عَلَى الْمُدَّةِ الْقَصِيرَةِ الْفَائِيَةِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	66	و [EDU#67] بِالْغَايَةِ الْمَدِيدَةِ الْبَاقِيَةِ .	Nominal(ised) construction (f): 7.prepositional phrase, coordinate to #63-65	Noun phrase
	67	عَلَى الْغَايَةِ الْقَرِيبَةِ الزَّائِلَةِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase

	68	ثُمَّ لَمْ تُسْمِ الْقِصَاصَ [EDU#69]	Coordinate clause (b): 2 to #60-67	Morphological and contextual finite
	69	فِيمَا أَكَلَ مِنْ رِزْقِكَ [EDU#70]	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	70	الَّذِي يَقْوَى بِهِ عَلَى طَاعَتِكَ.	Relative clause (d) to 'رِزْقِكَ' in #69	Morphological and contextual finite
	71	وَلَمْ تَحْمِلْهُ عَلَى الْمَنَاقِشَاتِ [EDU#72]	Coordinate clause (b): 2 to #68-70	Morphological and contextual finite
	72	فِي الْأَلَاتِ [EDU#73]	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	73	الَّتِي تَسَبَّبَ بِاسْتِعْمَالِهَا إِلَى مَغْفِرَتِكَ.	Relative clause (d) to 'الْأَلَاتِ' in # 72	Contextual finite
	74	وَلَوْ فَعَلْتَ ذَلِكَ بِهِ	Conditional clause (e): the condition	Contextual finite
	75	لَذَهَبَ بِجَمِيعِ مَا كَذَخَ لَهُ	Conditional clause (e): the result	Contextual finite
	76	وَجُمْلَةٍ مَا سَعَى فِيهِ ,	Conditional clause (e): the result, coordinate to #75	Omitted (contextual) finite
	77	جَزَاءً لِلصُّغْرِى [EDU#78] ،	Nominal(ised) construction (f): 4.accusative of purpose to #75-76 or Subordinate clause (c): 1.circumstantial qualifier to #75-76	Contextual finite Contextual finite
	78	مِنْ أَيْدِيكَ وَمِنْكَ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	79	وَلَتَقِي رَهِينًا بَيْنَ يَدَيْكَ [EDU#81] ،	Conditional clause (e): the result, coordinate to #75-78	Contextual finite
	80	بِسَائِرِ نِعَمِكَ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	81	فَمَتَى كَانَ يَسْتَحِقُّ شَيْئًا مِنْ نَوَائِكَ ؟!	Independent sentence(a): 3.interrogative	Contextual finite
	82	لَا ! مَتَى ؟	Independent sentence(a): 3.interrogative fragment, coordinate to #81	Omitted (morphological and contextual) finite
5 EDUs (#83-98)	83	هَذَا يَا إِلَهِي خَالٌ مِنْ أَطَاعِكَ ،	Independent sentence(a): 2.nominal	Contextual finite
	84	وَسَبِيلٌ مِنْ تَعَبَدَ لَكَ ،	Coordinate clause (b): 2 to #83	Omitted (contextual) finite
	85	فَأَمَّا الْعَاصِي أَمْرَكَ	Conditional clause (e): the condition, coordinate to #83-84	Omitted (contextual) finite
	86	وَالْمُوَافِعُ نَهْيَكَ	Conditional clause (e): the condition, coordinate to #85	Omitted (contextual) finite
	87	فَلَمْ تُعَاجِلْهُ [EDU#88]	Conditional clause (e): the	Morphological and

			result	contextual finite
	88	بِنَقَمَتِكَ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	89	لِكَيْ يَسْتَبْدِلَ بِخَالِهِ [EDU#90] حَالَ الْإِنَابَةِ إِلَى طَاعَتِكَ ،	Nominal(ised) construction (f): 4.accusative of purpose	Morphological and contextual finite
	90	فِي مَعْصِيَتِكَ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	91	وَلَقَدْ كَانَ يَسْتَحِقُّ [EDU#92] كُلَّ مَا أَعْدَدْتَ [EDU#93] مِنْ عُقُوبَتِكَ ،	Coordinate clause (b): 2 to #85-90	Morphological and contextual finite
	92	فِي أَوَّلِ مَا هُمْ بِعَصِيَانِكَ	Nominal(ised) construction (f): 3.adverb/adverbial	Non-finite
	93	لِجَمِيعِ خَلْقِكَ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	94	فَجَمِيعُ مَا أَخَّرْتَ عَنْهُ [EDU#95] تَرَكُ مِنْ حَقِّكَ ،	Independent sentence (a): 2. nominal	Contextual finite
	95	مِنَ الْعَذَابِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	96	وَأَبْطَأَتْ بِهِ عَلَيْهِ [EDU#97] ،	Coordinate clause (b): 2 to #94-95	Morphological and contextual finite
	97	مِنْ سَطَوَاتِ النِّقْمَةِ وَالْعِقَابِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	98	وَرَضَى بِذُنُوبِ وَاجِبِكَ .	Coordinate clause (b): 2 to #94-97	Omitted (contextual) finite
6 EDUs (#99- 115)	99	فَمَنْ أَكْرَمُ يَا إِلَهِي ، مَنْكَ ،	Independent sentence (a): 3.interrogative	Morphological and contextual finite
	100	وَمَنْ أَشَقَى مِمَّنْ هَلَكَ عَلَيْكَ ؟	Independent sentence (a): 3.interrogative, coordinate to #99	Morphological and contextual finite
	101	لَا مَنْ؟	Independent sentence(a): 3.interrogative fragment, coordinate to #100	Omitted (morphological and contextual) finite
	102	فَتَبَارَكْتَ أَنْ تُوصَفَ [EDU#103] ،	Independent sentence (a): 2. nominal	Morphological and contextual finite
	103	إِلَّا بِالْإِحْسَانِ	Exceptive construction (g)	Non-finite
	104	وَكُرُمْتَ أَنْ يُخَافَ مِنْكَ [EDU#105] ،	Coordinate clause (b): 2 to #102-103	Morphological and contextual finite
	105	إِلَّا الْعَدْلَ	Exceptive construction (g)	Non-finite
	106	لَا يُخْشَى جَوْرُكَ [EDU#107] ،	Independent sentence(a): 1.verbal	Morphological and contextual finite
	107	عَلَى مَنْ عَصَاكَ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	108	وَلَا يُخَافُ إِغْفَالَكَ ثَوَابَ مَنْ	Coordinate clause (b): 2 to	Morphological and

		أَرْضَاكَ ،	#106-107	contextual finite
109		فَصَلِّ عَلَى مُحَمَّدٍ وَآلِهِ ،	Independent sentence(a): 1.verbal	Morphological and contextual finite
110		وَهَبْ [EDU#111] أَمَلِي ،	Coordinate clause (b): 2 to #109	Morphological and contextual finite
111		لِي	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
112		وَزِدْنِي مِنْ هَذَاكَ	Coordinate clause (b): 2 to #110-111	Morphological and contextual finite
113		مَا أَصِلُ بِهِ إِلَى التَّوْفِيقِ ،[EDU#114]	Relative clause (d) to ' هَذَاكَ ' in #112	Morphological and contextual finite
114		فِي عَمَلِي	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
115		إِنَّكَ مَنَّانٌ كَرِيمٌ .	Independent sentence(a): 2.nominal	Contextual finite

The total number of EDUs is (115) and is distributed over the six stages as follows:

1. '37' EDUs have been textualised as coordinate construction and clause (level b2. syndetic);
2. Next in distribution is level (f 7) which has '33' EDUs textualised as prepositional phrase;
3. '10' EDUs are textualised as independent nominal sentence (i.e. level a 2);
4. '7' EDUs are under level (e), conditional result clause;
5. '6' EDUs are textualised as independent verbal sentence (a 1);
6. '5' EDUs are textualised as level (d), relative clause;
7. '5' EDUs are textualised as nominal(ised) construction (f 3.adverb/adverbial);
8. '4' EDUs are textualised as conditional clause (e, the condition);
9. '4' EDUs are textualised as exceptive constructions, level (g);

10. '2' EDUs have been textualised as independent interrogative sentence level (a 3);

11. '1' EDU belongs to level (f 4), dependent element;

12. '1' ambiguous case, EDU (#77).

It is noticed that '1' EDU can act as whole independent sentences intersententially linked to other EDUs, making reasonable sense by itself with no subordinate EDUs attached. It is EDU (#115).

Syntactically subordinated EDUs intrasententially distributed are '64' cases. Syntactically coordinated EDUs which are intrasententially distributed in the text are '37' cases in number. Whether coordinated or subordinated, EDUs are heavily used in intrasentential positions in this text.

The different levels of the deverbalisation scale discussed earlier can be grouped due to the realisation through morphological and/or contextual finiteness. Accordingly, contextual finite forms has '39' EDUs. '32' cases are realised by nouns, pronouns, and noun phrases. '28' EDUs are realised by morphological and contextual forms. '9' cases are for omitted contextual finite forms. Non-finite has '5' cases. '2' EDUs in this text have an omitted morphological and contextual finite form, positioned intrasententially.

5.2.3.1.2.3 Text Six (Ṣaḥīfa Text No. 51)

To analyse the structure of this text, consider the following table:

Table (5.8): The Text Structure of Text Six (Ṣaḥīfa Text No. 51).

Stage No.	EDU No.	Linguistic Material of EDU	Syntactic Relation (Dependency)	Realisation
1	1	إِلَهِىَ أَهْمَدُكَ [EDU#3]	Independent sentence (a): 2.nominal	Contextual finite
	2	وَ أَنْتَ لِلْحَمْدِ أَهْلٌ	Coordinate clause (b): 2 to #1	Contextual finite
	3	عَلَى حُسْنِ صَنِيعِكَ [EDU#4]	Nominal(ised) construction (f): 4.prepositional object	Contextual finite

EDUs (#1-27)	4	إِلَيَّ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	5	وَسُبُوحِ نِعْمَاتِكَ [EDU#6] ،	Nominal(ised) construction (f): 4.prepositional object, coordinate to #3-4	Omitted (contextual) finite
	6	عَلَيَّ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	7	وَجَزِيلِ عَطَايِكَ [EDU#8] ،	Nominal(ised) construction(f): 4.prepositional object, coordinate to #5-6	Omitted (contextual) finite
	8	عِنْدِي	Nominal(ised) construction (f): 3.adverb/adverbial	Non-finite
	9	وَعَلَى مَا فَضَّلْتَنِي بِهِ [EDU#10] ،	Nominal(ised) construction (f): 4.prepositional object, coordinate to #3-8	Omitted (contextual) finite
	10	مِنْ رَحْمَتِكَ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	11	وَأَسْبَغْتَ عَلَيَّ [EDU#12] ،	Coordinate clause (b): 2 to #9-10	Contextual finite
	12	مِنْ نِعْمَتِكَ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	13	فَقَدْ اصْطَنَعْتَ [EDU#14] مَا يَعْجُزُ عَنْهُ شُكْرِي .	Independent sentence (a): 1.verbal	Contextual finite
	14	عِنْدِي	Nominal(ised) construction (f): 3.adverb/adverbial	Non-finite
	15	وَلَوْ لَا إِحْسَانُكَ [EDU#12-18]	Conditional clause (e): the condition	Contextual finite
	16	إِلَيَّ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	17	وَسُبُوحِ نِعْمَاتِكَ [EDU#18] ،	Conditional clause (e): the condition, coordinate to #15-16	Contextual finite
	18	عَلَيَّ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	19	مَا بَلَغْتَ إِخْرَازَ حَظِّي ،	Conditional clause (e): the result	Contextual finite
	20	وَلَا إِصْلَاحَ نَفْسِي ،	Conditional clause (e): the result, coordinate to #19	Contextual finite
	21	وَلَكِنَّكَ ابْتَدَأْتَنِي بِالْإِحْسَانِ ،	Coordinate clause (b): 2 to #15-20	Contextual finite
	22	وَرَزَقْتَنِي [EDU#23] الْكَفَايَةَ ،	Coordinate clause (b): 2 to #21	Contextual finite
	23	فِي أُمُورِي كُلِّهَا	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase

	24	وَ صَرَفْتُ [EDU#25] جَهْدَ الْبَلَاءِ ،	Coordinate clause (b): 2 to #21-23	Contextual finite
	25	عَنِّي	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	26	وَ مَنَعْتُ [EDU#27] مَحْذُورَ الْقَضَاءِ .	Coordinate clause (b): 2 to #24-25	Contextual finite
	27	مَنِّي	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
2 EDUs (#28-53)	28	إِلَهِي فَكُم مِّنْ بَلَاءٍ جَاهِدِ قَدْ صَرَفْتُ عَنِّي ،	Exclamation clause (h):	Contextual finite
	29	وَ كُمْ مِّنْ نِّعْمَةٍ سَابِغَةٍ أَقْرَبْتُ بِهَا عَيْنِي ،	Nominal(ised) construction (f): 9.exclamation, coordinate to #28	Contextual finite
	30	وَ كُمْ مِّنْ صَنِيعَةٍ كَرِيمَةٍ أَكْ عِنْدِي !!	Nominal(ised) construction (f): 9.exclamation, coordinate to #29	Contextual finite
	31	أَنْتَ الَّذِي أَجَبْتَ [EDU#32] دَعْوَتِي ،	Independent sentence (a): 2.nominal	Contextual finite
	32	عِنْدَ الْإِضْطِرَارِ	Nominal(ised) construction (f): 3.adverb/adverbial	Non-finite
	33	وَ أَقَلْتُ [EDU#34] زُلَّتِي ،	Coordinate clause (b): 2 to #31-32	Contextual finite
	34	عِنْدَ الْعِثَارِ	Nominal(ised) construction (f): 3.adverb/adverbial	Non-finite
	35	وَ أَخَذْتُ [EDU#36-37] بِظُلَامَتِي .	Coordinate clause (b): 2 to #33-34	Contextual finite
	36	لِي	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	37	مِنَ الْأَعْدَاءِ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	38	إِلَهِي مَا وَجَدْتُكَ بِخَيْلٍ ،[EDU#39]	Independent sentence (a): 2.nominal	Contextual finite
	39	جِئْتُ سَأَلْتُكَ	Nominal(ised) construction (f): 3.adverb/adverbial	Contextual finite
	40	وَ لَا مُنْقِصًا [EDU#41]	Coordinate clause (b): 2 to #38-39	Omitted (contextual) finite
	41	جِئْتُ أَرَدْتُكَ	Nominal(ised) construction (f): 3.adverb/adverbial	Contextual finite
	42	بَلْ وَجَدْتُكَ [EDU#43] سَامِعًا ،	Coordinate clause (b): 2 to #38-41	Contextual finite
	43	لِدُعَائِي	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	44	وَ [EDU#45] مُغْطِيًا ،	Coordinate clause (b): 2 to #42-43	Omitted (contextual) finite
	45	لِمَطَالِبِي	Nominal(ised) construction	Noun phrase

			(f): 7.prepositional phrase	
	46	وَ وَجَدْتُ نَعْمَاكَ [EDU#47]سَابِغَةً ، [EDU#48-49]	Coordinate clause (b): 2 to #42-45	Contextual finite
	47	عَلَيَّ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	48	فِي كُلِّ شَأْنٍ مِنْ شَأْنِي	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	49	وَ كُلِّ زَمَانٍ مِنْ زَمَانِي	Nominal(ised) construction (f): 7.prepositional phrase, coordinate to #48	Noun phrase
	50	فَأَنْتَ [EDU#51] مَحْمُودٌ ،	Independent sentence (a): 2.nominal	Contextual finite
	51	عِنْدِي	Nominal(ised) construction (f): 3.adverb/adverbial	Non-finite
	52	وَ صَنِيعُكَ [EDU#53] مُبْرُورٌ .	Coordinate clause (b): 2 to #50-51	Contextual finite
	53	لَدَيَّ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
3 EDUs (#54-98)	54	تَحْمَدُكَ نَفْسِي وَ لِسَانِي وَ عَقْلِي ،	Independent sentence (a): 1.verbal	Morphological and contextual finite
	55	حَمْدًا [EDU#56] ،	Nominal(ised) construction (f): 4.cognate accusative to #54 or Coordinate clause (b): 1 to #54	Contextual finite Omitted (contextual) finite
	56	يَبْلُغُ الْوَفَاءَ وَ حَقِيقَةَ الشُّكْرِ	Subordinate clause (c): 1.indefinite adjectival clause to 'حَمْدًا' in #54	Morphological and contextual finite
	57	حَمْدًا [EDU#58] ،	Nominal(ised) construction (f): 4.cognate accusative to #54 or Coordinate clause (b): 1 to #55-56	Contextual finite Omitted (contextual) finite
	58	يَكُونُ مُبْلَغُ رِضَاكَ عِنْدِي	Subordinate clause (c): 1.indefinite adjectival clause to 'حَمْدًا' in #54	Morphological and contextual finite
	59	فَتَنْجِنِي مِنْ سُخْطِكَ .	Independent sentence (a): 1.verbal	Morphological and contextual finite
	60	يَا كَهْفِي [EDU#61]	Nominal(ised) construction (f): 8.vocative	Contextual finite
	61	جِئْتُ نَعِيْبِي الْمَذَاهِبُ	Nominal(ised) construction (f): 3.adverb/adverbial	Contextual finite
	62	وَ يَا مُقِيلِي عَذْرَتِي ،	Nominal(ised) construction (f): 8.vocative, coordinate to #60-61	Contextual finite

63	فَلَوْ لَا سَتْرُكَ عَوْرَتِي	Conditional clause (e): the condition	Contextual finite
64	لَكُنْتُ مِنَ الْمَقْضُوجِينَ ،	Conditional clause (e): the result	Contextual finite
65	وَ يَا مُؤَيَّدِي النَّصْرِ ،	Nominal(ised) construction (f): 8.vocative, coordinate to #60-64	Contextual finite
66	فَلَوْ لَا نَصْرُكَ إِنِّي	Conditional clause (e): the condition	Contextual finite
67	لَكُنْتُ مِنَ الْمَغْلُوبِينَ ،	Conditional clause (e): the result	Contextual finite
68	وَ يَا مَنْ وَصَعَتْ لَهُ الْمُلُوكُ نِيرَ الْمَدْلَةِ [EDU#69] ،	Nominal(ised) construction (f): 8.vocative, coordinate to #65-67	Contextual finite
69	عَلَى أَعْنَاقِهَا	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
70	فَهُمْ مِنْ سَطَوَاتِهِ خَائِفُونَ ،	Independent sentence (a): 2.nominal	Contextual finite
71	وَ يَا أَهْلَ النَّفْوَى ،	Nominal(ised) construction (f): 8.vocative, coordinate to #68-70	Contextual finite
72	وَ يَا مَنْ لَهُ الْأَسْمَاءُ الْحُسْنَى ،	Nominal(ised) construction (f): 8.vocative, coordinate to #71	Contextual finite
73	أَسْأَلُكَ أَنْ تَغْفُو عَنِّي ،	Independent sentence (a): 1.verbal	Morphological and contextual finite
74	وَ تَغْفِرْ لِي ،	Coordinate clause (b): 2 to #73	Morphological and contextual finite
75	فَلَسْتُ بِرَبِيئاً [EDU#76] ،	Independent sentence (a): 2.nominal	Morphological and contextual finite
76	فَاعْتَذِرْ	Independent sentence (a): 1.verbal	Morphological and contextual finite
77	وَ لَا يَذِي قُوَّةَ [EDU#78] ،	Coordinate clause (b): 2 to #75-76	Omitted (contextual) finite
78	فَانْتَصِرْ	Independent sentence (a): 1.verbal	Morphological and contextual finite
79	وَ لَا مَفْرَأَ لِي [EDU#80] .	Coordinate clause (b): 2 to #77-78	Omitted (contextual) finite
80	فَأَفِرْ	Independent sentence (a): 1.verbal	Morphological and contextual finite
81	وَ أَسْتَقْبِلُكَ عَثْرَاتِي ،	Coordinate clause (b): 2 to #60-80	Morphological and contextual finite
82	وَ اتَّصَلُ إِلَيْكَ مِنْ دُنُوبِي [EDU#83-85]	Coordinate clause (b): 2 to #81	Morphological and contextual finite
83	الَّتِي قَدْ أَوْفَقْتَنِي ،	Relative clause (d) to ' دُنُوبِي '	Contextual finite

			' in #82	
	84	وَ أَحَاطَتْ بِـِ	Coordinate clause (b): 2 to #83	Contextual finite
	85	فَأَهْلَكْتَنِي ،	Independent sentence (a): 1.verbal	Contextual finite
	86	مِنْهَا فَرَزْتُ [EDU#87] رَبِّ تَائِباً	Independent sentence (a): 2.nominal	Contextual finite
	87	إِلَيْكَ	Nominal(ised) construction (f): 7.prepositional phrase	Pronoun
	88	فَقُبَّ عَلَيَّ ،	Independent sentence (a): 1.verbal	Morphological and contextual finite
	89	مُعَوِّذاً	Coordinate clause (b): 1 to #86-88	Contextual finite
	90	فَاعْزَيْ،	Independent sentence (a): 1.verbal	Morphological and contextual finite
	91	مُسْتَجِيراً	Coordinate clause (b): 1 to #89-90	Contextual finite
	92	فَلَا تَخْذُلْنِي،	Independent sentence (a): 1.verbal	Morphological and contextual finite
	93	سَائِلاً	Coordinate clause (b): 1 to #91-92	Contextual finite
	94	فَلَا تَحْرَمْنِي،	Independent sentence (a): 1.verbal	Morphological and contextual finite
	95	مُعْتَصِماً	Coordinate clause (b): 1 to #93-94	Contextual finite
	96	فَلَا تُسَلِّمْنِي،	Independent sentence (a): 1.verbal	Morphological and contextual finite
	97	دَاعِياً	Coordinate clause (b): 1 to #95-96	Contextual finite
	98	فَلَا تَرُدَّنِي خَائِباً .	Independent sentence (a): 1.verbal	Morphological and contextual finite
4	99	دَعَوْتُكَ يَا رَبِّ	Independent sentence (a): 2.verbal	Contextual finite
	100	مُسْكِيناً ،	Subordinate clause (c): 1.circumstantial qualifier to # 99	Contextual finite
	101	مُسْكِيناً ،	Subordinate clause (c): 1.circumstantial qualifier to #99 or Coordinate clause (b): 1 to #100	Omitted (contextual) finite
	102	مُسْتَفِئاً ،	Subordinate clause (c): 1.circumstantial qualifier to #99 or Coordinate clause (b): 1 to	Omitted (contextual) finite
EDUs (#99-129)				

		#101	finite
103	خَائِفًا ،	Subordinate clause (c): 1.circumstantial qualifier to #99 or Coordinate clause (b): 1 to #102	Contextual finite Omitted (contextual) finite
104	وَجَلًا ،	Subordinate clause (c): 1.circumstantial qualifier to #99 or Coordinate clause (b): 1 to #103	Contextual finite Omitted (contextual) finite
105	فَقِيرًا	Subordinate clause (c): 1.circumstantial qualifier to #99 or Coordinate clause (b): 1 to #104	Contextual finite Omitted (contextual) finite
106	مُضْطَرًّا إِلَيْكَ.	Subordinate clause (c): 1.circumstantial qualifier to #99 or Coordinate clause (b): 1 to #105	Contextual finite Omitted (contextual) finite
107	أَشْكُو إِلَيْكَ يَا إِلَهِي، ضَعُفَتْ نَفْسِي [EDU#108-109]	Independent sentence (a): 1.verbal	Morphological and contextual finite
108	عَنِ الْمُسَارَعَةِ فِيمَا وَعَدَّتُهُ أَوْلِيَاءَكَ	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
109	وَالْمُجَانِبَةِ عَمَّا حَدَّثَتْهُ أَعْدَاءُكَ ،	Nominal(ised) construction (f): 7.prepositional phrase, coordinate to #108	Noun phrase
110	وَكَثْرَةَ هُمُومِي ،	Coordinate clause (b): 2 to #107-109	Omitted (contextual) finite
111	وَسُوسَةَ نَفْسِي .	Coordinate clause (b): 2 to #110	Omitted (contextual) finite
112	إِلَهِي لَمْ تَقْضَخْنِي [EDU#113]	Independent sentence (a): 1.verbal	Morphological and contextual finite
113	بِسَرِيرَتِي	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
114	وَلَمْ تُهْلِكْنِي [EDU#115] ،	Coordinate clause (b): 2 to #112-113	Morphological and contextual finite
115	بِجَرِيرَتِي	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
116	أَدْعُوكَ [EDU#117]	Independent sentence (a): 1.verbal	Morphological and contextual finite
117	فَتُجِيبُنِي	Independent sentence (a): 1.verbal	Morphological and contextual finite

	118	وَ إِنْ كُنْتُ بِطِينًا جِئْتُ نَدُّعُونِي	Subordinate clause (c): 1.circumstantial qualifier to #116-117	Contextual finite
	119	وَ اسْأَلْكَ كُلَّمَا شِئْتُ ، [EDU#120]	Coordinate clause (b): 2 to #116-118	Morphological and contextual finite
	120	مِنْ حَوَائِجِي	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	121	وَ [EDU#122] وَصَعْتُ ، [EDU#123] سِرِّي ،	Coordinate clause (b): 2 to #119-120	Contextual finite
	122	حَيْثُ مَا كُنْتُ	Nominal(ised) construction (f): 3.adverb/adverbial	Contextual finite
	123	عِنْدَكَ	Nominal(ised) construction (f): 3.adverb/adverbial	Non-finite
	124	فَلَا أَدْعُو سِوَاكَ ،	Independent sentence (a): 1.verbal	Morphological and contextual finite
	125	وَ لَا أَرْجُو غَيْرَكَ ،	Coordinate clause (b): 2 to #124	Morphological and contextual finite
	126	لَبَّيْكَ لَبَّيْكَ ، تَسْمَعُ مَنْ شَكََا إِلَيْكَ ،	Independent sentence (a): 1.verbal	Morphological and contextual finite
	127	وَ تَلْقَى مَنْ تَوَكَّلَ عَلَيْكَ ،	Coordinate clause (b): 2 to #126	Morphological and contextual finite
	128	وَ تُخَلِّصُ مَنْ اعْتَصَمَ بِكَ ،	Coordinate clause (b): 2 to #127	Morphological and contextual finite
	129	وَ تُفَرِّجُ عَمَّنْ لَدَاكَ .	Coordinate clause (b): 2 to #128	Morphological and contextual finite
5 EDUs (#130-137)	130	إِلَهِي فَلَا تُحَرِّمْنِي خَيْرَ الْأَخْزَةِ وَ الْأُولَى	Independent sentence (a): 1.verbal	Morphological and contextual finite
	131	لِقَلَّةِ شُكْرِي ،	Nominal(ised) construction (f): 7.prepositional phrase	Noun phrase
	132	وَ اغْفِرْ لِي مَا تَعْلَمُ مِنْ ذُنُوبِي .	Coordinate clause (b): 2 to #130-131	Morphological and contextual finite
	133	إِنْ تُعَذِّبْ	Conditional clause (e): the condition	Morphological and contextual finite
	134	فَأَنَا الظَّالِمُ الْمَفْرُطُ الْمُضَيِّعُ الْآثِمُ الْمُقْصِرُ الْمُضْجَعُ	Conditional clause (e): the result	Contextual finite
	135	الْمُغُولُ حَظُّ نَفْسِي ،	Conditional clause (e): the result, coordinate to #134	Contextual finite
	136	وَ إِنْ تَغْفِرْ	Conditional clause (e): the condition, coordinate to #133-	Morphological and contextual finite
	137	فَأَنْتَ أَرْحَمُ الرَّاحِمِينَ .	Conditional clause (e): the result	Contextual finite

The total number of EDUs is (137) and is distributed over the five stages as follows:

1. '50' EDUs have been textualised as coordinate construction and clause (level b2. syndetic);
2. Next in distribution is level (f 7) which has '23' EDUs textualised as prepositional phrase;
3. '22' EDUs are textualised as independent verbal sentence (a 1);
4. '10' EDUs are textualised as nominal(ised) construction (f 3. adverb/adverbial);
5. '7' EDUs are textualised as independent nominal sentence (i.e. level a 2);
6. '5' EDUs are under level (e), conditional result clause;
7. '4' EDU is textualised as conditional clause (e, the condition);
8. '2' EDUs are under level (c 1), indefinite adjectival clause;
9. '2' EDU belongs to level (c 1), circumstantial qualifiers;
10. '1' EDU is textualised as level (d), relative clause;
11. '1' EDU belongs to level (f 4), dependent element;
12. '1' EDU belongs to level (f 8), vocative;
13. '1' EDU is under level (h), exclamation clause;
14. '8' ambiguous cases.

It is noticed that only '1' EDU can act as a whole independent sentences intersententially linked to other EDUs, making reasonable sense by itself with no subordinate EDUs attached. It is EDU (#28).

Syntactically coordinated EDUs which are intrasententially distributed in the text are '50' cases in number. Syntactically subordinated EDUs

intrasententially distributed are '60' cases. Whether coordinated or subordinated, EDUs are heavily used in intrasentential positions in this text.'8' EDUs are ambiguous, they are (#55+57+101+102+103+104+105+ 106).

The different levels of the deverbalisation scale used in the analysis can be grouped into several groups according to the realisation through morphological and/or contextual finiteness. Accordingly, contextual finite forms has '55' EDUs. '34' EDUs are realised by morphological and contextual forms.'25' cases are realised by nouns, pronouns, and noun phrases. '8' cases are for omitted contextual finite forms. Non-finite has '6' cases.

5.2.3.2 Text Structure Discussion

The discussion now is turned to the two parameters under this level: dependencies and realisations of EDUs.

5.2.3.2.1 Dependencies of EDUs

EDUs either relate to EDUs intrasententially or intersententially. Intrasentential EDU relations that are based on syntactic coordination and subordination are analysed in this level only (i.e., text structure). However, intersentential EDU relations, in addition to intrasentential, are analysed, and are to be discussed, in both 'discourse' and 'information' structures. This goes with the basics of the adopted framework.

The following table shows the number of both intersentential and intrasentential EDU relations with their percentages in relation to the total number of EDUs in the data, which is (798).

Table (5.9): The Distribution of EDU Relations.

EDU Relations	Number of Cases	Percentage	Percentage
Intrasentential	737	97.875%	92.355%
Intersentential	16	2.124%	2.005%
Total:	753	-----	-----

The vast majority of cases are intrasentential (737), whether subordinated or coordinated, which represent (97.875%) out of the total number of both intersentential and intrasentential relations, which is (753). This number includes EDUs that work upon the textualisation levels in the deverbalisation scale. Only (16) cases representing (2.124%) out of (753) are intersentential. The percentages of the two groups of EDU relations are also shown due to the total number of EDUs in the data. Intrasentential relations record (92.355%), while intersentential ones record (2.005%). Some cases of EDUs, (45), do not belong to either of these two groups; they are not linked intersententially or intrasententially. They are within their texts, i.e., they have their job in the whole text in which they occur, but they do not use either of the two ways above.

However, the intrasentential EDU relations are distributed over syntactic coordination and subordination as shown the following table:

Table (5.10): The Distribution of Subordinate and Coordinate EDUs.

EDU	Number of Cases	Percentage	Percentage
Subordinated	379	51.424%	47.493%
Coordinated	337	45.725%	42.230%
Ambiguous	21	2.849%	2.631%
Total:	737	-----	-----

This distribution of the overall dependency due to their total number in the data (737) shows that (379) cases with (51.424%) are subordinated EDUs, followed by (337) with (45.725%) coordinated EDUs. Ambiguity is present with only (21) cases of (2.849%). These three values are clear in the first column of percentage. The second column of percentage represents the occurrences when compared to the total number of EDUs in the data (798). The common dependency relation in the present data is subordination between EDUs. This variation would belong to the different layers of those constructions that are employed as subordinate in the application of the deverbalisation scale of Arabic (i.e., levels 'b', 'c', 'd', 'e', 'f', 'g', 'h' in addition to 'a' level in some cases that refer to EDUs

subordinated to other EDUs inside the same sentence). This definitely refers to a deeper textual structure of different degrees of subordination that provides additional background information which frames the situation in the main clause. If compared to subordination, coordination nearly sounds a widely common feature as it is also favourite in the data to combine multiple units together at the same level or different levels of linguistic structures. In addition, much focus is, therefore, paid to equally foregrounding those multiple units through coordination. This also denotes a deeper textual structuring of different degrees of coordination.

A very obvious phenomenon in the data that is directly related to what is discussed above is the hierarchical nature of text structure that can be entailed from subordination and coordination, as well. The data presents hierarchy particularly in sentences that consist of two EDUs and more. For illustration, the subordination employed in the data reaches to very highest degrees, thirty four degrees, or even forty, if ambiguity is paraphrased in favour of subordination on the expense of coordination. An illustrative example from text '4' in the data is given below, where the upper limits of EDUs is '54':

5. Fifty Four-EDU Sentence (#59-112): [وَأَلْحَمْدُ لِلَّهِ] [عَلَى مَا عَرَفْنَا] [مِنْ نَفْسِهِ] [الَّتِي لَا تَحُولُ] ... [مِنْ شُكْرِهِ] [أَلْهَمْنَا].

In coordination, the deeper textual structuring can reach to highest degrees; twenty three degrees. An illustrative example from text '1' in the data is given below, in which the upper limit of EDUs is '30':

6. Twenty-Three EDU Sentence (#1-30): [وَسُورَةٍ] [---] [اللَّهُمَّ إِنِّي أَعُوذُ بِكَ] [أَوْ نَقُولَ فِي الْعِلْمِ] ... [الْغَضَبِ] ،

5.2.3.2.2 Realisation of Subordinate and Coordinate EDUs

EDUs in the data are analysed according to whether they are realised by 'finite', or 'non-finite', or 'pronoun, noun, or noun phrase', or even by the omission of the morphological and contextual finite element or

omission of the contextual finite element. The table below shows the overall distribution of the realisation of all EDUs:

Table (5.11): The Overall Distribution of Morphological and Contextual Realisation of EDUs.

Morphological and Contextual Realisation	Number of Cases	Percentage
Contextual Finite	245	30.701%
Noun, Pronoun, Noun Phrase	221	27.694%
Morphological and Contextual Finite	182	22.807%
Omitted Morphological and Contextual Finite	60	7.518%
Omitted Contextual Finite	38	4.761%
Non-Finite	31	3.884%
Ambiguous	21	2.631%
Total:	798	-----

The most frequent realisation is by 'contextual finite' with (245) cases followed by 'noun, pronoun, noun phrase' with (221), and 'morphological and contextual finite' of (182) cases. Cases of omission of an element are distributed over two types: (60) for 'omitted morphological and contextual finite' and (38) for 'omitted contextual finite'. Non-finite realisation records (31). Ambiguous cases are recorded: (21) cases. The following table redistributes these basic numbers in a detailed way, from the most frequent to the less frequent:

Table (5.12): The Redistribution of Morphological and Contextual Realisation in Subordinate EDUs.

Morphological and Contextual Realisation in Subordinate EDUs	Number of Cases	Percentage	Percentage
Noun, Pronoun, Noun Phrase	214	56.464%	26.817%
Contextual Finite	81	21.372%	10.150%
Morphological and Contextual Finite	57	15.039%	7.142%
Non-Finite	27	7.124%	3.383%
Omitted Morphological and Contextual Finite	-----	-----	-----
Omitted Contextual Finite	-----	-----	-----
Total:	379	-----	-----

Two percentages are given for the occurrences of these realisations; first in terms of their total number (379), and second in terms of the total number of EDUs in the data (798). The most frequent occurrence and percentage of intrasentential subordinate EDUs, however, are 'noun, pronoun, noun phrase' followed by, in order, 'contextual finite', 'morphological and contextual finite', and 'non-finite'.

As for coordinate EDUs, (337) cases are seen. Two percentages are also given for the occurrences of these realisations; first in terms of their total number (337), and second in terms of the total number of EDUs in the data (798). They are arranged in the following table, from the most frequent, 'contextual finite', to the less frequent, 'non-finite':

Table (5.13): The Redistribution of Morphological and Contextual Realisation in Coordinate EDUs.

Morphological and Contextual Realisation in Coordinate EDUs	Number of Cases	Percentage	Percentage
Contextual Finite	131	38.872%	16.416%
Morphological and Contextual Finite	98	29.080%	12.280%
Omitted Morphological and Contextual Finite	59	17.507%	7.393%
Omitted Contextual Finite	38	11.275%	4.761%
Noun, Pronoun, Noun Phrase	07	2.077%%	0.877%
Non-Finite	04	1.186%	0.501%
Total:	337	-----	-----

5.2.3.3 Discourse Structure

The discourse structures of the selected texts are stated in terms of the following operational tables. The first group includes the Petitionary Praise (i.e., Lament): (Şahīfa Texts No. 8, 12, and 13), and the second one includes the Declarative Praise (i.e., Thanksgiving) Texts: (Şahīfa Texts No. 1, 37, and 51). For the RST graphical representations for all these texts, see (Appendix G).

5.2.3.3.1 Petitionary Praise (i.e., Lament) Texts

5.2.3.3.1.1 Text One (Şahîfa Text No. 8)

The discourse structure of this text is stated in the table below:

Table (5.14): The Discourse Structure of Text One (Şahîfa Text No. 8).

Stage No	N EDU(s)	S EDU(s)	Rhe R	CS	TL	E
1 EDUs (#1-30)	1-24 25		disjunction	SM	a2+f7+b2(18times)+ f7+b2+f7+f3+ b2	R recognises that the linked items are not- necessarily-exclusive alternatives for the other(s).
	25 26		disjunction	SM	b2+ b2	
	26 27-28		disjunction	SM	b2+ b2+f7	
	27-28 29-30		disjunction	SM	b2+f7+ b2+f7	
	1-2 3-4		conjunction	SM	2a+f7+ b2+b2	Conjoined items are united together where each plays its role.

2 EDUs (#31-43)	35-36 37		conjunction	SM	b2+f7+ b2	united together where each plays its role.
	37 38-40		conjunction	SM	b2+ b2+b2+b2	
	35	36	elaboration	SM	f7	R recognises & identifies S as additional details for the subject matter in N.
	38 39		disjunction	SM	b2+ b2	R recognises that the linked items are not-necessarily-exclusive alternatives for the other(s).
	39 40		disjunction	SM	b2+ b2	
	41-42 43		conjunction	SM	b2+f7+ b2	Conjoined items are united together where each plays its role.
	41	42	elaboration	SM	f7	R recognises & identifies S as additional details for the subject matter in N.
3 EDUs (#44-55)	44-48 49-55		conjunction	SM	b2+f7+b2+b2 +b2+ b2+f7+b2+b2 +b2+b2+b2	Conjoined items are united together where each plays its role.
	44-45 46		conjunction	SM	b2+f7+ b2	
	46 47-48		conjunction	SM	b2+ b2+b2	
	44	45	elaboration	SM	f7	R recognises & identifies S as additional details for the subject matter in N.
	47 48		conjunction	SM	b2+ b2	Conjoined items are united together where each plays its role.
	49-50 51		conjunction	SM	b2+f7+ b2	
	51 52		conjunction	SM	b2+ b2+	
	52 53-55		conjunction	SM	b2+ b2+b2+b2	
	49	50	elaboration	SM	f7	
	53 54		conjunction	SM	b2+ b2	Conjoined items are

4						united together where each plays its role.
	54	55	conjunction	SM	b2+ b2	
	57-60	56	preparation or motivation	PR PR	a2	R is more ready, interested or oriented for reading N or R's intended desire to perform the actions in Ns is increased.
	57-59	60	circumstance or evaluation	SM SM	f8	R recognises that S interprets the context of situation in N or R recognises S as assessing N and & the value it assigns.
	57-58	59	means	SM	f7	R recognises that the instrument/method in S realises the subject matters in N
EDUs (#56-60)	57	58	elaboration	SM	f7	R recognises & identifies S as additional details for the subject matter in N.

Accordingly, the generic stages, Rhe Rs, and their Es are shown below:

Table (5.15): Generic Stages, Rhe Rs, and their Es of Text One (Şahîfa Text No 8).

Stage	E(s)
1. (#1-30)	It is in 'conjunction' Rhe R with stage '2': conjoined items are united together where each plays its role.
2. (#31-43)	It is in 'conjunction' Rhe R with stage '3': conjoined items are united together where each plays its role.
3. (#44-55)	-----
4. (#56-60)	It is either in 'background' Rhe R to stages '1-3': R's understanding of N is increased & facilitated or in 'summary' Rhe R: R recognises S as a shorter restatement of N.

Some observations are noticed in this analysis:

1. Rhe Rs whose CS is SM are either mononuclear or multinuclear. They link the situations embodied in EDUs. SM relations are '53' in number; '41' of them are multinuclear Rhe Rs and '12' are mononuclear ones. According to occurrence in the four stages, they are distributed as follows:

- '35' cases of conjunction (multinuclear) Rhe R;
- '10' cases of elaboration Rhe R;
- '6' instances of disjunction Rhe R;
- '2' cases of means Rhe R.

2. No Rhe Rs of PR CS are used in this text.

3. Ambiguous cases are uncovered in situations that refer to multiple analyses. '3' instances of these ambiguous cases are below:

- stage '1' has '1' ambiguity which is either 'means' (SM) or 'circumstance' (SM);
- stage '2' has '2' ambiguities: '1' case of 'preparation' (PR) or 'motivation' (PR) and '1' case of 'circumstance' (SM) or 'evaluation' (SM).

4. Single EDUs are used to express a relation, as clear in many instances such as: S EDU (#32) which is 'elaboration' to N EDUs (#31) in stage '2'. The number of such cases is '12' cases. This refers also to the fact that a single TL is used to syntactically realise a relation.

5. Several EDUs are united together to express a relation, as in 'disjunction' Rhe R expressed in stage '1': EDUs (#27-30). The number of such instances is '44' cases. This can refer to the fact that certain TLs are employed to syntactically realise a relation.

6. Stages '1-3' are employed to set the 'background' or show the 'summary' for the ultimate E (intention of W) presented in stage '4'. Stages '1', '2', and '3' are in 'conjunction' to each other.

5.2.3.3.1.2 Text Two (Şahîfa Text No. 12)

The discourse structure is stated in the table below:

Table (5.16): The Discourse Structure of Text Two (Şahîfa Text No.12).

Stage No	N EDU(s)	S EDU(s)	Rhe R	CS	TL	E
1 EDUs (#1-15)	1-2	3-15	elaboration	SM	a1+b2+b2+b2+b2+f7+b2+a1+f7+b2+f7+f3+f3	R recognises & identifies Ss as additional details for the subject matter in Ns.

Accordingly, the generic stages, Rhe Rs, and their Es are shown below:

Table (5.17): Generic Stages, Rhe Rs, and their Es of Text Two (Şahîfa Text No. 12).

Stage	E(s)
'1-3' vs. '4-6'	Stages '1-3' are either in 'justify' Rhe R to stages '4-6': R accepting W's right to express N is increased or in 'preparation' Rhe R: R is more ready, interested or oriented for reading N.
1. (#1-15)	It is in 'background' Rhe R to stages '2' and '3': R's understanding of N is increased & facilitated.
2. (#16-39)	-----
3. (#40-63)	It is in 'elaboration' Rhe R stage '2': R recognises & identifies S as additional details for the subject matter 'murder' in N.
'4-5'	Stages '4-5' are in 'preparation' Rhe R to stage '6': R is more ready, interested or oriented for reading N.
4. (#64-89)	-----
5. (#90-122)	It is in 'elaboration' Rhe R to stage '4': R recognises & identifies S as additional details for the subject matter 'murder' in N.
6. (#123-152)	-----

Some observations are noticed in this analysis:

1. SM Rhe Rs are '129' in number; '66' of them are multinuclear Rhe Rs and '63' are mononuclear ones. According to occurrence in the six stages, they are distributed as follows:

- '64' cases of conjunction (multinuclear) Rhe R;
- '40' cases of elaboration Rhe R;
- '8' instances of circumstance Rhe R;
- '7' cases of means Rhe R;
- '5' instances of volitional cause Rhe R;
- '1' case of condition Rhe R;
- '1' case of contrast (multinuclear) Rhe R;
- '1' case of list (multinuclear) Rhe R;
- '1' instance of purpose Rhe R;
- '1' instance of volitional result Rhe R.

2. PR Rhe Rs are used in this text. They are '4' in number, and are distributed as follows:

- '2' justify instances;
- '1' background case;
- '1' motivation case.

3. Instances of ambiguous cases are below:

- stage '1' has '1' ambiguity which is either 'interpretation' (SM) or 'circumstance' (SM);

- stage '2' has '2' ambiguity cases: the first is either 'volitional cause' (SM) or 'motivation' (PR), and the second is between 'elaboration' (SM) or 'antithesis' (PR);
- stage '5' has '4' cases of ambiguity: the first is of either 'motivation' (PR) or 'justify' (PR), the second is between 'conjunction' (SM) or 'elaboration' (SM), the third is between 'conjunction' (SM) or 'elaboration' (SM) and the fourth is also between 'conjunction' (SM) or 'elaboration';
- stage '6' has '5' ambiguities: the first is of either 'justify' (PR) or 'preparation' (PR), the second is between 'elaboration' (SM) or 'antithesis' (PR), the third is between 'elaboration' (SM) or 'antithesis' (PR), the fourth is also between 'elaboration' (SM) or 'antithesis' (PR), and the fifth is between 'summary' (PR) or 'evaluation' (SM).

4. Single EDUs are used to express a relation, as clear in many instances such as: S EDU (#8) which is 'elaboration' to N EDU(#7) in stage '1'. The number of such cases is '60' cases. This refers also to the fact that single a TL is used to syntactically realise a relation.

5. Several EDUs are united together to express a relation, as in 'list' Rhe R expressed in stage '1': EDUs (#3-9). The number of such instances is '85' cases. This can also refer to the fact that some TLs are employed to syntactically realise a relation.

6. Stages '1-3' are employed as 'justify' or 'preparation' for the ultimate E (intention of W) presented in stages '4-6'. Stage '1' sets the 'background' to stages '2-3'. Stage '3' is 'elaboration' to stage '2'. Stages '4-5' are used to show 'preparation' to stage '6'. Stage '5' is 'elaboration' to stage '4'.

5.2.3.3.1.3 Text Three (Ṣaḥīfa Text No. 13)

The discourse structure of this text is stated in the table below:

91	92-94	elaboration	SM	c1+c1+b2	R recognises & identifies Ss as additional details for the subject matter in Ns.
92	93-94	elaboration	SM	c1+b2	
93 94		conjunction	SM	c1+ b2	Conjoined items are united together where each plays its role.
95-97	98	justify or volitional cause	PR SM	a2	R accepting W's right to express N is increased or R recognises S as a cause for the deliberate action in N.
95-96 97		conjunction	SM	b2+f7+ b2	Conjoined items are united together where each plays its role.
95	96	elaboration	SM	f7	R recognises & identifies S as additional details for the subject matter in N.
99-100 101-106		conjunction	SM	a2+b2+ b2+b2+b2+f7+f7+ a2	Conjoined items are united together where each plays its role.
99 100		conjunction	SM	a2+ b2	
101-102 103-106		conjunction	SM	b2+b2+ b2+f7+f7+a2	
101 102		conjunction	SM	b2+ b2	

	103	104-106	means	SM	f7+f7+a2	R recognises that the instrument/method in S realises the subject matters in N.
	104 105-106		conjunction	SM	f7+ f7+a2	Conjoined items are united together where each plays its role.
	105	106	elaboration	SM	a2	R recognises & identifies S as additional details for the subject matter in N.

Accordingly, the generic stages, Rhe Rs, and their Es are shown below:

Table (5.19): Generic Stages, Rhe Rs, and their Es of Text Three (Şahîfa Text No. 13).

Stage	E(s)
'1-3' vs. '4'	Stages '1-3' are either in 'preparation' Rhe R to stage '4': R is more ready, interested or oriented for reading N or in 'justify' Rhe R: R accepting W's right to express N is increased.
1. (#1-31)	It is in background' Rhe R to stages '2-3': R's understanding of N is increased & facilitated.
2. (#32-52)	-----
3. (#53-62)	It is in 'volitional result' Rhe R to stage '2': R recognises that N might be the cause behind the deliberate action or situation in S.
4. (#63-106)	-----

Some observations are noticed in this analysis:

1.SM Rhe Rs are '96' in number; '56' of them are multinuclear Rhe Rs and '40' are mononuclear ones. According to occurrence in the four stages, they are distributed as follows:

- '56' cases of conjunction (multinuclear) Rhe R;
- 21' cases of elaboration Rhe R;
- '11' instances of means Rhe R;
- '4' cases of circumstance Rhe R;

- '2' instances of condition Rhe R;
- '1' case of disjunction (multinuclear) Rhe R;
- '1' case of interpretation Rhe R;
- '1' instance of volitional cause Rhe R.

2. Only '1' PR Rhe R is used in this text. It is preparation.

3. Instances of ambiguous cases are below:

- stage '3' has and '2' cases of ambiguity: the first is of either 'means' (SM) or 'volitional cause' (SM), the second is also between 'means' (SM) or 'volitional cause' (SM);
- stage '4' has '2' ambiguities: the first is of either 'background' (PR) or 'preparation' (PR), and the second is between 'justify' (PR) or 'volitional cause' (SM).

4. Single EDUs are used to express a relation, as clear in many instances such as: S EDU (#4) which is 'means' to N EDU (#3) in stage '1'. The number of such cases is '32' cases. This refers also to the fact that a single TL is used to syntactically realise a relation.

5. Several EDUs are united together to express a relation, as in 'conjunction' Rhe R expressed in stage '1': EDUs (#1-16). The number of such instances is '70' cases. This can also refer to the fact that some TLs are employed to syntactically realise a relation.

6. Stages '1-3' are either in 'preparation' Rhe R to stage '4' or in 'justify' Rhe R. Stage '1' sets the 'background' to stages '2-3'. Stage '3' is 'volitional result' to stage '2'.

5.2.3.3.2 Declarative Praise (i.e., Thanksgiving) Texts

5.2.3.3.2.1 Text Four (Ṣaḥīfa Text No. 1)

The discourse structure of this text is stated in the table below:

Accordingly, the generic stages, Rhe Rs, and their Es are shown below:

Table (5.21): Generic Stages, Rhe Rs, and their Es of Text Four (Şahîfa Text No. 1).

Stage	E(s)
'1-3' vs. '4-6'	Stages '1-3' are in 'conjunction' Rhe R to stages '4-6': Conjoined items are united together where each plays its role.
1. (#1-42)	Stages '1-2' are either in 'background' Rhe R to stage '3': R's understanding of N is increased & facilitated or in 'justify' Rhe R: R accepting W's right to express N is increased.
2. (#43-58)	Stage '1' is in 'conjunction' Rhe R to stage '2': Conjoined items are united together where each plays its role.
3. (#59-112)	-----
4. (#113-159)	Stages '4-5' are either in 'background' Rhe R to stage '6': R's understanding of N is increased & facilitated or in 'justify' Rhe R: R accepting W's right to express N is increased.
5. (#160-185)	Stage '4' is in 'conjunction' Rhe R to stage '5': Conjoined items are united together where each plays its role.
6. (#186-228)	-----

Some observations are noticed in this analysis:

1. SM Rhe Rs are '195' in number; '75' of them are multinuclear Rhe Rs and '120' are mononuclear ones. According to occurrence in the six stages, they are distributed as follows:

- '78' cases of elaboration Rhe R;
- '73' cases of conjunction (multinuclear) Rhe R;
- '16' instances of means Rhe R;
- '12' cases of circumstance Rhe R;
- '6' instances of condition Rhe R;
- '3' cases of purpose Rhe R;
- '2' instances of evaluation Rhe R.
- '2' cases of volitional result Rhe R;
- '1' case of contrast (multinuclear) Rhe R;
- '1' instance disjunction (multinuclear) Rhe R;
- '1' instance of interpretation Rhe R.

2. No PR Rhe Rs are used in this text.

3. Instances of ambiguous cases are below:

- stage '1' has '3' cases of ambiguity: the first is of either 'interpretation' (SM) or 'non-volitional result' (SM), the second is also between 'interpretation' (SM) or 'non-volitional result' (SM), and the third is between 'elaboration' (SM) or 'purpose' or 'volitional cause' (SM);
- stage '1' has '1' cases of ambiguity: it is of either 'elaboration' (SM) or 'antithesis' (PR);
- stage '3' has '9' cases of ambiguity: the first six ambiguities are between 'elaboration' Rhe Rs (SM) or 'conjunction' ones (SM), the seventh is

between 'conjunction' (SM) or 'multinuclear restatement' (SM), the eighth is between 'volitional result' (SM) or 'conjunction' (SM), and the ninth is either of 'volitional result' (SM) or 'conjunction' (SM);

- stage '4' has '5' ambiguities: the first is of either 'interpretation' (SM) or 'non-volitional result' (SM), the second is between 'elaboration' (SM) or 'means' (SM), the third is also between 'elaboration' (SM) or 'means' (SM), the fourth is of either 'elaboration' (SM) or 'volitional cause' (SM) or 'purpose' (SM), and the fifth is also between 'elaboration' (SM) or 'volitional cause' (SM) or 'purpose' (SM);

- stage '5' has '4' ambiguity cases: the first is between 'evidence' (PR) or 'interpretation' (SM), while the second, the third, and the fourth are between elaboration (SM) Rhe R or 'antithesis'(PR) ;

- stage '6' has '5' ambiguities: the first four are of either 'elaboration' Rhe Rs (SM) or a number of 'conjunction' ones (SM), and the fifth is between is 'justify' (PR) or 'evaluation' (SM) or 'volitional cause' (SM).

4. Single EDUs are used to express a relation, as clear in many instances such as: S EDU (#7) which is 'means' to N EDU (#6) in stage '1'. The number of such cases is '84' cases. This refers also to the fact that a single TL is used to syntactically realise a relation.

5. Several EDUs are united together to express a relation, as in 'conjunction' Rhe R expressed in stage '1': EDUs (#1-42). The number of such instances is '138' cases. Two cases of ambiguities are noticed here: the first is the single EDU (#88) which is related to the EDUs (#86-87) in either 'volitional result' or 'conjunction'. The second case is where the single EDU (#91) is related to the EDUs (#89-90) in either 'volitional result' or 'conjunction', too. This can also refer to the fact that certain TLs are employed to syntactically realise a relation.

6. Stages '1-3' are in 'conjunction' Rhe R to stages '4-6'. Stages '1-2' either set the 'background' or present 'justify' to stage '3'. Stages '1' and '2' are in 'conjunction' to each other. As for stages '4-5', they also set the

'background' or present 'justify' to stage '6'. Stages '4' and '5' are in 'conjunction' to each other, too.

5.2.3.3.2.2 Text Five (Şahîfa Text No. 37)

The discourse structure is stated in the table below:

Table (5.22): The Discourse Structure of Text Five (Şahîfa Text No. 37).

	106	107	elaboration	SM	f7	R recognises & identifies S as additional details for the subject matter in N.
	110- 115	109	background or preparation or motivation	PR PR PR	a1	R's understanding of N is increased & facilitated or R is more ready, interested or oriented for reading N or R's intended desire to perform the action in N is increased.
	110- 114	115	justify or evaluation or volitional cause	PR SM SM	a2	R accepting W's right to express N is increased or R recognises that S can assess & identify the value of N or R recognises S as a cause for the deliberate action in N.
	110-111 112-114		conjunction	SM	b2+f7+ b2+d+f7	Conjoined items are united together where each plays its role.
	110	111	elaboration	SM	f7	R recognises & identifies Ss as additional details for the subject matter in Ns.
	112	113- 114	elaboration	SM	d+f7	
	113	114	elaboration	SM	f7	

Accordingly, the generic stages, Rhe Rs, and their Es are shown below:

Table (5.23): Generic Stages, Rhe Rs, and their Es of Text Five (Şahîfa Text 37).

Stage	E(s)
'1-5' vs. '6'	Stages '1-5' are either in 'preparation' Rhe R to stage '6': R is more ready, interested or oriented for reading N or in 'justify' Rhe R to stage '6': R accepting W's right to express N is increased.
'1-2' vs. '3-5'	Stages '1-2' are either in 'background' Rhe R to stages '3-5': R's understanding of N is increased & facilitated or in 'justify' Rhe R to stages '3-5': R accepting W's right to express N is increased.
1. (#1-29)	Stage '1' is in 'conjunction' Rhe R to stage '2': Conjoined items are united together where each plays its role.
2. (#30-50)	-----
3. (#51-59)	-----
'3' vs. '4-5'	Stages '4-5' are in 'elaboration' Rhe R to stage '3': R recognises & identifies Ss as additional details for the subject matter in N.
4. (#60-82)	Stage '4' is in 'contrast' Rhe R with stage '5': R recognises the comparability and difference(s) shown by comparison of situations. It is also in 'enablement' (i.e., R's ability to perform the action presented in N is increased.
5. (#83-98)	-----
6. (#99-115)	-----

Some observations are noticed in this analysis:

1. SM Rhe Rs are '99' in number; '37' of them are multinuclear Rhe Rs and '62' are mononuclear ones. According to occurrence in the six stages, they are distributed as follows:

- '40' cases of elaboration Rhe R;
- '36' cases of conjunction (multinuclear) Rhe R;
- '7' instances of condition Rhe R;
- '4' cases of circumstance Rhe R;
- '4' instances of means Rhe R;
- '4' cases of volitional cause Rhe R;

- '1' instance of disjunction (multinuclear) Rhe R;
- '1' instance of evaluation Rhe R;
- '1' instance of interpretation Rhe R;
- '1' case of purpose Rhe R.

2. Two PR Rhe Rs are used in this text:

- '1' instance of antithesis Rhe R;
- '1' case of justify Rhe R.

3. Instances of ambiguous cases are below:

- stage '1' has '2' ambiguities: both cases are either between 'elaboration' (SM) or 'antithesis' (PR) Rhe Rs;
- stage '4' has '1' case of ambiguity: which is of either 'purpose' (SM) or 'interpretation' (SM) or 'volitional cause' (SM);
- stage '5' has also '1' ambiguity : it is between 'interpretation' (SM) or 'volitional cause' (SM);
- stage '6' has '4' ambiguities: the first is of either 'background' (PR) or 'preparation' (PR) or 'motivation' (PR), the second is between 'justify' (PR) or 'evaluation' (SM) or 'volitional cause' (SM), and two cases where both are either between 'elaboration' (SM) or 'antithesis' (PR) Rhe Rs.

4. Single EDUs are used to express a relation, as clear in many instances such as: S EDU (#7) which is 'elaboration' to N EDU (#6) in stage '1'. The number of such cases is '44' cases. This refers also to the fact that a single TL is used to syntactically realise a relation.

5. Several EDUs are united together to express a relation, as in 'conjunction' Rhe R expressed in stage '1': EDUs (#1-8). The number of such instances is '65' cases. This can also refer to the fact that some TLs are employed to syntactically realise a relation.

6. Stages '1-5' are either in 'preparation' or 'justify' Rhe R to stage '6'. Stages '1-2' either set the 'background' or present 'justify' to stages '3-5'. Stages '1' and '2' are in 'conjunction' to each other. As for stages '4-5', they act as 'elaboration' to stage '3'. Stages '4' and '5' are in 'contrast' to each other.

5.2.3.3.2.3 Text Six (Şahîfa Text No. 51)

The discourse structure is represented in the table below:

Table (5.24): The Discourse Structure of Text Six (Şahîfa Text No. 51).

	134 135		conjunction	SM	e+ e	Conjoined items are united together where each plays its role.
	136	137	condition	SM	e	R recognises how the realisation of N depends on the realisation of S.

Accordingly, the generic stages, Rhe Rs, and their Es are shown below:

Table (5.25): Generic Stages, Rhe Rs, and their Es of Text Six (Şahīfa Text 51).

Stage	E(s)
'1-2' vs. '3-5'	Stages '1-2' are either in 'background' Rhe R to stages '3-5': R's understanding of N is Rhe R increased & facilitated or in 'preparation' Rhe R to stages '3-5': R is more ready, interested or oriented for reading N.
1. (#1-27)	-----
2. (#28-53)	It is either in 'elaboration' Rhe R to stage '1': R recognises & identifies S as additional details for the subject matter in N or in 'motivation' Rhe R: R's intended desire to perform the action in N is increased.
3. (#54-98)	Stage '3' is 'conjunction' Rhe R with stage '4': Conjoined items are united together where each plays its role.
4. (#99-129)	-----
5. (#130-137)	It is in 'summary' Rhe R to stages '3-4': R recognises S as a shorter restatement of N.

Some observations are noticed in this analysis:

1. SM Rhe Rs are '115' in number; '52' of them are multinuclear Rhe Rs and '63' are mononuclear ones. According to occurrence in the five stages, they are distributed as follows:

- '50' cases of conjunction (multinuclear) Rhe R;
- '30' cases of elaboration Rhe R;
- '14' cases of volitional result Rhe R;
- '8' cases of circumstance Rhe R;
- '5' instances of condition Rhe R;
- '2' instances of contrast (multinuclear) Rhe R;
- '2' instances of means Rhe R;
- '1' instance of evaluation Rhe R;
- '1' instance of interpretation Rhe R;
- '1' instance of non-volitional result Rhe R;

- '1' instance of volitional cause Rhe R.

2. '5' PR Rhe Rs are used in this text. They are:

- '2' instances of background Rhe R;
- '3' instances of preparation Rhe R.

3. Instances of ambiguous cases are below:

- stage '3' has '2' cases of ambiguity: either a set of two 'elaboration' Rhe Rs (SM) or two 'conjunction' ones (SM);
- stage '4' has '10' ambiguities: the first seven are between a group of 'elaboration' Rhe Rs (SM) or a number of 'conjunction' ones (SM), the eighth is between 'evidence' (PR) or 'justify' (PR), the ninth is between 'restatement' (PR) or 'summary' (PR), and the tenth is of either 'volitional result' (SM) or 'sequence' (SM).

4. Single EDUs are used to express a relation, as clear in many instances such as: S EDU (#10) which is 'elaboration' to N EDU (#9) in stage '1'. The number of such cases is '50' cases. This refers also to the fact that a single TL is used to syntactically realise a relation.

5. Several EDUs are united together to express a relation, as in 'conjunction' Rhe R expressed in stage '1': EDUs (#21-27). The number of such instances is '82' cases. Two cases of ambiguities are noticed here: the first is the single N EDU (#99) which is related to the S EDUs (#100-106) in either 'elaboration' or 'conjunction'. The second case is where the single EDU (#117) is related to the EDU (#106) in either 'volitional result' or 'sequence'. This can also refer to the fact that some TLs are employed to syntactically realise a relation.

6. Stages '1-2' either set the 'background' or act as 'preparation' to stage '3-5'. Stages '2' can act as either 'elaboration' or 'motivation' to stage '1'. Stage '5' is a 'summary' to stages '3-4' which are themselves in 'conjunction' to each other.

5.2.3.4 Discourse Structure Discussion

Two parameters are activated in this level of analysis. CSs of the Rhe Rs used in the data are revealed and discussed here. In addition, the rhetorical hierarchy (i.e., rhetorical coordination versus subordination of discourse EDUs units) is also to be subsequently analysed.

5.2.3.4.1 CS and Rhe Rs

Two CSs have been shown in the six texts of the Arabic data: SM (i.e., EDUs are related to other EDUs in terms of semantic information) and PR (i.e., EDUs are related to other EDUs in terms of pragmatic intentions). The following table shows Rhe Rs in these two terms stating the basic numbers and percentages:

Table (5.26): The Basic Numbers and Percentages of Rhe Rs.

CS	Number of Rhe Rs	Percentage
SM	688	89.817%
PR	12	1.665%
Ambiguous	66	8.616%
Total	766	-----

As clear from the table, too much focus is upon SM CS represented by 'SM' Rhe Rs with (688) cases and (89.817%) as percentage. Only (12), with (1.665%), Rhe Rs are PR in their CS. Ambiguous cases are also noticed. '66' cases, with (8.616%), are shown. Another distribution of these Rhe Rs can be shown in terms of whether 'SM' Rs are 'mononuclear' or 'multinuclear'. Numbers and percentages are below:

Table (5.27): The Distribution of Mononuclear and Multinuclear Rhe Rs.

SM Rhe Rs	Number	Percentage	Percentage
Mononuclear	360	52.325%	46.997%
Multinuclear	328	47.674%	42.819%

Two percentages are given for these Rhe Rs; first in terms of their total (688), and second in terms of the total number of Rhe Rs in the data (766). The table reads that mononuclear Rhe Rs are used highly in the data. Multinuclear ones have also been recognised as nearly the same as mononuclear ones. A very detailed redistribution of these occurrences would tell of the more and less frequent mononuclear and multinuclear SM Rhe Rs. Consider this table:

Table (5.28): The Redistribution SM Mononuclear of Rhe Rs.

CS	Rhe R	Number	Percentage	Percentage
SM Mononuclear	elaboration	219	60.833%	28.590%
	means	44	12.222%	5.744%
	circumstance	36	10%	4.699%
	condition	19	5.277%	2.488%
	volitional result	17	4.722%	2.219%
	volitional cause	11	3.055%	1.436%
	purpose	5	1.388%	0.652%
	evaluation	4	1.111%	0.522%
	interpretation	4	1.111%%	0.522%
	non-volitional result	1	0.277%	0.130%
Total:	10	360	-----	-----

and:

Table (5.29): The Redistribution SM Multinuclear Rhe Rs.

CS	Rhe R	Number	Percentage	Percentage
SM Multinuclear	conjunction	314	95.73%	40.992%
	disjunction	09	2.743%	1.174%
	contrast	04	1.219%	0.522%
	list	01	0.304%	0.130%
Total:	04	328	-----	-----

Two percentages are identified in each table; the first is due to the total number of 'mononuclear' (i.e., 360 cases) or 'multinuclear' (i.e., 328 cases) SM Rhe Rs, and the second is due to all the Rhe Rs present in the

data (i.e., 766). Only '14' out of '22' SM Rhe Rs, adopted in this study, are recognised in the data.

The five most frequent mononuclear Rhe Rs are:

1. elaboration, realised through some nominal(ised) constructions such as (f 7: prepositional phrase), (c 1:subordinate clause; circumstantial qualifier), etc., or even through a group of TLs;
2. means, realised through some nominal(ised) constructions such as (f 7: prepositional phrase), (c 1:subordinate clause; circumstantial qualifier), etc.;
3. circumstance, realised through some nominal(ised) constructions such as (f 3: adverb/adverbial), (f 7: prepositional phrase), etc., or a group of TLs;
4. condition, realised through conditional clause (e) or via other TLs together;
5. volitional result; coordinate clause (b 1 or 2) or independent sentence (a 1) or other TLs are used to realise this Rhe R.

Possible motives that Rs can find behind the frequency attached to these five SM mononuclear Rhe Rs in the table above are, respectively:

1. the actor uses any additional elaborations (member, instance, part, step, attribute, specific, etc.) as participating to making the subjects matters he intends in Ns recognisably clear and understood;
2. the actor aims to identify the instrument/method, whether literally or metaphorically, used to realise the subject matters in Ns;
3. he tries to devise the setting for his requests, petitions, asking, in order to enable Rs to interpret the contexts presented in Ns;
4. he recognises that the realisation of the hypothetical, future, or unrealised situation in Ns depends on the realisation of that situation presented in Ss;

5. he prefers to recognise that Ns might be the causes behind any deliberate actions or situations, on his part, in Ss.

Other less frequent SM mononuclear Rhe Rs are shown in the table. They can be realised through the different TLs shown in the tables for each discourse structure under the column 'TL'. They also have their motivations or intentions, such as:

6. volitional cause: Ss are taken as causes for the deliberate actions in Ns;

7. purpose: Rs recognise that activities in Ns are initiated in order to realise Ss;

8. evaluation: Rs are able to assess the situations in Ns and their values via Ss;

9. interpretation: Ss can interpret the framework of situations or knowledge presented in Ns;

10. non-volitional result: Rs recognise that situations presented in Ns might have caused the actions or situations described in Ss;

The most frequent multinuclear Rhe R is 'conjunction' which can be realised through:

a. coordinate clause (b 1 or 2);

b. other TLs coordinated together such as (f 3: adverb/adverbial) + (f 7: prepositional phrase), etc.; or

c. a group of TLs used together.

Other multinuclear Rhe Rs are noticed:

2. disjunction, coordinate clause (b 1 or 2);

3. contrast, usually several TLs are coordinated together to realise this Rhe R, such as (a1: independent sentence) + (c1: subordinate clause);

4. list, realised through a group of TLs are also used.

Rs can find some of the reasons for the frequency of the SM multinuclear Rhe Rs in the table above, respectively:

1. using conjunction enables the devoted individual to consider the conjoined items as united together where each plays a role in the context and progression of text and serves the desired effect;
2. the linked items are used to show that they are not-necessarily-exclusive alternatives for the other(s);
3. sometimes the suppliant intends to bring into play the different degrees that exist of the comparability through the comparison made in EDUs linked through contrast;
4. Rs are able to recognise the different degrees of comparability of the linked items.

The other CS is PR and Rhe Rs in the data show that only (12) cases are present. A detailed redistribution of these occurrences would tell of the more and less frequent PR Rhe Rs, as in the table below:

Table (5.30): The Redistribution of PR Rhe Rs.

CS	Rhe R	Number	Percentage	Percentage
PR	Preparation	04	33.333%	0.522%
	Background	03	25%	0.391%
	Justify	03	25%	0.391%
	antithesis	01	8.333%	0.130%
	motivation	01	8.333%	0.130%
Total:	05	12	-----	-----

Two percentages are uncovered in each table; the first is due to the total number of PR Rhe Rs (i.e., 12 cases), and the second is due to all the Rhe Rs present in the data (i.e., 766). '05' out of '10' PR Rhe Rs, adopted in this study, are employed in the data. The frequency of these Rhe Rs is stated as:

1. preparation, realised by nominal(ised) constructions such as (f 8:vocative) or other TLs grouped together;
2. background, realised by TLs grouped together;
3. justify, realised by TLs grouped together;
4. antithesis, realised also by TLs grouped together;
5. motivation, realised by a group of TLs.

However, Rs can identify some intentions behind using each of these relations, respectively:

1. Rs are made more ready or oriented or interested for reading Ns;
2. R's understandings of Ns are recognised and facilitated;
3. Rs accepting W's rights to express N are increased;
4. the intended desires of Rs to perform the actions in Ns are increased;
5. Rs desires to perform the action in Ns are increased.

Ambiguity has also been identified; '66' cases are discovered. In this regard, ambiguity might possibly rise in the multiple analyses out of several reasons: textual structure ambiguity, 'simultaneous analyses' of compatible degrees, or differences in 'plausibility judgements'. The table below shows the cases and their percentages in the six texts under analysis:

Table (5.31): Ambiguity Cases and their Percentages in the Analysed Arabic Data.

Text	Rhe Rs in Text	Ambiguity Cases	Percentage	Percentage	Percentage
1	56	03	5.357%	4.545%	0.391%
2	145	12	8.275%	18.181%	1.566%
3	102	04	3.921%	6.060%	0.522%
4	222	27	12.126%	40.909%	3.524%
5	109	08	7.339%	12.121%	1.044%

6	132	12	9.090%	18.181%	1.566%
Total:	766	66	-----	-----	-----

The first column in the table lists the six texts. The second column contains the number of Rhe Rs in each text. The third is related to cases of ambiguity in each text. Three types of percentages are recognised in the last three columns. The first percentage is related to ambiguity in each analysed text. The second one shows ambiguity in relation to the total number of such cases; (66). The third one represents ambiguity with regard to all Rhe Rs in the data; (66) cases with (8.616%). To be more precise, the whole percentage of liability of analysis with complete clarity and ease of achievement in the terms this study presents is (91.383 %). The rest of percentage is for ambiguity, only (8.616%), which can be distributed from the more frequent to the less frequent: '4' (thanksgiving text), '2' (lament text) and '6' (thanksgiving text), '5' (thanksgiving text), '3', and '1' (lament texts).

According to the framework of the study, the stages of each text in the data are first analysed and the content of each stage is outlined. In addition, the analysis re-proceeds with this course of action in terms of the Rhe Rs that link all the text stages together and the Es on Rs. The following table outlines some basic numbers and percentages related to generic structures of the Arabic data:

Table (5.32): The Basic Distribution of GSPs and their Rhe Rs.

GSP	Texts	Number of Stages	Number of Rhe Rs
1	3	14	11
2	3	17	14
Total:		31	25

The six texts are distributed over two GSPs; the first '3' texts are under GSP '1', with '14' stages and '11' Rhe Rs, and the second '3' texts, with '17' stages and '14' Rhe Rs, are under GSP '2'. Some Rhe Rs are clearly

uncovered while others are liable to multiple readings; i.e., ambiguous. To redistribute in detail, consider the following table:

Table (5.33): The Detailed Distribution of GSP and their Rhe Rs.

GSP	Number of Rhe Rs	Clear Cases	Percentage	Ambiguous Cases	Percentage
1	11	08	32%	03	12%
2	14	08	32%	06	24%
Total:	25	16	64%	09	36%

The two percentages are presented due to the total number of ambiguity and clarity cases in the generic structures of all texts in the data. Ambiguity in this table is between two parts of a Rhe R, such as 'background' and 'summary'. Clarity and ease of analysis are also dominant.

5.2.3.4.2 Rhetorical Hierarchy

Syntactic dependency relations of coordination and subordination have been analysed under 'text structure' in each text. However, this part is set to prove whether EDUs can also be rhetorically coordinated or subordinated due to their co-textual salience. This is referred to as 'hierarchy', as presented in Gylling (2013: 146).

If the Arabic data is deeply investigated, opposite evidence can be noticed where syntactic subordination may show rhetorical coordination in which some Rhe Rs are brought together as one unit in order to achieve some degree of balance of the composite elements of the Rhe R. Many examples can be found in the data. Consider the examples below:

7. EDUs (#19-24) [بِك] [وَرَامَ صَرَفَ الْفَقْرَ عَنْ نَفْسِهِ] [مِنْ عِنْدِكَ] [فَمَنْ حَاوَلَ سَدَّ خَلَّتِهِ] [وَمَنْ] [وَأَتَى طَلِبَتَهُ مِنْ وَجْهِهَا] [فَقَدْ طَلَبَ حَاجَتَهُ فِي مَظَانِّهَا] [فَقَدْ تَعَرَّضَ لِلْحِزْمَانِ] [لِدُونِكَ] [أَوْ جَعَلَهُ سَبَبَ نُجْحِهَا] [مِنْ خَلْقِكَ] [تَوَجَّهَ بِحَاجَتِهِ إِلَى أَحَدٍ] [فَوَثَّ الْإِحْسَانِ...وَأَسْتَحَقَّ] [مِنْ عِنْدِكَ], text '3'.

The Rhe R is 'conjunction' which means that the conjoined items are brought together where each plays its role. The TLs of this Rhe R are $(e+f7+b2+f7+e+b2) + (e+f7+e+f3+e+e+f7)$. They occur as two groups of conditional clauses within the domain of subordination in the Arabic deverbalisation scale. These EDUs unite together to assume rhetorical coordination that also contains other Rhe Rs inside each part.

8. EDUs (#3-8) [وَجَزِيلٍ] [عَلَيَّ] [وَأَسْبَغَ نَعْمَانِكَ،] [إِلَيَّ] [عَلَى حُسْنِ صَنِيعِكَ] and EDUs (#9-12) [وَأَسْبَغَتْ] [مِنْ رَحْمَتِكَ] [وَعَلَى مَا فَضَّلْتَنِي بِهِ] [عِنْدِي] [عَطَانِكَ،] [مِنْ نِعْمَتِكَ] [عَلَيَّ]... text '6'.

The Rhe R is also 'conjunction' which means that the conjoined items are brought together where each plays its role. The TLs of this Rhe R are $(f4+f7+f4+f7+f4+f3) + (f4+f7+b2+f7)$. They occur as two groups within the domain of subordination in the Arabic deverbalisation scale. These EDUs unite together to assume rhetorical coordination that also contain other Rhe Rs inside each part.

In contrast, syntactic coordination may assume a rhetorical subordination which changes independent clauses into dependent clauses having less semantic and rhetorical E if compared to their independent clauses. Consider the examples below:

9. N EDU (#85) [عِنْدَ مَوَاقِفِ الْأَشْهَادِ] and S EDUs (#86-91) [يَوْمَ تُجْزَى كُلُّ نَفْسٍ] [وَلَا هُمْ] [عَنْ مَوْلَى] [يَوْمَ لَا يُغْنِي مَوْلَى... شَيْئاً،] [وَهُمْ لَا يُظْلَمُونَ] [بِمَا كَسَبَتْ] [،] [يُنْصَرُونَ]... text '4'

The Rhe R is 'elaboration' (i.e., R recognises and identifies S as additional details for the subject matters in Ns). However, within the S EDUs, two syntactically coordinated EDUs are seen, EDUs (#86-88) and (#89-91), in either 'conjunction' or 'multinuclear restatement' Rhe R. Still within EDUs (#86-88), there is either a 'volitional result' Rhe R or 'conjunction' one that links EDU (#88), with TL (b2), to (#86-87), with TLs $(f2+f7)$. Thus, in 'volitional result' reading, two EDUs are coordinated but they may express a relation that pertains to rhetorical subordination.

10. N EDUs (#60-62) [لَا وَشَكَ أَنْ يَفْقَدَ ثَوَابِكَ ، [وَلَوْ كَافَأَتِ الْمُطِيعَ عَلَى مَا أَنْتَ تَوَلَّيْتَهُ] and S EDUs (#63-67) [وَلَكِنَّكَ...جَازَيْتَهُ بِالْمُدَّةِ...الطَّوِيلَةِ] [وَأَنْ تَرْوُلَ عَنْهُ نِعْمَتُكَ، عَلَى الْعَايَةِ الْقَرِيبَةِ] [وَبِالْعَايَةِ...الْمَدِيدَةِ الْبَاقِيَةِ]. [عَلَى الْمُدَّةِ الْقَصِيرَةِ الْفَانِيَةِ] [بِكَرَمِكَ] [الْخَالِدَةِ، الزَّائِلَةِ], text '5'

These EDUs are conjoined together but, nevertheless, are not rhetorically coordinated; they are subordinated rhetorically to result in 'antithesis' Rhe R realised by the TLs (b2+f7+f7+b2+f7).

To sum up, rhetorical coordination does not always assume syntactic coordination. At the same time, syntactic subordination may not correspond to rhetorical subordination, though not often.

5.2.3.5 Information Structure Analysis and Discussion

Two parameters are analysed in this level: linkage of EDUs and signalling of Rhe Rs. These two are presented together for all texts of the Arabic data.

5.2.3.5.1 Linkage of EDUs

A widely assumed linguistic, stylistic, and rhetorical fact is that long-sentencing texts, in words and EDUs, are *"more difficult to understand, less reader-oriented and denser..."* than short-sentencing texts (Gylling, 2013: 162). On the other hand, texts with short sentences or with lengths that are unvaried might be considered *"fragmented or incoherent,..."* (ibid.). The selected texts are analysed to testify these two assumed facts: to discover whether or not EDUs of the texts are related to other EDUs inside or across the sentence boundary, and, therefore, whether long- or short-sentencing is prevalent. As shaped by the procedures of the framework in this part, the first step to take is to point out the tendency towards a positive or negative correlation between the number of words in sentences and number of EDUs in the texts in order to uncover the mean sentence length.

The numbers of words, of sentences, and of EDUs in the selected data are stated in the table below. In addition, the mean numbers of words per sentence, text, and per EDU are also recorded. The mean sentences per text and the mean EDUs per sentence are revealed, too. Consider the following table:

Table (5.34): The Mean Number of Selected Means.

Basic Numbers and Selected Means	Number and Percentage
Number of words	2627
Number of sentences	70
Number of EDUs	798
Mean words per sentence	37.528%
Mean words per text	437.833
Mean words per EDU	3.291%
Mean sentences per text	11.666%
Mean EDUs per sentence	11.4%

In terms of percentages, the data shows that the mean number of words per sentence, which also refers to the mean sentence length, is (37.528%). In addition, the mean number of words per text is (437.833), and per EDU is (3.291%). Accordingly, the percentage of mean sentences per text is (11.666%) and the percentage of mean EDUs per sentence is (11.4%). To investigate this issue in detail, EDUs in the data are distributed per the sentences of the six texts in the following way:

Table (5.35): The Distribution of EDU-Sentence.

EDU-Sentence	Number of Cases	Percentage	Percentage
One-EDU Sentence	04	0.501%	5.714%
Two-EDU Sentence	02	0.250%	2.857%
Three-EDU Sentence	05	0.250%	7.142%
Four-EDU Sentence	02	0.250%	2.857%
Five-EDU Sentence	08	1.002%	11.428%
Six-EDU Sentence	08	1.002%	11.428%

Seven-EDU Sentence	05	0.626%	7.142%
Eight-EDU Sentence	04	0.501%	5.714%
Nine-EDU Sentence	02	0.250%	2.857%
Ten-EDU Sentence	04	0.501%	5.714%
Eleven-EDU Sentence	03	0.375%	4.285%
Twelve-EDU Sentence	03	0.375%	4.285%
Thirteen-EDU Sentence	01	0.125%	1.428%
Fourteen-EDU Sentence	03	0.375%	4.285%
Sixteen-EDU Sentence	03	0.375%	4.285%
Nineteen-EDU Sentence	02	0.250%	2.857%
Twenty-EDU Sentence	01	0.125%	1.428%
Twenty Three-EDU Sentence	01	0.125%	1.428%
Twenty Four-EDU Sentence	01	0.125%	1.428%
Twenty Five-EDU Sentence	01	0.125%	1.428%
Thirty-EDU Sentence	02	0.250%	2.857%
Thirty One-EDU Sentence	01	0.125%	1.428%
Thirty Nine-EDU Sentence	01	0.125%	1.428%
Forty Two-EDU Sentence	01	0.125%	1.428%
Fifty Four-EDU Sentence	01	0.125%	1.428%
Total:	70	-----	-----

Two percentages can be stated: first in terms of the total number of EDUs (798), and second in terms of sentences (70). The distribution clearly shows that 'Five-EDU Sentence' and 'Six-EDU Sentence' represent the first position; (1.002%) and (11.428%) with (8) cases for each. The second position is represented by 'Three-EDU Sentence' and 'Seven-EDU Sentence'; (0.626%) and (7.142%) with (5) cases for each. Cases of 'One-EDU Sentence', 'Eight-EDU Sentence', and 'Ten-EDU Sentence' are in the third position; (0.501%) and (5.714%) with (4) cases for each. The fourth position is occupied by 'Eleven-EDU Sentence', 'Twelve-EDU Sentence', 'Fourteen-EDU Sentence', and 'Sixteen-EDU Sentence'; (0.375) and (4.285) with (3) cases for each. The fifth position is reserved for 'Two-EDU Sentence', 'Four-EDU Sentence', 'Nine-EDU Sentence', 'Nineteen-EDU Sentence', and 'Thirty-EDU Sentence'; (0.250%) and (2.857%) with (2) cases for each. The last rank is occupied by those

EDU-Sentences of only (01) case for each, as clear from the table. These numbers verify that long sentence length dominates in the data.

It is noticed from the numbers above that (66) cases, with (8.270%) and (94.285%), out of (798) EDUs and (70) sentences respectively, are sentences of more than one EDU. Much more information is packaged behind such concentration of EDUs. These EDUs depend on their nuclei and, thus cognitively, *"... play a less salient role in the discourse structure of the sentence than if the satellites had been textualised as independent sentences"* (Renkema,2004: 147, in Gylling,2013: 167). This is illustrated in the table below that relates to the linguistically structuring of EDUs of the data:

Table (5.36): The Distribution of Linguistic Structuring of EDUs.

TL	Number of Cases	Percentage
a. Independent sentence (verbal, nominal, interrogative)	89	11.152%
b. Coordinate construction and clause (asyndetic, syndetic)	336	42.105%
c. Subordinate construction and clause (circumstantial qualifiers and indefinite adjectival clauses, syndetic single, syndetic correlative, complementisers clauses)	25	3.132%
d. Adjectival and relative clauses	19	2.380%
e. Conditional clause (the condition, the result)	32	4.010%
f. Nominal(ised) construction and clause (adjective and adjectival qualification, apposition, adverb/ adverbial, dependent element, nominal argument, possessive/genitive construction and chain, prepositional phrase, vocative construction,miscellaneous)	262	32.832%
g. Exceptive construction	12	1.503%
h. Exclamation construction and clause	01	0.125%
Ambiguous	22	2.756%
Total	798	-----

If observed carefully, all EDUs in the data are inside their nominated functional sentence.

Two strategies can be elicited from the table; downgrading and upgrading information. Downgrading information packaged in EDUs can be shown when Ss are linguistically textualised as subordinate clauses, for instance. There are (709) such cases, represented by TLs (b-h) as applicable to the data, with (88.847%). Upgrading, on the contrary, can be seen when information packaged in EDUs is upgraded to an independent sentence, as in the (89) cases above with (11.152%).

5.2.3.5.2 Signalling Rhe Rs

Ws have the option to signal their texts by the use of some cues or prefer implicitness. In the case of explicit signalling, the purpose of Ws is either to highlight the structure of texts and organise their ideas or help Rs comprehend, process, and recall the content of their texts. Below is a survey of all the explicit linguistic DCs in the data under analysis, number of cases, and percentage, from the most frequent to the less frequent:

Table (5.37): The Distribution of Explicit DCs.

#	DC	Number of Cases	Percentage	#	DC	Number of Cases	Percentage
1	و	280	42.553%	18	قبل	03	0.455%
2	بـ	57	8.662%	19	لو	03	0.455%
3	لـ	40	6.079%		إذا	02	0.303%
4	من	36	5.471%		عَمَّا	02	0.303%
5	على	32	4.863%		فَيَمَّا	02	0.303%
6	في	23	3.495%		لام شرطية	02	0.303%
7	فَاء رابطة	20	3.039%		لدى	02	0.303%
8	الى	18	2.735%		ما	02	0.303%
9	فَاء سببية	16	2.431%		يوم	02	0.303%
10	عن	11	1.671%		أَمَّا شرطية	01	0.151%
11	عند	10	1.519%	20	إذ	01	0.151%
12	أو	09	1.367%		إن شرطية	01	0.151%
	إِلَّا	09	1.367%		إن...لا	01	0.151%
	الذي	09	1.367%		حتى	01	0.151%
13	ثم	08	1.215%		حتى إذا	01	0.151%

14	فاء شرطية	07	1.063%		حتى كأن	01	0.151%
15	فاء تعليلية	06	0.911%		حيث	01	0.151%
16	التي	05	0.759%		غير	01	0.151%
	بل	05	0.759%		سوى	01	0.151%
	لولا	05	0.759%		كـ	01	0.151%
17	فاء نتيجة	04	0.607%		لكي	01	0.151%
	مما	04	0.607%		من	01	0.151%
18	أم	03	0.455%		وذلك	01	0.151%
	حين	03	0.455%		وقت	01	0.151%
	دون	03	0.455%		Total:	658	-----

All the DCs used in the data are represented in the table, followed by number of occurrences, and frequencies.

However, explicit and implicit signalling between EDUs of the data are distributed the following way:

Table (5.38): The Distribution of Explicit and Implicit Signalling between EDUs.

Signalling	Number of Cases	Percentage
Explicit	658	85.900%
Implicit	108	14.099%
Total:	766	-----

Most of Rhe Rs are explicitly signalled; (658). This signalling refers to the idea of 'specification'; the presence of DCs between EDUs (Gylling,2013:180). On the contrary, implicit signalling, or 'underspecification', is (108) cases with (14.099%).

Those explicit DCs are either used to link EDUs inside one sentence (intrasentential) or across different sentences (intersentential). Some of these in the data are less frequent and the others are more frequent. The table below illustrates this:

Table (5.39): The Distribution of Explicit DCs in Intra- and Intersentential EDUs.

Explicit Signalling	Number of Cases	Percentage
DCs linking EDUs inside the same sentence	642	97.568%
DCs linking EDUs across different sentences	16	2.431%
Total:	658	-----

The vast majority of DCs are employed in the data to link EDUs intrasententially. Only very few cases are intersententially used. To further investigate this issue, the syntactic classes or linguistic items used as DCs are distributed over the following four classes or items:

Table (5.40): The Distribution of Syntactic Classes/Items Used as DCs.

Class or Item	Number of Cases	Percentage
Coordinators	325	49.392%
Prepositions	228	34.650%
Subordinators	85	12.917%
Adverbials	20	3.039%
Total:	658	-----

The tendency is to prefer coordinators linking different parts of the sentence, followed by prepositions heading their phrases and then subordinators. The lower frequency is reserved for adverbials. Except of coordinators, the total number of prepositions, subordinators, and adverbials used in the data is (333) with (50.607 %). These three classes or items can be seen as belonging to levels (c-h) in the deverbalisation scale applied earlier. They integrate EDUs to their nuclei to indicate subordination, which, in this case, is greatly balanced with coordination.

The distribution of explicit DCs can be reproduced to include their occurrence in relation to the deverbalisation scale, as in the following table:

Table (5.41): The Distribution of DCs in Relation to the Deverbalisation Scale.

TL	Number of Cases	Percentage
a. Independent sentence (verbal, nominal, interrogative)	31	4.711%
b. Coordinate construction and clause (asyndetic, syndetic)	268	40.729%
c. Subordinate construction and clause (circumstantial qualifiers and indefinite adjectival clauses, syndetic single, syndetic correlative, complementisers clauses)	08	1.215%
d. Adjectival and relative clauses	16	2.431%
e. Conditional clause (the condition, the result)	45	6.838%
f. Nominal(ised) construction and clause (adjective and adjectival qualification, apposition, adverb/ adverbial, dependent element, nominal argument, possessive/genitive construction and chain, prepositional phrase, vocative construction, miscellaneous)	275	41.793%
g. Exceptive construction	13	1.975%
h. Exclamation construction and clause	02	0.303%
Total	658	-----

Differences in number of cases and percentages are clear in the table. According to frequency, these DCs can be arranged from the most frequent to the less frequent as follows: (f), (b), (e), (d), (g), (c), and (h).

CHAPTER SIX

CONCLUSIONS, RECOMMENDATIONS, AND SUGGESTIONS

This chapter presents the main conclusions, recommendations, and suggestions for future researches.

6.1 Conclusions

The main conclusions of the present study are the following:

1. the first hypothesis has been verified. The study has shown that bringing together the generic structure and linguistic structures under the functional orientation of the study is greatly practical. The longer texts of the study would not have been analysed plausibly without this composite. The feedback from the selected texts, which are in different languages, fills the gaps that RST has called for and suffered from when analysing longer effective texts. The calls of RST augmentation have been fulfilled from sublimely rhetorical texts of great excellence.

2. The second hypothesis has been verified. In this regard, the study has proved that:

- a. the default structures of the selected texts are first distinct from each other regarding which elements are included or excluded and which exist or do not exist. They are also so in terms of the AGSs of the selected texts. All the selected texts require in their AGSs some obligatory elements not all of them are presented in the default structures given for the sub-genres. Distinctions are also clear in terms of which elements are optional and which are iterative in the selected texts. This is controlled by the subject matters of each text. As for GSPs, they are detached from the default structures. Two well-recognised GSPs are uncovered, through analysis, for the selected six lament texts in English and Arabic where three decisive elements are, however, in common for these six texts: OA, EL, and PT. In addition, the selected six thanksgiving texts have also two

GSPs where only one decisive element is, nevertheless, in common for these six texts: PRS/BL.

b. the selected texts are clearly distinguishable as for their semantic sets of properties which refer to the job of each structural element in their CCs.

c. some indistinguishability is seen in the selected texts: 'tenor' (Agents: hierarchic: the individual(s) subordinate and LORD/God superordinate; social distance: minimal), and 'mode' (Language role: constitutive; channel: phonic; medium: written to be spoken) values are identical in all texts. The values of 'field' partly resemble each other in that (Religion language: lament) value is common in six texts, and (Religion language: thanksgiving) value is also common in the other six texts.

d. only two levels of textual identity are shared, though not widely spread, in the selected texts: (material uniqueness and verbal identity), and (structural uniqueness and verbal uniqueness). The other two levels of textual identity; i.e., 'verbal uniqueness' and structural identity' and 'generic uniqueness and uniqueness of actual structure' are not shown in the texts under analysis.

3. The third hypothesis has also been verified. The study has come up with the following as for this hypothesis:

a. though numbers of cases and their percentages are incomparable between the English data and Arabic data, yet too much focus is on the intrasentential EDU relations, whether subordinate or coordinate. This implies an undeniable result out of the analysis of the selected texts: all EDUs are correlated to each other for the sake of presenting well-framed texts of different situations or subject matters.

b. regardless of the above shared feature, there is a great variation in the English and Arabic selected texts as for the concentration on either intrasentential subordination or intrasentential coordination. The English selected texts tend to pay attention to subordination on the expense of

coordination. In contrast, the Arabic data texts nearly balance the two: subordination surpasses coordination with not too much percentage. In more definite terms, the English texts do not prefer foregrounding multiple units of the same or different TLs. On the contrary, the Arabic texts are in favour of both foregrounding information in similar or different multiple units and also back-grounding information which frames the situations or subject matters in the main clause.

c. all texts show intrasentential hierarchical textual structure, but with non-identical degrees. The English selected texts show that hierarchy in subordination constructions is of not more than five degrees. The Arabic texts have higher degrees on both: thirty four degrees, or even forty, in subordination, and twenty three degrees of coordination.

d. in the selected texts, realisation proves workable in conjunction with dependency relations. However, realisation in the English text is a morphological one with four values (finite, noun/pronoun/noun phrase, non-finite, and omission of verbal element) that are not exactly consistent with their default TLs. The Arabic texts show realisation of morphological and contextual types with six values: contextual finite, noun/pronoun/noun phrase, morphological and contextual finite, omitted morphological and contextual finite, omitted contextual finite, and non-finite) which are not fixed to their default TLs. This variation in values is out of typological differences between the two languages as far as their deverbalisation scales are concerned.

4. The fourth hypothesis has been verified. Some of the points in this issue are stated below:

a. SM Rhe Rs that link the situations presented in each text of the selected ones are heavily and plausibly noticed in all texts. Few PR Rhe Rs are necessitated, in all texts, by the strategy of facilitating the process of presentation through W-R relationship. Within SM Rhe Rs, mononuclear Rhe Rs in the selected texts are given primary priority over multinuclear Rhe Rs.

b. in addition, ten-to-twelve mononuclear Rhe Rs are frequent in all texts. Out of these twelve Rhe Rs, ten have been in common to all texts. They are, not in order of frequency: (circumstance, condition, elaboration, evaluation, interpretation, means, non-volitional result, purpose, volitional cause, and volitional result). Within the same type of SM Rhe Rs, four-to-six multinuclear ones are frequent in all texts. Only three are shared in all texts: (conjunction, contrast, and list). As for PR Rhe Rs, five-to-six are shown in all texts. However, only four of them are in common: (antithesis, background, justify, and motivation). These frequencies allude to a very clear result out of the analysis; the genre type guides the occurrence and interpretation of Rhe Rs.

c. plausibility judgements that RST calls for are strongly clear. Analysis of all texts shows lesser cases of ambiguities than expected. This means that the percentage of clarity and ease of analysis is very high. Ambiguity here is not to be understood as an analytical obstacle. On the contrary, the texts of the study are too rich in their organisation for different exegetical reasons in the two cultures.

d. as a result, no one-to-one correspondence is held between syntactic dependency (subordination and coordination) and rhetorical hierarchy of Rhe Rs (rhetorical subordination and rhetorical coordination). This is testified with feedback from the TLs of the two deverbatisation scales.

5. The fifth hypothesis has been partially verified. The following points are noticed in this regard:

a. the mean sentence length in the English texts refers to a reasonably moderate one, while the Arabic texts are considered long-sentencing texts. However, in terms of numbers and percentages, much more information is packaged in the EDUs of the Arabic texts than that of the English texts.

b. all the texts show a cognitive tendency towards less salience roles in the discourse structure of their EDUs. This tendency can clearly refer to two strategies: downgrading information in the EDUs to Ss as

subordinate constructions and upgrading information in the EDUs is upgraded to independent sentences. Downgrading is higher than upgrading in all texts, thus, less salience is prevalent.

c. all texts are not difficult to understand. On the contrary, they are reader and analyst-friendly in that less ambiguity is noticed because the intentions of the Rhe Rs are mostly direct. This issue is also related to the availability of the four types of DCs (conjunct adverbs/adverbials, coordinators, subordinators, prepositions) in the texts. The tendency of the selected texts is to favour explicit DCs intrasententially linking EDUs. Following-up the intentions through DCs in the texts definitely facilitates the process of understanding texts.

6.2 Recommendations

The following recommendations can be useful:

1. Applied linguists are called to pay much attention to the generic variation between AGS and GSP taken as rhetorical patterns when they investigate the cultural-linguistic characteristics and working mechanism of texts belonging to the different sub-genres of religion.
2. Levels of textual identity and, accordingly, rhetorical structuring of religious texts can be a gate to a cross-cultural talk between religions and civilisations.
3. Rhetoricians and specialists in writing can make use of the correlation between generic structures and linguistic structures in their exploiting deeply the processes of creative and academic writings.
4. Much focus is needed to be on Rhe Rs and the intentions behind them between English and Arabic as far as understanding of text processing is concerned. This can enhance better attractiveness, quality, and value towards discourse studies and analyses.

6.3 Suggestions for Future Researches

The following suggestions are relevant to the present study:

1. A rhetorical study of religious misunderstanding.
2. A rhetorical study of on-line religious text creation and effects through RST.
3. A cultural-rhetorical study of anti-fundamentalist religious T.V. shows.
4. A corpus analysis of implicit Rhe Rs in religious texts.
5. A rhetorical analysis of misinterpretations in religion-oriented texts.

Appendix A: Definitions of Rhetorical Relations

The following tables have been taken from Mann & Taboada (2005 [2015/2016]) and adopted by Gylling (2013) where N = Nucleus, S = Satellite, W = Writer, R = Reader

Definitions of Presentational Relations (Pragmatic)			
Relation Name	Constraints on either S or N individually	Constraints on N + S	Intention of W
<u>Antithesis</u>	on N: W has positive regard for N	N and S are in contrast (see the Contrast relation); because of the incompatibility that arises from the contrast, one cannot have positive regard for both of those situations; comprehending S and the incompatibility between the situations increases R's positive regard for N	R's positive regard for N is increased
<u>Background</u>	on N: R won't comprehend N sufficiently before reading text of S	S increases the ability of R to comprehend an element in N	R's ability to comprehend N increases
<u>Concession</u>	on N: W has positive regard for N on S: W is not claiming that S does not hold;	W acknowledges a potential or apparent incompatibility between N and S; recognising the compatibility between N and S increases R's positive regard for N	R's positive regard for N is increased
<u>Enablement</u>	on N: presents an action by R (including accepting an	R comprehending S increases R's potential ability to perform the action in N	R's potential ability to perform the action in N increases

	offer), unrealised with respect to the context of N		
<u>Evidence</u>	on N: R might not believe N to a degree satisfactory to W on S: R believes S or will find it credible	R's comprehending S increases R's belief of N	R's belief of N is increased
<u>Justify</u>	none	R's comprehending S increases R's readiness to accept W's right to present N	R's readiness to accept W's right to present N is increased
<u>Motivation</u>	on N: N is an action in which R is the actor (including accepting an offer), unrealised with respect to the context of N	Comprehending S increases R's desire to perform action in N	R's desire to perform action in N is increased
<u>Preparation</u>	none	S precedes N in the text; S tends to make R more ready, interested or oriented for reading N	R is more ready, interested or oriented for reading N
<u>Restatement</u>	none	on N + S: S restates N, where S and N are of comparable bulk; N is more central to W's purposes than S is.	R recognises S as a restatement of N
<u>Summary</u>	on N: N must be more than one unit	S presents a restatement of the content of N, that is shorter in bulk	R recognises S as a shorter restatement of N

Definitions of Subject Matter Relations (Semantic)			
Relation Name	Constraints on either S or N individually	Constraints on N + S	Intention of W
<u>Circumstance</u>	on S: S is not unrealised	S sets a framework in the subject matter within which R is intended to interpret N	R recognises that S provides the framework for interpreting N
<u>Condition</u>	on S: S presents a hypothetical, future, or otherwise unrealised situation (relative to the situational context of S)	Realisation of N depends on realisation of S	R recognises how the realisation of N depends on the realisation of S
<u>Elaboration</u>	none	S presents additional detail about the situation or some element of subject matter which is presented in N or inferentially accessible in N in one or more of the ways listed below. In the list, if N presents the first member of any pair, then S includes the second: • set :: member • abstraction :: instance • whole :: part • process :: step • object :: attribute • generalisation :: specific	R recognises S as providing additional detail for N. R identifies the element of subject matter for which detail is provided.
<u>Evaluation</u>	none	on N + S: S relates N to degree of W's positive regard toward N.	R recognises that S assesses N and

			recognises the value it assigns
<u>Interpretation</u>	none	on N + S: S relates N to a framework of ideas not involved in N itself and not concerned with W's positive regard	R recognises that S relates N to a framework of ideas not involved in the knowledge presented in N itself
<u>Means</u>	on N: an activity	S presents a method or instrument which tends to make realisation of N more likely	R recognises that the method or instrument in S tends to make realisation of N more likely
<u>Non-volitional Cause</u>	on N: N is not a volitional action	S, by means other than motivating a volitional action, caused N; without the presentation of S, R might not know the particular cause of the situation; a presentation of N is more central than S to W's purposes in putting forth the N-S combination.	R recognises S as a cause of N
<u>Non-volitional Result</u>	on S: S is not a volitional action	N caused S; presentation of N is more central to W's purposes in putting forth the N-S combination than is the presentation of S.	R recognises that N could have caused the situation in S
<u>Otherwise</u>	on N: N is an unrealised situation on S: S is an unrealised situation	realisation of N prevents realisation of S	R recognises the dependency relation of prevention between the realisation of N and the realisation of S
<u>Purpose</u>	on N: N is an activity;	S is to be realised through the activity in N	R recognises that the activity in N is

	on S: S is a situation that is unrealised		initiated in order to realise S
<u>Solutionhood</u>	on S: S presents a problem	N is a solution to the problem presented in S;	R recognises N as a solution to the problem presented in S
<u>Unconditional</u>	on S: S conceivably could affect the realisation of N	N does not depend on S	R recognises that N does not depend on S
<u>Unless</u>	none	S affects the realisation of N; N is realised provided that S is not realised	R recognises that N is realised provided that S is not realised
<u>Volitional Cause</u>	on N: N is a volitional action or else a situation that could have arisen from a volitional action	S could have caused the agent of the volitional action in N to perform that action; without the presentation of S, R might not regard the action as motivated or know the particular motivation; N is more central to W's purposes in putting forth the N-S combination than S is.	R recognises S as a cause for the volitional action in N
<u>Volitional Result</u>	on S: S is a volitional action or a situation that could have arisen from a volitional action	N could have caused S; presentation of N is more central to W's purposes than is presentation of S;	R recognises that N could be a cause for the action or situation in S

Definitions of Multinuclear Relations		
Relation Name	Constraints on each pair of N	Intention of W
<u>Conjunction</u>	The items are conjoined to form a unit in which each item plays a comparable role	R recognises that the linked items are conjoined
<u>Contrast</u>	No more than two nuclei; the situations in these two nuclei are (a) comprehended as the same in many respects (b) comprehended as differing in a few respects and (c) compared with respect to one or more of these differences	R recognises the comparability and the difference(s) yielded by the comparison is being made
<u>Disjunction</u>	An item presents a (not necessarily exclusive) alternative for the other(s)	R recognises that the linked items are alternatives
<u>Joint</u>	None	None
<u>List</u>	An item comparable to others linked to it by the List relation	R recognises the comparability of linked items
<u>Multinuclear Restatement</u>	An item is primarily a reexpression of one linked to it; the items are of comparable importance to the purposes of W	R recognises the reexpression by the linked items
<u>Sequence</u>	There is a succession relationship between the situations in the nuclei	R recognises the succession relationships among the nuclei.

Appendix B: The English Deverbalisation Scale by Gylling (2013:92ff)

An EDU can be textualised as a	Textualisation examples
a. independent sentence (including sentence fragments)	[Our group supports this proposal.] [<u>We will vote in favour of it.</u>]
b. main or matrix clause that is part of a sentence	[Our group supports this proposal;] [<u>we will vote in favour of it.</u>] [Because our group supports this proposal,] [<u>we will vote in favour of it.</u>]
c. coordinate main or matrix clause (including ellipsis)	[Our group supports this proposal,] [<u>and we will vote in favour of it.</u>]
d. subordinate finite adverbial clause	[<u>Because our group supports this proposal.</u>] [we will vote in favour of it.]
e. relative clause	[Our group supports this proposal] [<u>of which we will vote in favour.</u>]
f. infinitival clause	[Our group supports this proposal] [<u>in order to have it approved.</u>]
g. gerund, present or past participle construction	[Our group supports this proposal,] [<u>voting in favour of it.</u>] [<u>As said by my colleague.</u>] [we support this proposal.]
h. present, past participial or adjectival modifier	[Our group supports this proposal] [<u>involving EU citizens.</u>] [Our group supports the proposal] [<u>made by the commissioner.</u>] [Our group supports the proposal] [<u>present in today's agenda.</u>]
i. nominalisation	[Our group will vote in favour] [<u>without support from all members.</u>]
j. verbless construction	[By now [<u>O</u>] <u>in favour of the proposal.</u>] [our group supports it.]

Appendix C: The Arabic Deverbalisation Scale

#	Textualisation Levels in the Arabic Deverbalisation Scale
a	Independent sentence: 1. verbal (a. tense-based, b. tense-less) 2. nominal 3. interrogative
b	Coordinate construction and clause: 1. asyndetic (elision of a DC) 2. syndetic
c	Subordinate construction and clause: 1. circumstantial qualifiers and indefinite adjectival clauses 2. syndetic single (single DC لَمَّا , أَنْ) 3. syndetic correlative (مَعَ أَنْ , إِلَّا أَنْ) 4. complementisers (أَنَّ , أَنْ) clauses
d	Adjectival and relative clauses
e	Conditional clause (the condition, i.e., the protasis, and the result, i.e., apodosis)
f	Nominal(ised) construction and clause: 1. adjective and adjectival qualification 2. apposition 3. adverb/adverbial 4. dependent element (cognate accusative, accusative of specification, accusative of purpose, comitative object, prepositional object) 5. nominal argument (deverbal nouns , active participle, and passive participle) 6. possessive/genitive construction and chain 7. prepositional phrase 8. vocative construction 9. miscellaneous (comparatives, superlatives)
g	Exceptive construction and clause
h	Exclamation construction and clause

Appendix D: The Selected English Data

Text One (PS No.9):

- ¹ I will praise you, O Lord, with all my heart; I will tell of all your wonders.
- ² I will be glad and rejoice in you; I will sing praise to your name, O Most High.
- ³ My enemies turn back; they stumble and perish before you.
- ⁴ For you have upheld my right and my cause; you have sat on your throne, judging righteously.
- ⁵ You have rebuked the nations and destroyed the wicked; you have blotted out their name for ever and ever.
- ⁶ Endless ruin has overtaken the enemy, you have uprooted their cities; even the memory of them has perished.
- ⁷ The Lord reigns forever; he has established his throne for judgment.
- ⁸ He will judge the world in righteousness; he will govern the peoples with justice.
- ⁹ The Lord is a refuge for the oppressed, a stronghold in times of trouble.
- ¹⁰ Those who know your name will trust in you, for you, Lord, have never forsaken those who seek you.
- ¹¹ Sing praises to the Lord, enthroned in Zion; proclaim among the nations what he has done.
- ¹² For he who avenges blood remembers; he does not ignore the cry of the afflicted.
- ¹³ O Lord, see how my enemies persecute me! Have mercy and lift me up from the gates of death,
- ¹⁴ that I may declare your praises in the gates of the Daughter of Zion and there rejoice in your salvation.
- ¹⁵ The nations have fallen into the pit they have dug; their feet are caught in the net they have hidden.
- ¹⁶ The Lord is known by his justice; the wicked are ensnared by the work of their hands. Higgaion. Selah
- ¹⁷ The wicked return to the grave, all the nations that forget God.
- ¹⁸ But the needy will not always be forgotten, nor the hope of the afflicted ever perish.
- ¹⁹ Arise, O Lord, let not man triumph; let the nations be judged in your presence.

²⁰ Strike them with terror, O Lord; let the nations know they are but men. Selah

Text Two (PS No.10):

¹ Why, O Lord, do you stand far off? Why do you hide yourself in times of trouble?

² In his arrogance the wicked man hunt down the weak, who are caught in the schemes he devises.

³ He boasts of the cravings of his heart; he blesses the greedy and reviles the Lord.

⁴ In his pride the wicked does not seek him; in all his thoughts there is no room for God.

⁵ His ways are always prosperous; he is haughty and your laws are far from him; he sneers at all his enemies.

⁶ He says to himself, "Nothing will shake me; I'll always be happy and never have trouble."

⁷ His mouth is full of curses and lies and threats; trouble and evil are under his tongue.

⁸ He lies in wait near the villages; from ambush he murders the innocent, watching in secret for his victims.

⁹ He lies in wait like a lion in cover; he lies in wait to catch the helpless; he catches the helpless and drags them off in his net.

¹⁰ His victims are crushed, they collapse; they fall under his strength.

¹¹ He says to himself, "God has forgotten; he covers his face and never sees."

¹² Arise, Lord! Lift up your hand, O God. Do not forget the helpless.

¹³ Why does the wicked man revile God? Why does he say to himself, "He won't call me to account"?

¹⁴ But you, O God, do see trouble and grief; you consider it to take it in hand. The victim commits himself to you; you are the helper of the fatherless.

¹⁵ Break the arm of the wicked and evil man; call him to account for his wickedness that would not be found out.

¹⁶ The Lord is King for ever and ever; the nations will perish from his land.

¹⁷ You hear, O Lord, the desire of the afflicted; you encourage them, and you listen to their cry,

¹⁸ defending the fatherless and the oppressed, in order that man, who is of the earth, may terrify no more.

Text Three (PS No.22):

- ¹ My God, my God, why have you forsaken me? Why are you so far from saving me, so far from the words of my groaning?
- ² O my God, I cry out by day, but you do not answer, by night, and am not silent.
- ³ Yet you are enthroned as the Holy One; you are the praise of Israel.
- ⁴ In you our fathers put their trust; they trusted and you delivered them.
- ⁵ They cried to you and were saved; in you they trusted and were not disappointed.
- ⁶ But I am a worm and not a man, scorned by men and despised by the people.
- ⁷ All who see me mock me; they hurl insults, shaking their heads:
- ⁸ "He trusts in the Lord; let the Lord rescue him. Let him deliver him, since he delights in him."
- ⁹ Yet you brought me out of the womb; you made me trust in you even at my mother's breast.
- ¹⁰ From birth I was cast upon you; from my mother's womb you have been my God.
- ¹¹ Do not be far from me, for trouble is near and there is no one to help.
- ¹² Many bulls surround me; strong bulls of Bashan encircle me.
- ¹³ Roaring lions tearing their prey open their mouths wide against me.
- ¹⁴ I am poured out like water, and all my bones are out of joint. My heart has turned to wax; it has melted away within me.
- ¹⁵ My strength is dried up like a potsherd, and my tongue sticks to the roof of my mouth; you lay me in the dust of death.
- ¹⁶ Dogs have surrounded me; a band of evil men has encircled me, they have pierced my hands and my feet.
- ¹⁷ I can count all my bones; people stare and gloat over me.
- ¹⁸ They divide my garments among them and cast lots for my clothing.
- ¹⁹ But you, O Lord, be not far off; O my Strength, come quickly to help me.
- ²⁰ Deliver my life from the sword, my precious life from the power of the dogs.
- ²¹ Rescue me from the mouth of the lions; save me from the horns of the wild oxen.
- ²² I will declare your name to my brothers; in the congregation I will praise you.

²³ You who fear the Lord, praise him! All you descendants of Jacob, honor him! Revere him, all you descendants of Israel!

²⁴ For he has not despised or disdained the suffering of the afflicted one; he has not hidden his face from him but has listened to his cry for help.

²⁵ From you comes the theme of my praise in the great assembly; before those who fear you will I fulfill my vows.

²⁶ The poor will eat and be satisfied; they who seek the Lord will praise him- may your hearts live forever!

²⁷ All the ends of the earth will remember and turn to the Lord, and all the families of the nations will bow down before him,

²⁸ for dominion belongs to the Lord and he rules over the nations.

²⁹ All the rich of the earth will feast and worship; all who go down to the dust will kneel before him- those who cannot keep themselves alive.

³⁰ Posterity will serve him; future generations will be told about the Lord.

³¹ They will proclaim his righteousness to a people yet unborn- for he has done it.

Text Four (PS No.34):

¹ I will extol the Lord at all times; his praise will always be on my lips.

² My soul will boast in the Lord; let the afflicted hear and rejoice.

³ Glorify the Lord with me; let us exalt his name together.

⁴ I sought the Lord, and he answered me; he delivered me from all my fears.

⁵ Those who look to him are radiant; their faces are never covered with shame.

⁶ This poor man called, and the Lord heard him; he saved him out of all his troubles.

⁷ The angel of the Lord encamps around those who fear him, and he delivers them.

⁸ Taste and see that the Lord is good; blessed is the man who takes refuge in him.

⁹ Fear the Lord, you his saints, for those who fear him lack nothing.

¹⁰ The lions may grow weak and hungry, but those who seek the Lord lack no good thing.

¹¹ Come, my children, listen to me; I will teach you the fear of the Lord.

¹² Whoever of you loves life and desires to see many good days,

¹³ keep your tongue from evil and your lips from speaking lies.

- ¹⁴ Turn from evil and do good; seek peace and pursue it.
- ¹⁵ The eyes of the Lord are on the righteous and his ears are attentive to their cry;
- ¹⁶ the face of the Lord is against those who do evil, to cut off the memory of them from the earth.
- ¹⁷ The righteous cry out, and the Lord hears them; he delivers them from all their troubles.
- ¹⁸ The Lord is close to the brokenhearted and saves those who are crushed in spirit.
- ¹⁹ A righteous man may have many troubles, but the Lord delivers him from them all;
- ²⁰ he protects all his bones, not one of them will be broken.
- ²¹ Evil will slay the wicked; the foes of the righteous will be condemned.
- ²² The Lord redeems his servants; no one will be condemned who takes refuge in him.

Text Five (PS No.40):

- ¹ I waited patiently for the Lord; he turned to me and heard my cry.
- ² He lifted me out of the slimy pit, out of the mud and mire; he set my feet on a rock and gave me a firm place to stand.
- ³ He put a new song in my mouth, a hymn of praise to our God. Many will see and fear and put their trust in the Lord.
- ⁴ Blessed is the man who makes the Lord his trust, who does not look to the proud, to those who turn aside to false gods.
- ⁵ Many, O Lord my God, are the wonders you have done. The things you planned for us no one can recount to you; were I to speak and tell of them, they would be too many to declare.
- ⁶ Sacrifice and offering you did not desire, but my ears you have pierced; burnt offerings and sin offerings you did not require.
- ⁷ Then I said, "Here I am, I have come - it is written about me in the scroll.
- ⁸ I desire to do your will, O my God; your law is within my heart."
- ⁹ I proclaim righteousness in the great assembly; I do not seal my lips, as you know, O Lord.
- ¹⁰ I do not hide your righteousness in my heart; I speak of your faithfulness and salvation. I do not conceal your love and your truth from the great assembly.

¹¹ Do not withhold your mercy from me, O Lord; may your love and your truth always protect me.

¹² For troubles without number surround me; my sins have overtaken me, and I cannot see. They are more than the hairs of my head, and my heart fails within me.

¹³ Be pleased, O Lord, to save me; O Lord, come quickly to help me.

¹⁴ May all who seek to take my life be put to shame and confusion; may all who desire my ruin be turned back in disgrace.

¹⁵ May those who say to me, "Aha! Aha!" be appalled at their own shame.

¹⁶ But may all who seek you rejoice and be glad in you; may those who love your salvation always say, "The Lord be exalted!"

¹⁷ Yet I am poor and needy; may the Lord think of me. You are my help and my deliverer; O my God, do not delay.

Text Six (PS No.41):

¹ Blessed is he who has regard for the weak; the Lord delivers him in times of trouble.

² The Lord will protect him and preserve his life; he will bless him in the land and not surrender him to the desire of his foes.

³ The Lord will sustain him on his sickbed and restore him from his bed of illness.

⁴ I said, "O Lord, have mercy on me; heal me, for I have sinned against you."

⁵ My enemies say of me in malice, "When will he die and his name perish?"

⁶ Whenever one comes to see me, he speaks falsely, while his heart gathers slander; then he goes out and spreads it abroad.

⁷ All my enemies whisper together against me; they imagine the worst for me, saying,

⁸ "A vile disease has beset him; he will never get up from the place where he lies."

⁹ Even my close friend, whom I trusted, he who shared my bread, has lifted up his heel against me.

¹⁰ But you, O Lord, have mercy on me; raise me up, that I may repay them.

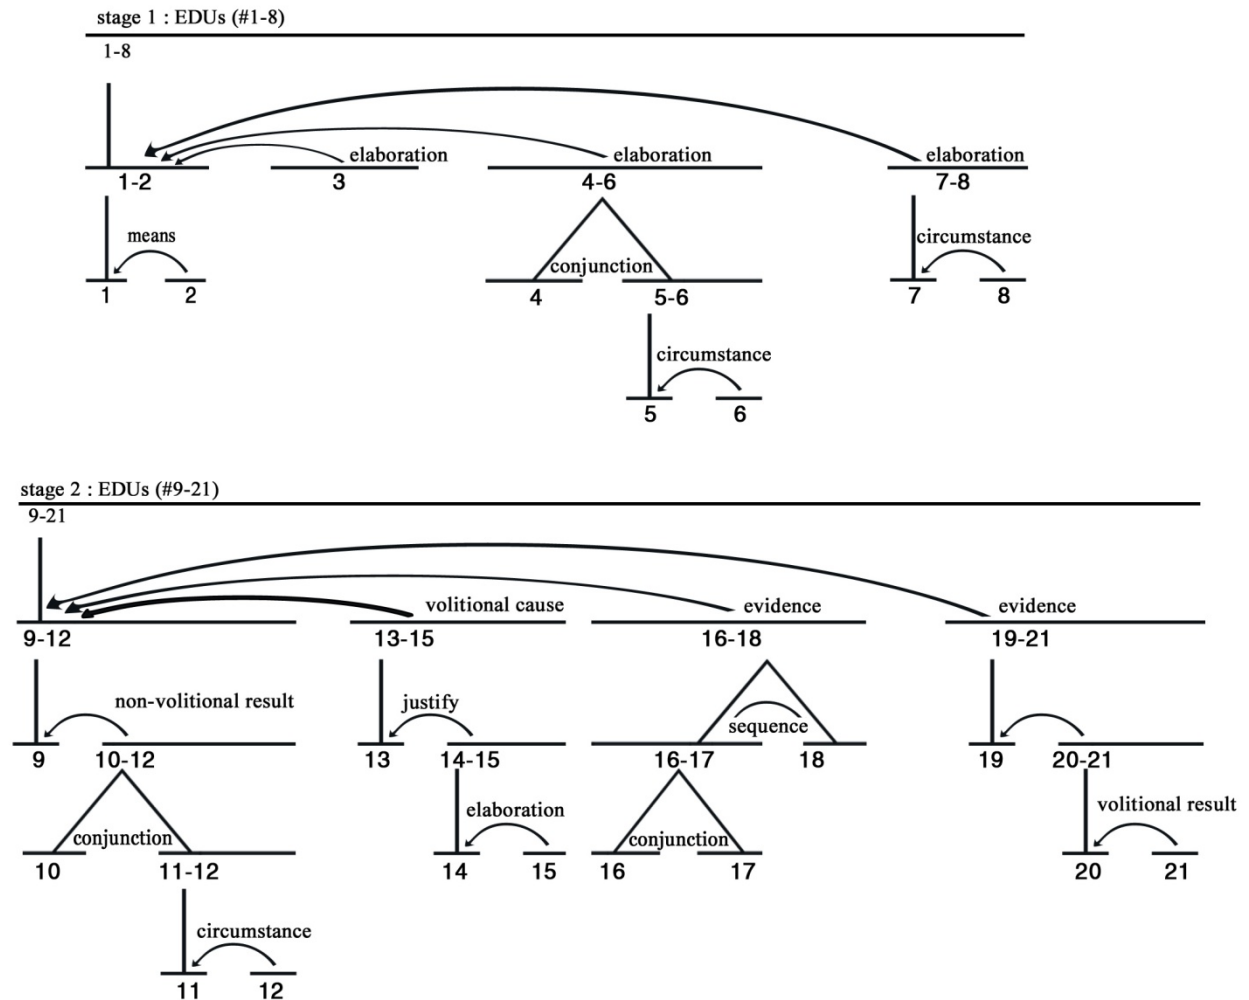

¹¹ I know that you are pleased with me, for my enemy does not triumph over me.

¹² In my integrity you uphold me and set me in your presence forever.

¹³ Praise be to the Lord, the God of Israel, from everlasting to everlasting. Amen and Amen.

Appendix F: The Selected Arabic Data

Text One (Ṣaḥīfa Text No.8):

- ١ اللَّهُمَّ إِنِّي أَعُوذُ بِكَ مِنْ هَيَجَانِ الْحَرِصِ ، وَ سُورَةِ الْغَضَبِ ، وَ غَلَبَةِ الْحَسَدِ ، وَ ضَعْفِ الصَّبْرِ ، وَ قِلَّةِ الْقَنَاعَةِ ، وَ شَكَاةِ الْخُلُقِ ، وَ إِحْلَاحِ الشَّهْوَةِ ، وَ مَلَكَةِ الْحَمِيَّةِ
- ٢ وَ مُتَابَعَةِ الْهَوَى ، وَ مُخَالَفَةِ الْهُدَى ، وَ سِنَةِ الْعُقْلَةِ ، وَ تَعَاطِي الْكُلْفَةِ ، وَ إِيثَارِ الْبَاطِلِ عَلَى الْحَقِّ ، وَ الْإِصْرَارِ عَلَى الْمَأْثِمِ ، وَ اسْتِصْغَارِ الْمَعْصِيَةِ ، وَ اسْتِكْبَارِ الطَّاعَةِ .
- ٣ وَ مُبَاهَاةِ الْمُكْثَرِينَ ، وَ الْإِزْرَاءِ بِالْمُقِيلِينَ ، وَ سُوءِ الْوَلَايَةِ لِمَنْ تَحْتَ أَيْدِينَا ، وَ تَرْكِ الشُّكْرِ لِمَنْ اصْطَنَعَ الْعَارِفَةَ عُنْدَنَا
- ٤ أَوْ أَنْ نَعُصِدُ ظَالِمًا ، أَوْ نَخْذُلَ مَلْهُوفًا ، أَوْ نَرُومَ مَا لَيْسَ لَنَا بِحَقٍّ ، أَوْ نَقُولَ فِي الْعِلْمِ بِغَيْرِ عِلْمٍ .
- ٥ وَ نَعُوذُ بِكَ أَنْ نَنْطَوِيَ عَلَى غِشٍّ أَحَدٍ ، وَ أَنْ نُعْجِبَ بِأَعْمَالِنَا ، وَ نَمُدَّ فِي آمَالِنَا .
- ٦ وَ نَعُوذُ بِكَ مِنْ سُوءِ السَّرِيرَةِ ، وَ اخْتِقَارِ الصَّغِيرَةِ ، وَ أَنْ يَسْتَحْوِذَ عَلَيْنَا الشَّيْطَانُ ، أَوْ يَنْكَبُنَا الزَّمَانُ ، أَوْ يَنْهَضَمَنَا السُّلْطَانُ
- ٧ وَ نَعُوذُ بِكَ مِنْ تَنَاقُلِ الْإِسْرَافِ ، وَ مِنْ فَقْدَانِ الْكَفَافِ .
- ٨ وَ نَعُوذُ بِكَ مِنْ شِمَاتَةِ الْأَعْدَاءِ ، وَ مِنْ الْفَقْرِ إِلَى الْأَكْفَاءِ ، وَ مِنْ مَعِيشَةٍ فِي شِدَّةٍ ، وَ مَيِّتَةٍ عَلَى غَيْرِ عُدَّةٍ .
- ٩ وَ نَعُوذُ بِكَ مِنَ الْحُسْرَةِ الْعُظْمَى ، وَ الْمُصِيبَةِ الْكُبْرَى ، وَ أَشَقَى الشَّقَاءِ ، وَ سُوءِ الْمَأْبِ ، وَ جِرْمَانِ النَّوَابِ ، وَ حُلُولِ الْعِقَابِ .
- ١٠ اللَّهُمَّ صَلِّ عَلَى مُحَمَّدٍ وَ آلِهِ ، وَ أَعِزَّنِي مِنْ كُلِّ ذَلِكَ بِرَحْمَتِكَ وَ جَمِيعِ الْمُؤْمِنِينَ وَ الْمُؤْمِنَاتِ ، يَا أَرْحَمَ الرَّاحِمِينَ .

Text Two (Ṣaḥīfa Text No.12):

- ١ اللَّهُمَّ إِنَّهُ يَحْجُبُنِي عَنْ مَسْأَلَتِكَ خِلَالِ ثَلَاثٍ ، وَ تَحْدُونِي عَلَيْهَا خَلَّةٌ وَاحِدَةٌ .
- ٢ يَحْجُبُنِي أَمْرٌ أَمَرْتُ بِهِ فَأَبْطَأْتُ عَنْهُ ، وَ نَهْيٌ نَهَيْتَنِي عَنْهُ فَأَسْرَعْتُ إِلَيْهِ ، وَ نِعْمَةٌ أَنْعَمْتَ بِهَا عَلَيَّ فَقَصَرْتُ فِي شُكْرِهَا .
- ٣ وَ يَحْدُونِي عَلَى مَسْأَلَتِكَ تَفَضُّلُكَ عَلَى مَنْ أَقْبَلَ بِوَجْهِهِ إِلَيْكَ ، وَ وَقَدَ بِحُسْنِ ظَنِّهِ إِلَيْكَ ، إِذْ جَمِيعُ إِحْسَانِكَ تَفَضُّلٌ ، وَ إِذْ كُلُّ نِعْمِكَ ابْتِدَاءٌ .
- ٤ فَهَذَا أَنَا ذَا ، يَا إِلَهِي ، وَاقِفْتُ بِبَابِ عِزِّكَ وَ قُوفُ الْمُسْتَسْلِمِ الدَّلِيلِ ، وَ سَأَلْتُكَ عَلَى الْخِيَاءِ مِنِّي سُؤَالَ الْبَائِسِ الْمُعِيلِ ،
- ٥ مُؤَرِّكَ لَكَ بِأَيِّ لَمْ أَسْتَسْلِمَ وَ قَتَّ إِحْسَانِكَ إِلَّا بِالْإِقْلَاعِ عَنْ عَصِيَانِكَ ، وَ لَمْ أَخْلُ فِي الْحَالَاتِ كُلِّهَا مِنْ امْتِنَانِكَ .
- ٦ فَهَلْ يَنْفَعُنِي ، يَا إِلَهِي ، إِقْرَارِي عِنْدَكَ بِسُوءِ مَا اكْتَسَبْتُ؟ وَ هَلْ يُنْجِينِي مِنْكَ اعْتِرَافِي لَكَ بِقُبْحِ مَا ارْتَكَبْتُ؟ أَمْ أَوْجِبْتُ لِي فِي مَقَامِي هَذَا سُخْطَكَ؟ أَمْ لَزَمَنِي فِي وَقْتِ دُعَايِ مَقْنُكَ؟
- ٧ سُبْحَانَكَ ، لَا أَيْأُسُ مِنْكَ وَ قَدْ فَتَحْتَ لِي بَابَ التَّوْبَةِ إِلَيْكَ ، بَلْ أَقُولُ مَقَالَ الْعَبْدِ الدَّلِيلِ الظَّالِمِ لِنَفْسِهِ الْمُسْتَخَفِّ بِحُرْمَةِ رَبِّهِ .

٨ الَّذِي عَظَمْتَ ذُنُوبَهُ فَجَلَّتْ ، وَ أَدْبَرْتَ أَيَّامَهُ قَوْلْتُ حَتَّى إِذَا رَأَى مُدَّةَ الْعَمَلِ قَدْ انْقَضَتْ ، وَ غَايَةَ الْعُمُرِ قَدْ انْتَهَتْ ، وَ أَيقَنَ أَنَّهُ لَا مَحِيصَ لَهُ مِنْكَ ، وَ لَا مَهْرَبَ لَهُ عَنْكَ ، تَلَقَّاكَ بِالْإِنَابَةِ ، وَ أَخْلَصَ لَكَ التَّوْبَةَ ، فَقَامَ إِلَيْكَ بِقَلْبٍ طَاهِرٍ نَقِيٍّ ، ثُمَّ دَعَاكَ بِصَوْتٍ خَائِلٍ خَفِيِّ .

٩ قَدْ تَطَّأْتَ لَكَ فَأَنْحَنِي ، وَ نَكَّسَ رَأْسَهُ فَأَنْتَنِي ، قَدْ أَرَعَشْتَ خَشْيَتَهُ رَجْلَيْهِ ، وَ غَرَّقْتَ دُمُوعَهُ خَدْيِهِ ، يَدْعُوكَ بِنَا أَرْحَمَ الرَّاحِمِينَ ، وَ يَا أَرْحَمَ مَنْ انْتَابَهُ الْمُسْتَرْحِمُونَ ، وَ يَا أَعْطَفَ مَنْ أَطَّافَ بِهِ الْمُسْتَغْفِرُونَ ، وَ يَا مَنْ عَفُوهُ أَكْثَرُ مِنْ نَقَمَتِهِ ، وَ يَا مَنْ رِضَاهُ أَوْفَرُ مِنْ سَخَطِهِ .

١٠ وَ يَا مَنْ تَحَمَّدَ إِلَى خَلْقِهِ بِحُسْنِ النَّجَازِ ، وَ يَا مَنْ عَوَّدَ عِبَادَهُ قَبُولَ الْإِنَابَةِ ، وَ يَا مَنْ اسْتَصْلَحَ فَاسِدَهُمْ بِالنُّوْبَةِ وَ يَا مَنْ رَضِيَ مِنْ فِعْلِهِمْ بِالْيَسِيرِ ، وَ مَنْ كَافَى قَلِيلَهُمْ بِالْكَثِيرِ ، وَ يَا مَنْ ضَمِنَ لَهُمْ إِبَابَةَ الدُّعَاءِ ، وَ يَا مَنْ وَعَدَهُمْ عَلَى نَفْسِهِ بِتَقْضِيهِ حُسْنِ الْجَزَاءِ .

١١ مَا أَنَا بِأَعْصَى مَنْ عَصَاكَ فَغَفَرْتَ لَهُ ، وَ مَا أَنَا بِأَلْوَمَ مَنْ اعْتَذَرَ إِلَيْكَ فَقَبِلْتَ مِنْهُ ، وَ مَا أَنَا بِأَظْلَمَ مَنْ تَابَ إِلَيْكَ فَغُدَّتْ عَلَيْهِ .

١٢ أَتُوبُ إِلَيْكَ فِي مَقَامِي هَذَا تَوْبَةَ نَادِمٍ عَلَى مَا فَرَطَ مِنْهُ ، مُشْفِقٍ مِمَّا اجْتَمَعَ عَلَيْهِ ، خَالِصٍ الْحَيَاءِ مِمَّا وَقَعَ فِيهِ .

١٣ عَالِمٌ بِأَنَّ الْعَفْوَ عَنِ الذَّنْبِ الْعَظِيمِ لَا يَتَعَاظَمُكَ ، وَ أَنَّ النَّجَازَ عَنِ الْإِثْمِ الْجَلِيلِ لَا يَسْتَصْعِبُكَ ، وَ أَنَّ اِحْتِمَالَ الْجَنَائِاتِ الْفَاحِشَةِ لَا يَتَكَادُكَ ، وَ أَنَّ أَحَبَّ عِبَادِكَ إِلَيْكَ مَنْ تَرَكَ الْإِسْتِكْبَارَ عَلَيْكَ ، وَ جَانَبَ الْإِصْرَارَ ، وَ لَزِمَ الْإِسْتِغْفَارَ .

١٤ وَ أَنَا أَزِيرُ إِلَيْكَ مِنْ أَنْ أَسْتَكْبِرَ ، وَ أَعُوذُ بِكَ مِنْ أَنْ أَصِرَّ ، وَ أَسْتَغْفِرُكَ لِمَا قَصَرْتُ فِيهِ ، وَ أَسْتَعِينُ بِكَ عَلَى مَا عَجَزْتُ عَنْهُ .

١٥ اللَّهُمَّ صَلِّ عَلَى مُحَمَّدٍ وَ آلِهِ ، وَ هَبْ لِي مَا يَجِبُ عَلَيَّ لَكَ ، وَ عَافِنِي مِمَّا اسْتَوْجِبُهُ مِنْكَ ، وَ أَجِرْنِي مِمَّا يَخَافُهُ أَهْلُ الْإِسَاءَةِ ، فَإِنَّكَ مَلِيٌّ بِالْعَفْوِ ، مَرْجُوٌّ لِلْمَغْفَرَةِ ، مَعْرُوفٌ بِالنَّجَازِ ، لَيْسَ لِحَاجَتِي مَطْلَبٌ سِوَاكَ ، وَ لَا لِدُنْيِي غَافِرٌ غَيْرُكَ ، حَاشَاكَ .

١٦ وَ لَا أَخَافُ عَلَى نَفْسِي إِلَّا إِيَّاكَ ، إِنَّكَ أَهْلُ التَّقْوَى وَ أَهْلُ الْمَغْفَرَةِ . صَلِّ عَلَى مُحَمَّدٍ وَ آلِ مُحَمَّدٍ ، وَ أَقْضِ حَاجَتِي ، وَ أَنْجِ طَلِبَتِي ، وَ اغْفِرْ ذَنْبِي ، وَ آمِنْ خَوْفَ نَفْسِي ، إِنَّكَ عَلَى كُلِّ شَيْءٍ قَدِيرٌ ، وَ ذَلِكَ عَلَيْكَ يَسِيرٌ ، آمِينَ رَبَّ الْعَالَمِينَ .

Text Three (Şahîfa Text No.13):

١ اللَّهُمَّ يَا مُنْتَهَى مَطْلَبِ الْحَاجَاتِ ، ٢ وَ يَا مَنْ عِنْدَهُ نَيْلُ الطَّلِبَاتِ ، ٣ وَ يَا مَنْ لَا يَبِيعُ نِعَمَهُ بِالْأَثْمَانِ ، ٤ وَ يَا مَنْ لَا يَكْذِرُ عَطَايَاهُ بِالْأَمْتَانِ ، ٥ وَ يَا مَنْ يُسْتَعْنَى بِهِ وَ لَا يُسْتَعْنَى عَنْهُ ، ٦ وَ يَا مَنْ يُرْغَبُ إِلَيْهِ وَ لَا يُرْغَبُ عَنْهُ ، ٧ وَ يَا مَنْ لَا تُفْنِي خَزَائِنُهُ الْمَسَائِلَ ، ٨ وَ يَا مَنْ لَا تُبْدِلُ حِكْمَتُهُ الْوَسَائِلَ ، ٩ وَ يَا مَنْ لَا تُنْقَطِعُ عَنْهُ حَوَائِجُ الْمُحْتَاجِينَ ، ١٠ وَ يَا مَنْ لَا يُعْتَبَرُ دُعَاءُ الدَّاعِينَ ، ١١ تَمَدَّحَتْ بِالْعَنَاءِ عَنْ خَلْقِكَ وَ أَنْتَ أَهْلُ الْغِنَى عَنْهُمْ ، ١٢ وَ نَسَبَتْهُمْ إِلَى الْفَقْرِ وَ هُمْ أَهْلُ الْفَقْرِ إِلَيْكَ ، ١٣ فَمَنْ حَاوَلَ سَدَّ خَلَّتِيهِ مِنْ عِنْدِكَ ، وَ رَامَ صَرْفَ الْفَقْرِ عَنْ نَفْسِهِ بِكَ فَقَدْ طَلَبَ حَاجَتَهُ فِي مَطَائِبِهَا ، وَ أَتَى طَلِبَتَهُ مِنْ وَجْهِهَا ، ١٤ وَ مَنْ تَوَجَّهَ بِحَاجَتِهِ إِلَى أَحَدٍ مِنْ خَلْقِكَ أَوْ جَعَلَهُ سَبَبَ نُجْحِهَا دُونَكَ فَقَدْ تَعَرَّضَ لِلْحِرْمَانِ ، وَ اسْتَحَقَّ مِنْ عِنْدِكَ قَوْتَ الْإِحْسَانِ .

١٥ اللَّهُمَّ وَ لِي إِلَيْكَ حَاجَةٌ قَدْ قَصَرَ عَنْهَا جُهْدِي ، وَ نَقَطَعْتُ دُونَهَا حِيلِي ، وَ سَوَّلْتُ لِي نَفْسِي رَفْعَهَا إِلَى مَنْ يَرْفَعُ حَوَائِجَهُ إِلَيْكَ ، وَ لَا يُسْتَعْنَى فِي طَلِبَاتِهِ عَنْكَ ، وَ هِيَ زَلَّةٌ مِنْ زَلَلِ الْخَاطِئِينَ ، وَ عَثْرَةٌ مِنْ عَثَرَاتِ الْمَذْنُبِينَ .

١٦ ثُمَّ انْتَبَهْتُ بِتَذْكِيرِكَ لِي مِنْ غَفْلَتِي ، وَ نَهَضْتُ بِتَوْفِيقِكَ مِنْ زَلَّتِي ، وَ رَجَعْتُ وَ نَكَصْتُ بِتَسْدِيدِكَ عَنْ عَثْرَتِي .

١٧ وَ قُلْتُ: سُبْحَانَ رَبِّي كَيْفَ يَسْأَلُ مُحْتَاجٌ مُحْتَاجاً؟! وَ أَتَى يَرْغَبُ مُعْدِمٌ إِلَى مُعْدِمٍ!؟

- ١٨ فَقَصَدْتُكَ، يَا إِلَهِي، بِالرَّغْبَةِ، وَ أَوْفَدْتُ عَلَيْكَ رَجَائِي بِالنِّقَةِ بِكَ.
- ١٩ وَ عَلِمْتُ أَنَّ كَثِيرَ مَا أَسْأَلُكَ يَسِيرُ فِي وَجْدِكَ ، وَ أَنَّ خَطِيرَ مَا أَسْتَوْهِبُكَ حَقِيرٌ فِي وَسْعِكَ ، وَ أَنَّ كَرَمَكَ لَا يَضِيقُ عَنْ سُؤَالِ أَحَدٍ ، وَ أَنَّ يَدَكَ بِالْعَطَايَا أَعْلَى مِنْ كُلِّ يَدٍ .
- ٢٠ اللَّهُمَّ فَصِّلْ عَلَى مُحَمَّدٍ وَ آلِهِ ، وَ احْمِلْنِي بِكَرَمِكَ عَلَى التَّفَضُّلِ ، وَ لَا تَحْمِلْنِي بِعَذْلِكَ عَلَى الْإِسْتِحْقَاقِ ، فَمَا أَنَا بِأَوَّلِ رَاغِبٍ رَغِبَ إِلَيْكَ فَأَعْطَيْتَهُ وَ هُوَ يَسْتَحِقُّ الْمُنْعَ ، وَ لَا بِأَوَّلِ سَائِلٍ سَأَلَكَ فَأَفْضَلْتَ عَلَيْهِ وَ هُوَ يَسْتَوْجِبُ الْجَزْمَانَ .
- ٢١ اللَّهُمَّ صَلِّ عَلَى مُحَمَّدٍ وَ آلِهِ، وَ كُنْ لِدُعَائِي مُجِيبًا، وَ مِنْ نِذَائِي قَرِيبًا، وَ لِتَضَرُّعِي رَاجِمًا، وَ لِصَوْتِي سَامِعًا.
- ٢٢ وَ لَا تَقْطَعْ رَجَائِي عَنْكَ، وَ لَا تَبْتِ سَبَبِي مِنْكَ، وَ لَا تُوجِّهْنِي فِي حَاجَتِي هَذِهِ وَ غَيْرَهَا إِلَى سِوَاكَ
- ٢٣ وَ تَوَلَّنِي بِنُجْحِ طَلِبَتِي وَ قَضَاءِ حَاجَتِي وَ نَيْلِ سُؤْلِي قَبْلَ رَوَالِي عَنْ مَوْفَاقِي هَذَا بِنَيْسِيرِكَ لِي الْعَسِيرِ وَ حُسْنِ تَقْدِيرِكَ لِي فِي جَمِيعِ الْأُمُورِ.
- ٢٤ وَ صَلِّ عَلَى مُحَمَّدٍ وَ آلِهِ ، صَلَاةً دَائِمَةً نَامِيَةً لَا انْقِطَاعَ لِأَبْدِهَا وَ لَا مُنْتَهَى لِأَمْدِهَا ، وَ اجْعَلْ ذَلِكَ عَوْنًا لِي وَ سَبَبًا لِنَجَاحِ طَلِبَتِي ، إِنَّكَ وَاسِعٌ كَرِيمٌ .
- ٢٥ وَ مِنْ حَاجَتِي يَا رَبِّ: كَذَا وَ كَذَا [وَ تَذَكُّرُ حَاجَتِكَ] ثُمَّ تَسْجُدُ وَ تَقُولُ فِي سُجُودِكَ: فَضْلُكَ آتَسْنِي ، وَ إِحْسَانُكَ دَلَّنِي ، فَاسْأَلُكَ بِكَ وَ بِمُحَمَّدٍ وَ آلِهِ ، صَلَوَاتِكَ عَلَيْهِمْ ، أَنْ لَا تَرُدَّنِي خَائِبًا .

Text Four (Şahîfa Text No.1):

- ١ الْحَمْدُ لِلَّهِ الْأَوَّلِ بِلَا أَوَّلٍ كَانَ قَبْلُهُ، وَ الْآخِرِ بِلَا آخِرٍ يَكُونُ بَعْدُهُ.
- ٢ الَّذِي قَصُرَتْ عَنْ رُؤْيِيهِ أَبْصَارُ النَّاطِرِينَ، وَ عَجَزَتْ عَنْ نَعْتِهِ أَوْهَامُ الْوَاصِفِينَ.
- ٣ ابْتَدَعَ بِقُدْرَتِهِ الْخَلْقَ ابْتِدَاعًا، وَ اخْتَرَعَ عَنْهُمْ عَلَى مَشِيئِهِ اخْتِرَاعًا.
- ٤ ثُمَّ سَلَكَ بِهِمْ طَرِيقَ إِزَادَتِهِ ، وَ بَعَثَهُمْ فِي سَبِيلِ مَحَبَّتِهِ ، لَا يَمْلِكُونَ تَأْخِيرًا عَمَّا قَدَّمَهُمْ إِلَيْهِ ، وَ لَا يَسْتَطِيعُونَ تَقْدِمًا إِلَى مَا آخَرَهُمْ عَنْهُ .
- ٥ وَ جَعَلَ لِكُلِّ رُوحٍ مِنْهُمْ قُوَّةً مَعْلُومًا مَقْسُومًا مِنْ رِزْقِهِ، لَا يَنْقُصُ مِنْ زَادِهِ نَاقِصٌ، وَ لَا يَزِيدُ مِنْ نَقْصٍ مِنْهُمْ زَائِدٌ.
- ٦ ثُمَّ ضَرَبَ لَهُ فِي الْحَيَاةِ أَجَلًا مَوْفُوتًا ، وَ نَصَبَ لَهُ أَمَدًا مَحْدُودًا ، يَتَخَطَّى إِلَيْهِ بِأَيَّامِ عُمْرِهِ ، وَ يَزْهُقُهُ بِأَعْوَامِ دَهْرِهِ ، حَتَّى إِذَا بَلَغَ أَقْصَى أَثَرِهِ ، وَ اسْتَوْعَبَ حِسَابَ عُمْرِهِ ، قَبِضَهُ إِلَى مَا نَدَبَهُ إِلَيْهِ مِنْ مَوْفُورِ ثَوَابِهِ ، أَوْ مَحْدُورِ عِقَابِهِ ، لِيَجْزِيَ الَّذِينَ أَسَاءُوا بِمَا عَمِلُوا وَ يَجْزِيَ الَّذِينَ أَحْسَنُوا بِالْحُسْنَى .
- ٧ عَدَلًا مِنْهُ، تَقَدَّسَتْ أَسْمَاؤُهُ، وَ تَظَاهَرَتْ آلَاؤُهُ، لَا يُسْأَلُ عَمَّا يَفْعَلُ وَ هُمْ يُسْأَلُونَ.
- ٨ وَ الْحَمْدُ لِلَّهِ الَّذِي لَوْ حَبَسَ عَنْ عِبَادِهِ مَعْرِفَةَ حَمْدِهِ عَلَى مَا أَبْلَاهُمْ مِنْ مَنَنِهِ الْمُتَتَابِعَةِ، وَ أَسْبَغَ عَلَيْهِمْ مِنْ نِعَمِهِ الْمُتَظَاهِرَةِ، لَتَصَرَّفُوا فِي مَنَنِهِ فَلَمْ يَحْمَدُوهُ، وَ تَوَسَّعُوا فِي رِزْقِهِ فَلَمْ يَشْكُرُوهُ
- ٩ وَ لَوْ كَانُوا كَذَلِكَ لَخَرَجُوا مِنْ حُدُودِ الْإِنْسَانِيَّةِ إِلَى حَدِّ الْبَهِيمِيَّةِ فَكَانُوا كَمَا وَصَفَ فِي مُحْكَمِ كِتَابِهِ : { إِنْ هُمْ إِلَّا كَالْأَنْعَامِ بَلْ هُمْ أَضَلُّ سَبِيلًا } .
- ١٠ وَ الْحَمْدُ لِلَّهِ عَلَى مَا عَرَفْنَا مِنْ نَفْسِهِ ، وَ أَلْهَمَنَا مِنْ شُكْرِهِ ، وَ فَتَحَ لَنَا مِنْ أَبْوَابِ الْعِلْمِ بِرُبُوبِيَّتِهِ ، وَ دَلَّنَا عَلَيْهِ مِنَ الْإِخْلَاصِ لَهُ فِي تَوْحِيدِهِ ، وَ جَنَّبَنَا مِنَ الْإِلْحَادِ وَ الشَّلَكِ فِي أَمْرِهِ .

- ١١ حَمْدًا نَعْمَرُ بِهِ فِيمَنْ حَمَدَهُ مِنْ خَلْقِهِ، وَ نَسْبِقُ بِهِ مَنْ سَبَقَ إِلَى رِضَاهُ وَ عَفْوِهِ.
- ١٢ حَمْدًا يُضِيءُ لَنَا بِهِ ظُلُمَاتِ الْبَرَزَخِ ، وَ يُسَهِّلُ عَلَيْنَا بِهِ سَبِيلَ الْمَبْعَثِ ، وَ يُشْرِفُ بِهِ مَنَازِلَنَا عِنْدَ مَوَاقِفِ الْأَشْهَادِ ، يَوْمَ تُجْزَى كُلُّ نَفْسٍ بِمَا كَسَبَتْ وَ هُمْ لَا يُظْلَمُونَ ، يَوْمَ لَا يُغْنِي مَوْلَى عَنْ مَوْلَى شَيْئاً وَ لَا هُمْ يُنصَرُونَ .
- ١٣ حَمْدًا يَرْتَفِعُ مِنَّا إِلَى أَعْلَى عِلِّيِّينَ فِي كِتَابِ مَرْفُوعٍ يَشْهَدُهُ الْمَقَرَّبُونَ .
- ١٤ حَمْدًا تَقَرُّ بِهِ عُيُونُنَا إِذَا بَرَقَتْ الْأَبْصَارُ ، وَ تَنِيضُ بِهِ وُجُوهُنَا إِذَا اسْوَدَّتِ الْأَبْشَارُ .
- ١٥ حَمْدًا نُعْتَقُ بِهِ مِنْ أَلِيمِ نَارِ اللَّهِ إِلَى كَرِيمِ جِوَارِ اللَّهِ.
- ١٦ حَمْدًا نُرَاحِمُ بِهِ مَلَائِكَتَهُ الْمُقَرَّبِينَ، وَ نُضَامُ بِهِ أَنْبِيََاءَهُ الْمُرْسَلِينَ فِي دَارِ الْمُقَامَةِ الَّتِي لَا تَزُولُ، وَ مَحَلِّ كَرَامَتِهِ الَّتِي لَا تَحُولُ.
- ١٧ وَ الْحَمْدُ لِلَّهِ الَّذِي اخْتَارَ لَنَا مَحَاسِنَ الْخَلْقِ، وَ أَجْرَى عَلَيْنَا طَيِّبَاتِ الرِّزْقِ.
- ١٨ وَ جَعَلَ لَنَا الْفَضِيلَةَ بِالْمَلَكَةِ عَلَى جَمِيعِ الْخَلْقِ، فَكُلُّ خَلِيقَتِهِ مُنْقَادَةٌ لَنَا بِقُدْرَتِهِ، وَ صَائِرَةٌ إِلَى طَاعَتِنَا بِعِزَّتِهِ.
- ١٩ وَ الْحَمْدُ لِلَّهِ الَّذِي أَغْلَقَ عَنَّا بَابَ الْحَاجَةِ إِلَّا إِلَيْهِ ، فَكَيْفَ نُطِيقُ حَمْدَهُ أَمْ مَتَى نُؤَدِّي شُكْرَهُ؟! لا ، مَتَى ؟
- ٢٠ وَ الْحَمْدُ لِلَّهِ الَّذِي رَكَّبَ فِيْنَا آلَاتِ الْبَسْطِ، وَ جَعَلَ لَنَا أَدَوَاتِ الْقَبْضِ، وَ مَنَعَنَا بِأَرْوَاحِ الْحَيَاةِ، وَ أَثْبَتَ فِيْنَا جَوَارِحَ الْأَعْمَالِ، وَ غَذَّانَا بِطَيِّبَاتِ الرِّزْقِ، وَ أَغْنَانَا بِفَضْلِهِ، وَ أَفْنَانَا بِمَمِّهِ.
- ٢١ ثُمَّ أَمَرْنَا لِيُخْتَبَرَ طَاعَتُنَا ، وَ نَهَانَا لِيُتَبَلَى شُكْرُنَا ، فَخَالَفْنَا عَنْ طَرِيقِ أَمْرِهِ ، وَ رَكِبْنَا مُتُونَ رَجْرِهِ ، فَلَمْ يَبْتَدِرْنَا بِعَفْوِيَّتِهِ ، وَ لَمْ يُعَاجِلْنَا بِنِقْمَتِهِ ، بَلْ تَأَنَّنَا بِرَحْمَتِهِ تَكْرُماً ، وَ انْتَظَرُ مُرَاجَعَتُنَا بِرَأْفَتِهِ جُلْماً .
- ٢٢ وَ الْحَمْدُ لِلَّهِ الَّذِي دَلَّنَا عَلَى التَّوْبَةِ الَّتِي لَمْ نُفْذِهَا إِلَّا مِنْ فَضْلِهِ ، فَلَوْ لَمْ نَعْتَدِدْ مِنْ فَضْلِهِ إِلَّا بِهَا لَقَدْ حَسَنَ بَلَاؤُهُ عِنْدَنَا ، وَ جَلَّ إِحْسَانُهُ إِلَيْنَا وَ جِسْمُ فَضْلُهُ عَلَيْنَا .
- ٢٣ فَمَا هَكَذَا كَانَتْ سُنَّتُهُ فِي التَّوْبَةِ لِمَنْ كَانَ قَبْلَنَا، لَقَدْ وَضَعَ عَنَّا مَا لَا طَاقَةَ لَنَا بِهِ، وَ لَمْ يُكَلِّفْنَا إِلَّا وُسْعاً، وَ لَمْ يُجَسِّمْنَا إِلَّا يَسْراً، وَ لَمْ يَدَعْ لِأَحَدٍ مِنَّا حُجَّةً وَ لَا عُذْراً
- ٢٤ قَالَهُالِكُ مِنَّا مَنْ هَلَكَ عَلَيْهِ، وَ السَّعِيدُ مِنَّا مَنْ رَغِبَ إِلَيْهِ.
- ٢٥ وَ الْحَمْدُ لِلَّهِ بِكُلِّ مَا حَمَدَهُ بِهِ أَدْنَى مَلَائِكَتِهِ إِلَيْهِ وَ أَكْرَمُ خَلِيقَتِهِ عَلَيْهِ وَ أَرْضَى حَامِدِيهِ لَدَيْهِ
- ٢٦ حَمْدًا يَفْضُلُ سَائِرَ الْحَمْدِ كَفَضْلِ رَبِّنَا عَلَى جَمِيعِ خَلْقِهِ.
- ٢٧ ثُمَّ لَهُ الْحَمْدُ مَكَانَ كُلِّ نِعْمَةٍ لَهُ عَلَيْنَا وَ عَلَى جَمِيعِ عِبَادِهِ الْمَاضِينَ وَ الْبَاقِينَ عَدَدَ مَا أَحَاطَ بِهِ عِلْمُهُ مِنْ جَمِيعِ الْأَشْيَاءِ ، وَ مَكَانَ كُلِّ وَاحِدَةٍ مِنْهَا عَدَدُهَا أَضْعَافاً مُضَاعَفَةً أَبَدًا سَرْمَدًا إِلَى يَوْمِ الْقِيَامَةِ .
- ٢٨ حَمْدًا لَا مُنْتَهَى لِحَدِّهِ، وَ لَا حِسَابَ لِعَدَدِهِ، وَ لَا مَبْلَغَ لِعَاجِبَتِهِ، وَ لَا انْقِطَاعَ لِأَمَدِهِ.
- ٢٩ حَمْدًا يَكُونُ وَصْلَةً إِلَى طَاعَتِهِ وَ عَفْوِهِ، وَ سَبَباً إِلَى رِضْوَانِهِ، وَ ذَرِيعَةً إِلَى مَغْفِرَتِهِ، وَ طَرِيقاً إِلَى جَنَّتِهِ، وَ خَفِيرًا مِنْ نِقْمَتِهِ، وَ أَمْنًا مِنْ غَضَبِهِ، وَ ظَهيراً عَلَى طَاعَتِهِ، وَ حَاجِزاً عَنْ مَعْصِيَتِهِ، وَ عَوْنًا عَلَى تَأْدِيَةِ حَقِّهِ وَ وَطَافِهِ.
- ٣٠ حَمْدًا نَسْعُدُ بِهِ فِي السُّعْدَاءِ مِنْ أَوْلِيَائِهِ ، وَ نَصِيرُ بِهِ فِي نَظْمِ الشُّهَدَاءِ بِسُيُوفِ أَعْدَائِهِ ، إِنَّهُ وَلِيُّ حَمِيدٍ .

Text Five (Ṣaḥīfa Text No.37):

- ١ اللَّهُمَّ إِنَّ أَحَدًا لَا يَبْلُغُ مِنْ شُكْرِكَ غَايَةَ إِلَّا حَصَلَ عَلَيْهِ مِنْ إِحْسَانِكَ مَا يُلْزِمُهُ شُكْرًا.
- ٢ وَلَا يَبْلُغُ مَبْلَغًا مِنْ طَاعَتِكَ وَإِنْ اجْتَهَدَ إِلَّا كَانَ مُقْصِرًا دُونَ اسْتِحْقَاقِكَ بِفَضْلِكَ
- ٣ فَأَشْكُرُ عِبَادَكَ عَاجِزٌ عَنْ شُكْرِكَ، وَأَعْبُدُهُمْ مُقْصِرٌ عَنْ طَاعَتِكَ.
- ٤ لَا يَجِبُ لِأَحَدٍ أَنْ تَغْفِرَ لَهُ بِاسْتِحْقَاقِهِ، وَلَا أَنْ تَرْضَى عَنْهُ بِاسْتِجَابِهِ.
- ٥ فَمَنْ غَفَرْتَ لَهُ فِطْرَتَكَ، وَمَنْ رَضِيتَ عَنْهُ فَبِغْضِكَ.
- ٦ تَشْكُرُ يَسِيرَ مَا شَكَرْتَهُ، وَتُثِيبُ عَلَى قَلِيلٍ مَا تُطَاعُ فِيهِ. حَتَّى كَأَنَّ شُكْرَ عِبَادِكَ الَّذِي أُوجِبَتْ عَلَيْهِ ثَوَابُهُمْ وَأَعْظَمْتَ عَنْهُ جَزَاءَهُمْ أَمْرٌ مَلَكُوا اسْتِطَاعَةَ الْإِمْتِنَاعِ مِنْهُ دُونَكَ فَكَافَيْتَهُمْ، أَوْ لَمْ يَكُنْ سَبَبُهُ بِيَدِكَ فَجَارَيْتَهُمْ.
- ٧ بَلْ مَلَكْتَ يَا إِلَهِي أَمْرَهُمْ قَبْلَ أَنْ يَمْلِكُوا عِبَادَتَكَ، وَأَعَدَدْتَ ثَوَابَهُمْ قَبْلَ أَنْ يُفِيضُوا فِي طَاعَتِكَ، وَذَلِكَ أَنَّ سُنَّتَكَ الْإِفْضَالَ، وَعَادَتَكَ الْإِحْسَانَ، وَسَبِيلَكَ الْعَفْوَ.
- ٨ فَكُلُّ الْبَرِيَّةِ مُعْتَرِفَةٌ بِأَنَّكَ غَيْرُ ظَالِمٍ لِمَنْ عَاقَبْتَ، وَشَاهِدَةٌ بِأَنَّكَ مُتَفَضِّلٌ عَلَى مَنْ عَاقَبْتَ، وَكُلُّ مُؤَرٍّ عَلَى نَفْسِهِ بِالتَّقْصِيرِ عَمَّا اسْتَوْجِبْتَ.
- ٩ فَلَوْ لَا أَنَّ الشَّيْطَانَ يَخْتَدِعُهُمْ عَنْ طَاعَتِكَ مَا عَصَاكَ عَاصٍ، وَلَوْ لَا أَنَّهُ صَوَّرَ لَهُمُ الْبَاطِلَ فِي مِثَالِ الْحَقِّ مَا ضَلَّ عَنْ طَرِيقِكَ ضَالٌّ.
- ١٠ فَسُبْحَانَكَ مَا أَبَيَّنَ كَرَمَكَ فِي مُعَامَلَةٍ مِنْ أَطَاعَكَ أَوْ عَصَاكَ. تَشْكُرُ لِلْمُطِيعِ مَا أَنْتَ تَوَلَّيْتَهُ لَهُ، وَتُثْلِي لِلْعَاصِي فِيمَا تَمَلَّكَ مُعَاجَلَتُهُ فِيهِ.
- ١١ أُعْطِيتَ كُلًّا مِنْهُمَا مَا لَمْ يَجِبْ لَهُ، وَتَفَضَّلْتَ عَلَى كُلِّ مِنْهُمَا بِمَا يَقْصُرُ عَمَلُهُ عَنْهُ.
- ١٢ وَلَوْ كَافَأَتِ الْمُطِيعَ عَلَى مَا أَنْتَ تَوَلَّيْتَهُ لَأَوْشَكَ أَنْ يَفْقَدَ ثَوَابَكَ، وَأَنْ تُرْوَلَ عَنْهُ نِعْمَتُكَ، وَكَأَنَّكَ بِكَرَمِكَ جَارَيْتَهُ عَلَى الْمُدَّةِ الْقَصِيرَةِ الْفَائِئَةِ بِالْمُدَّةِ الطَّوِيلَةِ الْخَالِدَةِ، وَ عَلَى الْغَايَةِ الْقَرِيبَةِ الرَّائِلَةِ بِالْغَايَةِ الْمَدِيدَةِ الْبَاقِيَةِ.
- ١٣ ثُمَّ لَمْ تَسْمُهُ الْقِصَاصَ فِيمَا أَكَلَ مِنْ رِزْقِكَ الَّذِي يَقْوَى بِهِ عَلَى طَاعَتِكَ، وَلَمْ تَحْمِلْهُ عَلَى الْمُنَاقَشَاتِ فِي الْأَلَاتِ الَّتِي تَسَبَّبَ بِاسْتِعْمَالِهَا إِلَى مَغْفِرَتِكَ، وَلَوْ فَعَلْتَ ذَلِكَ بِهِ لَذَهَبَ بِجَمِيعِ مَا كَدَحَ لَهُ وَجُمْلَةُ مَا سَعَى فِيهِ. جَزَاءٌ لِلصُّغْرَى مِنْ أَيْادِيكَ وَ مِنْكَ، وَ لَبَقِيَ رَهِينًا بَيْنَ يَدَيْكَ بِسَائِرِ نِعَمِكَ، فَمَتَى كَانَ يَسْتَحِقُّ شَيْئًا مِنْ ثَوَابِكَ؟! لَا! مَتَى؟!!
- ١٤ هَذَا يَا إِلَهِي حَالُ مَنْ أَطَاعَكَ، وَ سَبِيلُ مَنْ تَعَبَّدَ لَكَ، فَأَمَّا الْعَاصِي أَمْرَكَ وَ الْمَوَاقِعَ نَهَيْكَ فَلَمْ تُعَاجِلْهُ بِنِقْمَتِكَ لِكَيْ يَسْتَبْدِلَ بِحَالِهِ فِي مَعْصِيَتِكَ حَالِ الْإِنَابَةِ إِلَى طَاعَتِكَ، وَ لَقَدْ كَانَ يَسْتَحِقُّ فِي أَوَّلِ مَا هَمَّ بِعِصْيَانِكَ كُلَّ مَا أَعَدَدْتَ لِجَمِيعِ خَلْقِكَ مِنْ غُفُوتِكَ.
- ١٥ فَجَمِيعُ مَا أَحْرَتْ عَنْهُ مِنَ الْعَذَابِ وَ أَبْطَأَتْ بِهِ عَلَيْهِ مِنْ سَطَوَاتِ النِّقْمَةِ وَ الْعِقَابِ تَرَكَ مِنْ حَقِّكَ، وَ رَضَى بِدُونِ وَاجِبِكَ.
- ١٦ فَمَنْ أَكْرَمَ يَا إِلَهِي مِنْكَ، وَ مَنْ أَشَقَى مِمَّنْ هَلَكَ عَلَيْكَ؟! لَا! مَنْ؟ فَتَبَارَكْتَ أَنْ تُوصَفَ إِلَّا بِالْإِحْسَانِ، وَ كَرُمْتَ أَنْ يُخَافَ مِنْكَ إِلَّا الْعَدْلُ، لَا يُخْشَى جُورُكَ عَلَى مَنْ عَصَاكَ، وَ لَا يُخَافُ إِغْفَالُكَ ثَوَابَ مَنْ أَرْضَاكَ، فَصَلِّ عَلَى مُحَمَّدٍ وَ آلِهِ، وَ هَبْ لِي أَمْلِي، وَ زِدْنِي مِنْ هَذَاكَ مَا أَصِلُ بِهِ إِلَى التَّوْفِيقِ فِي عَمَلِي، إِنَّكَ مَنَّانٌ كَرِيمٌ.

Text Six (Ṣaḥīfa Text No.51):

^١ إِلَهِي أَحْمَدُكَ وَ أَنْتَ لِلْحَمْدِ أَهْلٌ. عَلَى حُسْنِ صَنِيعِكَ إِلَيَّ ، وَ سُبُوغِ نِعْمَاتِكَ عَلَيَّ ، وَ جَزِيلِ عَطَائِكَ عِنْدِي ، وَ عَلَى مَا فَضَّلْتَنِي بِهِ مِنْ رَحْمَتِكَ ، وَ أَسْبَغْتَ عَلَيَّ مِنْ نِعْمَتِكَ ، فَقَدْ اصْطَلَعْتَ عِنْدِي مَا يَعْجُزُ عَنْهُ شُكْرِي .

^٢ وَ لَوْ لَا إِحْسَانُكَ إِلَيَّ وَ سُبُوغُ نِعْمَاتِكَ عَلَيَّ. مَا بَلَغْتُ إِخْرَارَ حَظِّي ، وَ لَا إِصْلَاحَ نَفْسِي ، وَ لَكِنَّكَ ابْتَدَأْتَنِي بِالْإِحْسَانِ ، وَ رَزَقْتَنِي فِي أُمُورِي كُلِّهَا الْكَفَايَةَ ، وَ صَرَفْتَ عَنِّي جَهْدَ الْبَلَاءِ ، وَ مَنَعْتَ مِنِّي مَحْدُورَ الْقَضَاءِ .

^٣ إِلَهِي فَكَمْ مِنْ بَلَاءٍ جَاهِدَ قَدْ صَرَفْتَ عَنِّي ، وَ كَمْ مِنْ نِعْمَةٍ سَابَغَةً أَفْرَرْتُ بِهَا عَيْنِي ، وَ كَمْ مِنْ صَنِيعَةٍ كَرِيمَةٍ لَكَ عِنْدِي !!

^٤ أَنْتَ الَّذِي أَجَبْتَ عِنْدَ الْاضْطِرَارِ دَعْوَتِي ، وَ أَقَلْتَ عِنْدَ الْعِثَارِ زَلَّتِي ، وَ أَخَذْتَ لِي مِنَ الْأَعْدَاءِ بِظِلَامَتِي .

^٥ إِلَهِي مَا وَجَدْتُكَ بِخِيَلٍ جِئَ سَأَلْتُكَ ، وَ لَا مُنْقِبُضاً جِئَ أَرَدْتُكَ ، بَلْ وَجَدْتُكَ لِدُعَائِي سَامِعاً ، وَ لِمَطَالِبِي مُعْطِياً ، وَ وَجَدْتُ نِعْمَاتِكَ عَلَيَّ سَابِغَةً فِي كُلِّ شَأْنٍ مِنْ شَأْنِي وَ كُلِّ زَمَانٍ مِنْ زَمَانِي، فَأَنْتَ عِنْدِي مَحْمُودٌ، وَ صَنِيعُكَ لَدَيَّ مَبْرُورٌ.

^٦ تَحْمَدُكَ نَفْسِي وَ لِسَانِي وَ عَقْلِي، حَمْدًا يَبْلُغُ الْوَفَاءَ وَ حَقِيقَةَ الشُّكْرِ، حَمْدًا يَكُونُ مَبْلَغَ رِضَاكَ عَنِّي، فَتَجَنِّي مِنْ سُخْطِكَ.

^٧ يَا كَهْفِي جِئَ تُعِينِي الْمَذَاهِبُ وَ يَا مُقِيلِي عَثْرَتِي ، فَلَوْ لَا سَتْرُكَ عَوْرَتِي لَكُنْتُ مِنَ الْمَفْضُوحِينَ ، وَ يَا مُؤَيِّدِي بِالْأَنْصَرِ ، فَلَوْ لَا نَصْرُكَ إِيَّاي لَكُنْتُ مِنَ الْمَغْلُوبِينَ ، وَ يَا مَنْ وَضَعْتَ لَهُ الْمُلُوكُ نِيرَ الْمَذَلَّةِ عَلَى أَعْنَاقِهَا ، فَهُمْ مِنْ سَطَوَاتِهِ خَائِفُونَ ، وَ يَا أَهْلَ التَّقْوَى ، وَ يَا مَنْ لَهُ الْأَسْمَاءُ الْحُسْنَى ، أَسْأَلُكَ أَنْ تَغْفِرَ عَنِّي ، وَ تَغْفِرَ لِي. فَلَسْتُ بِرَبِيئاً فَاعْتَذِرْ ، وَ لَا بِذِي قُوَّةٍ فَانْتَصِرْ ، وَ لَا مَفَرَّ لِي فَأَوِّرْ .

^٨ وَ أَسْتَغِيثُكَ عَثْرَاتِي ، وَ أَتَنَصَّلُ إِلَيْكَ مِنْ ذُنُوبِي الَّتِي قَدْ أُوْبَقْتَنِي ، وَ أَحَاطْتُ بِهَا فَاهْلَكْتَنِي ، مِنْهَا فَرَزْتُ إِلَيْكَ رَبِّ تَائِباً قَتَبٌ عَلَيَّ ، مُتَعَوِّذاً فَأَعْدِنِي ، مُسْتَجِيراً فَلَا تَخْذَلْنِي ، سَائِلاً فَلَا تَحْرِمْنِي. مُعْتَصِماً فَلَا تُسْلِمْنِي ، دَاعِياً فَلَا تَرُدَّنِي خَائِباً .

^٩ دَعْوَتُكَ يَا رَبِّ مُسْكِيناً، مُسْتَكِيناً، مُشْفِئاً، خَائِفاً، وَجِلاً، فَقِيراً، مُضْطَرّاً إِلَيْكَ.

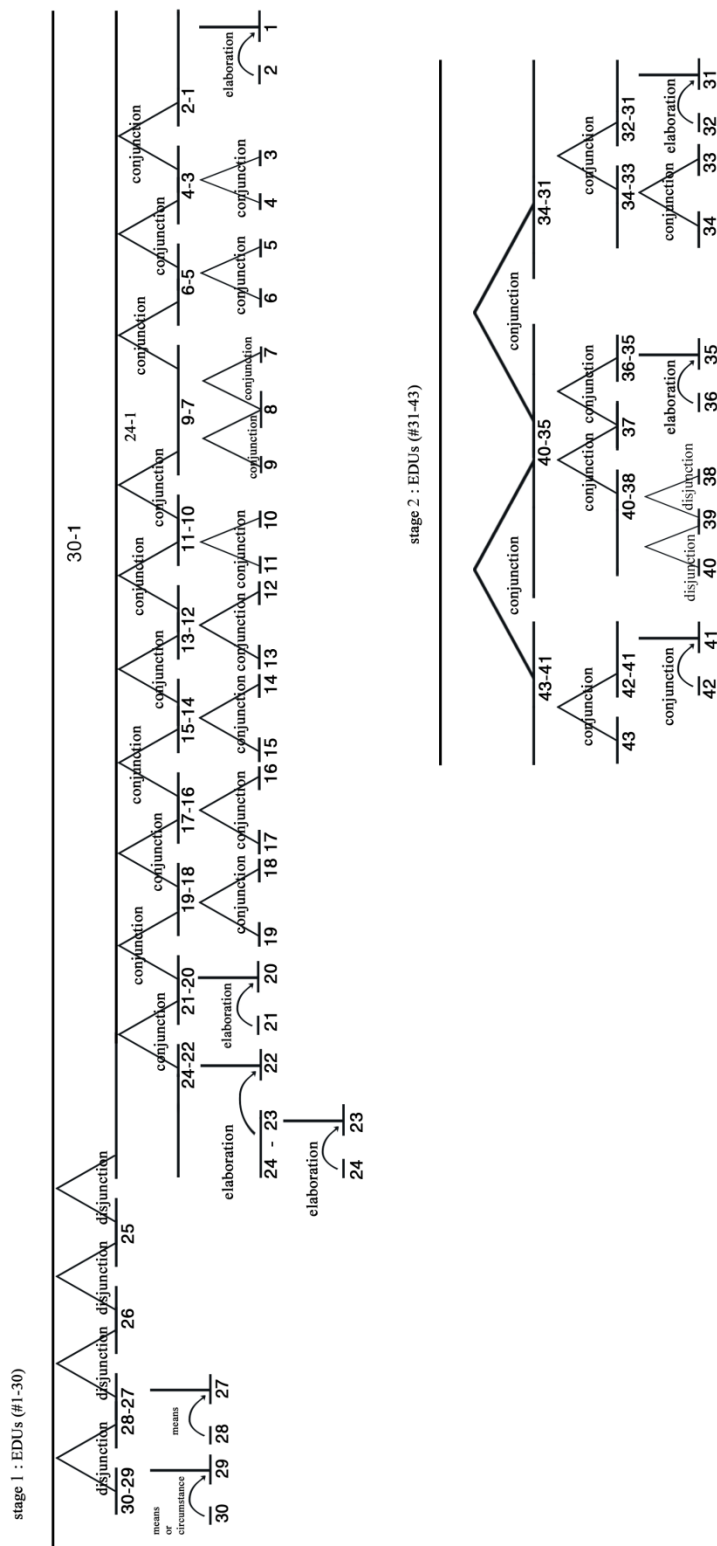

^{١٠} أَشْكُو إِلَيْكَ يَا إِلَهِي ضَعْفَ نَفْسِي عَنِ الْمُسَارَعَةِ فِيمَا وَعَدْتَهُ أَوْلِيَاءُكَ ، وَ الْمَجَانِبَةَ عَمَّا حَذَرْتَهُ أَعْدَاءُكَ ، وَ كَثْرَةَ هُمُومِي ، وَ وَسْوَسةَ نَفْسِي .

^{١١} إِلَهِي لَمْ تَفْضَحْنِي بِسِرِّيرَتِي ، وَ لَمْ تُهْلِكْنِي بِجَرِيرَتِي ، أَدْعُوكَ فَتُجِيبْنِي. وَ إِنْ كُنْتُ بِطِيناً جِئَ تَدْعُونِي ، وَ أَسْأَلُكَ كُلَّمَا شِئْتُ مِنْ حَوَائِجِي ، وَ حَيْثُ مَا كُنْتُ وَضَعْتُ عِنْدَكَ سِرِّي ، فَلَا أَدْعُو سِوَاكَ ، وَ لَا أَرْجُو غَيْرَكَ .

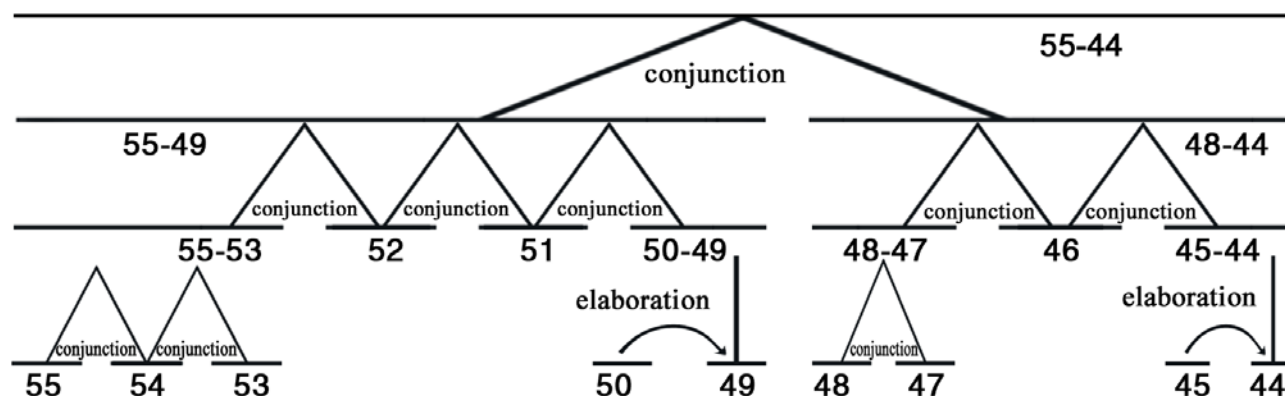

^{١٢} لَبَّيْكَ لَبَّيْكَ، تَسْمَعُ مِنْ شَكَا إِلَيْكَ، وَ تُلْقِي مِنْ تَوَكَّلَ عَلَيْكَ، وَ تُخْلِصُ مِنِّي اعْتَصَمَ بِكَ، وَ تُفَرِّجُ عَمَّنْ لَدَاكَ.

^{١٣} إِلَهِي فَلَا تَحْرِمْنِي خَيْرَ الْآخِرَةِ وَ الْأُولَى لِقَلَّةِ شُكْرِي، وَ اغْفِرْ لِي مَا تَعْلَمُ مِنْ ذُنُوبِي.

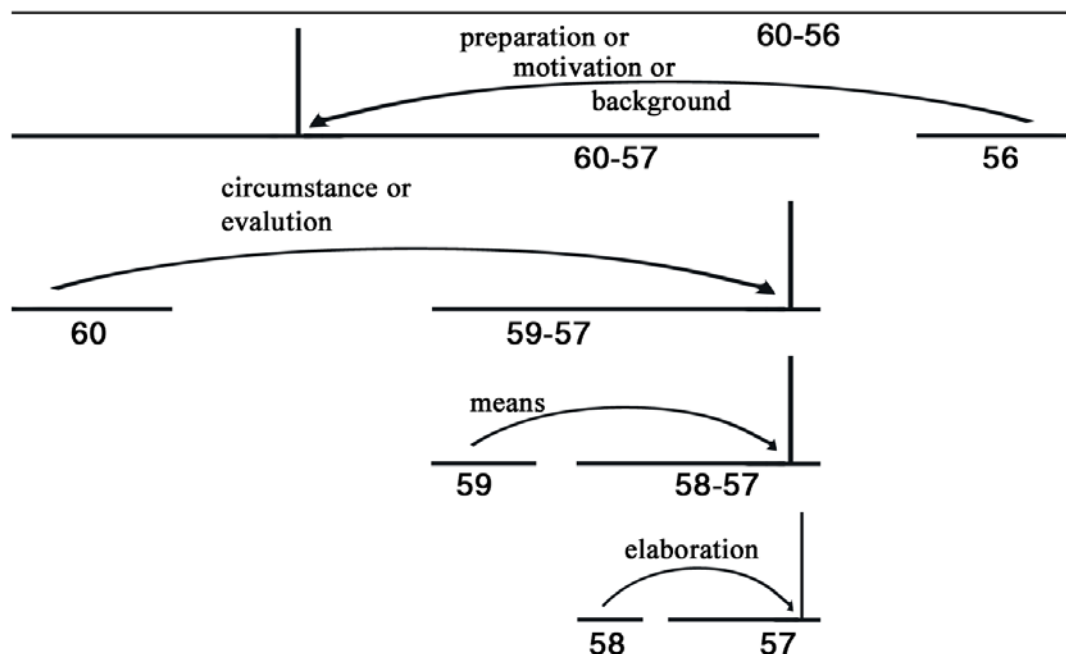

^{١٤} إِنْ تُعَذِّبْ فَأَنَا الظَّالِمُ الْمَفْرَطُ الْمُضْيَعُ الْإِثْمُ الْمُقَصِّرُ الْمُضْجِعُ الْمُغْفِلُ حَظَّ نَفْسِي، وَ إِنْ تَغْفِرْ فَأَنْتَ أَرْحَمُ الرَّاحِمِينَ.

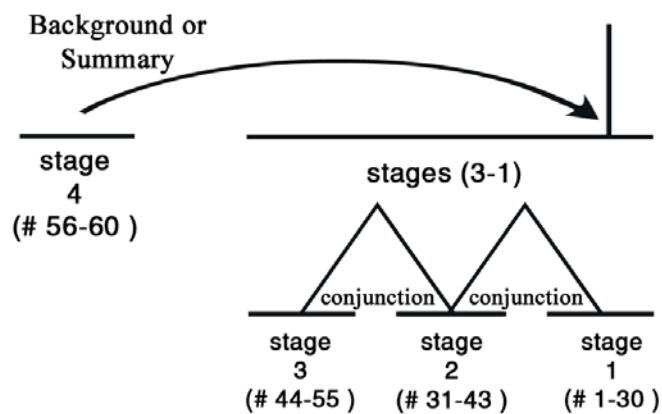

stage 3 : EDUs (#44-55)

stage 4 : EDUs (#56-60)

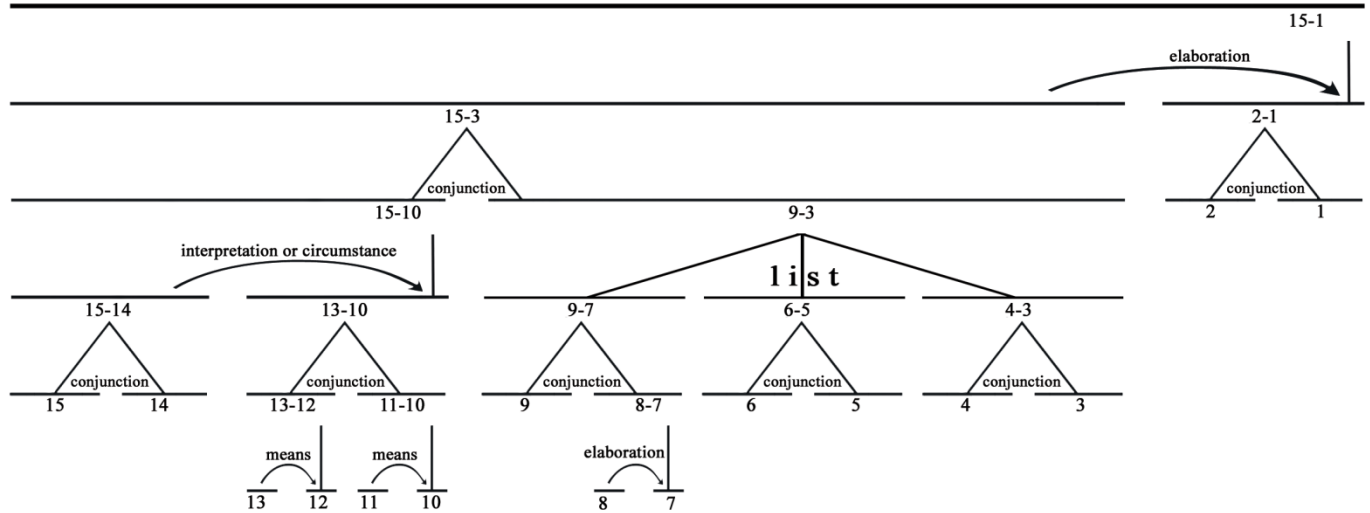

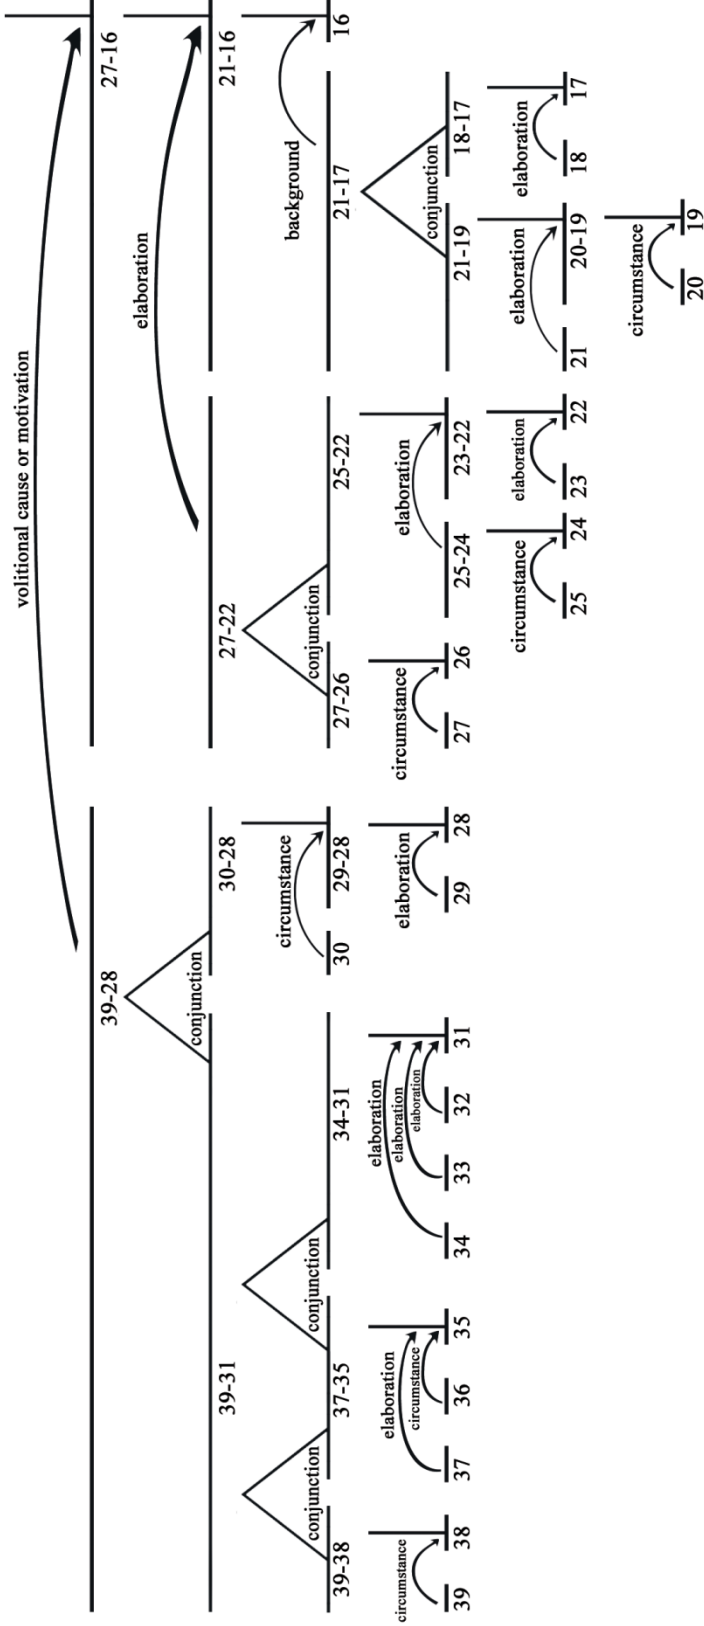

the genecic stages , the Rhe Rs holding between them , and ther Es can be linked together to result in the representation below :

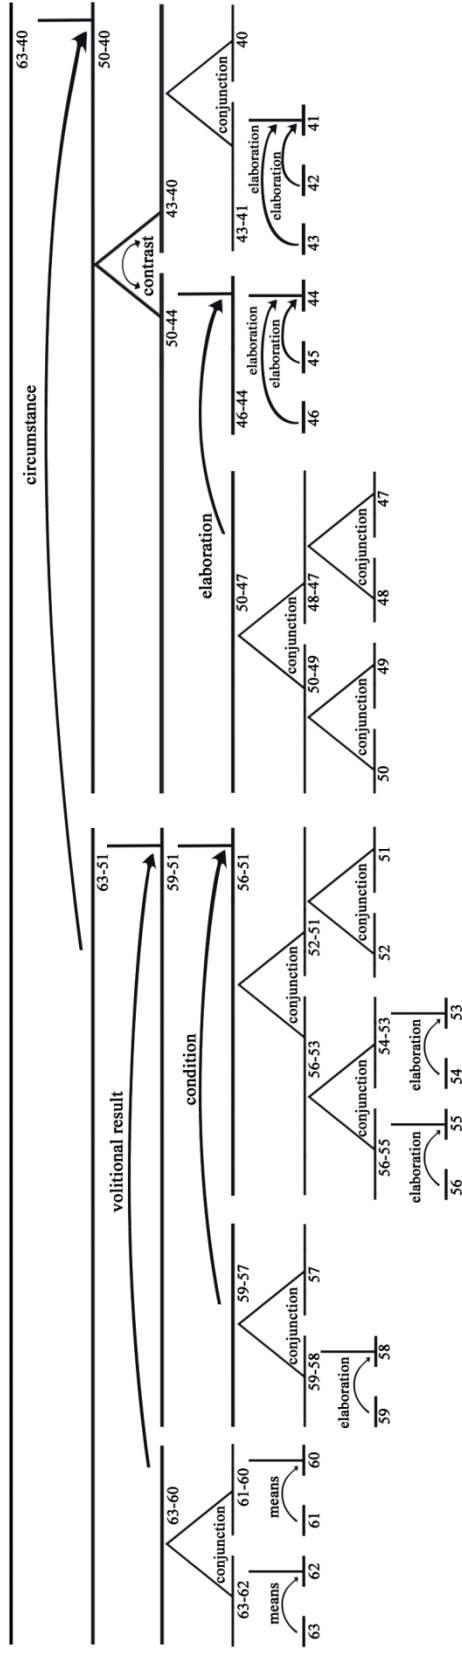

The RST graphical representation of the discourse structure of Text Two (Şahīfa Text No.12) would be as follows:

stage 1 : EDUs (#1-15)

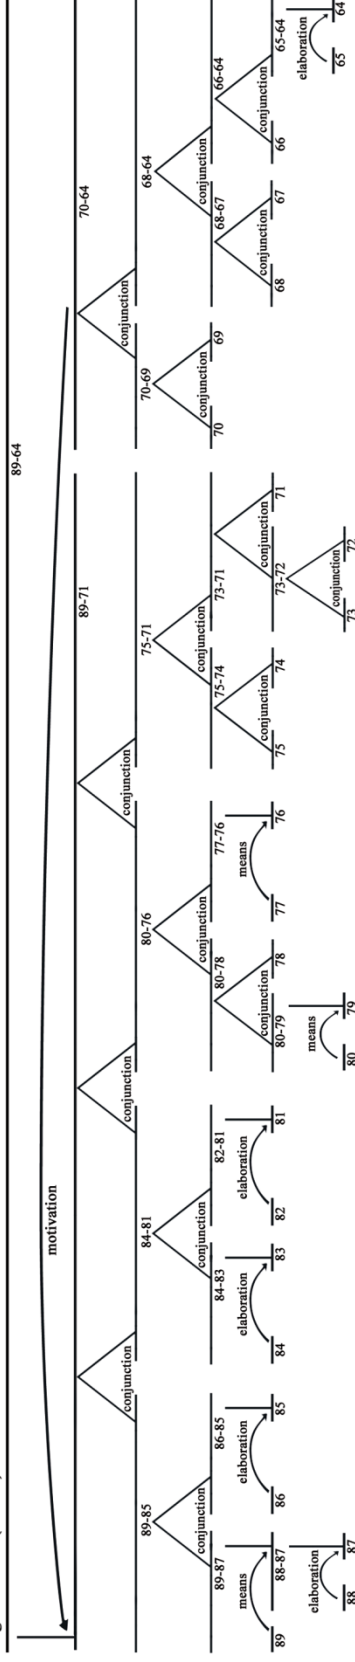

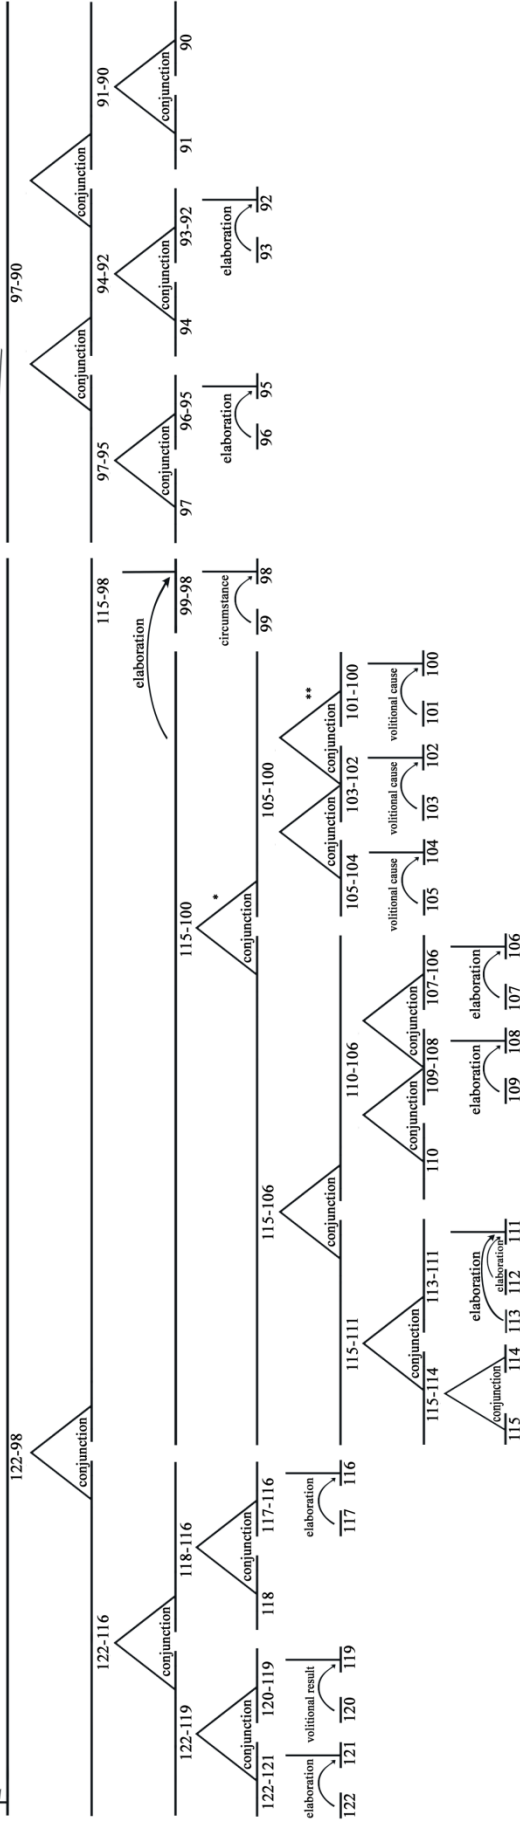

stage 3 : EDUs (#40-63)

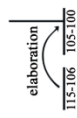

stage 4 : EDUs (#64-89)

المُلَخَّص

ينبع تميز النص الديني من ممارسات نصية و اجتماعية, بخلفية دينية, تُنتج تفاعلا بين المتخاطبين و مختلف الخبرات بهدف الإجابة عن أسئلة هامة من قبيل: ما الذي نستخدمه في التخاطب والتفاعل مع كُلماء مستترين؟ كيف لنا أن نتخاطب و نتفاعل معهم؟ ما الوسائل التي يجب ان نستخدمها لتحقيق ذلك؟ كيف نجعلهم يستجيبون لنا؟ كيف نصفهم أو نخبر عنهم؟ و عند الاجابة عن هذه الاسئلة, يتحتم على تلك الممارسات الدينية أن تنتقي من بين مجمل خيارات لغوية أو قد تلجأ الى تعليق أو تغيير بعض المظاهر السائدة في الكلام أو الكتابة. و قد يدفع التخاطب و التفاعل مع الكُلماء المستترين الى تبيان المتخاطبين و تبيان طبيعة و غرض الكلام.

تستفيد دراسة النصوص الدينية من التقدم في نظريات وأنشطة علم اللغة ومثال ذلك واضح في تحليل التنظيم البلاغي لهذه النصوص كما في الدراسة الحالية و التي هي تحليل بلاغي للخطاب في مجموعة نصوص دينية منتقاة من ثقافتين مختلفتين: ثقافة أهل الكتاب , ممثلة بسفر المزامير, و ثقافة الاسلام, ممثلة بالصحيفة السجادية. تتناول الدراسة بتعمق و تفصيل بلاغة النص الديني بصيغة الاستحسان و المقبولية الوظيفية من طريق التعالق بين التركيبية الكلية لجنس النص و التراكيب اللغوية و العمل تحت نظرية بلاغية خطابية تسمى (نظرية البنية البلاغية). و من منطلق أدق , تهدف الدراسة الى تحليل مجموعة من النصوص الدينية الطويلة , و تفحص تركيبية جنس النص, و تقصي العلاقات الجُمليّة و بين - الجُمليّة و تظهرهما, و تحديد أنماط و هرميّة العلاقات البلاغية, و الكشف عن ربط هذه العلاقات البلاغية مع بعضها البعض و أدوات هذا الربط.

وتأسيسا على ما سبق, فللدراسة خمس فرضيات: ١. تبني الاطار المكوّن من (تركيبية جنس النص) و (التراكيب اللغوية) مفيد و عملي جدا في تحليل النصوص الدينية الطويلة, ٢. لا تتطابق التركيبات الافتراضية العامة لجنس النصوص المنتقاة مع التماثل الحقيقي الفعلي و عن مكوّن التركيبية الكامن, ٣. تنماز العلاقات الجُمليّة وتظهرها عن العلاقات بين - الجُمليّة وتظهرها, ٤. جُلّ الاهتمام مُوجّه الى العلاقات البلاغية الدلالية لا العلاقات البلاغية التداولية, ٥. تهيم على النصوص المنتقاة كثرة تكتيف المعلومات (أي, التكتيف الدلالي), و مبدأ البروز الأقل, و لزوم واضح بيّن لعطف التبعية, و لذا فهي شديدة المراس. شملت عينة الدراسة إثنا عشر نصاً من جنسين متممين لبعضهما: حمد بتوسل و التماس (التفجع) و حمد تصريح (الشكر و الثناء), طُرحت للبحث والتحليل في ضوء اطار مكون من (تركيبية جنس النص) لحسن (١٩٨٩) و (التراكيب اللغوية) لجلنج (٢٠١٣).

ومن نتائج الدراسة: ١. نجاح الاطار المقترح في تحليل النصوص الدينية الطويلة, ٢. لا تتطابق التركيبات الافتراضية العامة مع بعضها البعض خاصة فيما يتعلق بمكوناتها و إمكانية وجودها من عدمه, و لا تتطابق أيضا مع التماثل الحقيقي الفعلي وعن مكوّن التركيبية الكامن , ٣. إنمازت, و بكثرة طاغية, العلاقات الجُمليّة بنوعها (التبعية و النسقية) و تظهرها عن العلاقات بين - الجُمليّة الاخرى, ٤. سادت العلاقات البلاغية الدلالية في جميع النصوص على نحو الاستحسان والمقبولية الوظيفية, ٥. لم تكن النصوص صعبة المراس, رغم تكتيف المعلومات و أطراد مبدأ البروز الاقل و لزوم التبعية. توصلت الدراسة الى بعض النتائج التي تخص

النصوص المدروسة. و اختُتِمت الدراسة ببعض التوصيات العلمية و بعض المقترحات لبحوث مستقبلية.
